Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

Editorial Policy

To be published in the Proceedings, a paper must be correct, new, nontrivial and significant. Further, it must be well written and of interest to a substantial number of mathematicians. Piecemeal results, such as an inconclusive step toward an unproved major theorem or a minor variation on a known result, are in general not acceptable for publication. Proceedings Editors shall solicit, and encourage publication of, worthy papers of length not exceeding 16 (8½" × 11") typewritten, double-spaced pages. If $\TeX$ or a similar system is used, submitted manuscripts should not exceed 10 $\AmS\TeX$ preprint style or $\AmS\LaTeX$ article style pages.

Very short notes not to exceed two printed pages are also accepted, and appear under the heading Shorter Notes. Items deemed suitable include an elegant new proof of an important and well-known theorem, an illuminating example or counterexample, or a new viewpoint on familiar results. New results, if of a brief and striking character, might also be acceptable, though in general a paper which is merely very short will not be suitable for the Shorter Notes department.

On January 23, 1979, the Council of the American Mathematical Society abolished blind refereeing as a policy for the Proceedings, but decided that any author who so requests and who provides a blind copy of a manuscript will have the manuscript refereed blind.

Two copies of a manuscript should be submitted. If blind refereeing is intended, one should be complete and one blind, and then the latter will be sent to the referee without disclosure of the author's name or institution.

Subscription Information. PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published monthly. Subscription prices for Volumes 111–113 (1991) are $470 list; $376 institutional member; $282 individual member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of $25: subscribers in India must pay a postage surcharge of $38. Expedited delivery to destinations in North America—$33; elsewhere—$90. Combination paper and microfiche subscription prices are $625 list; $501 institutional member. Microfiche of each issue will be mailed the fastest way possible before the camera copy is sent to the printer. Microfilm subscriptions may be purchased from University Microfilms International, 300 North Zeeb Road, Ann Arbor, Michigan 48106.

BACK NUMBER INFORMATION. Back number prices per volume are for Volumes 1–89, $124 list, $99 institutional; for Volumes 90–92, $142 list; $114 institutional member; for Volumes 93–95, $190 list; $152 institutional member; for Volumes 96–98, $210 list; $168 institutional members; for Volumes 99–104, $222 list; $178 institutional member; for Volumes 105–107, $227 list; $182 institutional member; for Volumes 108–110, $216 list; $173 institutional member.

Subscriptions and orders for publications of the American Mathematical Society should be addressed to American Mathematical Society, P. O. Box 1571, Annex Station, Providence, R. I. 02901-1571. All orders must be accompanied by payment. Other correspondence should be addressed to P. O. Box 6248, Providence, R. I. 02940-6248.

PROCEEDINGS of the American Mathematical Society is published monthly by the American Mathematical Society at 201 Charles Street, Providence, R. I. 02904-2213. Second-class postage is paid at Providence, Rhode Island. Postmaster: Send address changes to PROCEEDINGS, American Mathematical Society, P. O. Box 6248, Providence, R. I. 02940-6248.

Information on Copying and Reprinting can be found at the back of this journal.

The paper used in this journal is acid-free and falls within the guidelines established to ensure permanence and durability. This publication was typeset using $\AmS\TeX$, the American Mathematical Society's $\TeX$ macro system.
Manuscript Information

1. Articles submitted for publication should be no more than 16 (8½" × 11") typewritten, double-spaced pages. If TeX or a similar system is used, submitted manuscripts should not exceed 10 AMS-TeX preprint style or AMS-LaTeX article style pages. The Manual for Authors, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand drawn symbols are satisfactory, if clearly done; directions to the printer should be included where necessary on a separate sheet. Authors must keep complete copies of their manuscripts, and editors will acknowledge receipt. To encourage the submission of manuscripts in electronic form using TeX and the AMS-TeX macro package, the Executive Committee of the Council has adopted a policy that allows for accelerating the publication date of such manuscripts by as much as 20 weeks, which is approximately equal to the time normally needed by the Society for copyediting, typesetting, and proofreading an average manuscript.

2. The first page must consist of a descriptive title, followed by an abstract which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The descriptive title should be short, but informative; useless or vague phrases such as "some remarks about" or "concerning" should be avoided. The abstract should be at least one complete sentence, and at most 150 words. Included with the footnotes to the paper, but placed before the first footnote, there should be first the 1991 Mathematics Subject Classification representing the primary and secondary subjects of the article. This may be followed by a list of key words and phrases describing the subject matter of the article and taken from it. A list of the numbers may be found in the annual subject index of Mathematical Reviews, published with the December issue starting in 1990.

