Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

Editorial Policy

To be published in the Proceedings, a paper must be correct, new, nontrivial and significant. Further, it must be well written and of interest to a substantial number of mathematicians. Piecemeal results, such as an inconclusive step toward an unproved major theorem or a minor variation on a known result, are in general not acceptable for publication. Proceedings Editors shall solicit, and encourage publication of, worthy papers of length not exceeding 15 typed pages.

Very short notes not to exceed two printed pages are also accepted, and appear under the heading SHORTER NOTES. Items deemed suitable include an elegant new proof of an important and well-known theorem, an illuminating example or counterexample, or a new viewpoint on familiar results. New results, if of a brief and striking character, might also be acceptable, though in general a paper which is merely very short will not be suitable for the SHORTER NOTES department.

On January 23, 1979, the Council of the American Mathematical Society abolished blind refereeing as a policy for the Proceedings, but decided that any author who so requests and who provides a blind copy of a manuscript will have the manuscript refereed blind.

Two copies of a manuscript should be submitted. If blind refereeing is intended, one should be complete and one blind, and then the latter will be sent to the referee without disclosure of the author’s name or institution.

SUBSCRIPTION INFORMATION. PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published monthly. Subscription prices for Volumes 105–107 (1989) are $413 list; $330 institutional member; $248 individual member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of $25: subscribers in India must pay a postage surcharge of $38. Expedited delivery to destinations in North America—$30; elsewhere—$40. Combination paper and microfiche subscription prices are $549 list; $439 institutional member. Microfiche of each issue will be mailed the fastest way possible before the camera copy is sent to the printer. Microfilm subscriptions may be purchased from University Microfilms International, 300 North Zeeb Road, Ann Arbor, Michigan 48106.

BACK NUMBER INFORMATION. Back number prices per volume are for Volumes 1–89, $113 list, $90 institutional; for Volumes 90–92, $129 list; $103 institutional member; for Volumes 93–95, $173 list; $138 institutional member; for Volumes 96–98, $191 list; $153 institutional members; for Volumes 99–104, $202 list; $162 institutional member.

Subscriptions and orders for publications of the American Mathematical Society should be addressed to American Mathematical Society, P. O. Box 1571, Annex Station, Providence, R. I. 02901-1571. All orders must be accompanied by payment. Other correspondence should be addressed to P. O. Box 6248, Providence, R. I. 02940.
Manuscript Information

1. Articles submitted for publication should be typewritten, double spaced, and no more than 15 (8 1/2" x 11") pages long. The Manual for Authors, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand drawn symbols are satisfactory, if clearly done; directions to the printer should be included where necessary on a separate sheet. Authors must keep complete copies of their manuscripts, and editors will acknowledge receipt. To encourage the submission of manuscripts in electronic form using TeX and the A^aS-T^X macro package, the Executive Committee of the Council has adopted a policy that allows for accelerating the publication date of such manuscripts by as much as 20 weeks, which is approximately equal to the time normally needed by the Society for copyediting, typesetting, and proofreading an average manuscript.

2. The first page should consist of a descriptive title, followed by an abstract which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The descriptive title should be short, but informative; useless or vague phrases such as "some remarks about" or "concerning" should be avoided. The abstract should be at least one complete sentence, and at most 150 words. Included with the footnotes to the paper, but placed before the first footnote, there should be first the 1980 Mathematics Subject Classification (1985 Revision) representing the primary and secondary subjects of the article. This may be followed by a list of key words and phrases describing the subject matter of the article and taken from it. A list of the numbers may be found in the annual subject index of Mathematical Reviews, published with the December issue starting in 1984.

3. A Copyright Transfer Agreement is required before a paper will be published in the Proceedings. A copy of the form is sent with the acknowledgement of receipt of manuscript from the Providence office of the Society. Authors are urged to return the forms immediately to prevent delays in processing and publishing of the manuscript.

OFFPRINTS AND ADDRESS CHANGES. Any inquiries concerning a paper which has been accepted for publication, including information regarding offprints or changes of address for mailing proof, should be sent directly to the Editorial Department, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

GALLEY PROOF. When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate on the original manuscript which of them should receive galley proof in the event that the manuscript is accepted for publication.

