Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

Editorial Policy

To be published in the Proceedings, a paper must be correct, new, nontrivial and significant. Further, it must be well written and of interest to a substantial number of mathematicians. Piecemeal results, such as an inconclusive step toward an unproved major theorem or a minor variation on a known result, are in general not acceptable for publication. Proceedings Editors shall solicit, and encourage publication of, worthy papers of length not exceeding 16 (8 1/2" x 11") typewritten, double-spaced pages. If TeX or a similar system is used, submitted manuscripts should not exceed 10 \text{AMS-\TeX} preprint style or \text{AMS-\LaTeX} article style pages.

Very short notes not to exceed two printed pages are also accepted, and appear under the heading Shorter notes. Items deemed suitable include an elegant new proof of an important and well-known theorem, an illuminating example or counterexample, or a new viewpoint on familiar results. New results, if of a brief and striking character, might also be acceptable, though in general a paper which is merely very short will not be suitable for the Shorter notes department.

On January 23, 1979, the Council of the American Mathematical Society abolished blind refereeing as a policy for the Proceedings, but decided that any author who so requests and who provides a blind copy of a manuscript will have the manuscript refereed blind.

Two copies of a manuscript should be submitted. If blind refereeing is intended, one should be complete and one blind, and then the latter will be sent to the referee without disclosure of the author's name or institution.

SUBSCRIPTION INFORMATION. PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published monthly. Subscription prices for Volumes 111–113 (1991) are $470 list; $376 institutional member; $282 individual member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of $25: subscribers in India must pay a postage surcharge of $38. Expedited delivery to destinations in North America—$33; elsewhere—$90. Combination paper and microfiche subscription prices are $625 list; $501 institutional member. Microfiche of each issue will be mailed the fastest way possible before the camera copy is sent to the printer. Microfilm subscriptions may be purchased from University Microfilms International, 300 North Zeeb Road, Ann Arbor, Michigan 48106.

BACK NUMBER INFORMATION. Back number prices per volume are for Volumes 1–89, $124 list, $99 institutional; for Volumes 90–92, $142 list; $114 institutional member; for Volumes 93–95, $190 list; $152 institutional member; for Volumes 96–98, $210 list; $168 institutional members; for Volumes 99–104, $227 list; $182 institutional member; for Volumes 105–107, $227 list; $182 institutional member; for Volumes 108–110, $216 list; $173 institutional member.

Subscriptions and orders for publications of the American Mathematical Society should be addressed to American Mathematical Society, P. O. Box 1571, Annex Station, Providence, R. I. 02901-1571. All orders must be accompanied by payment. Other correspondence should be addressed to P. O. Box 6248, Providence, R. I. 02940-6248.

PROCEEDINGS of the American Mathematical Society is published monthly by the American Mathematical Society at 201 Charles Street, Providence, R. I. 02904-2213. Second-class postage is paid at Providence, Rhode Island. Postmaster: Send address changes to PROCEEDINGS, American Mathematical Society, P. O. Box 6248, Providence, R. I. 02940-6248.

Additive properties of multiplicatively subgroups of finite index in fields.
By Pedro Berrizbeitia .............................................................. 365

B. ANALYSIS

Lebesgue’s theorem of differentiation in Fréchet lattices.
By Karl-Goswin Grosse-Erdmann .................................................. 371
Dimension of certain kernel spaces of linear operators. By Zuowei Shen ............... 381
Multiplicity theory and the outer boundary. By John S. Spraker ....................... 391
Weighted decay estimate for the wave equation.  
By Valéry Covachev and Vladimir Georgiev .......................... 393

Hypersurfaces in $\mathbb{R}^n$ whose unit normal has small BMO norm.  
By Stephen Semmes .......................... 403

A class of absolute retracts in spaces of integrable functions.  
By Alberto Bressan, Arrigo Cellina, and Andrzej Fryszkowski ............. 413

A symbolic calculus for layer potentials on $C^1$ curves and $C^1$ curvilinear polygons.  
By Jeff E. Lewis .................................................. 419

Note on a theorem of Avakumović. By J. L. Geluk .................. 429

A growth condition for Fourier coefficients of functions of bounded entropy norm.  
By W. Christopher Lang ........................................... 433

Homogeneous Fourier multipliers in the plane.  
By Javier Duoandikoetxea and Adela Moyua .......................... 441

On the evaluation of spectral projections onto absolutely continuous parts of a contraction.  
By Alexey V. Rybkin ................................................. 451

