Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

Editorial Policy

To be published in the Proceedings, a paper must be correct, new, nontrivial and significant. Further, it must be well written and of interest to a substantial number of mathematicians. Piecemeal results, such as an inconclusive step toward an unproved major theorem or a minor variation on a known result, are in general not acceptable for publication. Proceedings Editors shall solicit, and encourage publication of, worthy papers of length not exceeding 15 typed pages.

Very short notes not to exceed two printed pages are also accepted, and appear under the heading Shorter notes. Items deemed suitable include an elegant new proof of an important and well-known theorem, an illuminating example or counterexample, or a new viewpoint on familiar results. New results, if of a brief and striking character, might also be acceptable, though in general a paper which is merely very short will not be suitable for the Shorter notes department.

On January 23, 1979, the Council of the American Mathematical Society abolished blind refereeing as a policy for the Proceedings, but decided that any author who so requests and who provides a blind copy of a manuscript will have the manuscript refereed blind.

Two copies of a manuscript should be submitted. If blind refereeing is intended, one should be complete and one blind, and then the latter will be sent to the referee without disclosure of the author’s name or institution.

SUBSCRIPTION INFORMATION. PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published monthly. Subscription prices for Volumes 105-107 (1989) are $413 list; $330 institutional member; $248 individual member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of $25: subscribers in India must pay a postage surcharge of $38. Expedited delivery to destinations in North America—$30; elsewhere—$40. Combination paper and microfiche subscription prices are $549 list; $439 institutional member. Microfiche of each issue will be mailed the fastest way possible before the camera copy is sent to the printer. Microfilm subscriptions may be purchased from University Microfilms International, 300 North Zeeb Road, Ann Arbor, Michigan 48106.

BACK NUMBER INFORMATION. Back number prices per volume are for Volumes 1-89, $113 list, $90 institutional; for Volumes 90-92, $129 list; $103 institutional member; for Volumes 93-95, $173 list; $138 institutional member; for Volumes 96-98, $191 list; $153 institutional members; for Volumes 99-104, $202 list; $162 institutional member.

Subscriptions and orders for publications of the American Mathematical Society should be addressed to American Mathematical Society, P. O. Box 1571, Annex Station, Providence, R. I. 02901-1571. All orders must be accompanied by payment. Other correspondence should be addressed to P. O. Box 6248, Providence, R. I. 02940.

PROCEEDINGS of the American Mathematical Society is published monthly by the American Mathematical Society at 201 Charles Street, Providence, R. I. 02904. Second-class postage is paid at Providence, Rhode Island. Postmaster: Send address changes to PROCEEDINGS, American Mathematical Society, P. O. Box 6248, Providence, R. I. 02940.

Information on Copying and Reprinting can be found at the back of this journal.

The paper used in this journal is acid-free and falls within the guidelines established to ensure permanence and durability.
Manuscript Information

1. Articles submitted for publication should be typewritten, double spaced, and no more than 15 (8½" × 11") pages long. The Manual for Authors, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand drawn symbols are satisfactory, if clearly done; directions to the printer should be included where necessary on a separate sheet. Authors must keep complete copies of their manuscripts, and editors will acknowledge receipt. To encourage the submission of manuscripts in electronic form using \TeX{} and the \AMS-\TeX{} macro package, the Executive Committee of the Council has adopted a policy that allows for accelerating the publication date of such manuscripts by as much as 20 weeks, which is approximately equal to the time normally needed by the Society for copyediting, typesetting, and proofreading an average manuscript.

2. The first page should consist of a descriptive title, followed by an abstract which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The descriptive title should be short, but informative; useless or vague phrases such as “some remarks about” or “concerning” should be avoided. The abstract should be at least one complete sentence, and at most 150 words. Included with the footnotes to the paper, but placed before the first footnote, there should be first the 1980 Mathematics Subject Classification (1985 Revision) representing the primary and secondary subjects of the article. This may be followed by a list of key words and phrases describing the subject matter of the article and taken from it. A list of the numbers may be found in the annual subject index of Mathematical Reviews, published with the December issue starting in 1984.

3. A Copyright Transfer Agreement is required before a paper will be published in the Proceedings. A copy of the form is sent with the acknowledgement of receipt of manuscript from the Providence office of the Society. Authors are urged to return the forms immediately to prevent delays in processing and publishing of the manuscript.

