PROVIDENCE, RHODE ISLAND USA

ISSN 0002-9939

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

Subscription information. *Proceedings of the American Mathematical Society* is published monthly. Subscription prices for Volumes 114–116 (1992) are $508 list; $406 institutional member; $305 individual member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmember after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of $25; subscribers in India must pay a postage surcharge of $38. Expedited delivery to destinations in North America—$38; elsewhere—$90.

Back number information. For back issues see the *AMS Catalogue of Publications.*

Subscriptions and orders should be addressed to the American Mathematical Society, P.O. Box 1571, Annex Station, Providence, RI 02901-1571. *All orders must be accompanied by payment.* Other correspondence should be addressed to P.O. Box 6248, Providence, RI 02940-6248.

Copying and reprinting. Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Manager of Editorial Services, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that a fee of $1.00 plus $.25 per page for each copy be paid directly to the Copyright Clearance Center, Inc., 27 Congress Street, Salem, MA 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.

Proceedings of the American Mathematical Society is published monthly by the American Mathematical Society at 201 Charles Street, Providence, RI 02904-2213. Second-class postage is paid at Providence, Rhode Island. Postmaster: Send address changes to Proceedings, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248.

INDEX TO VOLUME 115

*Starred items are "Shorter Notes."

Abraham, Uri and Bonnet, Robert. *Every superatomic subalgebra of an interval algebra is embeddable in an ordinal algebra*, 585.

Akeroyd, John. *Density of the polynomials in the Hardy space of certain slit domains*, 1013.

Aleman, Alexandru. *Hilbert spaces of analytic functions between the Hardy and the Dirichlet space*, 97.

Ancel, Fredric D. and Guilbault, Craig R. *An extension of Rourke's proof that* $\Omega_3 = 0$ *to nonorientable manifolds*, 283.

Antal Balog and Carl Pomerance. *The distribution of smooth numbers in arithmetic progressions*, 33.

Arias, Alvaro. *All the infinite nest algebras are isomorphic*, 85.

Atalla, Robert E. *Regular matrices and P-sets in* $\beta N \backslash N$. II, 141.

Babich, Amy. *Scrawny Cantor sets are not definable by tori*, 829.

Baker, John, Hindman, Neil, and Pym, John. *κ-topologies for right topological semigroups*, 251.

Baldwin, Stewart. *On the existence of invariant measures that behave like area*, 89.

Baribeau, Line and Harbottle, Sarah. *Two new open mapping theorems for analytic multivalued functions*, 1009.

Berkovich, Yakov, Chillag, David, and Marcel Herzog, Marcel. *Finite groups in which the degrees of the nonlinear irreducible characters are distinct*, 955.

Bernau, S. J., Huijsmans, C. B., and De Pagter, B. *Sums of lattice homomorphisms*, 151.

Blasco, Oscar. *A note on vector-valued Hardy and Paley inequalities*, 787.

Bonnet, Robert. *See* Abraham, Uri

Boratynski, M. *Locally complete intersection multiple structures on smooth algebraic curves*, 877.

Brooks, Robin and Wong, Peter. *On changing fixed points and coincidences to roots*, 527.

Bruce, J. W., Ruas, M. A. S., and Saia, M. J. *A note on determinacy*, 865.

Brunner, A. M. *A two-generator presentation for the Picard group*, 45.

Bruns, Winfried. *The Evans-Griffith syzygy theorem and Bass numbers*, 939.

Burns, Keith. *The flat strip theorem fails for surfaces with no conjugate points*, 199.

Candeal-Haro, Juan Carlos and Indurain-Eraso, Esteban. *Utility functions on partially ordered topological groups*, 765.

Chen, Liang and Li, Shihai. *Shadowing property for inverse limit spaces*, 573.

Chillag, David. *See* Berkovich, Yakov

Choda, Hisashi. *A Galois type theorem in von Neumann algebras*, 415.

Christy, Joe. *Immersing branched surfaces in dimension three*, 853.

Chung, Dong Myung and Hwang, Hong Taek. *Cylinder functions in the Fresnel class of functions on abstract Wiener spaces*, 381.

Cilleruelo, J. and Cordoba, A. *Trigonometric polynomials and lattice points*, 899.

Conder, Marston, Robertson, Edmund, and Williams, Peter. *Presentations for 3-dimensional special linear groups over integer rings*, 19.

Connor, Jeff. *R-type summability methods, Cauchy criteria, P-sets and statistical convergence*, 319.

Cooper, S. Barry. *A splitting theorem for the n-r.e. degrees*, 461.

