PROCEEDINGS OF THE
AMERICAN MATHEMATICAL SOCIETY

EDITED BY
William Adams
J. Marshall Ash
Andreas R. Blass
Thomas H. Brylawski
Dennis Burke
Frederick R. Cohen
John B. Conway
William J. Davis, Managing Editor
Barbara L. Keyfitz
Irwin Kra
R. Daniel Mauldin
Kenneth R. Meyer
Paul S. Muhly
Andrew Odlyzko
George C. Papanicolaou
Donald Passman
Louis J. Ratliff, Jr.
Jonathan M. Rosenberg
William D. Sudderth
James E. West
Warren J. Wong

PROVIDENCE, RHODE ISLAND USA
ISSN 0002-9939
Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

Editorial Policy

To be published in the Proceedings, a paper must be correct, new, nontrivial and significant. Further, it must be well written and of interest to a substantial number of mathematicians. Piecemeal results, such as an inconclusive step toward an unproved major theorem or a minor variation on a known result, are in general not acceptable for publication. Proceedings Editors shall solicit, and encourage publication of, worthy papers of length not exceeding 15 typed pages.

Very short notes not to exceed two printed pages are also accepted, and appear under the heading SHORTER NOTES. Items deemed suitable include an elegant new proof of an important and well-known theorem, an illuminating example or counterexample, or a new viewpoint on familiar results. New results, if of a brief and striking character, might also be acceptable, though in general a paper which is merely very short will not be suitable for the SHORTER NOTES department.

On January 23, 1979, the Council of the American Mathematical Society abolished blind refereeing as a policy for the Proceedings, but decided that any author who so requests and who provides a blind copy of a manuscript will have the manuscript refereed blind.

Two copies of a manuscript should be submitted. If blind refereeing is intended, one should be complete and one blind, and then the latter will be sent to the referee without disclosure of the author’s name or institution.

SUBSCRIPTION INFORMATION. PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published monthly. Subscription prices for Volumes 102–104 (1988) are $401 list; $321 institutional member; $241 individual member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of $25: subscribers in India must pay a postage surcharge of $38. Expedited delivery to destinations in North America—$30; elsewhere—$40. Combination paper and microfiche subscription prices are $533 list; $426 institutional member. Microfiche of each issue will be mailed the fastest way possible before the camera copy is sent to the printer. Microfilm subscriptions may be purchased from University Microfilms International, 300 North Zeeb Road, Ann Arbor, Michigan 48106.

BACK NUMBER INFORMATION. Back number prices per volume are for Volumes 1–89, $113 list, $90 institutional; for Volumes 90–92, $129 list, $103 institutional member; for Volumes 93–95, $173 list, $138 institutional member; for Volumes 96–98, $191 list, $153 institutional members; for Volumes 99–101, $202 list, $162 institutional member.

Subscriptions and orders for publications of the American Mathematical Society should be addressed to American Mathematical Society, P. O. Box 1571, Annex Station, Providence, R. I. 02901-9930. All orders must be accompanied by payment. Other correspondence should be addressed to P. O. Box 6248, Providence, R. I. 02940.

PROCEEDINGS of the American Mathematical Society is published monthly by the American Mathematical Society at 201 Charles Street, Providence, R. I. 02904. Second-class postage is paid at Providence, Rhode Island. Postmaster: Send address changes to PROCEEDINGS, American Mathematical Society, P. O. Box 6248, Providence, R. I. 02940.

Information on Copying and Reprinting can be found at the back of this journal.

The paper used in this journal is acid-free and falls within the guidelines established to ensure permanence and durability.
Manuscript Information

1. Articles submitted for publication should be typewritten, double spaced, and no more than 15 ($8\frac{1}{2}" \times 11")$ pages long. The Manual for Authors, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand drawn symbols are satisfactory, if clearly done; directions to the printer should be included where necessary on a separate sheet. Authors must keep complete copies of their manuscripts, and editors will acknowledge receipt. To encourage the submission of manuscripts in electronic form using \TeX{} and the \LaTeX{} macro package, the Executive Committee of the Council has adopted a policy that allows for accelerating the publication date of such manuscripts by as much as 20 weeks, which is approximately equal to the time normally needed by the Society for copyediting, typesetting, and proofreading an average manuscript.

