## Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

**Submission information.** See **Information for Authors** at the end of this issue.

**Publisher Item Identifier.** The Publisher Item Identifier (PII) appears at the top of the first page of each article published in this journal. This alphanumeric string of characters uniquely identifies each article and can be used for future cataloging, searching, and electronic retrieval.

**Subscription information.** *Proceedings of the American Mathematical Society* is published monthly. Beginning January 1996 *Proceedings* is accessible from e-MATH via the World Wide Web at the URL <http://www.ams.org/publications/>. Subscription prices for Volume 126 (1998) are as follows: for paper delivery, \$713 list, \$570 institutional member, \$642 corporate member, \$428 individual member; for electronic delivery, \$642 list, \$514 institutional member, \$578 corporate member, \$385 individual member. Upon request, subscribers to paper delivery of this journal are also entitled to receive electronic delivery. If ordering the paper version, add \$25 for surface delivery outside the United States and India; \$49 to India. Expedited delivery to destinations in North America is \$39; elsewhere \$118. For paper delivery a late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year.

**Back number information.** For back issues see the *AMS Catalog of Publications*.

Subscriptions and orders should be addressed to the American Mathematical Society, P.O. Box 5904, Boston, MA 02206-5904. *All orders must be accompanied by payment.* Other correspondence should be addressed to P.O. Box 6248, Providence, RI 02940-6248.

**Copying and reprinting.** Material in this journal may be reproduced by any means for educational and scientific purposes without fee or permission with the exception of reproduction by services that collect fees for delivery of documents and provided that the customary acknowledgment of the source is given. This consent does not extend to other kinds of copying for general distribution, for advertising or promotional purposes, or for resale. Requests for permission for commercial use of material should be addressed to the Assistant to the Publisher, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248. Requests can also be made by e-mail to [reprint-permission@ams.org](mailto:reprint-permission@ams.org).

Excluded from these provisions is material in articles for which the author holds copyright. In such cases, requests for permission to use or reprint should be addressed directly to the author(s). (Copyright ownership is indicated in the notice in the lower right-hand corner of the first page of each article.)

---

*Proceedings of the American Mathematical Society* is published monthly by the American Mathematical Society at 201 Charles Street, Providence, RI 02904-2213. Periodicals postage is paid at Providence, Rhode Island. Postmaster: Send address changes to *Proceedings*, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248.

This journal is indexed in *Science Citation Index*<sup>®</sup>, *SciSearch*<sup>®</sup>,  
*Research Alert*<sup>®</sup>, *CompuMath Citation Index*<sup>®</sup>, and  
*Current Contents*<sup>®</sup>/*Physical, Chemical & Earth Sciences*.

Printed in the United States of America.

⊗ The paper used in this journal is acid-free and falls within the guidelines established to ensure permanence and durability.

## Editorial Information

To be published in the *Proceedings*, a paper must be correct, new, nontrivial, and significant. Further, it must be well written and of interest to a substantial number of mathematicians. Piecemeal results, such as an inconclusive step toward an unproved major theorem or a minor variation on a known result, are in general not acceptable for publication. *Proceedings* Editors solicit and encourage publication of worthy papers of length not exceeding 10 published pages. Published pages are the same size as those generated in the style files provided for  $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$  or  $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{T}\mathcal{E}\mathcal{X}$ .

Very short notes not to exceed two printed pages are also accepted, and appear under the heading SHORTER NOTES. Items deemed suitable include an elegant new proof of an important and well-known theorem, an illuminating example or counterexample, or a new viewpoint on familiar results. New results, if of a brief and striking character, might also be acceptable, though in general a paper which is merely very short will not be suitable for the SHORTER NOTES department.

As of September 30, 1997, the backlog for this journal was approximately 10 issues. This estimate is the result of dividing the number of manuscripts for this journal in the Providence office that have not yet gone to the printer on the above date by the average number of articles per issue over the previous twelve months, reduced by the number of issues published in four months (the time necessary for editing and composing a typical issue).