Corach, G., Porta, H., and Recht, L. *A geometric interpretation of Segal's inequality* $\|e^{X+Y}\| \leq \|e^{X/2}e^{Y}e^{X/2}\|$, 229.

Cordoba, A. *See* Cilleruelo, J.

Curzio, Mario, Longobardi, Patrizia, Maj, Mercede, and Rhemtulla, Akbar. *Groups with many rewritable products*, 931.

De Pagter, B. *See* Bernau, S. J.

DeFranza, J. and Zeller, K. *Matrix summability of unbounded sequences*, 171.

Dekov, Deko V. *The class of all S-pregroups is not finitely axiomatizable*, 895.

Dobbs, David E. and Fontana, Marco. *Integral overrings of two-dimensional going-down domains*, 655.

Driver, R. D., Ladas, G., and Vlahos, P. N. *Asymptotic behavior of a linear delay difference equation*, 105.

Duncan, Andrew J. and Howie, James. *Weinbaum's conjecture on unique subwords of nonperiodic words*, 947.
Dvurečenskij, Anatolij. *Finitely additive Gleason measures*, 191.
Edelstein, Michael. *On the indecomposability of compact convex sets*, 737.
Egawa, Jirō. *Eigenvalues of some almost periodic functions*, 535.
Escauriaza, L., Fabes, E. B., and Verchota, G. *On a regularity theorem for weak solutions to transmission problems with internal Lipschitz boundaries*, 1069.
Escauriaza, Luis. *A note on Krylov-Tso's parabolic inequality*, 1053.
Fabes, E. B. *See* Escauriaza, L.
Farsi, Carla. *K-theoretical index theorems for good orbifolds*, 769.
Faybusovich, Leonid. *Toda flows and isospectral manifolds*, 837.
Ferrando, J. C. and López-Pellicer, M. *A note on a theorem of J. Diestel and B. Faires*, 1077.
Filho, Augusto Reynol. *Nilpotent spaces: some inequalities on nilpotency degrees*, 501.
Fink, A. M. *On Opial's inequality for* $f^{(n)}$, 177.
Flapan, Erica and Weaver, Nikolai. *Intrinsic chirality of complete graphs*, 233.
Fonda, A. and Lazer, A. C. *Subharmonic solutions of conservative systems with nonconvex potentials*, 183.
Fontana, Marco. *See* Dobbs, David E.
Fujii, Masatoshi and Kamei, Eizaburo. *Furuta's inequality and a generalization of Ando's theorem*, 409.
Gedeon, Tomáš and Kuchta, Milan. *Shadowing property of continuous maps*, 271.
Gessel, Ira M. and Zeilberger, Doron. *Random walk in a Weyl chamber*, 27.
Gilmer, Robert and Heinzer, William. *Zero-dimensionality in commutative rings*, 881.
Gong, Weibang and Zhu, Jun. *Strong-principal bimodules of nest algebras*, 435.
González, Manuel and Gutiérrez, Joaquín M. *Compact and weakly compact homomorphisms between algebras of differentiable functions*, 1025.
Goulden, I. P. and Jackson, D. M. *Immanants, Schur functions, and the MacMahon Master theorem*, 605.
Gowrisankaran, Kohur. *Polydiscs and nontangential limits*, 977.
Greenlees, J. P. C. and May, J. P. *Some remarks on the structure of Mackey functors*, 237.
Gudder, Stanley. *A generalization of d'Alembert's functional equation*, 419.
Guilbault, Craig R. *See* Ancel, Fredric D.
Gutiérrez, Joaquín M. *See* González, Manuel
Haagerup, Uffe and de la Harpe, Pierre. *The numerical radius of a nilpotent operator on a Hilbert space*, 371.
Hanin, Leonid G. *Kantorovich-Rubinstein norm and its application in the theory of Lipschitz spaces*, 345.
Harbottle, Sarah. *See* Baribeau, Line
Harpe, Pierre de la. *See* Haagerup, Uffe
Hasselblatt, Boris. *Bootstrapping regularity of the Anosov splitting*, 817.
Haydon, Richard. *Reflexivity of commutative subspace lattices*, 1057.
Healey, Timothy J. and Kielhöfer, Hansjörg. *Positivity of global branches of fully nonlinear elliptic boundary value problems*, 1031.
Heinzer, William. *See* Gilmer, Robert
Henríquez, Hernán R. and Hernández, Eduardo A. *On the abstract Cauchy problem in Fréchet spaces*, 353.
Hernández, Eduardo A. *See* Henríquez, Hernán R.
Hieber, Matthias and Räbiger, Frank. *A remark on the abstract Cauchy problem on spaces of Hölder continuous functions*, 431.
Hindman, Neil. *See* Baker, John
Holte, Sarah E. *An order theoretic characterization of Peano continua*, 1119.
Howie, James. *See* Duncan, Andrew J.
Huijsmans, C. B. *See* Bernau, S. J.

