Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

Editorial Policy

To be published in the Proceedings, a paper must be correct, new, nontrivial and significant. Further, it must be well written and of interest to a substantial number of mathematicians. Piecemeal results, such as an inconclusive step toward an unproved major theorem or a minor variation on a known result, are in general not acceptable for publication. Proceedings Editors shall solicit, and encourage publication of, worthy papers of length not exceeding 15 typed pages.

Very short notes not to exceed two printed pages are also accepted, and appear under the heading Shorter notes. Items deemed suitable include an elegant new proof of an important and well-known theorem, an illuminating example or counterexample, or a new viewpoint on familiar results. New results, if of a brief and striking character, might also be acceptable, though in general a paper which is merely very short will not be suitable for the Shorter notes department.

On January 23, 1979, the Council of the American Mathematical Society abolished blind refereeing as a policy for the Proceedings, but decided that any author who so requests and who provides a blind copy of a manuscript will have the manuscript refereed blind.

Two copies of a manuscript should be submitted. If blind refereeing is intended, one should be complete and one blind, and then the latter will be sent to the referee without disclosure of the author's name or institution.

SUBSCRIPTION INFORMATION. PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published monthly. Subscription prices for Volumes 108–110 (1990) are $432 list; $346 institutional member; $259 individual member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of $25: subscribers in India must pay a postage surcharge of $38. Expedited delivery to destinations in North America—$30; elsewhere—$67. Combination paper and microfiche subscription prices are $575 list; $460 institutional member. Microfiche of each issue will be mailed the fastest way possible before the camera copy is sent to the printer. Microfilm subscriptions may be purchased from University Microfilms International, 300 North Zeeb Road, Ann Arbor, Michigan 48106.

BACK NUMBER INFORMATION. Back number prices per volume are for Volumes 1–89, $117 list, $93 institutional: for Volumes 90–92, $134 list, $107 institutional member; for Volumes 93–95, $179 list; $143 institutional member; for Volumes 96–98, $198 list; $158 institutional members; for Volumes 99–104, $209 list; $168 institutional member; for Volumes 105–107, $214 list; $171 institutional member.

Subscriptions and orders for publications of the American Mathematical Society should be addressed to American Mathematical Society, P. O. Box 1571, Annex Station, Providence, R. I. 02901-1571. All orders must be accompanied by payment. Other correspondence should be addressed to P. O. Box 6248, Providence, R. I. 02940-6248.

PROCEEDINGS of the American Mathematical Society is published monthly by the American Mathematical Society at 201 Charles Street, Providence, R. I. 02904-2213. Second-class postage is paid at Providence, Rhode Island. Postmaster: Send address changes to PROCEEDINGS, American Mathematical Society, P. O. Box 6248, Providence, R. I. 02940-6248.

Information on Copying and Reprinting can be found at the back of this journal.

The paper used in this journal is acid-free and falls within the guidelines established to ensure permanence and durability. 

This publication was typeset using AMSTeX, the American Mathematical Society's TeX macro system.
Manuscript Information

1. Articles submitted for publication should be typewritten, double spaced, and no more than 15 (8½" x 11") pages long. The Manual for Authors, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand drawn symbols are satisfactory, if clearly done; directions to the printer should be included where necessary on a separate sheet. Authors must keep complete copies of their manuscripts, and editors will acknowledge receipt. To encourage the submission of manuscripts in electronic form using \TeX and the \LaTeX macro package, the Executive Committee of the Council has adopted a policy that allows for accelerating the publication date of such manuscripts by as much as 20 weeks, which is approximately equal to the time normally needed by the Society for copyediting, typesetting, and proofreading an average manuscript.

2. The first page should consist of a descriptive title, followed by an abstract which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The descriptive title should be short, but informative; useless or vague phrases such as “some remarks about” or “concerning” should be avoided. The abstract should be at least one complete sentence, and at most 150 words. Included with the footnotes to the paper, but placed before the first footnote, there should be first the 1980 Mathematics Subject Classification (1985 Revision) representing the primary and secondary subjects of the article. This may be followed by a list of key words and phrases describing the subject matter of the article and taken from it. A list of the numbers may be found in the annual subject index of Mathematical Reviews, published with the December issue starting in 1984.

3. A Copyright Transfer Agreement is required before a paper will be published in the Proceedings. A copy of the form is sent with the acknowledgement of receipt of manuscript from the Providence office of the Society. Authors are urged to return the forms immediately to prevent delays in processing and publishing of the manuscript.