3. A Copyright Transfer Agreement is required before a paper will be published in the Proceedings. A copy of the form is sent with the acknowledgement of receipt of manuscript from the Providence office of the Society. Authors are urged to return the forms immediately to prevent delays in processing and publishing of the manuscript.

OFFPRINTS AND ADDRESS CHANGES. Any inquiries concerning a paper which has been accepted for publication, including information regarding offprints or changes of address for mailing proof, should be sent directly to the Editorial Department, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940-6248.

GALLEY PROOF. When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate on the original manuscript which of them should receive galley proof in the event that the manuscript is accepted for publication.

BACKLOG. Papers currently being accepted by the editors will be published in 12–14 months.

COPYING AND REPRINTING. Individual readers of this publication, and nonprofit libraries acting for them are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Manager of Editorial Services, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940-6248.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 27 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.
Submission of Manuscript

Send papers directly to one of the editors listed under the subject field of the paper. The numbers in parentheses are the first two digits of major classification from the 1991 Mathematics Subject Classification and describe the fields being handled by the editor.

LOGIC AND FOUNDATIONS (03 04)
Andreas R. Blass, Department of Mathematics, University of Michigan, Ann Arbor, Michigan 48109-1003

COMBINATORICS, COMPUTER SCIENCE, AND INFORMATION THEORY (05 15 68 94)
Jeffry N. Kahn, Department of Mathematics, Rutgers University, New Brunswick, New Jersey 08903

COMMUTATIVE ALGEBRA (06 12 13 14 15 18)
Louis J. Ratliff, Jr., Department of Mathematics, University of California, Riverside, California 92502

NUMBER THEORY AND K-THEORY (11 19)
William Adams, Department of Mathematics, University of Maryland, College Park, Maryland 20742

GENERAL ALGEBRA (16 17 18 08)
Maurice Auslander, Department of Mathematics, Brandeis University, P.O. Box 9110, Waltham, Massachusetts 02254-9110

GROUP THEORY (20)
Ronald M. Solomon, Department of Mathematics, Ohio State University, Columbus, Ohio 43210

REAL VARIABLES (26 28 40)
Andrew M. Bruckner, Department of Mathematics, University of California, Santa Barbara, California 93106

COMPLEX VARIABLES (30 31 32)
Clifford J. Earle Jr., Cornell University, White Hall, Ithaca, New York 14853

ORDINARY DIFFERENTIAL EQUATIONS AND DYNAMICAL SYSTEMS (33 34 39 49 58)
Charles Pugh, Department of Mathematics, University of California at Berkeley, Berkeley, California 94720

PARTIAL DIFFERENTIAL EQUATIONS (35 49 53)
Barbara L. Keyfitz, Department of Mathematics, University of Houston, Houston, Texas 77204-3476

GENERAL ANALYSIS (31 41 42 43 44 45)
J. Marshall Ash, Department of Mathematics, DePaul University, Chicago, Illinois 60614

FUNCTIONAL ANALYSIS AND OPERATOR THEORY (46 47)
Palle E. T. Jorgensen, University of Iowa, Iowa City, Iowa 52242

FUNCTIONAL ANALYSIS AND CONVEXITY (46 52)
William J. Davis, Department of Mathematics, Ohio State University, Columbus, Ohio 43210

LIE GROUPS AND GEOMETRY (22 51 53)
Jonathan M. Rosenberg, Department of Mathematics, University of Maryland, College Park, Maryland 20742

GLOBAL ANALYSIS AND PARTIAL DIFFERENTIAL EQUATIONS ON MANIFOLDS (53 58)
Peter Li, Department of Mathematics, University of Arizona, Tucson, Arizona 85721

SET THEORETIC AND GENERAL TOPOLOGY (54)
Franklin D. Tall, Department of Mathematics, University of Toronto, Ontario M5S 1A1, Canada

METRIC AND GEOMETRIC TOPOLOGY (54 57)
James E. West, Department of Mathematics, Cornell University, Ithaca, New York 14853

ALGEBRAIC AND DIFFERENTIAL TOPOLOGY (55 58)
Frederick R. Cohen, Department of Mathematics, University of Rochester, Rochester, New York 14627

PROBABILITY AND CERTAIN OTHER FIELDS (60–94 inclusive)
Lawrence F. Gray, Department of Mathematics, University of Minnesota, Minneapolis, Minnesota 55455

George C. Papanicolaou, Applied Mathematics Division, Courant Institute, New York University, 251 Mercer Street, New York, New York 10012

All other communications should be addressed to the Managing Editor, Irwin Kra, Department of Mathematics, State University of New York at Stony Brook, Stony Brook, New York 11794-3651.
CONTENTS—Continued from back cover