CONTENTS

Vol. 115, No. 1 May 1992 Whole No. 395

A. ALGEBRA AND NUMBER THEORY

Dehomogenization of gradings to Zariskian filtrations and applications to invertible ideals. By HUI-SHI LI and FREDDY VAN OYSTAEYEN 1
Small congruences and concreteness. By MAGDALENA VELEBILOVÁ 13
Presentations for 3-dimensional special linear groups over integer rings. By MARSTON CONDER, EDMUND ROBERTSON, and PETER WILLIAMS 19
Random walk in a Weyl chamber. By IRA M. GESSEL and DORON ZEILBERGER 27
The distribution of smooth numbers in arithmetic progressions. By ANTAL BALOG and CARL POMERANCE 33
A two-generator presentation for the Picard group. By A. M. BRUNNER 45
A test theorem on coherent GCD domains. By ZHAO YICAI 47
Koszul homology of Cohen-Macaulay rings with linear resolutions. By CARLOS RENTERÍA and RAFAEL H. VILLARREAL 51

B. ANALYSIS

Quadrature formulas for monotone functions. By ERICH NOVAK 59
Complete conformal metrics with zero scalar curvature. By XIAOYUN MA and ROBERT C. MCOWEN 69
Continuous independence and the Ilieff-Sendov conjecture. By MICHAEL J. MILLER 79
All the infinite nest algebras are isomorphic. By ALVARO ARIAS 85
On the existence of invariant measures that behave like area. By STEWART BALDWIN 89
Hilbert spaces of analytic functions between the Hardy and the Dirichlet space. By ALEXANDRU ALEMAN 97
Asymptotic behavior of a linear delay difference equation. By R. D. DRIVER, G. LADAS, and P. N. VLAHOS 105
Smooth approximations in Banach spaces. By J. VANDERWERFF 113
The existence of left averaging functions that are not right averaging. By TIANXUAN MIAO 121
Inverses generalises d'operateurs non bornes. By J-PH. LABROUSSE 125
Bound on the extreme zeros of orthogonal polynomials. By MOURAND E. H. ISMAIL and XIN LI 131
Regular matrices and P-sets in $\beta N \backslash N$. II. By ROBERT E. ATALLA 141
Compositions of continuous functions and connected functions. By KENNETH R. KELLUM and HARVEY ROSEN 145
Sums of lattice homomorphisms. By S. J. BERNAU, C. B. HUIJSMANS, and B. DE PAGTER 151
On absolute weighted mean summability methods. By M. ALI SARIGÖL 157
A sharp estimate in an operator inequality. By R. MCEACHIN 161
-Representations of the trace-class of an H-algebra. By LAJOS MOLNÁR 167
Matrix summability of unbounded sequences. By J. DEFRANZA and K. ZELLER 171
On Opial's inequality for $f^{(n)}$. By A. M. FINK 177
Subharmonic solutions of conservative systems with nonconvex potentials. By A. FONDA and A. C. LAZER 183

C. APPLIED MATHEMATICS

Finitely additive Gleason measures. By ANATOLIJ DVUREČENSKIJ 191

D. GEOMETRY

The flat strip theorem fails for surfaces with no conjugate points. By KEITH BURNS 199

Approximation of convex bodies by triangles. By MAREK LASSAK 207
Ball covering on manifolds with nonnegative Ricci curvature near infinity. By ZHONG-DONG LIU 211
Dirichlet polyhedra for cyclic groups in complex hyperbolic space. By MARK B. PHILLIPS 221
A geometric interpretation of Segal's inequality $\|e^{X+Y}\| \leq \|e^{X/2}e^{Y}e^{X/2}\|$. By G. CORACH, H. PORTA, and L. RECHT 229

