PROVIDENCE, RHODE ISLAND USA

ISSN 0002-9939

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

Subscription information. *Proceedings of the American Mathematical Society* is published monthly. Subscription prices for Volume 123 (1995) are \$605 list; \$484 institutional member; \$363 individual member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of \$25; subscribers in India must pay a postage surcharge of \$38. Expedited delivery to destinations in North America—\$38; elsewhere—\$91.

Back number information. For back issues see the *AMS Catalog of Publications*.

Subscriptions and orders should be addressed to the American Mathematical Society, P. O. Box 5904, Boston, MA 02206-5904. *All orders must be accompanied by payment.* Other correspondence should be addressed to P. O. Box 6248, Providence, RI 02940-6248.

Copying and reprinting. Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Manager of Editorial Services, American Mathematical Society, P. O. Box 6248, Providence, RI 02940-6248. Requests can also be made by e-mail to reprint-permission@math.ams.org.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that a fee of \$1.00 plus \$.25 per page for each copy be paid directly to the Copyright Clearance Center, Inc., 222 Rosewood Drive, Danvers, MA 01923. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.

Proceedings of the American Mathematical Society is published monthly by the American Mathematical Society at 201 Charles Street, Providence, RI 02904-2213. Second-class postage is paid at Providence, Rhode Island. Postmaster: Send address changes to *Proceedings*, American Mathematical Society, P. O. Box 6248, Providence, RI 02940-6248.

Editorial Information

To be published in the *Proceedings*, a paper must be correct, new, nontrivial, and significant. Further, it must be well written and of interest to a substantial number of mathematicians. Piecemeal results, such as an inconclusive step toward an unproved major theorem or a minor variation on a known result, are in general not acceptable for publication. *Proceedings* Editors solicit and encourage publication of worthy papers of length not exceeding 10 published pages. Published pages are the same size as those generated in the style files provided for $\mathcal{A}\mathcal{M}\mathcal{S}\text{-T}\mathcal{E}\mathcal{X}$ or $\mathcal{A}\mathcal{M}\mathcal{S}\text{-L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$.

Very short notes not to exceed two printed pages are also accepted, and appear under the heading SHORTER NOTES. Items deemed suitable include an elegant new proof of an important and well-known theorem, an illuminating example or counterexample, or a new viewpoint on familiar results. New results, if of a brief and striking character, might also be acceptable, though in general a paper which is merely very short will not be suitable for the SHORTER NOTES department.

As of March 8, 1995, the backlog for this journal was approximately 9 issues. This estimate is the result of dividing the number of manuscripts for this journal in the Providence office that have not yet gone to the printer on the above date by the average number of articles per issue over the previous twelve months, reduced by the number of issues published in four months (the time necessary for editing and composing a typical issue).

A Copyright Transfer Agreement is required before a paper will be published in this journal. By submitting a paper to this journal, authors certify that the manuscript has not been submitted to nor is it under consideration for publication by another journal, conference proceedings, or similar publication.

Information for Authors and Editors

The first page of an article must consist of a *descriptive title*, followed by an *abstract* that summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The *descriptive title* should be short, but informative; useless or vague phrases such as "some remarks about" or "concerning" should be avoided. The *abstract* should be at least one complete sentence, and at most 150 words. Included with the footnotes to the paper, there should be the 1991 *Mathematics Subject Classification* representing the primary and secondary subjects of the article. This may be followed by a list of *key words and phrases* describing the subject matter of the article and taken from it. A list of the numbers may be found in the annual index of *Mathematical Reviews*, published with the December issue starting in 1990, as well as from the electronic service e-MATH [telnet e-MATH.ams.org (or telnet 130.44.1.100). Login and password are e-math]. For journal abbreviations used in bibliographies, see the list of serials in the latest *Mathematical Reviews* annual index. When the manuscript is submitted, authors should supply the editor with electronic addresses if available. These will be printed after the postal address at the end of each article.

Two copies of the paper should be sent directly to the appropriate Editor and the author should keep one copy.

T_EX files available upon request. Authors may request a copy of the T_EX files of their papers by sending e-mail to file-request@math.ams.org or by contacting the Editorial Department, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248. The request should include the title of the paper, the name(s) of the author(s), the name of the publication in which the paper has or will appear, and the volume and issue numbers if known. The T_EX file will be sent to the author making the request after the article goes to the printer. If the requestor can receive Internet e-mail, please include the e-mail address to which the file should be sent. Otherwise please indicate a diskette format and postal address to which a disk should be mailed. **Note:** Because

\TeX production at the AMS sometimes requires extra fonts and macros that are not yet publicly available, \TeX files cannot be guaranteed to run through the author's version of \TeX without errors. The AMS regrets that it cannot provide support to eliminate such errors in the author's \TeX environment.