Local spectrum and generalized spectrum. By Mostafa Mbekhta ........ 457

Some properties of noncommutative $H^1$ spaces. By Alvaro Arias .... 465

A note on the quenching rate. By Marek Fila and Josephus Hulshof .... 473

Conditional analytic Feynman integrals on abstract Wiener spaces.  
By Dong Myung Chung ............................................. 479

Finiteness of the lower spectrum of Schrödinger operators with singular potentials.  
By Jörg Donig ...................................................... 489

Common fixed points in hyperbolic Riemann surfaces and convex domains.  
By Marco Abate and Jean-Pierre Vigué .................................. 503

Higher monotonicity properties and inequalities for zeros of Bessel functions.  
By Laura Nicolò-Amati Gori, Andrea Laforgia, and Martin E. Muldoon 513

Finite order vanishing of boundary values of holomorphic mappings. By Mitja Lakner 521

Array convergence of functions of the first Baire class. By Helmut Knaust 529

D. GEOMETRY

A local classification of 2-type surfaces in $S^3$. By Th. Hasanis and Th. Vlachos .... 533

New complete genus zero minimal surfaces with embedded parallel ends.  
By Francisco J. Lopez ............................................. 539

Harmonic two-forms in four dimensions. By Walter Seaman ................ 545

Self-similar sets 5. Integer matrices and fractal tilings of $\mathbb{R}^n$. By Christoph Bandt .... 549

The soul at infinity in dimension 4. By Gerard Walschap ................ 563

E. LOGIC AND FOUNDATIONS

Ordered rings over which output sets are recursively enumerable sets.  
By Christian Michaux ............................................. 569

A remark on incomparable ultrafilters in the Rudin-Keisler order. By Eva Butkovičová .... 577

F. STATISTICS AND PROBABILITY

Sharp maximal inequalities for conditionally symmetric martingales and Brownian motion.  
By Gang Wang ...................................................... 579

G. TOPOLOGY

A congruence for the signature of an embedded manifold. By Robert D. Little .... 587

$\alpha$-invariant and $S^1$ actions. By Kaoru Ono ............................................. 597

SHORTER NOTES

A remark on a paper of Ji-Shou. By Patrick M. Fitzpatrick and Seymour Goldberg .... 601

On measurable local homomorphisms. By Zoltán Sasvári .......................... 603
A. ALGEBRA AND NUMBER THEORY

What makes Tor^R_{p}(R/I, J) free? By Shiro Goto and Naoyoshi Suzuki ............... 605
Integral domains with finitely generated groups of divisibility. By D. D. Anderson .... 613
Algebras of finite self-injective dimension. By Mitsuo Hoshino .......................... 619
ω! can be a nontrivial automorphism group.
By Judith Roitman .......................... 623
On the compositum of two power series rings.
By Shreeram S. Abhyankar, William Heinzer, and Sylvia Wiegand 629
Embedding Galois problems and reduced norms. By Teresa Crespo 637
Auslander-Reiten triangles in derived categories of finite-dimensional algebras.
By Dieter Happel .......................... 641
The group determinant determines the group.
By Edward Formanek and David Sibley .......................... 649
Finitely embedded commutative rings. By Carl Faith .......................... 657
Comaximizable primes. By Raymond C. Heitmann and Stephen McAdam ..................... 661
On small Iwasawa invariants and imaginary quadratic fields. By Jonathan W. Sands .. 671
Henselian rings and Weierstrass polynomials. By Budh Nashier .......................... 685
Automorphisms of SL_2 of imaginary quadratic integers.
By John Smillie and Karen Vogtmann .......................... 691