G. TOPOLOGY

Intrinsic chirality of complete graphs. By ERICA FLAPAN and NIKOLAI WEAVER 233
Some remarks on the structure of Mackey functors. By J. P. C. GREENLEES and J. P. MAY 237
Essential laminations in surgered 3-manifolds. By YING-QING WU 245
κ-topologies for right topological semigroups. By JOHN BAKER, NEIL HINDMAN, and JOHN PYM 251
Characterization of separable metric **R**-trees. By J. C. MAYER, L. K. MOHLER, L. G. OVERSTEEGEN, and E. D. TYMCHATYN 257
Relations between chain recurrent points and turning points on the interval. By SHIHAI LI 265
Shadowing property of continuous maps. By TOMÁŠ GEDEON and MILAN KUCHTA 271
An extension of Rourke's proof that $\Omega_3 = 0$ to nonorientable manifolds. By FREDRIC D. ANCEL and CRAIG R. GUILBAULT 283

Vol. 115, No. 2 **June 1992** **Whole No. 396**

A. ALGEBRA AND NUMBER THEORY

An invariant on 3-dimensional Lie algebras. By HIROYUKI TASAKI and MASAAKI UMEHARA 293
Descending chain conditions for graded rings. By M. SAORÍN 295

B. ANALYSIS

A study on a relation between two summability methods. By W. T. SULAIMAN 303
On some summability factors of infinite series. By W. T. SULAIMAN 313
R-type summability methods, Cauchy criteria, *P*-sets and statistical convergence. By JEFF CONNOR 319
Radon–Nikodym property in symmetric spaces of measurable operators. By XU QUANHUA 329
On the maximum modulus of polynomials. By M. A. QAZI 337
Kantorovich-Rubinstein norm and its application in the theory of Lipschitz spaces. By LEONID G. HANIN 345
On the abstract Cauchy problem in Fréchet spaces. By HERNÁN R. HENRÍQUEZ and EDUARDO A. HERNÁNDEZ 353
Fixed points for discontinuous quasimonotone maps in sequence spaces. By SABINA SCHMIDT 361
Compact measures have Loeb preimages. By DAVID ROSS 365
The numerical radius of a nilpotent operator on a Hilbert space. By UFFE HAAGERUP and PIERRE DE LA HARPE 371
Cylinder functions in the Fresnel class of functions on abstract Wiener spaces. By DONG MYUNG CHUNG and HONG TAEK HWANG 381
Oscillation criteria for second order nonlinear differential equations with integrable coefficients. By JAMES S. W. WONG 389
Multipliers on complemented Banach algebras. By BOHDAN J. TOMIUK 397
Rational modules and Cauchy transforms, II. By JAMES LI-MING WANG 405
Furuta's inequality and a generalization of Ando's theorem. By MASATOSHI FUJII and EIZABURO KAMEI 409
A Galois type theorem in von Neumann algebras. By HISASHI CHODA 415

A generalization of d'Alembert's functional equation. By STANLEY GUDDER 419
Regularity and σ-additivity of states on quantum logics. By MIRKO NAVARA 427
A remark on the abstract Cauchy problem on spaces of Hölder continuous functions. By MATTHIAS HIEBER and FRANK RÄBIGER 431
Strong-principal bimodules of nest algebras. By WEIBANG GONG and JUN ZHU 435
Some remarks of drop property. By PEI-KEE LIN 441

D. GEOMETRY

Invariant affine connections on symmetric spaces. By H. TURNER LAQUER 447
Prescribing a Ricci tensor in a conformal class of Riemannian metrics. By XINGWANG XU 455

E. LOGIC AND FOUNDATIONS

A splitting theorem for the n-r.e. degrees. By S. BARRY COOPER 461
A consistency result on thin-tall superatomic Boolean algebras. By JUAN CARLOS MARTÍNEZ 473

F. STATISTICS AND PROBABILITY

Sample path-valued conditional Yeh-Wiener integrals and a Wiener integral equation. By CHULL PARK and DAVID SKOUG 479
Stable measure of a small ball. By M. LEWANDOWSKI, M. RYZNAR, and T. ŻAK 489

G. TOPOLOGY

Common fixed points for compatible maps on the unit interval. By GERALD JUNGCK .. 495
Nilpotent spaces: some inequalities on nilpotency degrees. By AUGUSTO REYNOL FILHO 501
Essential maps and manifolds. By JEAN-FRANCOIS MERTENS 513
On changing fixed points and coincidences to roots. By ROBIN BROOKS and PETER WONG 527
Eigenvalues of some almost periodic functions. By JIRÔ EGAWA 535
The framed braid group and 3-manifolds. By KI HYOUNG KO and LAWRENCE SMOLINSKY 541
Equidistant sets in plane triodic continua. By L. D. LOVELAND and S. M. LOVELAND ... 553
Attractors in restricted cellular automata. By MIKE HURLEY 563
Shadowing property for inverse limit spaces. By LIANG CHEN and SHIHAI LI 573