OFFPRINTS AND ADDRESS CHANGES. Any inquiries concerning a paper which has been accepted for publication, including information regarding offprints or changes of address for mailing proof, should be sent directly to the Editorial Department, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

GALLEY PROOF. When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate on the original manuscript which of them should receive galley proof in the event that the manuscript is accepted for publication.

BACKLOG. 150 pages. Papers currently being accepted by the editors will be published in 12–14 months.

COPYING AND REPRINTING. Individual readers of this publication, and nonprofit libraries acting for them are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.
Submission of Manuscript

Send papers directly to one of the editors listed under the subject field of the paper. The numbers in parentheses are the first two digits of major classification from the 1980 Mathematics Subject Classification (1985 Revision) and describe the fields being handled by the editor.

**LOGIC AND FOUNDATIONS (03 04)**
- Andreas R. Blass, Department of Mathematics, University of Michigan, Ann Arbor, Michigan 48109-1003

**COMBINATORICS AND DISCRETE MATHEMATICS (05 15)**
- Thomas H. Brylawski, Department of Mathematics, University of North Carolina, Chapel Hill, North Carolina 27514

**COMBINATORICS, COMPUTER SCIENCE AND INFORMATION THEORY (05 68 94)**
- Andrew Odlyzko, Room 2C-370, Bell Laboratories, Murray Hill, New Jersey 07974

**COMMUTATIVE ALGEBRA (06 12 13 14 15 18)**
- Louis J. Ratliff, Jr., Department of Mathematics, University of California, Riverside, California 92502

**GENERAL ALGEBRA (16 17 18 08)**
- Maurice Auslander, Department of Mathematics, Brandeis University, P.O. Box 9110, Waltham, Massachusetts 02254-9110

**GROUP THEORY (20)**
- Warren J. Wong, Department of Mathematics, University of Notre Dame, Notre Dame, Indiana 46556

**ALGEBRAIC AND DIFFERENTIAL TOPOLOGY (55 57 58)**
- Frederick R. Cohen, Department of Mathematics, University of Kentucky, Lexington, Kentucky 40506

**REAL VARIABLES (26 28 40)**
- R. Daniel Mauldin, Department of Mathematics, North Texas State University, Denton, Texas 76203

**COMPLEX VARIABLES (30 31 32)**
- Clifford J. Earle Jr., Cornell University, White Hall, Ithaca, New York 14853

**NUMBER THEORY (11)**
- William Adams, 11520 Lockhart Place, Silver Spring, Maryland 20902

**ORDINARY DIFFERENTIAL EQUATIONS AND DYNAMICAL SYSTEMS (33 34 39 49 58)**
- Kenneth R. Meyer, Department of Mathematical Sciences, University of Cincinnati, Cincinnati, Ohio 45221-0025

**PARTIAL DIFFERENTIAL EQUATIONS (35 49)**
- Barbara Lee Keyfitz, Institute for Mathematics and Its Applications, University of Minnesota, 514 Vincent Hall, 206 Church Street S. E., Minneapolis, MN 55455

**GENERAL ANALYSIS (41 42 43 44 45)**
- J. Marshall Ash, Department of Mathematics, DePaul University, Chicago, Illinois 60614

**FUNCTIONAL ANALYSIS AND OPERATOR THEORY (46 47)**
- Palle E. T. Jorgensen, University of Iowa, Iowa City, Iowa 52242

**FUNCTIONAL ANALYSIS AND CONVEXITY (46 52)**
- William J. Davis, Department of Mathematics, Ohio State University, Columbus, Ohio 43210

**LIE GROUPS AND GEOMETRY (22 51 53)**
- Jonathan M. Rosenberg, Department of Mathematics, University of Maryland, College Park, Maryland 20742

**GENERAL TOPOLOGY (54)**
- Dennis Burke, Department of Mathematics, Miami University of Ohio, Oxford, Ohio 45056
- James E. West, Department of Mathematics, Cornell University, Ithaca, New York 14853

**PROBABILITY AND CERTAIN OTHER FIELDS (60-94 inclusive)**
- William D. Sudderth, Department of Statistics, University of Minnesota, Minneapolis, Minnesota 55455
- George C. Papanicolaou, Applied Mathematics Division, New York University-Courant Institute, 251 Mercer Street, New York, New York 10012

All other communications should be addressed to the Managing Editor, William J. Davis, at the above address.

