Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

Editorial Policy

To be published in the Proceedings, a paper must be correct, new, nontrivial and significant. Further, it must be well written and of interest to a substantial number of mathematicians. Piecemeal results, such as an inconclusive step toward an unproved major theorem or a minor variation on a known result, are in general not acceptable for publication. Proceedings Editors shall solicit, and encourage publication of, worthy papers of length not exceeding 15 typed pages.

Very short notes not to exceed two printed pages are also accepted, and appear under the heading SHORTER NOTES. Items deemed suitable include an elegant new proof of an important and well-known theorem, an illuminating example or counterexample, or a new viewpoint on familiar results. New results, if of a brief and striking character, might also be acceptable, though in general a paper which is merely very short will not be suitable for the SHORTER NOTES department.

On January 23, 1979, the Council of the American Mathematical Society abolished blind refereeing as a policy for the Proceedings, but decided that any author who so requests and who provides a blind copy of a manuscript will have the manuscript refereed blind.

Two copies of a manuscript should be submitted. If blind refereeing is intended, one should be complete and one blind, and then the latter will be sent to the referee without disclosure of the author's name or institution.

SUBSCRIPTION INFORMATION. PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published monthly. Subscription prices for Volumes 108-110 (1990) are $432 list; $346 institutional member; $259 individual member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of $25: subscribers in India must pay a postage surcharge of $38. Expedited delivery to destinations in North America—$30; elsewhere—$67. Combination paper and microfiche subscription prices are $575 list; $460 institutional member. Microfiche of each issue will be mailed the fastest way possible before the camera copy is sent to the printer. Microfilm subscriptions may be purchased from University Microfilms International, 300 North Zeeb Road, Ann Arbor, Michigan 48106.

BACK NUMBER INFORMATION. Back number prices per volume are for Volumes 1-89, $117 list, $93 institutional; for Volumes 90-92, $134 list; $107 institutional member; for Volumes 93-95, $179 list; $143 institutional member; for Volumes 96-98, $198 list; $158 institutional members; for Volumes 99-104, $209 list; $168 institutional member; for Volumes 105-107, $214 list; $171 institutional member.

Subscriptions and orders for publications of the American Mathematical Society should be addressed to American Mathematical Society, P. O. Box 1571, Annex Station, Providence, R. I. 02901-1571. All orders must be accompanied by payment. Other correspondence should be addressed to P. O. Box 6248, Providence, R. I. 02940-6248.

PROCEEDINGS of the American Mathematical Society is published monthly by the American Mathematical Society at 201 Charles Street, Providence, R. I. 02904-2213. Second-class postage is paid at Providence, Rhode Island. Postmaster: Send address changes to PROCEEDINGS, American Mathematical Society, P. O. Box 6248, Providence, R. I. 02940-6248.

Information on Copying and Reprinting can be found at the back of this journal.

The paper used in this journal is acid-free and falls within the guidelines established to ensure permanence and durability. 

This publication was typeset using \AMS-\TeX, the American Mathematical Society's \TeX macro system.
Manuscript Information

1. Articles submitted for publication should be typewritten, double spaced, and no more than 15 (8½" x 11") pages long. The Manual for Authors, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand drawn symbols are satisfactory, if clearly done; directions to the printer should be included where necessary on a separate sheet. Authors must keep complete copies of their manuscripts, and editors will acknowledge receipt. To encourage the submission of manuscripts in electronic form using \TeX{} and the \texttt{AMS-\TeX} macro package, the Executive Committee of the Council has adopted a policy that allows for accelerating the publication date of such manuscripts by as much as 20 weeks, which is approximately equal to the time normally needed by the Society for copyediting, typesetting, and proofreading an average manuscript.

2. The first page should consist of a descriptive title, followed by an abstract which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The descriptive title should be short, but informative; useless or vague phrases such as “some remarks about” or “concerning” should be avoided. The abstract should be at least one complete sentence, and at most 150 words. Included with the footnotes to the paper, but placed before the first footnote, there should be first the 1980 Mathematics Subject Classification (1985 Revision) representing the primary and secondary subjects of the article. This may be followed by a list of key words and phrases describing the subject matter of the article and taken from it. A list of the numbers may be found in the annual subject index of Mathematical Reviews, published with the December issue starting in 1984.