BACKLOG. 150 pages. Papers currently being accepted by the editors will be published in 12-14 months.

COPYING AND REPRINTING. Individual readers of this publication, and nonprofit libraries acting for them are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.
Submission of Manuscript

Send papers directly to one of the editors listed under the subject field of the paper. The numbers in parentheses are the first two digits of major classification from the 1980 Mathematics Subject Classification (1985 Revision) and describe the fields being handled by the editor.

LOGIC AND FOUNDATIONS (03 04)
Andreas R. Blass, Department of Mathematics, University of Michigan, Ann Arbor, Michigan 48109-1003

COMBINATORICS AND DISCRETE MATHEMATICS (05 15)
Thomas H. Brylawski, Department of Mathematics, University of North Carolina, Chapel Hill, North Carolina 27514

COMBINATORICS, COMPUTER SCIENCE AND INFORMATION THEORY (05 68 94)
Andrew Odlyzko, Room 2C-370, Bell Laboratories, Murray Hill, New Jersey 07974

COMMUTATIVE ALGEBRA (06 12 13 14 15 18)
Louis J. Ratliff, Jr., Department of Mathematics, University of California, Riverside, California 92502

GENERAL ALGEBRA (16 17 18 08)
Maurice Auslander, Department of Mathematics, Brandeis University, P.O. Box 9110, Waltham, Massachusetts 02254-9110

GROUP THEORY (20)
Warren J. Wong, Department of Mathematics, University of Notre Dame, Notre Dame, Indiana 46556

ALGEBRAIC AND DIFFERENTIAL TOPOLOGY (55 57 58)
Frederick R. Cohen, Department of Mathematics, University of Kentucky, Lexington, Kentucky 40506

REAL VARIABLES (26 28 40)
R. Daniel Mauldin, Department of Mathematics, North Texas State University, Denton, Texas 76203

COMPLEX VARIABLES (30 31 32)
Clifford J. Earle Jr., Cornell University, White Hall, Ithaca, New York 14853

NUMBER THEORY (11)
William Adams, 11520 Lockhart Place, Silver Spring, Maryland 20902

ORDINARY DIFFERENTIAL EQUATIONS AND DYNAMICAL SYSTEMS (33 34 39 49 58)
Kenneth R. Meyer, Department of Mathematical Sciences, University of Cincinnati, Cincinnati, Ohio 45221-0025

PARTIAL DIFFERENTIAL EQUATIONS (35 49)
Barbara Lee Keyfitz, Institute for Mathematics and Its Applications, University of Minnesota, 514 Vincent Hall, 206 Church Street S. E., Minneapolis, MN 55455

GENERAL ANALYSIS (41 42 43 44 45)
J. Marshall Ash, Department of Mathematics, DePaul University, Chicago, Illinois 60614

FUNCTIONAL ANALYSIS AND OPERATOR THEORY (46 47)
Palle E. T. Jorgensen, University of Iowa, Iowa City, Iowa 52242

FUNCTIONAL ANALYSIS AND CONVEXITY (46 52)
William J. Davis, Department of Mathematics, Ohio State University, Columbus, Ohio 43210

COMPLEX VARIABLES, FUNCTIONAL ANALYSIS AND OPERATOR THEORY (30 46 47)
Paul S. Muhly, Department of Mathematics, University of Iowa, Iowa City, Iowa 52242

LIE GROUPS AND GEOMETRY (22 51 53)
Jonathan M. Rosenberg, Department of Mathematics, University of Maryland, College Park, Maryland 20742

GENERAL TOPOLOGY (54)
Dennis Burke, Department of Mathematics, Miami University of Ohio, Oxford, Ohio 45056
James E. West, Department of Mathematics, Cornell University, Ithaca, New York 14853

PROBABILITY AND CERTAIN OTHER FIELDS (60-94 inclusive)
William D. Sudderth, Department of Statistics, University of Minnesota, Minneapolis, Minnesota 55455
George C. Papanicolau, Applied Mathematics Division, New York University-Courant Institute, 251 Mercer Street, New York, New York 10012

