## Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

**Submission information.** See **Information for Authors** at the end of this issue.

**Publisher Item Identifier.** The Publisher Item Identifier (PII) appears at the top of the first page of each article published in this journal. This alphanumeric string of characters uniquely identifies each article and can be used for future cataloging, searching, and electronic retrieval.

**Postings to the AMS website.** Articles are posted to the AMS website individually after proof is returned from authors and before appearing in an issue.

**Subscription information.** *Proceedings of the American Mathematical Society* is published monthly. Beginning January 1996 *Proceedings* is accessible from [www.ams.org/journals/](http://www.ams.org/journals/). Subscription prices for Volume 136 (2008) are as follows: for paper delivery, US\$1106 list, US\$885 institutional member, US\$995 corporate member, US\$664 individual member; for electronic delivery, US\$995 list, US\$796 institutional member, US\$896 corporate member, US\$597 individual member. Upon request, subscribers to paper delivery of this journal are also entitled to receive electronic delivery. If ordering the paper version, add US\$32 for surface delivery outside the United States and India; US\$49 to India. Expedited delivery to destinations in North America is US\$75; elsewhere US\$118. For paper delivery a late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year.

**Back number information.** For back issues see [www.ams.org/bookstore](http://www.ams.org/bookstore).

Subscriptions and orders should be addressed to the American Mathematical Society, P.O. Box 845904, Boston, MA 02284-5904 USA. *All orders must be accompanied by payment.* Other correspondence should be addressed to 201 Charles Street, Providence, RI 02904-2294 USA.

**Copying and reprinting.** Material in this journal may be reproduced by any means for educational and scientific purposes without fee or permission with the exception of reproduction by services that collect fees for delivery of documents and provided that the customary acknowledgment of the source is given. This consent does not extend to other kinds of copying for general distribution, for advertising or promotional purposes, or for resale. Requests for permission for commercial use of material should be addressed to the Acquisitions Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA. Requests can also be made by e-mail to [reprint-permission@ams.org](mailto:reprint-permission@ams.org).

Excluded from these provisions is material in articles for which the author holds copyright. In such cases, requests for permission to use or reprint should be addressed directly to the author(s). (Copyright ownership is indicated in the notice in the lower right-hand corner of the first page of each article.)

---

*Proceedings of the American Mathematical Society* is published monthly by the American Mathematical Society at 201 Charles Street, Providence, RI 02904-2294 USA. Periodicals postage is paid at Providence, Rhode Island. Postmaster: Send address changes to *Proceedings*, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA.

© 2008 by the American Mathematical Society. All rights reserved.

This journal is indexed in *Mathematical Reviews*, *Zentralblatt MATH*, *Science Citation Index*<sup>®</sup>, *Science Citation Index*<sup>™</sup>-*Expanded*, *ISI Alerting Services*<sup>SM</sup>, *CompuMath Citation Index*<sup>®</sup>, and *Current Contents*<sup>®</sup>/*Physical, Chemical & Earth Sciences*. This journal is archived in *Portico*.

Printed in the United States of America.

⊗ The paper used in this journal is acid-free and falls within the guidelines established to ensure permanence and durability.

A. ALGEBRA, NUMBER THEORY, AND COMBINATORICS

Mark Gross and Simone Pavanelli, <i>A Calabi-Yau threefold with Brauer group <math>(\mathbb{Z}/8\mathbb{Z})^2</math></i> .....	1
Edward B. Burger and Ashok M. Pillai, <i>On diophantine approximation along algebraic curves</i> .....	11
Enrique Artal Bartolo, José Ignacio Cogolludo, and Hiro-o Tokunaga, <i>Pencils and infinite dihedral covers of <math>\mathbb{P}^2</math></i> .....	21
Christopher Holden, <i>Mod 4 Galois representations and elliptic curves</i> .....	31
Daniel T. Wise, <i>Nonpositive sectional curvature for <math>(p, q, r)</math>-complexes</i> .....	41
Thomas Marley, Mark W. Rogers, and Hideto Sakurai, <i>Gorenstein rings and irreducible parameter ideals</i> .....	49
W. Kucharz, <i>Submanifolds of real algebraic varieties</i> .....	55
Arnold Adelberg, Shaofang Hong, and Wenli Ren, <i>Bounds of divided universal Bernoulli numbers and universal Kummer congruences</i> .....	61
Christopher J. Hillar and Jiawang Nie, <i>An elementary and constructive solution to Hilbert's 17th Problem for matrices</i> .....	73
Alex Kasman, Kathryn Pedings, Amy Reiszl, and Takahiro Shiota, <i>Universality of Rank 6 Plücker relations and Grassmann cone preserving maps</i> .....	77