SHORTER NOTES

A functional analysis proof of the existence of haar measure on locally compact abelian groups. By ALEXANDER J. IZZO 581

Vol. 115, No. 3 **July 1992** **Whole No. 397**

A. ALGEBRA AND NUMBER THEORY

Every superatomic subalgebra of an interval algebra is embeddable in an ordinal algebra. By URI ABRAHAM and ROBERT BONNET 585
Primitive elements of Galois extensions of finite fields. By ISAO KIKUMASA and TAKASI NAGAHARA 593
t-linked overrings of Noetherian weakly factorial domains. By MARY B. MARTIN and M. ZAFRULLAH 601
Immanants, Schur functions, and the MacMahon Master theorem. By I. P. GOULDEN and D. M. JACKSON 605
Semiendomorphisms of simple near-rings. By KIRBY C. SMITH and LEON VAN WYK ... 613
A generic H-invariant in a multiplicity-free G-action. By CHEN-BO ZHU 629

Dependence of arithmetic functions and Dirichlet series. By VICHIAN LAOHAKOSOL 637
A class of primary abelian groups characterized by its socles. By PATRICK KEEF 647
Integral overrings of two-dimensional going-down domains. By DAVID E. DOBBS and MARCO FONTANA 655

B. ANALYSIS

A connectedness property of maximal monotone operators and its application to approximation theory. By LIBOR VESELÝ 663
Projections P on $C = C[-1, 1]$ which interpolate at $\dim(P(C))$ or more points. By CHENGMIN YANG 669
On the weighted L^p-integrability of nonnegative $\mathcal{M}$-superharmonic functions. By SHIYING ZHAO 677
Harmonic measure and conformal length. By KNUT ØYMA 687
Linearly stable subharmonic orbits in strongly monotone time-periodic dynamical systems. By PETER TAKÁČ 691
Positive solutions of $\Delta u + K(x)u^p = 0$ without decay conditions on $K(x)$. By XINGBIN PAN 699
Generalizations of certain nest algebra results. By N. K. SPANOUDAKIS 711
Generic spectral properties of measure-preserving maps and applications. By ANDRÉS DEL JUNCO and MARIUSZ LEMAŃCZYK 725
On the indecomposability of compact convex sets. By MICHAEL EDELSTEIN 737
The analytic rank of a C^*-algebra. By GERARD J. MURPHY 741
Cesàro and general Euler-Borel summability. By LAYING TAM 747
Ahlfors functions on Denjoy domains. By AKIRA YAMADA 757
Utility functions on partially ordered topological groups. By JUAN CARLOS CANDEAL-HARO and ESTEBAN INDURAIN-ERASO 765
K-theoretical index theorems for good orbifolds. By CARLA FARSI 769
On real invariant subspaces of bounded operators with compact imaginary part. By VICTOR I. LOMONOSOV 775
On the retarded Liénard equation. By BO ZHANG 779
A note on vector-valued Hardy and Paley inequalities. By OSCAR BLASCO 787

D. GEOMETRY

Curvature pinching for three-dimensional minimal submanifolds in a sphere. By YI-BING SHEN 791

G. TOPOLOGY

On properties of Rosenthal compacta. By WITOLD MARCISZEWSKI 797
Reduction of prequantized Mp^c structures. By P. L. ROBINSON 807
Bootstrapping regularity of the Anosov splitting. By BORIS HASSELBLATT 817
$\mathbf{Z}_2$-fixed sets of stationary point free $\mathbf{Z}_4$-actions. By CLAUDINA IZEPE RODRIGUES 821
Scrawny Cantor sets are not definable by tori. By AMY BABICH 829
Toda flows and isospectral manifolds. By LEONID FAYBUSOVICH 837
A note on hyperelliptic curves. By GEOFFREY MESS 849
Immersing branched surfaces in dimension three. By JOE CHRISTY 853
A characterization of the 2-sphere in terms of Jordan curve separation. By CARSTEN THOMASSEN 863
A note on determinacy. By J. W. BRUCE, M. A. S. RUAS, and M. J. SAIA 865
Errata to "Norms of Hankel operators on a bidisc". By TAKAHIKO NAKAZI 873
Errata to "Maps between orbifolds". By MASAYUKI YAMASAKI 875