Electronically prepared manuscripts. The AMS encourages submission of electronically prepared manuscripts in $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\text{\TeX}$ or $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\text{\LaTeX}$ because properly prepared electronic manuscripts save the author proofreading time and move more quickly through the production process. To this end, the Society has prepared author packages for each AMS publication. Author packages include instructions for preparing electronic manuscripts, the *AMS Author Handbook*, samples, and a style file that generates the particular design specifications of that publication series for both $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\text{\TeX}$ and $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\text{\LaTeX}$.

Those authors who make use of these style files from the beginning of the writing process will further reduce their own efforts. Electronically submitted manuscripts prepared in plain \TeX or \LaTeX are normally not acceptable due to the high amount of technical time required to insure that the file will run properly through the AMS in-house production system. Users of plain \TeX should have little difficulty learning $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\text{\TeX}$, and \LaTeX users will find that $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\text{\LaTeX}$ is the same as \LaTeX with additional commands to simplify the typesetting of mathematics.

Authors with FTP access may retrieve an author package from the Society's Internet node `e-MATH.ams.org` (130.44.1.100). For those without FTP access, the author package can be obtained free of charge by sending e-mail to `pub@math.ams.org` (Internet) or from the Publication Division, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248. When requesting an author package, please specify $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\text{\TeX}$ or $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\text{\LaTeX}$ and the publication in which your paper will appear.

At the time of submission, authors should indicate if the paper has been prepared using $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\text{\TeX}$ or $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\text{\LaTeX}$ and provide the Editor with a paper manuscript that matches the electronic manuscript. The final version of the electronic manuscript should be sent to the Providence office immediately after the paper has been accepted for publication. The author should also send the final version of the paper manuscript to the Editor, who will forward a copy to the Providence office. Editors will require authors to send their electronically prepared manuscripts to the Providence office in a timely fashion. Electronically prepared manuscripts can be sent via e-mail to `pub-submit@math.ams.org` (Internet) or on diskette to the Editorial Department, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248. When submitting an electronic manuscript, please be sure to include a message indicating in which publication the paper has been accepted. No corrections will be accepted electronically. Authors must mark their changes on their proof copies and return them to the Providence office. Complete instructions on how to submit files are included in the author package.

Any inquiries concerning a paper that has been accepted for publication should be sent directly to the Editorial Department, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248.

Editors

Authors are requested to send papers directly to the appropriate Editor (the one whose area of responsibility and expertise, as described below, most closely approximates the subject field of the manuscript). Only when in doubt about an appropriate Editor, should manuscripts be sent to the Coordinating Editor responsible for the area in mathematics most closely connected to the paper. If in doubt about the area, send manuscript to the Managing Editor, to whom all other communication about the journal should also be addressed. (All addresses should include the line "Department of Mathematics", unless another department is indicated.)

Managing Editor: Irwin Kra, SUNY at Stony Brook, Stony Brook, NY 11794-3651
e-mail: irwin@math.sunysb.edu

1. ODE, PDE, GLOBAL ANALYSIS, AND DYNAMICAL SYSTEMS

Coordinating Editor: Linda Keen, CUNY-Lehman College, Bronx, NY 10468,
e-mail: ljdklc@cunyvm.cuny.edu or ljdklc@cunyvm.bitnet

Partial differential equations, Jeffrey B. Rauch, University of Michigan, Angell Hall, Ann Arbor, MI 48109, e-mail: rauch@math.lsa.umich.edu

Dynamical systems and ergodic theory, Mary Rees, Department of Pure Mathematics, University of Liverpool, P.O. Box 147, Liverpool L69 3BX, United Kingdom,
e-mail: maryrees@liverpool.ac.uk

Ordinary differential equations and special functions, Hal L. Smith, Arizona State University, Tempe, AZ 85287, e-mail: halsmith@math.la.asu.edu

Global analysis, Linda Keen

2. LIE GROUPS, TOPOLOGY, AND GEOMETRY

Coordinating Editor: Peter Li, University of California, Irvine, CA 92717,
e-mail: pli@math.uci.edu

Topological groups and Lie groups (symmetric spaces), Roe Goodman, Rutgers University, New Brunswick, NJ 08903-2101, e-mail: goodman@math.rutgers.edu

Riemannian geometry (including affine, pseudo-Riemannian, contact, classical, and Lorentzian geometries), Christopher Croke, University of Pennsylvania, Philadelphia, PA 19104-6317,
e-mail: ccroke@math.upenn.edu

Geometric analysis (geometric PDE, minimal surfaces, harmonic maps) and Kahler geometry, Peter Li

Algebraic topology (higher dimensional topology), Thomas Goodwillie, Brown University, Box 1917, Providence, RI 02912, e-mail: tomg@brownvm.bitnet

Metric and geometric topology, James West, Cornell University, White Hall, Ithaca, NY 14853-7901, e-mail: west@math.cornell.edu