OFFPRINTS AND ADDRESS CHANGES. Any inquiries concerning a paper which has been accepted for publication, including information regarding offprints or changes of address for mailing proof, should be sent directly to the Editorial Department, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940-6248.

GALLEY PROOF. When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate on the original manuscript which of them should receive galley proof in the event that the manuscript is accepted for publication.

BACKLOG. 150 pages. Papers currently being accepted by the editors will be published in 12-14 months.

COPYING AND REPRINTING. Individual readers of this publication, and nonprofit libraries acting for them are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given. Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940-6248.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 27 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.
Submission of Manuscript

Send papers directly to one of the editors listed under the subject field of the paper. The numbers in parentheses are the first two digits of major classification from the 1980 Mathematics Subject Classification (1985 Revision) and describe the fields being handled by the editor.

## CONTENTS

**Vol. 108, No. 2**  
**February 1990**  
**Whole No. 368**

### A. ALGEBRA AND NUMBER THEORY

- On automorphisms of free pro-$p$-groups I.  
  By Wolfgang N. Herfort and Luis Ribes  
  287
- Splitting theorem for homology of $GL(R)$.  
  By Stanislaw Betley  
  297
- Consecutive units.  
  By Morris Newman  
  303
- Multiplicative functions on arithmetic progressions.  
  By Adolf Hildebrand  
  307
- Zeros of differentials along one-fibered ideals.  
  By R. Fedder, C. Huneke and R. Hüb  
  319
- Integral group rings with trivial central units.  
  By Jürgen Ritter and Sudarshan K. Sehgal  
  327
- Generating functions for the numbers of abelian extensions of a local field.  
  By Artur Travesa  
  331

### B. ANALYSIS

- Nevanlinna-Pick interpolation on Sobolev space.  
  By Jim Agler  
  341
- Complete monotonicity of modified Bessel functions.  
  By Mourad E. H. Ismail  
  353
- Embedding subspaces of $L_1$ into $l_1^N$.  
  By Michel Talagrand  
  363
- A measure which is singular and uniformly locally uniform.  
  By David Freedman and Jim Pitman  
  371
- A note on Tong paper: The asymptotic behavior of a class of nonlinear differential equations of second order.  
  By Fan Wei Meng  
  383
- Monotonicity in terms of order of the zeros of the derivatives of Bessel functions.  
  By Lee Lorch  
  387
- Differentiable restrictions of real functions.  
  By Jack B. Brown  
  391
- Characterizations of Tauberian operators and other semigroups of operators.  
  By M. Gonzalez and V. M. Onieva  
  399
- A remark on a paper by C. Fefferman.  
  By Filippo Chiarenza and Michele Frasca  
  407
- Wiener transformation on functions with bounded averages.  
  By Yong-Zhuo Chen and Ka-Sing Lau  
  411
- Real analytic boundary regularity of the Cauchy kernel on convex domains.  
  By So-Chin Chen  
  423
- Almost everywhere convergence of Vilenkin-Fourier series of $H^1$ functions.  
  By Wo-Sang Young  
  433
- Compact composition operators on $L^1$.  
  By Joel H. Shapiro and Carl Sundberg  
  443
- On two function spaces which are similar to $L_0$.  
  By S. J. Dilworth and D. A. Trautman  
  451
- Harmonic functions having no tangential limits.  
  By Hiroaki Aikawa  
  457
- $L^\infty$-BMO boundedness for a singular integral operator.  
  By Javad Namazi  
  465
- Functional representation of vector lattices.  
  By Isidore Fleischer  
  471
- On the modulus of cone absolutely summing operators and vector measures of bounded variation.  
  By Boris Lavrić  
  479

### D. GEOMETRY

- A characterization of compact surfaces with constant mean curvature.  
  By Masaaki Umehara  
  483
- A remark on the Gromov convergence theorem.  
  By Yukio Otsu  
  491
- On asymptotic behavior of the mass of rays.  
  By Takashi Shioya  
  495

### E. LOGIC AND FOUNDATIONS

- On Sierpinski sets.  
  By Tomek Bartoszynski and Haim Judah  
  507

### G. TOPOLOGY

- Paracompact product spaces defined by ultrafilters over the index set.  
  By L. Brian Lawrence  
  513

(Continued on inside back cover)