All other communications should be addressed to the Managing Editor, William J. Davis, at the above address.
CONTENTS—Continued from back cover

G. TOPOLOGY

Covers of Dehn fillings on once-punctured torus bundles. By Mark D. Baker ............. 747
On compact Hausdorff spaces of countable tightness. By Zoltán Balogh ..................... 755
Tree-like continua and exactly k-to-1 functions. By Jo Heath .................................. 765
Remark on Witten’s modular forms. By Jean-Luc Brylinski ................................. 773
On the spans and width of simple triods. By Thelma West ............................... 776
CONTENTS
Vol. 105, No. 3 March 1989 Whole No. 357

A. ALGEBRA AND NUMBER THEORY

The Albert quadratic form for an algebra of degree four. By P. Mammone and D. B. Shapiro .......................................................... 525
A characterization of the Veronese surface. By Edoardo Ballico .................. 531
The conjugate property for Diophantine approximation of continued fractions. By Jingcheng Tong ......................................................... 535
Elliptic curves of bounded degree and height. By Joseph H. Silverman .......... 540
On monoids of finite real character. By Ulrich Krause .............................. 546
$M$-groups with Sylow towers. By Elsa L. Gunter .................................. 555
Simple near-rings associated with meromorphic products. By C. J. Maxson and K. C. Smith ................................................................. 564

B. ANALYSIS

Point evaluations and polynomial approximation in the mean with respect to harmonic measure. By John Akeroyd ........................................... 575
Hypo-analytic pseudodifferential operators. By S. Berhanu ........................ 582
On weighted norm inequalities for positive linear operators. By R. Kerman and E. Sawyer ................................................................. 589
Microlocal hypo-analyticity and hypo-analytic pseudodifferential operators. By S. Berhanu ................................................................. 594
The simple-zero theorem for support points in $\Sigma$. By Y. J. Leung and G. Schober ................................................................. 603
Representation of an abstract measure using Borel-isomorphism types. By R. M. Shortt ................................................................. 609
Closure properties of families of Cauchy-Stieltjes transforms. By R. A. Hirschweiler and T. H. MacGregor ........................................... 615
Multipliers on weighted $L_p$-spaces over locally compact Vilenkin groups. By C. W. Onneweer and T. S. Quek ........................................... 622
An elementary proof of a theorem of Schaefer, Wolff and Arendt. By C. B. Huijsmans ................................................................. 632
On the almost everywhere existence of the ergodic Hilbert transform. By Diego Gallardo and F. J. Martín-Reyes ........................................... 636
On a property of metric projections onto closed subsets of Hilbert spaces. By U. Westphal and J. Frerking .................................................. 644
Surjective isometries of weighted Bergman spaces. By Clinton J. Kolaski .... 652
A note on Roe's characterization of the Sine function. By Ralph Howard .... 658
Note on arc-length and harmonic measure. By John S. Spraker .................. 664
Generalization of a classical theorem of Pólya and Szegő. By Ruben N. Mera ... 666
A generalization of nonharmonic Fourier series. By Harold E. Benzinger .... 670
Stable isomorphism of hereditary $C^*$-subalgebras and stable equivalence of open projections. By Shuang Zhang ................................. 677
Monotone closures of commutative $C^*$-algebras. By Masamichi Hamana .... 683

D. GEOMETRY

Reduction of local Lie algebra structures. By Kentaro Mikami .................... 686
Isometries homotopic to the identity. By Douglas A. Norris ...................... 692
Extremal Minkowski additive selections of compact convex sets. By Rade T. Živaljević ................................................................. 697
Euclidean metric and flat metric outside a compact set. By Nobuhiro Innami ................................................................. 701
Meromorphic functions on a compact Riemann surface and associated complete minimal surfaces. By Kichoon Yang ........................................... 706

E. LOGIC AND FOUNDATIONS

Tame theories with hyperarithmetic homogeneous models. By Terrence Millar ................................................................................. 712
On weakly stationary sets. By Qi Feng ................................................ 727
Continuity properties of optimal stopping value. By John Elton .................. 736