A Consent to Publish and Copyright Agreement is required before a paper will be published in this journal. After a paper is accepted for publication, the Providence office will send out a Consent to Publish and Copyright Agreement to all authors of the paper. By submitting a paper to this journal, authors certify that the results have not been submitted to nor are they under consideration for publication by another journal, conference proceedings, or similar publication.

## Information for Authors

**Initial submission.** Two copies of the paper should be sent directly to the appropriate Editor and the author should keep a copy.

The first page of an article must consist of a *descriptive title*, followed by an *abstract* that summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The *descriptive title* should be short, but informative; useless or vague phrases such as “some remarks about” or “concerning” should be avoided. The *abstract* should be at least one complete sentence, and at most 150 words. Included with the footnotes to the paper, there should be the 1991 *Mathematics Subject Classification* representing the primary and secondary subjects of the article. This may be followed by a list of *key words and phrases* describing the subject matter of the article and taken from it. A list of classifications may be found in the annual index of *Mathematical Reviews*, published with the December issue starting in 1990. Journal abbreviations used in bibliographies are also listed in the latest *Mathematical Reviews* annual index. The classifications and the journal abbreviations are accessible from e-MATH via the World Wide Web through the URL <http://www.ams.org/committee/publications/mr-info.html> or via FTP to <ftp.ams.org> (login as `anonymous` and enter username as password). The classifications are available as a browsable list and the journal abbreviations are available through a search tool. When the manuscript is submitted, authors should supply the editor with electronic addresses if available. These will be printed after the postal address at the end of each article.

**Electronically prepared manuscripts.** The AMS encourages electronically prepared manuscripts, with a strong preference for  $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ . To this end, the Society has prepared  $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$  author packages for each AMS publication. Author packages include instructions for preparing electronic manuscripts, the *AMS Author Handbook*, samples, and a style file that generates the particular design specifications of that publication series. Articles properly prepared using the  $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$  style file automatically provide hypertext linking to the bibliography and other elements of the article for searching electronically on the World Wide Web. Because linking must often be added manually to electronically prepared manuscripts in other forms of  $\mathcal{T}\mathcal{E}\mathcal{X}$ , using  $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$  also reduces the amount of technical intervention once the files are received by the AMS. This results

in fewer errors in processing and saves the author proofreading time.  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$  papers also move more efficiently through the production stream, helping to minimize publishing costs.

$\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$  is the highly preferred format of  $\mathcal{T}\mathcal{E}\mathcal{X}$ , but author packages are also available in  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{T}\mathcal{E}\mathcal{X}$ . Those authors who make use of these style files from the beginning of the writing process will further reduce their own efforts. Manuscripts prepared electronically in  $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$  or plain  $\mathcal{T}\mathcal{E}\mathcal{X}$  are normally not acceptable due to the high amount of technical time required to insure that the file will run properly through the AMS in-house production system.  $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$  users will find that  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$  is the same as  $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$  with additional commands to simplify the typesetting of mathematics, and users of plain  $\mathcal{T}\mathcal{E}\mathcal{X}$  should have the foundation for learning  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ .

Authors may retrieve an author package from e-MATH via the World Wide Web through the URL <http://www.ams.org/tex/> or via FTP to <ftp.ams.org> (login as `anonymous` and enter username as password). The author package can also be obtained free of charge by sending e-mail to [pub@ams.org](mailto:pub@ams.org) (Internet) or from the Publication Division, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248. When requesting an author package, please specify  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$  or  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{T}\mathcal{E}\mathcal{X}$ , Macintosh or IBM (3.5) format, and the publication in which your paper will appear. Please be sure to include your complete mailing address.

At the time of submission, authors should indicate if the paper has been prepared using  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$  or  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{T}\mathcal{E}\mathcal{X}$  and provide the Editor with a paper manuscript that matches the electronic manuscript. The final version of the electronic manuscript should be sent to the Providence office immediately after the paper has been accepted for publication. The author should also send the final version of the paper manuscript to the Editor, who will forward a copy to the Providence office. Editors will require authors to send their electronically prepared manuscripts to the Providence office in a timely fashion. Electronically prepared manuscripts can be sent via e-mail to [pub-submit@ams.org](mailto:pub-submit@ams.org) (Internet) or on diskette to the Electronic Prepress Department, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248. When sending a manuscript electronically, please be sure to include a message indicating in which publication the paper has been accepted. No corrections will be accepted electronically. Authors must mark their changes on their proof copies and return them to the Providence office. Complete instructions on how to send files are included in the author package.