3. A Copyright Transfer Agreement is required before a paper will be published in the Proceedings. A copy of the form is sent with the acknowledgement of receipt of manuscript from the Providence office of the Society. Authors are urged to return the forms immediately to prevent delays in processing and publishing of the manuscript.

OFFPRINTS AND ADDRESS CHANGES. Any inquiries concerning a paper which has been accepted for publication, including information regarding offprints or changes of address for mailing proof, should be sent directly to the Editorial Department, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940-6248.

GALLEY PROOF. When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate on the original manuscript which of them should receive galley proof in the event that the manuscript is accepted for publication.

BACKLOG. 150 pages. Papers currently being accepted by the editors will be published in 12–14 months.

COPYING AND REPRINTING. Individual readers of this publication, and nonprofit libraries acting for them are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940-6248.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 27 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.
Submission of Manuscript

Send papers directly to one of the editors listed under the subject field of the paper. The numbers in parentheses are the first two digits of major classification from the 1980 Mathematics Subject Classification (1985 Revision) and describe the fields being handled by the editor.

A. ALGEBRA AND NUMBER THEORY

The diophantine equation $f(x) = g(y)$. By Todd Cochrane .......................... 573
Two families of stable bundles with the same spectrum. By A. P. Rao .................. 579
Growth functions for residually torsion-free nilpotent groups. By Roger C. Alperin and
Brian L. Peterson .................. 585
On theta pairs for a maximal subgroup. By N. P. Mukherjee and Prabir Bhattacharya
Evaluation of the infinite series $\sum_{n=1}^{\infty} \left(\frac{a}{p}\right) n^{-1}$. By Kenneth Hardy and
Kenneth S. Williams .................. 597
Priestley spaces. By P. Venugopalan .................. 605
The relative form of Gersten's conjecture for power series over a complete discrete valuation
ring. By L. Reid and C. Sherman .................. 611
Unique subwords in nonperiodic words. By C. M. Weinbaum .................. 615
Modular extensions. By Shizuka Sato .................. 621
Nodal quintic threefolds and nodal octic surfaces. By Ciprian Borcea .................. 627
$t$-linked overrings as intersections of localizations. By David E. Dobbs, Evan G. Houston,
Thomas G. Lucas, and Muhammad Zafrullah .................. 637
Hall subgroup normalizers and character correspondences in $M$-groups. By I. M. Isaacs

B. ANALYSIS

Periodic solutions for nonlinear evolution equations in a Banach space. By Ioan I. Vrabie
The converse of the Minkowski's inequality theorem and its generalization. By Janusz Matkowski
Weak convergence and weak compactness for multifunctions with values in a separable
Banach space. By Nikolaos S. Papageorgiou .................. 677
The Haagerup type cross norm on $C^*$-algebras. By Takashi Itoh .................. 689
The operator inequality $P \leq A^* A$. By B. P. Duggal .................. 697
Topological rationalization of a class of meromorphic functions. By A. Meziani .................. 699
Commutativity in operator algebras. By David P. Blecher .................. 709
A property of purely infinite simple $C^*$-algebras. By Shuang Zhang .................. 717
Hilbert-Schmidt Hankel operators on the Bergman space. By Kehe Zhu .................. 721
An extreme absolutely continuous $RP$-measure. By John N. McDonald .................. 731
Descriptions of nest algebras. By M. Anousis and E. G. Katzouli{s} .................. 739
When does $ca(\Sigma, X)$ contain a copy of $l_\infty$ or $c_0$? By Lech Drewnowski .................. 747
Spectral pictures of hyponormal bilateral operator weighted shifts. By Domingo A. Herrero
Geometric finiteness of certain Kleinian groups. By G. P. Scott and G. A. Swarup 753
Nonoscillatory solutions of second order differential equations with integrable coefficients.
By Manabu Naito .................. 765
Hypercompletions of Riesz spaces. By Wolfgang Filter .................. 775
Stable rank of subalgebras of the ball algebras. By Rudolf Rupp 781

D. GEOMETRY

Lower bounds for the extrinsic total curvatures of a space-like codimension 2 surface in
Minkowski space. By Marek Kossowski .................. 787
Minimal shell of a typical convex body. By Andreana Zucco .................. 787
Multiplier groups of planar difference sets and a theorem of Kantor. By Chat Yin Ho
and Alexander Pott .................. 803

E. LOGIC AND FOUNDATIONS

Lifting theorems in nonstandard measure theory. By David Ross 809