Vol. 115, No. 4 **August 1992** **Whole No. 398**

A. ALGEBRA AND NUMBER THEORY

Locally complete intersection multiple structures on smooth algebraic curves. By M. BORATYNSKI 877
Zero-dimensionality in commutative rings. By ROBERT GILMER and WILLIAM HEINZER . 881
The class of all S-pregroups is not finitely axiomatizable. By DEKO V. DEKOV 895
Trigonometric polynomials and lattice points. By J. CILLERUELO and A. CORDOBA 899
Maximal ideals in Laurent polynomial rings. By BUDH NASHIER 907
Free summands in maximal Cohen-Macaulay approximations and Eisenbud operators over hypersurface rings. By ALEX MARTSINKOVSKY 915
The automorphism group of a function field. By MANOHAR MADAN and MICHAEL ROSEN 923
Groups with many rewritable products. By MARIO CURZIO, PATRIZIA LONGOBARDI, MERCEDE MAJ, and AKBAR RHEMTULLA 931
A note on coherent rings of dimension two. By ZHAO YICAI 935
The Evans-Griffith syzygy theorem and Bass numbers. By WINFRIED BRUNS 939
Weinbaum's conjecture on unique subwords of nonperiodic words. By ANDREW J. DUNCAN and JAMES HOWIE 947
Finite groups in which the degrees of the nonlinear irreducible characters are distinct. By YAKOV BERKOVICH, DAVID CHILLAG, and MARCEL HERZOG 955
Gaussian periods and units in certain cyclic fields. By ANDREW J. LAZARUS 961

B. ANALYSIS

The Fourier-Bessel series representation of the pseudo-differential operator $(-x^{-1}D)^{\nu}$. By O. P. SINGH and J. N. PANDEY 969
Polydiscs and nontangential limits. By KOHUR GOWRISANKARAN 977
The behavior of the analytically continued resolvent operator near $\kappa = 0$ and an application to energy decay. By KAZUHIRO YAMAMOTO 985
Commutator approximants. By P. J. MAHER 995
Imbedding of any vector field in a scalar semilinear parabolic equation. By P. POLÁČIK . 1001
Two new open mapping theorems for analytic multivalued functions. By LINE BARIBEAU and SARAH HARBOTTLE 1009
Density of the polynomials in the Hardy space of certain slit domains. By JOHN AKEROYD 1013
A short proof of the Y. Katznelson's and L. Tzafriri's theorem. By VŨ QUÔC PHÓNG . . 1023
Compact and weakly compact homomorphisms between algebras of differentiable functions. By MANUEL GONZÁLEZ and JOAQUÍN M. GUTIÉRREZ 1025
Positivity of global branches of fully nonlinear elliptic boundary value problems. By TIMOTHY J. HEALEY and HANSJÖRG KIELHÖFER 1031
Nonlinear p-Laplacian problems on unbounded domains. By LAO SEN YU 1037
Some Remarks on the Daugavet Equation. By P. WOJTASZCZYK 1047
A note on Krylov-Tso's parabolic inequality. By LUIS ESCAURIAZA 1053
Reflexivity of commutative subspace lattices. By RICHARD HAYDON 1057
The first interval of stability of a periodic equation of Duffing type. By RAFAEL ORTEGA 1061
On a regularity theorem for weak solutions to transmission problems with internal Lipschitz boundaries. By L. ESCAURIAZA, E. B. FABES, and G. VERCHOTA 1069
A note on a theorem of J. Diestel and B. Faires. By J. C. FERRANDO and M. LÓPEZ-PELLICER 1077
Global attractivity in nonlinear delay difference equations. By V. LJ. KOCIĆ and G. LADAS 1083

C. APPLIED MATHEMATICS

A characterization of weighted voting. By ALAN TAYLOR and WILLIAM ZWICKER 1089

E. LOGIC AND FOUNDATIONS

On the Rosenthal compacta and analytic sets. By ADAM KRAWCZYK 1095

F. STATISTICS AND PROBABILITY

Generalized first boundary value problem for Schrödinger equation. By REN YANXIA . . 1101

G. TOPOLOGY

On the Kostant convexity theorem. By FRANCOIS ZIEGLER 1111
Handlebody complements in the 3-sphere: A remark on a theorem of Fox. By MARTIN SCHARLEMANN 1115
An order theoretic characterization of Peano continua. By SARAH E. HOLTE 1119
Pseudocontraction and homotopy of the $\sin(1/x)$ curve. By HIDEFUMI KATSUURA 1129
Noncompact chain recurrence and attraction. By MIKE HURLEY 1139
The iterated total squaring operation. By LUCIANO LOMONACO 1149
Lipscomb's $L(A)$ space fractalized in Hilbert's $l^2(A)$ space. By S. L. LIPSCOMB and J. C. PERRY 1157