B. ANALYSIS

Wojciech Czaja and Jacek Zienkiewicz, <i>Atomic characterization of the Hardy space <math>H_L^1(\mathbb{R})</math> of one-dimensional Schrödinger operators with nonnegative potentials</i> .....	89
Eric Bedford and Sione Ma'u, <i>Complex Monge-Ampère of a maximum</i> .....	95
Kenneth S. Berenhaut, John D. Foley, and Stevo Stević, <i>The global attractivity of the rational difference equation <math>y_n = A + \left(\frac{y_{n-k}}{y_{n-m}}\right)^p</math></i> .....	103
Jacobo Pejsachowicz, <i>Bifurcation of homoclinics</i> .....	111
Eva A. Gallardo-Gutiérrez and Jonathan R. Partington, <i>Common hypercyclic vectors for families of operators</i> .....	119
Konrad J. Swanepoel and Rafael Villa, <i>A lower bound for the equilateral number of normed spaces</i> .....	127
Peter Lindqvist and Juan J. Manfredi, <i>Note on a remarkable superposition for a nonlinear equation</i> .....	133
Daniel Li, Hervé Queffélec, and Luis Rodríguez-Piazza, <i>On some random thin sets of integers</i> .....	141
José M. Arrieta, <i>On boundedness of solutions of reaction-diffusion equations with nonlinear boundary conditions</i> .....	151
Elias Wegert and Lothar von Wolfersdorf, <i>Blaschke representation of functions on the circle</i> .....	161
Stephan Ramon Garcia, <i>Approximate antilinear eigenvalue problems and related inequalities</i> .....	171
Erik Jensen, <i>A new construction of the unstable manifold for the measure-preserving Hénon map</i> .....	181
Ihab Al Alam, <i>A Müntz space having no complement in <math>L_1</math></i> .....	193
Jan-Fredrik Olsen and Kristian Seip, <i>Local interpolation in Hilbert spaces of Dirichlet series</i> .....	203

Daniel M. Oberlin, Convolution and restriction estimates for measures on curves in $\mathbb{R}^2$ .....	213
Severino T. Melo and Marcela I. Merklen, Pseudodifferential operators with $C^*$ -algebra-valued symbols: Abstract characterizations .....	219
Wenchang Chu, Partial fraction decompositions and trigonometric sum identities .....	229
Evgenia Soprunova, Exponential Gelfond–Khovanskii formula in dimension one .....	239
Matthew D. Blair, Hart F. Smith, and Christopher D. Sogge, On Strichartz estimates for Schrödinger operators in compact manifolds with boundary ...	247
Hantaek Bae, Global well-posedness of dissipative quasi-geostrophic equations in critical spaces .....	257
N. J. Kalton and T. Kucherenko, Rademacher bounded families of operators on $L_1$ .....	263
Manav Das, Billingsley’s packing dimension .....	273
Ravi P. Agarwal, Kanishka Perera, and Donal O’Regan, Positive solutions in the sense of distributions of singular boundary value problems .....	279

#### D. GEOMETRY

Marcos P. A. Cavalcante, The $r$ -stability of hypersurfaces with zero Gauss-Kronecker curvature .....	287
Kristopher Tapp, Nonnegatively curved vector bundles with large normal holonomy groups .....	295
Yasuhiro Yabuki, Nayatani’s metric and conformal transformations of a Kleinian manifold .....	301

#### E. LOGIC AND FOUNDATIONS

Moti Gitik and Assaf Sharon, On SCH and the approachability property ....	311
Alec Matheson and Timothy H. McNicholl, Computable analysis and Blaschke products .....	321

#### F. STATISTICS AND PROBABILITY

Philippe Clement and Wolfgang Desch, An elementary proof of the triangle inequality for the Wasserstein metric .....	333
--	-----

#### G. TOPOLOGY

Janusz J. Charatonik and Włodzimierz J. Charatonik, Property of Kelley for the Cartesian products and hyperspaces .....	341
Charles Livingston, Slice knots with distinct Ozsváth-Szabó and Rasmussen invariants .....	347
Fabio Nicola, On local solvability of certain differential complexes .....	351
Richard Miles and Thomas Ward, Uniform periodic point growth in entropy rank one .....	359
Mladen Božičević, Characteristic cycles of standard sheaves associated with open orbits .....	367
Harold Donnelly, Positive curvature and eigenfunctions of the Laplacian .....	373

## Editorial Information

To be published in the *Proceedings*, a paper must be correct, new, nontrivial, and significant. Further, it must be well written and of interest to a substantial number of mathematicians. Piecemeal results, such as an inconclusive step toward an unproved major theorem or a minor variation on a known result, are in general not acceptable for publication. *Proceedings* Editors solicit and encourage publication of worthy papers of length not exceeding 10 published pages. Published pages are the same size as those generated in the style files provided for  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{T}\mathcal{E}\mathcal{X}$  or  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{T}\mathcal{E}\mathcal{X}$ .

Information on the backlog for this journal can be found on the AMS website starting from <http://www.ams.org/proc>.

In an effort to make articles available as quickly as possible, articles are posted to the AMS website individually after proof is returned from authors and before appearing in an issue.