**Electronic graphics.** Figures may be sent to the AMS in an electronic format. The AMS recommends that graphics created electronically be saved in Encapsulated PostScript (EPS) format. This includes graphics originated via a graphics application as well as scanned photographs or other computer-generated images.

If the graphics package used does not support EPS output, the graphics file should be saved in one of the standard graphics formats—such as TIFF, PICT, GIF, etc.—rather than in an application-dependent format. Graphics files sent in an application-dependent format are not likely to be used. No matter what method was used to produce the graphic, it is necessary to provide a paper copy to the AMS.

Authors using graphics packages for the creation of electronic art should also avoid the use of any lines thinner than 0.5 points in width. Many graphics packages allow the user to specify a “hairline” for a very thin line. Hairlines often look acceptable when proofed on a typical laser printer. However, when produced on a high-resolution laser imagesetter, hairlines become nearly invisible and will be lost entirely in the final printing process.

Screens should be set to values between 15% and 85%. Screens which fall outside of this range are too light or too dark to print correctly.

**$\mathcal{T}\mathcal{E}\mathcal{X}$  files available.** Beginning with the January 1992 issue of the *Bulletin* and the January 1996 issues of *Transactions*, *Proceedings*, *Mathematics of Computation*, and the *Journal of the AMS*,  $\mathcal{T}\mathcal{E}\mathcal{X}$  files can be downloaded from e-MATH, starting from URL <http://www.ams.org/journals/>. Authors without Web access may request their files at the address given below after the article has been published. For *Bulletin* papers published in 1987 through 1991 and for *Transactions*, *Proceedings*, *Mathematics of Computation*, and the *Journal of the AMS* papers published in 1987 through 1995,  $\mathcal{T}\mathcal{E}\mathcal{X}$  files are available upon request for authors without Web access by sending e-mail to [file-request@ams.org](mailto:file-request@ams.org)

or by contacting the Electronic Prepress Department, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248. The request should include the title of the paper, the name(s) of the author(s), the name of the publication in which the paper has or will appear, and the volume and issue numbers if known. The  $\text{\TeX}$  file will be sent to the author making the request after the article goes to the printer. If the requestor can receive Internet e-mail, please include the e-mail address to which the file should be sent. Otherwise please indicate a diskette format and postal address to which a disk should be mailed. **Note:** Because  $\text{\TeX}$  production at the AMS sometimes requires extra fonts and macros that are not yet publicly available,  $\text{\TeX}$  files cannot be guaranteed to run through the author's version of  $\text{\TeX}$  without errors. The AMS regrets that it cannot provide support to eliminate such errors in the author's  $\text{\TeX}$  environment.

Any inquiries concerning a paper that has been accepted for publication should be sent directly to the Electronic Prepress Department, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248.

## Editors

Authors are requested to send papers directly to the appropriate Editor (the one whose area of responsibility and expertise, as described below, most closely approximates the subject field of the manuscript). Only when in doubt about an appropriate Editor, should manuscripts be sent to the Coordinating Editor responsible for the area in mathematics most closely connected to the paper. If in doubt about the area, send the manuscript to the Managing Editor, to whom all other communication about the journal should also be addressed. (All addresses should include the line "Department of Mathematics", unless another department is indicated.)