Set-theoretic and general topology, Franklin D. Tall, University of Toronto, Toronto, Ontario, Canada M5S 1A1, e-mail: tall@math.toronto.edu

Low dimensional topology and differential topology (knot theory, 3- and 4-manifolds, Gauge-theory), Ronald Stern, University of California, Irvine, CA 92717,
e-mail: rstern@math.uci.edu

3. ANALYSIS AND OPERATOR THEORY

Coordinating Editor: Clifford J. Earle, Jr., Cornell University, White Hall, Ithaca, NY 14853-7901, e-mail: cliff@math.cornell.edu

One complex variable and potential theory, Albert Baernstein II, Washington University, St. Louis, MO 63130-4899, e-mail: C31801AB@WUVM.D.BITNET

Several complex variables, Eric Bedford, Indiana University, Swain Hall East, Bloomington, IN 47405, e-mail: BEDFORD@ucs.indiana.edu

Functional analysis, Dale Alspach, Oklahoma State University, Stillwater, OK 74078-0613,
e-mail: alspach@hilbert.math.okstate.edu

Complex variables, functional analysis, and operator theory, Theodore W. Gamelin, University of California, Los Angeles, CA 90024, e-mail: twg@math.ucla.edu

Functional analysis and operator theory, Palle E. T. Jorgensen, University of Iowa, Iowa City, IA 52242

Classical and harmonic analysis, J. Marshall Ash, DePaul University, Chicago, IL 60614,
e-mail: MATJMA@DEPAUL.BITNET

Classical and harmonic analysis, Christopher D. Sogge, University of California, Los Angeles, CA 90024, e-mail: sogge@math.ucla.edu

Analytic number theory and automorphic forms, Dennis A. Hejhal, School of Mathematics, University of Minnesota, Minneapolis, MN 55455-0488, e-mail: hejhal@math.umn.edu

4. **ALGEBRA, NUMBER THEORY, AND COMBINATORICS**

Coordinating Editor: M. Susan Montgomery, University of Southern California, DRB 155, Los Angeles, CA 90089-1113, e-mail: smontgom@math.usc.edu

General number theory, William W. Adams, University of Maryland, College Park, MD 20742-4015, e-mail: wwa@math.umd.edu

General algebra, Lance W. Small, University of California San Diego, La Jolla, CA 92093-0112, e-mail: lws@math.ucsd.edu

Commutative algebra, Wolmer V. Vasconcelos, Rutgers University, New Brunswick, NJ 08903-2101, e-mail: vasconce@rings.rutgers.edu

Group theory, Ronald M. Solomon, Ohio State University, Columbus, OH 43210-1101, e-mail: solomon@function.mps.ohio-state.edu

K-theory, algebraic groups, algebraic geometry, Eric M. Friedlander, Northwestern University, Evanston, IL 60208-2730, e-mail: eric@math.nwu.edu

Combinatorics, Jeffrey N. Kahn, Rutgers University, New Brunswick, NJ 08903-2101, e-mail: jkahn@math.rutgers.edu

Analytic number theory and automorphic forms, Dennis A. Hejhal, School of Mathematics, University of Minnesota, Minneapolis, MN 55455-0488, e-mail: hejhal@math.umn.edu

Logic and foundations, Andreas R. Blass, University of Michigan, Ann Arbor, MI 48109-1003, e-mail: ablass@umich.edu

Lie algebras and Lie groups, Roe Goodman, Rutgers University, New Brunswick, NJ 08903-2101, e-mail: goodman@math.rutgers.edu

Noncommutative rings, Ken Goodearl, University of California, Santa Barbara, CA 93106, e-mail: goodearl@math.ucsb.edu

5. **APPLIED MATHEMATICS, PROBABILITY, AND STATISTICS**

Coordinating Editor: James Glimm, Department of Applied Mathematics and Statistics, SUNY at Stony Brook, Stony Brook, NY 11794-3600, e-mail: glimm@ams.sunysb.edu

Probability, Richard T. Durrett, Cornell University, White Hall, Ithaca, NY 14853-7901, e-mail: rtd@cornella.cit.cornell.edu

Statistics, Wei Y. Loh, Department of Statistics, University of Wisconsin, Madison, WI 53706-1693, e-mail: loh@stat.wisc.edu

Applied mathematics, David Sharp, Theoretic Division, Los Alamos National Laboratory MSB285, Los Alamos, NM 87545, e-mail: dhs@lanl.gov

John Trangenstein, Duke University, Durham, NC 27706, e-mail: johnt@math.duke.edu

Operations research, Joseph S. B. Mitchell, Department of Applied Mathematics and Statistics, SUNY at Stony Brook, Stony Brook, NY 11794-3600, e-mail: jbsm@ams.sunysb.edu