B. ANALYSIS

Some operator theoretic calculus for positive definite kernels. By Ameer Athavale .... 701
An n × n matrix of linear maps of a C*-algebra. By Ching-Yun Suen ........................ 709
Lower estimate in Littlewood's conjecture on the mean spherical derivative of a polynomial
and iteration theory. By A. E. Eremenko .......................... 713
Exceptional q-Askey-Wilson polynomials and continued fractions.
By Dharma P. Gupta and David R. Masson .......................... 717
The stability of certain functional equations. By John A. Baker ........................... 729
The stable rank of crossed products of sectional C*-algebras by compact Lie groups.
By Eckart Schulz .......................... 733
Principal distributions for almost unperturbed Schrödinger pairs of operators.
By Daoxiong Xia .......................... 745
Some trace formulas for almost unperturbed Schrödinger pairs of operators.
By Daoxiong Xia .......................... 755
A hypercyclic operator whose adjoint is also hypercyclic. By Hector Salas ................ 765
Carleson measures in Hardy and weighted Bergman spaces of polydiscs. By F. Jafari .. 771
Counterexamples concerning bitriangular operators.
By M. S. Lambrou and W. E. Longstaff .......................... 783
Estimates for inverses of e^{int} in some quotient algebras of A^+. By Elhassen Zerouali 789
On infinitely differentiable and Gevrey vectors for representation. By A.F.M. ter Elst .. 795
A note on a global stability theorem of M. W. Hirsch. By Jiang Ji-Fa .......................... 803
Sums of powers of derivatives. By Jan Marki and Clifford E. Weil 807
Boundaries and modular ideals on locally compact groups.
By William Moran and George A. Willis .......................... 819
Bernstein-type inequalities for the derivatives of constrained polynomials.
By Tamás Erdélyi .......................... 829
Explicit construction of universal operator algebras and applications to polynomial factori-
By David P. Blecher and Vern I. Paulsen .......................... 839
Mean growth of Bloch functions and Makarov's law of the iterated logarithm.
By Rodrigo Bañuelos and Charles N. Moore .......................... 851
The spectral extension property and extension of multiplicative linear functionals.

By Michael J. Meyer ........................................... 855

Pseudospectral operators and the pointwise ergodic theorem. By R. E. Bradley ........ 863

Simple C*-algebras with continuous scales and simple corona algebras. By Huaxin Lin 871

G. TOPOLOGY

A fixed point approach to homological perturbation theory.

By Donald W. Barnes and Larry A. Lambe ........................ 881

Spread and local properties. By Basil Coutant ........................ 893

H. COMBINATORICS

Permutation groups in Euclidean Ramsey theory. By Igor Kátész ....... 899

SHORTER NOTES

The derivative of the exponential map. By Carl Herz ............................. 909

A correction to “On extensions of models of strong fragments of arithmetic.” By Roman Kossak .... 913

Vol. 112, No. 4 August 1991 Whole No. 386

A. ALGEBRA AND NUMBER THEORY

About direct summands of projective modules over Laurent polynomial rings.

By Satya Mandal .................................................. 915

Projectively normal adjunction surfaces. By Marco Andreatta and Edoardo Ballico 919

On the rank and the crank modulo 4. By Richard Lewis .......................... 925

Around the relative center property in orthomodular lattices. By G. Chevalier ....... 935

B. ANALYSIS

On the primariness of the Banach space $l_{\infty}/C_0$.

By Lech Drewnowski and James W. Roberts ........................ 949

Bivariate monotone approximation. By George A. Anastassiou ........ 959

An example of a Hilbert transform. By Krzysztof Samotij ............ 965

A counterexample for Kobayashi completeness of balanced domains.

By Marek Jarnicki and Peter Pflug ................................ 973

Subharmonicity, the distance function, and $\alpha$-admissible sets. By Stephen J. Gardiner 979

On the existence and uniqueness of fixed points for holomorphic maps in complex Banach spaces. By Kazimierz Włodarczyk .......................... 983

Determinacy of complex analytic foliation germs without integrating factors.

By Dominique Cerveau and Tatsuo Suwa ................................ 989

von Neumann algebras which are second dual spaces. By Cho-Ho Chu ........ 999

Strong solutions of evolution equations governed by $m$-accretive operators and the Radon-Nikodym property. By Robert Deville ................. 1001

Random perturbations of singular spectra. By James S. Howland ........ 1009

Spectral properties of perturbed linear operators and their application to infinite matrices.

By F. O. Farid .................................................... 1013

An operator-valued moment problem. By Luminita Lemneta ............... 1023

Products of perfectly meagre sets. By Ireneusz Recław ................... 1029

Linear independence of iterates of entire functions. By Luis Bernal González 1033

The Hausdorff dimension of graphs of density continuous functions.

By Zoltán Buczolich and Krzysztof Ostaszewski ........................ 1037
On a differential equation for Koornwinder's generalized Laguerre polynomials.

By J. KOEKOEK and R. KOEKOEK ................................................. 1045

The Bloch constant of bounded analytic functions on a multiply connected domain.

By FLAVIA COLONNA .......................................................... 1055

Fonctions qui opèrent sur les espaces de Besov. By GÉRARD BOURDAUD et DALILA KATEB 1067

The rate of spatial decay of nonnegative solutions of nonlinear parabolic equations and inequalities. By ALAN V. LAIR ................................................. 1077

Positive sequence topological entropy characterizes chaotic maps.

By N. FRANZOVÁ and J. SMÍTAL ................................................. 1083

On r-separated sets in normed spaces. By JUAN ARIAS-DE-REYNA ................. 1087

The space ($L_\infty/c_0$, weak) is not a radon space.