Managing Editor: Clifford J. Earle, Jr., Cornell University, White Hall, Ithaca, NY 14853-7901; e-mail: [cliff@math.cornell.edu](mailto:cliff@math.cornell.edu)

### 1. ODE, PDE, GLOBAL ANALYSIS, AND DYNAMICAL SYSTEMS

Coordinating Editor: Linda Keen, CUNY-Lehman College, Bronx, NY 10468; e-mail: [linda@alpha.lehman.cuny.edu](mailto:linda@alpha.lehman.cuny.edu)

**Partial differential equations**, Lesley M. Sibner, Polytechnic University, Brooklyn, NY 11201-2990; e-mail: [lsibner@magnus.poly.edu](mailto:lsibner@magnus.poly.edu)

**Dynamical systems and ergodic theory**, Michael Handel, Department of Mathematics and Computer Science, Herbert Lehman College (CUNY), Bronx, NY 10468-1589; e-mail: [michael@alpha.lehman.cuny.edu](mailto:michael@alpha.lehman.cuny.edu)

**Ordinary differential equations and special functions**, Hal L. Smith, Arizona State University, Tempe, AZ 85287; e-mail: [halsmith@math.la.asu.edu](mailto:halsmith@math.la.asu.edu)

**Global analysis**, Jozef Dodziuk, Ph.D. Program in Mathematics, Graduate School and University Center (CUNY), 33 West 42nd Street, New York, NY 10036-8099; e-mail: [jozek@hodge.gc.cuny.edu](mailto:jozek@hodge.gc.cuny.edu)

### 2. LIE GROUPS, TOPOLOGY, AND GEOMETRY

Coordinating Editor: Peter Li, University of California, Irvine, CA 92717-0001; e-mail: [pli@math.uci.edu](mailto:pli@math.uci.edu)

**Topological groups and Lie groups (symmetric spaces)**, Roe Goodman, Rutgers University, New Brunswick, NJ 08903-2101; e-mail: [goodman@math.rutgers.edu](mailto:goodman@math.rutgers.edu)

**Riemannian geometry (including affine, pseudo-Riemannian, contact, classical, and Lorentzian geometries)**, Christopher Croke, University of Pennsylvania, Philadelphia, PA 19104-6317; e-mail: [ccroke@math.upenn.edu](mailto:ccroke@math.upenn.edu)

**Geometric analysis (geometric PDE, minimal surfaces, harmonic maps) and Kähler geometry**, Peter Li

**Algebraic topology**, Ralph Cohen, Stanford University, Stanford, CA 94305-2125; e-mail: [ralph@math.stanford.edu](mailto:ralph@math.stanford.edu)

**Set-theoretic and general topology**, Alan Dow, York University, North York, Ontario, Canada M3J 1P3; e-mail: [dowa@mathstat.yorku.ca](mailto:dowa@mathstat.yorku.ca)

**Low dimensional topology, gauge theory, 4-manifolds**, Ronald A. Fintushel, Michigan State University, East Lansing, MI 48824-1027; e-mail: [ronfint@math.msu.edu](mailto:ronfint@math.msu.edu)

**Complex and Kähler geometry**, Les Saper, Duke University, Durham, NC 27708-0320; e-mail: [saper@math.duke.edu](mailto:saper@math.duke.edu)

### 3. ANALYSIS AND OPERATOR THEORY

Coordinating Editor: Eric Bedford, Indiana University, Bloomington, IN 47405-5701; e-mail: [BEDFORD@ucs.indiana.edu](mailto:BEDFORD@ucs.indiana.edu)

**One complex variable and potential theory**, Albert Baernstein II, Washington University, St. Louis, MO 63130-4899; e-mail: [al@math.wustl.edu](mailto:al@math.wustl.edu)

**Several complex variables**, Steven R. Bell, Purdue University, West Lafayette, IN 47907-1395; e-mail: [bell@math.purdue.edu](mailto:bell@math.purdue.edu)

**Functional analysis**, Dale Alspach, Oklahoma State University, Stillwater, OK 74078-0613; e-mail: [alspach@hilbert.math.okstate.edu](mailto:alspach@hilbert.math.okstate.edu)

**Functional analysis and operator theory**, David R. Larson, Texas A & M University, College Station, TX 77843-3368; e-mail: [larson@math.tamu.edu](mailto:larson@math.tamu.edu)

**Classical real analysis and measure theory**, Frederick W. Gehring, University of Michigan, Ann Arbor, MI 48109-1003; e-mail: [fgehring@math.lsa.umich.edu](mailto:fgehring@math.lsa.umich.edu)

