VOLUME 106 NUMBER 1

MAY 1989

WHOLE NUMBER 359

PROCEEDINGS OF THE

AMERICAN MATHEMATICAL SOCIETY

EDITED BY

William Adams
J. Marshall Ash
Maurice Auslander
Andreas R. Blass
Thomas H. Brylawski
Dennis Burke
Frederick R. Cohen
William J. Davis, Managing Editor
Clifford J. Earle, Jr.
Palle E. T. Jorgensen
Barbara L. Keyfitz
R. Daniel Mauldin
Kenneth R. Meyer
Paul S. Muhly
Andrew Odlyzko
George C. Papanicolaou
Louis J. Ratliff, Jr.
Jonathan M. Rosenberg
William D. Sudderth
James E. West
Warren J. Wong

PROVIDENCE, RHODE ISLAND USA

ISSN 0002-9939

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

Editorial Policy

To be published in the Proceedings, a paper must be correct, new, nontrivial and significant. Further, it must be well written and of interest to a substantial number of mathematicians. Piecemeal results, such as an inconclusive step toward an unproved major theorem or a minor variation on a known result, are in general not acceptable for publication. Proceedings Editors shall solicit, and encourage publication of, worthy papers of length not exceeding 15 typed pages.

Very short notes not to exceed two printed pages are also accepted, and appear under the heading SHORTER NOTES. Items deemed suitable include an elegant new proof of an important and well-known theorem, an illluminating example or counterexample, or a new viewpoint on familiar results. New results, if of a brief and striking character, might also be acceptable, though in general a paper which is merely very short will not be suitable for the SHORTER NOTES department.

On January 23, 1979, the Council of the American Mathematical Society abolished blind refereeing as a policy for the Proceedings, but decided that any author who so requests and who provides a blind copy of a manuscript will have the manuscript refereed blind.

Two copies of a manuscript should be submitted. If blind refereeing is intended, one should be complete and one blind, and then the latter will be sent to the referee without disclosure of the author's name or institution.

SUBSCRIPTION INFORMATION. PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published monthly. Subscription prices for Volumes 105–107 (1989) are $413 list; $330 institutional member; $248 individual member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of $25: subscribers in India must pay a postage surcharge of $38. Expedited delivery to destinations in North America—$30; elsewhere—$40. Combination paper and microfiche subscription prices are $549 list; $439 institutional member. Microfiche of each issue will be mailed the fastest way possible before the camera copy is sent to the printer. Microfilm subscriptions may be purchased from University Microfilms International, 300 North Zeeb Road, Ann Arbor, Michigan 48106.

BACK NUMBER INFORMATION. Back number prices *per volume* are for Volumes 1–89, $113 list, $90 institutional; for Volumes 90–92, $129 list; $103 institutional member; for Volumes 93–95, $173 list; $138 institutional member; for Volumes 96–98, $191 list; $153 institutional members; for Volumes 99–104, $202 list; $162 institutional member.

Subscriptions and orders for publications of the American Mathematical Society should be addressed to American Mathematical Society, P. O. Box 1571, Annex Station, Providence, R. I. 02901-1571. *All orders must be accompanied by payment.* Other correspondence should be addressed to P. O. Box 6248, Providence, R. I. 02940.

PROCEEDINGS of the American Mathematical Society is published monthly by the American Mathematical Society at 201 Charles Street, Providence, R. I. 02904. Second-class postage is paid at Providence, Rhode Island. Postmaster: Send address changes to PROCEEDINGS, American Mathematical Society, P. O. Box 6248, Providence, R. I. 02940.

Printed in the United States of America
Information on Copying and Reprinting can be found at the back of this journal.

The paper used in this journal is acid-free and falls within the guidelines established to ensure permanence and durability. ♾

This publication was typeset using $\mathcal{A}\mathcal{M}\mathcal{S}$-TEX, the American Mathematical Society's TEX macro system.

Submission of Manuscript

Send papers directly to one of the editors listed under the subject field of the paper. The numbers in parentheses are the first two digits of major classification from the 1980 Mathematics Subject Classification (1985 Revision) and describe the fields being handled by the editor.

