

ADDENDUM TO “INDEPENDENCE AND DETERMINATION OF PROBABILITIES”

ZHIQIANG CHEN, HERMAN RUBIN, AND RICHARD A. VITALE

(Communicated by Clifford J. Earle, Jr.)

We have been apprised by A. P. Yurachkivsky that Theorem 1 of our paper [1] is contained in a result of his, as abstracted in “Axiomatization of stochastic independence” (5th International Vilnius Conference on Probability Theory and Mathematical Statistics, Abstracts of Communications, Vol. 4, 1989) and proved in preprint form as No. 90.6 “Axiomatic relations of independence as an equivalent of the probability measure” (Institute for Mathematics of the Academy of Science of the Ukrainian SSR, Kiev, 1990).