2. The first page should consist of a descriptive title, followed by an abstract which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The descriptive title should be short, but informative; useless or vague phrases such as “some remarks about” or “concerning” should be avoided. The abstract should be at least one complete sentence, and at most 150 words. Included with the footnotes to the paper, but placed before the first footnote, there should be first the 1980 Mathematics Subject Classification (1985 Revision) representing the primary and secondary subjects of the article. This may be followed by a list of key words and phrases describing the subject matter of the article and taken from it. A list of the numbers may be found in the annual subject index of Mathematical Reviews, published with the December issue starting in 1984.

3. A Copyright Transfer Agreement is required before a paper will be published in the Proceedings. A copy of the form is sent with the acknowledgement of receipt of manuscript from the Providence office of the Society. Authors are urged to return the forms immediately to prevent delays in processing and publishing of the manuscript.

OFFPRINTS AND ADDRESS CHANGES. Any inquiries concerning a paper which has been accepted for publication, including information regarding offprints or changes of address for mailing proof, should be sent directly to the Editorial Department, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

GALLEY PROOF. When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate on the original manuscript which of them should receive galley proof in the event that the manuscript is accepted for publication.

BACKLOG. 150 pages. Papers currently being accepted by the editors will be published in 12–14 months.

COPYING AND REPRINTING. Individual readers of this publication, and nonprofit libraries acting for them are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given. Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.
Submission of Manuscript

Send papers directly to one of the editors listed under the subject field of the paper. The numbers in parentheses are the first two digits of major classification from the 1980 Mathematics Subject Classification (1985 Revision) and describe the fields being handled by the editor.

LOGIC AND FOUNDATIONS (03 04)
   Andreas R. Blass, Department of Mathematics, University of Michigan, Ann Arbor, Michigan 48109-1003

COMBINATORICS AND DISCRETE MATHEMATICS (05 15)
   Thomas H. Brylawski, Department of Mathematics, University of North Carolina, Chapel Hill, North Carolina 27514

COMBINATORICS, COMPUTER SCIENCE AND INFORMATION THEORY (05 68 94)
   Andrew Odlyzko, Room 2C-370, Bell Laboratories, Murray Hill, New Jersey 07974

COMMUTATIVE ALGEBRA (06 12 13 14 15 18)
   Louis J. Ratliff, Jr., Department of Mathematics, University of California, Riverside, California 92502

GENERAL ALGEBRA (16 17 18 08)
   Donald Passman, Department of Mathematics, University of Wisconsin, Madison, Wisconsin 53706

GROUP THEORY (20)
   Warren J. Wong, Department of Mathematics, University of Notre Dame, Notre Dame, Indiana 46556

ALGEBRAIC AND DIFFERENTIAL TOPOLOGY (55 57 58)
   Frederick R. Cohen, Department of Mathematics, University of Kentucky, Lexington, Kentucky 40506

REAL VARIABLES (26 28 40)
   R. Daniel Mauldin, Department of Mathematics, North Texas State University, Denton, Texas 76203

COMPLEX VARIABLES (30 31 32)
   Irwin Kra, Department of Mathematics, State University of New York at Stony Brook, Stony Brook, New York 11794

NUMBER THEORY (11)
   William Adams, 11520 Lockhart Place, Silver Spring, Maryland 20902

ORDINARY DIFFERENTIAL EQUATIONS AND DYNAMICAL SYSTEMS (33 34 39 49 58)
   Kenneth R. Meyer, Department of Mathematical Sciences, University of Cincinnati, Cincinnati, Ohio 45221-0025

PARTIAL DIFFERENTIAL EQUATIONS (35 49)
   Barbara L. Keyfitz, Department of Mathematics, University of Houston-University Park, Houston, Texas 77004