SHORTER NOTES

A characterization of the sphere in terms of single-layer potentials. By HENRIK SHAHGHOLIAN 1167

Editorial Information

To be published in the *Proceedings*, a paper must be correct, new, nontrivial, and significant. Further, it must be well written and of interest to a substantial number of mathematicians. Piecemeal results, such as an inconclusive step toward an unproved major theorem or a minor variation on a known result, are in general not acceptable for publication. *Proceedings* Editors solicit and encourage publication of worthy papers of length not exceeding 10 published pages. Published pages are the same size as those generated in the style files provided for $\mathcal{A}\mathcal{M}\mathcal{S}$-TEX or $\mathcal{A}\mathcal{M}\mathcal{S}$-LATEX.

Very short notes not to exceed two printed pages are also accepted, and appear under the heading SHORTER NOTES. Items deemed suitable include an elegant new proof of an important and well-known theorem, an illuminating example or counterexample, or a new viewpoint on familiar results. New results, if of a brief and striking character, might also be acceptable, though in general a paper which is merely very short will not be suitable for the SHORTER NOTES department.

As of May 1, 1992, the backlog for this journal was approximately 16 issues. This estimate is the result of dividing the number of manuscripts for this journal in the Providence office that have not yet gone to the printer on the above date by the average number of articles per issue over the previous twelve months.

A Copyright Transfer Agreement is required before a paper will be published in this journal. By submitting a paper to this journal, authors certify that the manuscript has not been submitted to nor is it under consideration for publication by another journal, conference proceedings, or similar publication.

Information for Authors

The first page of an article must consist of a *descriptive title*, followed by an *abstract* that summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The *descriptive title* should be short, but informative; useless or vague phrases such as "some remarks about" or "concerning" should be avoided. The *abstract* should be at least one complete sentence, and at most 150 words. Included with the footnotes to the paper, there should be the 1991 *Mathematics Subject Classification* representing the primary and secondary subjects of the article. This may be followed by a list of *key words and phrases* describing the subject matter of the article and taken from it. A list of the numbers may be found in the annual index of *Mathematical Reviews*, published with the December issue starting in 1990, as well as from the electronic service e-MATH [**telnet e-MATH.ams.com** (or **telnet 130.44.1.100**). Login and password are **e-math**]. For journal abbreviations used in bibliographies, see the list of serials in the latest *Mathematical Reviews* annual index. When the manuscript is submitted, authors should supply the editor with electronic addresses if available. These will be printed after the postal address at the end of each article.

Electronically-prepared manuscripts. The AMS encourages submission of electronically-prepared manuscripts in $\mathcal{A}\mathcal{M}\mathcal{S}$-TEX or $\mathcal{A}\mathcal{M}\mathcal{S}$-LATEX because properly prepared electronic manuscripts save the author proofreading time and move more quickly through the production process. To this end, the Society

has prepared "preprint" style files, specifically the amsppt style of $\mathcal{A}_{\mathcal{M}}\mathcal{S}$-TEX and the amsart style of $\mathcal{A}_{\mathcal{M}}\mathcal{S}$-LATEX, which will simplify the work of authors and of the production staff. Those authors who make use of these style files from the beginning of the writing process will further reduce their own effort.

Guidelines for Preparing Electronic Manuscripts provide additional assistance and are available for use with either $\mathcal{A}_{\mathcal{M}}\mathcal{S}$-TEX or $\mathcal{A}_{\mathcal{M}}\mathcal{S}$-LATEX. Authors with FTP access may obtain these *Guidelines* from the Society's Internet node e-MATH.ams.com (130.44.1.100). For those without FTP access they can be obtained free of charge from the e-mail address guide-elec@math.ams.com (Internet) or from the Publications Department, P. O. Box 6248, Providence, RI 02940-6248. When requesting *Guidelines* please specify which version you want.

Electronic manuscripts should be sent to the Providence office only after the paper has been accepted for publication. Please send electronically prepared manuscript files via e-mail to pub-submit@math.ams.com (Internet) or on diskettes to the Publications Department address listed above. When submitting electronic manuscripts please be sure to include a message indicating in which publication the paper has been accepted.