By JOSE L. DE MARIA and BALTASAR RODRIGUEZ-SALINAS ................. 1095

D. GEOMETRY

Yang–Mills connections on surfaces and representations of the path group.

By KENT MORRISON .......................................................... 1101

E. LOGIC AND FOUNDATIONS

Meager-nowhere dense games (II): coding strategies. By MARION SCHEEPERS .............. 1107

On a conjecture of Tarski on products of cardinals.

By THOMAS JECH and SAHARON SHELAH ........................................ 1117

Two examples of Borel partially ordered sets with the countable chain condition.

By STEVO TODORCEVIC .............................................................. 1125

A second category set with only first category functions. By P. KOMJÁTH ............... 1129

On the relationship between density and weak density in Boolean algebras.

By KYLE BOZEMAN .......................................................... 1137

G. TOPOLOGY

A note on continuous mappings and the property of J. L. Kelley. By HISAO KATO .... 1143

Separation and von Neumann intersection theorems. By SHIOW-YU CHANG .......... 1149

A note on the shift on the Cantor set. By ROBBERT FOKKINK ................. 1153

Topological equivalence of real binary forms. By DAVID WEINBERG and DAVE WITTE .... 1157

Solution of two conjectures in symbolic dynamics. By K. H. KIM and F. W. ROUSH ...... 1163

Lojasiewicz type inequalities and Newton diagrams. By TOSHIZUMI FUKUI .......... 1169

Relating spans of some continua homeomorphic to $S^1$. By THELMA WEST .......... 1185

H. COMBINATORICS

Fully indecomposable exponents of primitive matrices.

By RICHARD A. BRUALDI and BOLIAN LIU ...................................... 1193

No polynomial bound for the chip firing game on directed graphs. By KIMMO ERIKSSON 1203

Cohomology of local sheaves on arrangement lattices. By SERGEY YUZVINSKY ........ 1207
Manuscript Information

1. Articles submitted for publication should be no more than 16 (8.5" × 11") typewritten, double-spaced pages. If \TeX or a similar system is used, submitted manuscripts should not exceed 10 \LaTeX preprint style or \LaTeX article style pages. The Manual for Authors, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand drawn symbols are satisfactory, if clearly done; directions to the printer should be included where necessary on a separate sheet. Authors must keep complete copies of their manuscripts, and editors will acknowledge receipt. To encourage the submission of manuscripts in electronic form using \TeX and the \LaTeX macro package, the Executive Committee of the Council has adopted a policy that allows for accelerating the publication date of such manuscripts by as much as 20 weeks, which is approximately equal to the time normally needed by the Society for copyediting, typesetting, and proofreading an average manuscript.

2. The first page must consist of a descriptive title, followed by an abstract which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The descriptive title should be short, but informative; useless or vague phrases such as "some remarks about" or "concerning" should be avoided. The abstract should be at least one complete sentence, and at most 150 words. Included with the footnotes to the paper, but placed before the first footnote, there should be first the 1991 Mathematics Subject Classification representing the primary and secondary subjects of the article. This may be followed by a list of key words and phrases describing the subject matter of the article and taken from it. A list of the numbers may be found in the annual subject index of Mathematical Reviews, published with the December issue starting in 1990.

3. A Copyright Transfer Agreement is required before a paper will be published in the Proceedings. A copy of the form is sent with the acknowledgement of receipt of manuscript from the Providence office of the Society. Authors are urged to return the forms immediately to prevent delays in processing and publishing of the manuscript.

OFFPRINTS AND ADDRESS CHANGES. Any inquiries concerning a paper which has been accepted for publication, including information regarding offprints or changes of address for mailing proof, should be sent directly to the Editorial Department, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940-6248.

GALLEY PROOF. When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate on the original manuscript which of them should receive galley proof in the event that the manuscript is accepted for publication.

BACKLOG. Papers currently being accepted by the editors will be published in 12–14 months.

COPYING AND REPRINTING. Individual readers of this publication, and nonprofit libraries acting for them are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Manager of Editorial Services, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940-6248.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 27 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.
Submission of Manuscript

Send papers directly to one of the editors listed under the subject field of the paper. The numbers in parentheses are the first two digits of major classification from the 1991 Mathematics Subject Classification and describe the fields being handled by the editor.

LOGIC AND FOUNDATIONS (03 04)
Andreas R. Blass, Department of Mathematics, University of Michigan, Ann Arbor, Michigan 48109-1003