GENERAL ANALYSIS (41 42 43 44 45)
   J. Marshall Ash, Department of Mathematics, DePaul University, Chicago, Illinois 60614

FUNCTIONAL ANALYSIS AND OPERATOR THEORY (46 47)
   John B. Conway, Department of Mathematics, Indiana University, Bloomington, Indiana 47405

FUNCTIONAL ANALYSIS AND CONVEXITY (46 52)
   William J. Davis, Department of Mathematics, Ohio State University, Columbus, Ohio 43210

COMPLEX VARIABLES, FUNCTIONAL ANALYSIS AND OPERATOR THEORY (30 46 47)
   Paul S. Muhly, Department of Mathematics, University of Iowa, Iowa City, Iowa 52242

LIE GROUPS AND GEOMETRY (22 51 53)
   Jonathan M. Rosenberg, Department of Mathematics, University of Maryland, College Park, Maryland 20742

GENERAL TOPOLOGY (54)
   Dennis Burke, Department of Mathematics, Miami University of Ohio, Oxford, Ohio 45056
   James E. West, Department of Mathematics, Cornell University, Ithaca, New York 14853

PROBABILITY AND CERTAIN OTHER FIELDS (60–94 inclusive)
   William D. Sudderth, Department of Statistics, University of Minnesota, Minneapolis, Minnesota 55455
   George C. Papanicolaou, Applied Mathematics Division, New York University-Courant Institute, 251 Mercer Street, New York, New York 10012

All other communications should be addressed to the Managing Editor, William J. Davis, at the above address.
Copy of and reprinting. Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy a chapter for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews, provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. CONTENTS—Continued from back cover

Intersection of Lebesgue spaces $L_1$ and $L_2$. By S. J. DILWORTH

The convolution of Radon measures. By H. Kharaghani

C. APPLIED MATHEMATICS

Approximating PA. By F. J. Wiid

D. GEOMETRY

Automatic continuity of concave functions. By ROGER HOWE

Closed convex hypersurfaces with curvature restrictions. By ROLF SCHNEIDER

A rigidity theorem for quaternionic-Kähler manifolds. By CLAUDE LEBRUN

Compact parallelizable four dimensional symplectic and complex manifolds. By MARISA FERNÁNDEZ, MARK J. GOTAY and ALFRED GRAY

Clear visibility and $L_2$ sets. By N. STAVRAKAS

E. LOGIC AND FOUNDATIONS

Undefinable classes and definable elements in models of set theory and arithmetic. By ALI ENAYAT

An extension of the closed unbounded filter. By ROBERT J. MIGNONE

F. STATISTICS AND PROBABILITY

Paraproducts and commutators of martingale transforms. By RODRIGO BANUELOS and ANDREW G. BENNETT

A comparison principle for large deviations. By JOHN R. BAXTER and NARESH C. JAIN

Occupation time and the Lebesgue measure of the range for a Levy process. By S. C. PORT

An asymptotic expansion for the expected number of real zeros of a random polynomial. By J. ERNEST WILKINS, JR.

Factorization of measures and normal conditional distributions. By A. MAITRA and S. RAMAKRISHNAN

G. TOPOLOGY

Congruence and one-dimensionality of metric spaces. By LUDVIK JANOS

Infinitesimal characterization of homogeneous bundles. By KIRILL MACKENZIE

A characterization of Lošn spaces. By H. H. HUNG

$L$-manifolds and cone-dual maps. By SARA DRAGOTTI and GAETANO MAGRO

Universal spaces for countable dimensional metric spaces. By TATSUO GOTO

Fixed point sets of homeomorphisms of metric products. By JOHN R. MARTIN

Integral Brown-Gitler spectra. By FRED R. COHEN, DONALD M. DAVIS, PAUL G. GOERSS and MARK E. MAHOWALD

Absolute endpoints of chainable continua. By IRA ROSENHOLTZ

Neighborhoods of points in codimension-one submanifolds lie in codimension-one spheres. By FREDRIC D. ANCEL