Two copies of the paper should be sent directly to the appropriate Editor and the author should keep one copy. At that time authors should indicate if the paper has been prepared using $\mathcal{A}_{\mathcal{M}}\mathcal{S}$-TEX or $\mathcal{A}_{\mathcal{M}}\mathcal{S}$-LATEX. The *Manual for Authors of Mathematical Papers* should be consulted for symbols and style conventions. The *Manual* may be obtained free of charge from the e-mail address cust-serv@math.ams.com or from AMS, Customer Services Department, P. O. Box 6248, Providence, RI 02940-6248.

Any inquiries concerning a paper that has been accepted for publication should be sent directly to the Editorial Department, American Mathematical Society, P. O. Box 6248, Providence, RI 02940-6248.

Editors

Authors are requested to send papers directly to the appropriate Editor (the one whose area of responsibility and expertise, as described below, most closely approximates the subject field of the manuscript). Only when in doubt about an appropriate Editor, should manuscripts be sent to the Coordinating Editor responsible for the area in mathematics most closely connected to the paper. If in doubt about the area, send manuscript to the Managing Editor, to whom all other communication about the journal should also be addressed. (All addresses should include the line "Department of Mathematics", unless another department is indicated.)

Managing Editor: Irwin Kra, SUNY at Stony Brook, Stony Brook, NY 11794–3651

CONTENTS

Vol. 115, No. 4 August 1992 Whole No. 398

A. ALGEBRA AND NUMBER THEORY

Locally complete intersection multiple structures on smooth algebraic curves. By M. Boratynski 877
Zero-dimensionality in commutative rings. By Robert Gilmer and William Heinzer . 881
The class of all S-pregroups is not finitely axiomatizable. By Deko V. Dekov 895
Trigonometric polynomials and lattice points. By J. Cilleruelo and A. Cordoba 899
Maximal ideals in Laurent polynomial rings. By Budh Nashier 907
Free summands in maximal Cohen-Macaulay approximations and Eisenbud operators over hypersurface rings. By Alex Martsinkovsky 915
The automorphism group of a function field. By Manohar Madan and Michael Rosen 923
Groups with many rewritable products. By Mario Curzio, Patrizia Longobardi, Mercede Maj, and Akbar Rhemtulla 931
A note on coherent rings of dimension two. By Zhao Yicai 935
The Evans-Griffith syzygy theorem and Bass numbers. By Winfried Bruns 939
Weinbaum's conjecture on unique subwords of nonperiodic words. By Andrew J. Duncan and James Howie 947
Finite groups in which the degrees of the nonlinear irreducible characters are distinct. By Yakov Berkovich, David Chillag, and Marcel Herzog 955
Gaussian periods and units in certain cyclic fields. By Andrew J. Lazarus 961

B. ANALYSIS

The Fourier-Bessel series representation of the pseudo-differential operator $(-x^{-1}D)^{\nu}$. By O. P. Singh and J. N. Pandey 969
Polydiscs and nontangential limits. By Kohur Gowrisankaran 977
The behavior of the analytically continued resolvent operator near $\kappa = 0$ and an application to energy decay. By Kazuhiro Yamamoto 985
Commutator approximants. By P. J. Maher 995
Imbedding of any vector field in a scalar semilinear parabolic equation. By P. Poláčik . 1001
Two new open mapping theorems for analytic multivalued functions. By Line Baribeau and Sarah Harbottle 1009
Density of the polynomials in the Hardy space of certain slit domains. By John Akeroyd 1013
A short proof of the Y. Katznelson's and L. Tzafriri's theorem. By Vũ Quôc Phóng .. 1023
Compact and weakly compact homomorphisms between algebras of differentiable functions. By Manuel González and Joaquín M. Gutiérrez 1025
Positivity of global branches of fully nonlinear elliptic boundary value problems. By Timothy J. Healey and Hansjörg Kielhöfer 1031
Nonlinear p-Laplacian problems on unbounded domains. By Lao Sen Yu 1037
Some Remarks on the Daugavet Equation. By P. Wojtaszczyk 1047
A note on Krylov-Tso's parabolic inequality. By Luis Escauriaza 1053
Reflexivity of commutative subspace lattices. By Richard Haydon 1057
The first interval of stability of a periodic equation of Duffing type. By Rafael Ortega 1061
On a regularity theorem for weak solutions to transmission problems with internal Lipschitz boundaries. By L. Escauriaza, E. B. Fabes, and G. Verchota 1069
A note on a theorem of J. Diestel and B. Faires. By J. C. Ferrando and M. López-Pellicer 1077
Global attractivity in nonlinear delay difference equations. By V. Lj. Kocić and G. Ladas 1083