CONTENTS—Continued from back cover

G.  TOPOLOGY
There can be $C^*$-embedded dense proper subspaces in $\beta\omega - \omega$. By Eric K. van Douwen, Kenneth Kunen and Jan van Mill .................................................. 462
Generalized unknotting operations and tangle decompositions. By Tsuyoshi Kobayashi . 471
Smooth 2-knots in $S^2 \times S^2$ with simply connected complements are topologically unique.
By Yoshihisa Sato ................................................................. 479
Fibrations that are cofibrations. II. By Juan M. Alonso .............................................. 486
Dimension of dense subalgebras of $C(X)$. By Juan B. Sancho de Salas and Maria Teresa
Sancho de Salas ................................................................. 491
$\kappa$-metrizable spaces, stratifiable spaces and metrization. By J. Suzuki, K. Tamaño and Y.
Tanaka ................................................................. 500
A remark on the normality of infinite products. By Keiko Chiba .................................. 510

H.  COMBINATORICS
A 4-color theorem for surfaces of genus $g$. By Kenneth A. Berman and Jerome L. Paul 513

SHORTER NOTES
Functions of exponential type and separated sequences. By David C. Ullrich ............. 523
CONTENTS

Vol. 105, No. 2  February 1989   Whole No. 356

A. ALGEBRA AND NUMBER THEORY

Factorization of matrices into partial isometries. By Kung-Hwang Kuo and Pei Yuan Wu ................................................................. 263
On the values of negative half-integers of the dedekind zeta function of a real quadratic field. By Minking Eie ......................................................... 273
A note on Jacobson rings and polynomial rings. By Miguel Ferrero and Michael M. Parmenter .................................................................................. 281
A Lie property in group rings. By Antonio Giambruno and Sudarshan K. Sehgal .... 287
Invariants for a class of torsion-free Abelian groups. By D. Arnold and C. Vinsonhaler 293
The number of indecomposable sequences over an Artin algebra of finite type. By Stephen P. Corwin ................................................................. 301
On the nonsimplicity of some convergence categories. By E. Lowen and R. Lowen ...... 305
Artinian duo rings and self-duality. By Weimin Xue .................................................. 309

B. ANALYSIS

A characterization of weak pseudoconvexity. By Akira Sakai ................................. 314
On a domain characterization of Schrödinger operators with gradient magnetic vector potentials and singular potentials. By Jerome A. Goldstein and Roman Svirsky .... 317
Coefficients of symmetric functions of bounded boundary rotation. By Wolfram Koepf 324
Completely bounded linear extensions of operator-valued functions on *-semigroups. By Ching-Yun Suen ................................................................. 330
A recurrence related to trees. By Donald E. Knuth and Boris Pittel .......................... 335
On projections in power series spaces and the existence of bases. By Jörg Krone .......... 350
On compact and bounding holomorphic mappings. By Mikael Lindström .................. 356
Sums and products of Hilbert spaces. By Jesus M. F. Castillo .................................... 362
Well-bounded and scalar-type spectral operators on spaces not containing $c_0$. By Ian Doust 367
Powers' binary shifts on the hyperfinite factor of type $III_1$. By Masatoshi Enomoto and Yasuo Watatani ................................................................. 371
Lack of uniform stabilization for noncontractive semigroups under compact perturbation. By R. Triggiani ................................................................. 375
Some Fourier-Stieltjes coefficients revisited. By Sylvester Reese ............................... 384
Approximation of analytic multifunctions. By Zbigniew Slodkowski ............................ 387
A generalized Poincaré inequality for Gaussian measures. By William Beckner .... 397
$L^2$-boundedness of spherical maximal operators with multidimensional parameter sets. By Young-Hwa Ha ................................................................. 401
On Tchebyshhev Systems. By Kazuaki Kitahara ........................................................ 412
Optimal lower bound for the gap between the first two eigenvalues of one-dimensional Schrödinger operators with symmetric single-well potentials. By Mark S. Ashbaugh and Rafael Benguria ......................................................... 419

D. GEOMETRY

A characterization of complex hypersurfaces in $\mathbb{C}^m$. By Marcos Dajczer ............ 425
Finiteness of index and total scalar curvature for minimal hypersurfaces. By Johan Tysk 429

F. STATISTICS AND PROBABILITY

Preorders compatible with probability measures defined on a Boolean algebra. By M. G. Schwarze ................................................................................. 436
A counterexample to the conjecture of Woess on simple random walks on trees. By Kenneth A. Berman and Mokhtar Konsowa ............................................ 443
Conditional Yeh-Wiener integrals with vector-valued conditioning functions. By Chull Park and David Skoug ............................................................... 450