Non-$G$-equivalent Moore $G$-spaces of the same type. By RYSZARD DOMAN

H. COMBINATORICS

Simultaneous systems of representatives for families of finite sets. By MELVYN B. NATHANSON

CONTENTS
Vol. 103, No. 4 August 1988 Whole No. 350

A. ALGEBRA AND NUMBER THEORY

Elementary divisor theorem for noncommutative PIDs. By ROBERT M. GURALNICK, LAWRENCE S. LEVY and CHARLES ODENTHAL ......................... 1003
Nontrivial uses of trivial rings. By FRED RICHMAN ................. 1012
The completeness theorems for universal and implicational logics of algebras via congruences. By ROBERT W. QUACKENBUSH ....................... 1015
Grothendieck groups of algebras with nilpotent annihilators. By MAURICE AUSLANDER and IDUN REITEN .................. 1022
A simple proof of Gabber's theorem on projective modules over a localized local ring. By RICHARD G. SWAN .................. 1025
Imbedding nondegenerate Jordan algebras in semiprimitive algebras. By W. S. MARTIN-DALE III and K. MCCRIMMON .............. 1031
The number of generators of modules over polynomial rings. By GENNADY LYUBEZNIK 1037
Elementary equivalence and profinite completions: A characterization of finitely generated abelian-by-finite groups. By FRANCIS OGER ........ 1041
Zeros of diagonal equations over finite fields. By DAQING WAN .... 1049
Modular group algebras of $\mathcal{N}$-groups. By WILLIAM ULLERY ... 1053
Finite extensions of rings. By BARBARA CORTZEN and LANCE W. SMALL 1058

B. ANALYSIS

Convergence and divergence almost everywhere of spherical means for radial functions. By YUICHI KANJIN ........ 1063
An extension of Ando-Krieger's theorem to ordered Banach spaces. By V. CASELLES .................. 1070
Classification of one-dimensional hypergroups. By ALAN L. SCHWARTZ ...................... 1073
Analytic functions with rectifiable radial images. By MARVIN ORTEL and WALTER SCHNEIDER ................. 1082
Banach space properties of Ciesielski-Pol's $C(K)$ space. By G. GODEFROY, J. PELANT, J. H. M. WHITFIELD and V. ZIZLER .......... 1087
Starlikeness and convexity from integral means of the derivative. By SHINJI YAMASHITA 1094
A projection formula for the Askey-Wilson polynomials and an application. By MIZAN RAHMAN ............. 1099
On Cesàro and Borel-type summability. By DAVID BORWEIN and TOM MARKOVICH 1108
Invariant Lagrangian subspaces. By LARS ANDERSSON ........ 1113
Linear independence of iterates and entire solutions of functional equations. By JENS PETER REUS CHRISTENSEN and PAL FISCHER .............. 1120
Joint continuity of measurable biadditive mappings. By JENS PETER REUS CHRISTENSEN and PAL FISCHER .................. 1125
Random approximations and random fixed point theorems for non-self-maps. By TZU-CHU LIN ............. 1129
The compactness of the $\bar{\mathcal{D}}$-Neumann operator. By STEVEN G. KRANTZ ........... 1136
Characterizing shape preserving $L_1$-approximation. By D. ZWICK ...................... 1139
A commutator estimate for pseudo-differential operators. By JÜRGEN MARSCHELL ........ 1147
Nonstandard methods for families of $\tau$-smooth probability measures. By DIETER LAN-DELS and LOTHAR ROGGE ........ 1151
An upper bound for the projection constant. By D. R. LEWIS .......... 1157
A note on the generalized Riemann integral. By WASHEK F. PFEFFER .......... 1161
A note on extreme points of subordination classes. By D. J. HALLENBECK .......... 1167
An extension theorem for normal functions. By PENTTI JÄRVI ........ 1171
Singular integrals in product domains and the method of rotations. By DONALD KRUG .......... 1175
The differentiability of the hairs of exp$(Z)$. By M. VIANA DA SILVA .......... 1179