**Classical and harmonic analysis**, Christopher D. Sogge, Johns Hopkins University, Baltimore, MD 21218; e-mail: [sogge@math.jhu.edu](mailto:sogge@math.jhu.edu)

**Analytic number theory and automorphic forms**, Dennis A. Hejhal, School of Mathematics, University of Minnesota, Minneapolis, MN 55455-0488; e-mail: [hejhal@math.umn.edu](mailto:hejhal@math.umn.edu)

#### 4. ALGEBRA, NUMBER THEORY, AND COMBINATORICS

Coordinating Editor: Lance W. Small, University of California San Diego, La Jolla, CA 92093-0112; e-mail: [lwsma11@ucsd.edu](mailto:lwsma11@ucsd.edu)

**General number theory**, David E. Rohrlich, Boston University, Boston, MA 02215-2411; e-mail: [rohrlich@math.bu.edu](mailto:rohrlich@math.bu.edu)

**General algebra**, Lance W. Small

**Commutative algebra**, Wolmer V. Vasconcelos, Rutgers University, New Brunswick, NJ 08903-2101; e-mail: [vasconce@math.rutgers.edu](mailto:vasconce@math.rutgers.edu)

**Group theory**, Ronald M. Solomon, Ohio State University, Columbus, OH 43210-1101; e-mail: [solomon@math.ohio-state.edu](mailto:solomon@math.ohio-state.edu)

**Algebraic geometry**, Ron Donagi, University of Pennsylvania, Philadelphia, PA 19104-6395; e-mail: [donagi@rademacher.math.upenn.edu](mailto:donagi@rademacher.math.upenn.edu)

**Combinatorics**, John R. Stembridge, University of Michigan, Ann Arbor, MI 48109-1109; e-mail: [jrs@math.lsa.umich.edu](mailto:jrs@math.lsa.umich.edu)

**Analytic number theory and automorphic forms**, Dennis A. Hejhal, School of Mathematics, University of Minnesota, Minneapolis, MN 55455-0488; e-mail: [hejhal@math.umn.edu](mailto:hejhal@math.umn.edu)

**Logic and foundations**, Carl G. Jockusch, Jr., University of Illinois, 1409 W. Green St., Urbana, IL 61801-2917; e-mail: [jockusch@math.uiuc.edu](mailto:jockusch@math.uiuc.edu)

**Lie algebras and Lie groups**, Roe Goodman, Rutgers University, New Brunswick, NJ 08903-2101; e-mail: [goodman@math.rutgers.edu](mailto:goodman@math.rutgers.edu)

**Noncommutative rings**, Ken Goodearl, University of California, Santa Barbara, CA 93106; e-mail: [goodearl@math.ucsb.edu](mailto:goodearl@math.ucsb.edu)

#### 5. APPLIED MATHEMATICS, PROBABILITY, AND STATISTICS

Coordinating Editor: James Glimm, Department of Applied Mathematics and Statistics, SUNY at Stony Brook, Stony Brook, NY 11794-3600; e-mail: [glimm@ams.sunysb.edu](mailto:glimm@ams.sunysb.edu)

**Probability**, Stanley Sawyer, Washington University, St. Louis, MO 63130-4899; e-mail: [sawyer@math.wustl.edu](mailto:sawyer@math.wustl.edu)

**Statistics**, Wei Y. Loh, Department of Statistics, University of Wisconsin, Madison, WI 53706-1693; e-mail: [loh@stat.wisc.edu](mailto:loh@stat.wisc.edu)

**Applied mathematics**, David Sharp, Theoretic Division, Los Alamos National Laboratory MSB285, Los Alamos, NM 87545; e-mail: [dhs@lanl.gov](mailto:dhs@lanl.gov)

**Control theory**, John A. Burns, Interdisciplinary Center for Applied Mathematics, Virginia Polytech Institute, Blacksburg, VA 24061-0531; e-mail: [burnsreg@vtvml.cc.vt.edu](mailto:burnsreg@vtvml.cc.vt.edu)

**Hyperbolic partial differential equations**, Suncica Canic, Iowa State University, Ames, IA 50010; e-mail: [canic@iastate.edu](mailto:canic@iastate.edu)