LOGIC AND FOUNDATIONS (03 04)
Andreas R. Blass, Department of Mathematics, University of Michigan, Ann Arbor, Michigan 48109-1003

COMBINATORICS AND DISCRETE MATHEMATICS (05 15)
Thomas H. Brylawski, Department of Mathematics, University of North Carolina, Chapel Hill, North Carolina 27514

COMBINATORICS, COMPUTER SCIENCE AND INFORMATION THEORY (05 68 94)
Andrew Odlyzko, Room 2C-370, Bell Laboratories, Murray Hill, New Jersey 07974

COMMUTATIVE ALGEBRA (06 12 13 14 15 18)
Louis J. Ratliff, Jr., Department of Mathematics, University of California, Riverside, California 92502

GENERAL ALGEBRA (16 17 18 08)
Maurice Auslander, Department of Mathematics, Brandeis University, P.O. Box 9110, Waltham, Massachusetts 02254-9110

GROUP THEORY (20)
Warren J. Wong, Department of Mathematics, University of Notre Dame, Notre Dame, Indiana 46556

ALGEBRAIC AND DIFFERENTIAL TOPOLOGY (55 57 58)
Frederick R. Cohen, Department of Mathematics, University of Kentucky, Lexington, Kentucky 40506

REAL VARIABLES (26 28 40)
R. Daniel Mauldin, Department of Mathematics, North Texas State University, Denton, Texas 76203

COMPLEX VARIABLES (30 31 32)
Clifford J. Earle Jr., Cornell University, White Hall, Ithaca, New York 14853

NUMBER THEORY (11)
William Adams, Department of Mathematics, University of Maryland, College Park, MD 20742

ORDINARY DIFFERENTIAL EQUATIONS AND DYNAMICAL SYSTEMS (33 34 39 49 58)
Kenneth R. Meyer, Department of Mathematical Sciences, University of Cincinnati, Cincinnati, Ohio 45221-0025

PARTIAL DIFFERENTIAL EQUATIONS (35 49)
Barbara Lee Keyfitz, Institute for Mathematics and Its Applications, University of Minnesota, 514 Vincent Hall, 206 Church Street S. E., Minneapolis, MN 55455

GENERAL ANALYSIS (41 42 43 44 45)
J. Marshall Ash, Department of Mathematics, DePaul University, Chicago, Illinois 60614

FUNCTIONAL ANALYSIS AND OPERATOR THEORY (46 47)
Palle E. T. Jorgensen, University of Iowa, Iowa City, Iowa 52242

FUNCTIONAL ANALYSIS AND CONVEXITY (46 52)
William J. Davis, Department of Mathematics, Ohio State University, Columbus, Ohio 43210

COMPLEX VARIABLES, FUNCTIONAL ANALYSIS AND OPERATOR THEORY (30 46 47)
Paul S. Muhly, Department of Mathematics, University of Iowa, Iowa City, Iowa 52242

LIE GROUPS AND GEOMETRY (22 51 53)
Jonathan M. Rosenberg, Department of Mathematics, University of Maryland, College Park, Maryland 20742

GENERAL TOPOLOGY (54)
Dennis Burke, Department of Mathematics, Miami University of Ohio, Oxford, Ohio 45056
James E. West, Department of Mathematics, Cornell University, Ithaca, New York 14853

PROBABILITY AND CERTAIN OTHER FIELDS (60–94 inclusive)
William D. Sudderth, Department of Statistics, University of Minnesota, Minneapolis, Minnesota 55455
George C. Papanicolaou, Applied Mathematics Division, New York University-Courant Institute, 251 Mercer Street, New York, New York 10012

All other communications should be addressed to the Managing Editor, William J. Davis, at the above address.

ABCDEFGHIJ-89

Manuscript Information

1. Articles submitted for publication should be typewritten, double spaced, and no more than 15 ($8\frac{1}{2}" \times 11"$) pages long. The *Manual for Authors*, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand drawn symbols are satisfactory, if clearly done; directions to the printer should be included where necessary on a separate sheet. Authors must keep complete copies of their manuscripts, and editors will acknowledge receipt. To encourage the submission of manuscripts in electronic form using TEX and the $\mathcal{A}\mathcal{M}\mathcal{S}$-TEX macro package, the Executive Committee of the Council has adopted a policy that allows for accelerating the publication date of such manuscripts by as much as 20 weeks, which is approximately equal to the time normally needed by the Society for copyediting, typesetting, and proofreading an average manuscript.

2. The first page should consist of a *descriptive title*, followed by an *abstract* which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The *descriptive title* should be short, but informative; useless or vague phrases such as "some remarks about" or "concerning" should be avoided. The *abstract* should be at least one complete sentence, and at most 150 words. Included with the footnotes to the paper, but placed before the first footnote, there should be first the 1980 *Mathematics Subject Classification* (1985 *Revision*) representing the primary and secondary subjects of the article. This may be followed by a list of *key words and phrases* describing the subject matter of the article and taken from it. A list of the numbers may be found in the annual subject index of *Mathematical Reviews*, published with the December issue starting in 1984.

3. A Copyright Transfer Agreement is required before a paper will be published in the Proceedings. A copy of the form is sent with the acknowledgement of receipt of manuscript from the Providence office of the Society. Authors are urged to return the forms immediately to prevent delays in processing and publishing of the manuscript.