D. GEOMETRY

A local classification of 2-type surfaces in $S^3$. By Th. Hasanis and Th. Vlachos 533
New complete genus zero minimal surfaces with embedded parallel ends. By Francisco J. Lopez 539
Harmonic two-forms in four dimensions. By Walter Seaman 545
Self-similar sets 5. Integer matrices and fractal tilings of $\mathbb{R}^n$. By Christoph Bandt 549
The soul at infinity in dimension 4. By Gerard Walschap 563

E. LOGIC AND FOUNDATIONS

Ordered rings over which output sets are recursively enumerable sets. By Christian Michaux 569
A remark on incomparable ultrafilters in the Rudin-Keisler order. By Eva Butkovičová 577

F. STATISTICS AND PROBABILITY

Sharp maximal inequalities for conditionally symmetric martingales and Brownian motion. By Gang Wang 579

G. TOPOLOGY

A congruence for the signature of an embedded manifold. By Robert D. Little 587
$\alpha$-invariant and $S^1$ actions. By Kaoru Ono 597

SHORTER NOTES

A remark on a paper of Ji-Shou. By Patrick M. Fitzpatrick and Seymour Goldberg 601
On measurable local homomorphisms. By Zoltán Sasvári 603
CONTENTS

Vol. 112, No. 2       June 1991       Whole No. 384

A.  ALGEBRA AND NUMBER THEORY

Good approximations and continued fractions.
By Cor Kraaikamp and Pierre Liardet ........................................ 303

On purity of inertia.  By David Harbater ................................. 311

On indecomposable modules over directed algebras.  By Peter Dräxler .... 321

Some trigonometric identities related to exact covers.
By John Beebee ......................................................... 329

Interpretations into $p$-algebras.
By O. Cartagena, C. González, R. Lewin, and O. Rubilar ............... 339

Points not as hyperplane sections of projectively normal curves.  By Edoardo Ballico . 343

Bielliptic curves and symmetric products.  By Joe Harris and Joe H. Silverman .... 347

Generating finite completely reducible linear groups.
By L. G. Kovács and Geoffrey R. Robinson .............................. 357

Additive properties of multiplicative subgroups of finite index in fields.
By Pedro Berrizbeitia .................................................. 365

B.  ANALYSIS

Lebesgue’s theorem of differentiation in Fréchet lattices.
By Karl-Goswin Grosse-Erdmann ........................................... 371

Dimension of certain kernel spaces of linear operators.  By Zuowei Shen ......... 381

Multiplicity theory and the outer boundary.  By John S. Spraker .......... 391

Weighted decay estimate for the wave equation.
By Valery Covachev and Vladimir Georgiev ................................ 393

Hypersurfaces in $\mathbb{R}^n$ whose unit normal has small BMO norm.
By Stephen Semmes ..................................................... 403

A class of absolute retracts in spaces of integrable functions.
By Alberto Bressan, Arrigo Cellina, and Andrzej Fryszkowski ....... 413

A symbolic calculus for layer potentials on $C^1$ curves and $C^1$ curvilinear polygons.
By Jeff E. Lewis .................................................................. 419

Note on a theorem of Avakumović.  By J. L. Geluk .......................... 429

A growth condition for Fourier coefficients of functions of bounded entropy norm.
By W. Christopher Lang .................................................... 433

Homogeneous Fourier multipliers in the plane.
By Javier Duoandikoetxea and Adela Moyua .................................. 441

On the evaluation of spectral projections onto absolutely continuous parts of a contraction.
By Alexey V. Rybkin ....................................................... 451

Local spectrum and generalized spectrum.  By Mostafa Mbekhta ......... 457

Some properties of noncommutative $H^1$ spaces.  By Alvaro Arias ........ 465

A note on the quenching rate.  By Marek Fila and Josephus Hulshof ...... 473

Conditional analytic Feynman integrals on abstract Wiener spaces.
By Dong Myung Chung ..................................................... 479

Finiteness of the lower spectrum of Schrödinger operators with singular potentials.
By Jörg Donig .............................................................. 489

Common fixed points in hyperbolic Riemann surfaces and convex domains.
By Marco Abate and Jean-Pierre Vigué ..................................... 503

Higher monotonicity properties and inequalities for zeros of Bessel functions.
By Laura Nicolò-Amati Gori, Andrea Laforgia, and Martin E. Muldoon ... 513

Finite order vanishing of boundary values of holomorphic mappings.
By Mitja Lakner .............................................................. 521

Array convergence of functions of the first Baire class.
By Helmut Knaust ........................................................... 529

(Continued on inside back cover)