OFFPRINTS AND ADDRESS CHANGES. Any inquiries concerning a paper which has been accepted for publication, including information regarding offprints or changes of address for mailing proof, should be sent directly to the Editorial Department, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

GALLEY PROOF. When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate on the original manuscript which of them should receive galley proof in the event that the manuscript is accepted for publication.

BACKLOG. 150 pages. Papers currently being accepted by the editors will be published in 12–14 months.

COPYING AND REPRINTING. Individual readers of this publication, and nonprofit libraries acting for them are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.

CONTENTS—*Continued from back cover*

The pseudo-orbit tracing property and expansiveness on the Cantor set. By TAKASHI SHIMOMURA 241
On topological entropy of group actions on S^1. By NOBUYA WATANABE 245
Immersed projective planes in lens spaces. By J. SCOTT CARTER 251
One parameter submonoids in locally compact differentiable monoids. By MITCH ANDERSON 261
Tangles and the Gromov invariant. By COLIN C. ADAMS 269

H. COMBINATORICS

On q-derangement numbers. By MICHELLE L. WACHS 273
A dichromatic polynomial for weighted graphs and link polynomials. By LORENZO TRALDI 279

PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY

CONTENTS

Vol. 106, No. 1 **May 1989** **Whole No. 359**

A. ALGEBRA AND NUMBER THEORY

A family of abelian varieties rationally isogenous to no Jacobian. By JAMES L. PARISH ... 1
Subgroups of almost separable torsionfree abelian groups. By CLAUDIA METELLI 9
A generalization of the Wedderburn-Artin theorem. By S. K. JAIN and LÓPEZ-PERMOUTH. 19
The normal index of a maximal subgroup of a finite group. By N. P. MUKHERJEE and PRABIR BHATTACHARYA 25
Degrees of irreducible characters and normal p-complements. By YA. G. BERKOVICH 33
Hyperplane sections of weakly normal varieties in positive characteristic. By CATERINA CUMINO, SILVIO GRECO and MIRELLA MANARESI 37
On the primitivity of group rings of amalgamated free products. By BOLA O. BALOGUN .. 43
Hochschild and cyclic homology are far from being homotopy functors. By S. GELLER and C. WEIBEL 49
On the monotonicity of the permanent. By SUK GEUN HWANG 59
Minimal models of nilmanifolds. By KEIZO HASEGAWA 65
Even quadratic forms with cube-free discriminant. By DONALD G. JAMES 73
On the arithmetic of weight spaces in the root lattice. By ROBERT W. DECKHART 81
On inner automorphisms of finite groups. By MARTIN R. PETTET 87
Prime length of crossed products. By CHARLES C. WELSH 91

B. ANALYSIS

Automorphisms of Grassmannians. By MICHAEL J. COWEN 99
Existence of multiple periodic solutions for a semilinear evolution equation. By NORIMICHI HIRANO 107
The coefficients of Nevanlinna's parametrization are not in H^p. By A. NICOLAU 115
A semi-Fredholm principle for periodically forced systems with homogeneous nonlinearities. By A. C. LAZER and P. J. MCKENNA 119
Regularity of mappings of G-structures of Frobenius type. By CHONG KYU HAN 127
An application of Hadamard-Lévy's theorem to a scalar initial value problem. By SORIN RÁDULESCU and MARIUS RÁDULESCU 139
Convolution properties of a class of starlike functions. By RAM SINGH and SUKHJIT SINGH 145
Approximation by polynomials with locally geometric rates. By K. G. IVANOV, E. B. SAFF and V. TOTIK 153
Sieved orthogonal polynomials and discrete measures with jumps dense in an interval. By WALTER VAN ASSCHE and ALPHONSE P. MAGNUS 163
Some special 2-generator Kleinian groups. By BERNARD MASKIT 175
A semigroup treatment of a one dimensional nonlinear parabolic equation. By HISAMITSU SERIZAWA 187

E. LOGIC AND FOUNDATIONS

Définissabilité avec paramètres extérieurs dans Q_p et $\mathbf{R}$. By FRANÇOISE DELON 193
Generic families and models of set theory with the axiom of choice. By KRZYSZTOF CIESIELSKI and WOJCIECH GUZICKI 199

G. TOPOLOGY

Virtually regular coverings. By M. T. LOZANO and C. SAFONT 207
Scattered spaces and the class MOBI. By H. R. BENNETT and J. CHABER 215
Compactifications with almost locally compact outgrowth. By MARLON C. RAYBURN 223
Refinable maps and θ_n-continua. By E. E. GRACE and ELDON J. VOUGHT 231

(*Continued on inside back cover*)