A Consent to Publish and Copyright Agreement is required before a paper will be published in this journal. After a paper is accepted for publication, the Providence office will send out a Consent to Publish and Copyright Agreement to all authors of the paper. By submitting a paper to this journal, authors certify that the results have not been submitted to nor are they under consideration for publication by another journal, conference proceedings, or similar publication.

## Information for Authors

**Initial submission.** The AMS uses Centralized Manuscript Processing for initial submission. Authors should submit a PDF file using the Initial Manuscript Submission form found at [www.ams.org/cgi-bin/peertrack/submission.pl](http://www.ams.org/cgi-bin/peertrack/submission.pl), or send one copy of the manuscript to the following address: Centralized Manuscript Processing, PROCEEDINGS OF THE AMS, 201 Charles Street, Providence, RI 02904-2294 USA. If a paper copy is being forwarded to the AMS, indicate that it is for *Proceedings* and include the name of the corresponding author, contact information such as email address or mailing address, and the name of an appropriate Editor to review the paper (see the list of Editors below).

The first page of an article must consist of a *descriptive title*, followed by an *abstract* that summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The *descriptive title* should be short, but informative; useless or vague phrases such as “some remarks about” or “concerning” should be avoided. The *abstract* should be at least one complete sentence, and at most 150 words. Included with the footnotes to the paper should be the 2000 *Mathematics Subject Classification* representing the primary and secondary subjects of the article. The classifications are accessible from [www.ams.org/msc/](http://www.ams.org/msc/). The list of classifications is also available in print starting with the 1999 annual index of *Mathematical Reviews*. The Mathematics Subject Classification footnote may be followed by a list of *key words and phrases* describing the subject matter of the article and taken from it. Journal abbreviations used in bibliographies are listed in the latest *Mathematical Reviews* annual index. The series abbreviations are also accessible from [www.ams.org/publications/](http://www.ams.org/publications/). To help in preparing and verifying references, the AMS offers MR Lookup, a Reference Tool for Linking, at [www.ams.org/mrlookup/](http://www.ams.org/mrlookup/).

**Electronically prepared manuscripts.** The AMS encourages electronically prepared manuscripts, with a strong preference for  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{T}\mathcal{E}\mathcal{X}$ . To this end, the Society has prepared  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{T}\mathcal{E}\mathcal{X}$  author packages for each AMS publication. Author packages include instructions for preparing electronic manuscripts, samples, and a style file that generates the particular design specifications of that publication series. Articles properly prepared using the  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{T}\mathcal{E}\mathcal{X}$  style file and the `\label` and `\ref` commands automatically enable extensive intra-document linking to the bibliography and other elements of the article for searching electronically on the Web. Because linking must often be added manually to electronically prepared manuscripts in other forms of  $\mathcal{T}\mathcal{E}\mathcal{X}$ , using  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{T}\mathcal{E}\mathcal{X}$  also reduces the amount of technical intervention once the files are received by the AMS. This results in fewer errors in processing and saves the author proofreading time.  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{T}\mathcal{E}\mathcal{X}$

papers also move more efficiently through the production stream, helping to minimize publishing costs.

$\mathcal{A}\mathcal{M}\mathcal{S}$ - $\text{\LaTeX}$  is the highly preferred format of  $\text{\TeX}$ , but author packages are also available in  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\text{\TeX}$ . Those authors who make use of these style files from the beginning of the writing process will further reduce their own efforts. Manuscripts prepared electronically in  $\text{\LaTeX}$  or plain  $\text{\TeX}$  are normally not acceptable due to the high amount of technical time required to insure that the file will run properly through the AMS in-house production system.  $\text{\LaTeX}$  users will find that  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\text{\LaTeX}$  is the same as  $\text{\LaTeX}$  with additional commands to simplify the typesetting of mathematics, and users of plain  $\text{\TeX}$  should have the foundation for learning  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\text{\LaTeX}$ .

Authors may retrieve an author package from the AMS website starting from [www.ams.org/tex/](http://www.ams.org/tex/) or via FTP to [ftp.ams.org](ftp://ftp.ams.org) (login as `anonymous`, enter username as password, and type `cd pub/author-info`). The *AMS Author Handbook* and the *Instruction Manual* are available in PDF format following the author packages link from [www.ams.org/tex/](http://www.ams.org/tex/). The author package can also be obtained free of charge by sending email to [tech-support@ams.org](mailto:tech-support@ams.org) (Internet) or from the Publication Division, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA. When requesting an author package, please specify  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\text{\LaTeX}$  or  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\text{\TeX}$  and the publication in which your paper will appear. Please be sure to include your complete email address.

**After acceptance.** The final version of the electronic manuscript should be sent to the Providence office immediately after the paper has been accepted for publication. The author should also send the final version of the paper to the Editor, who will forward a copy to the Providence office. Accepted electronically prepared manuscripts can be submitted via the web at [www.ams.org/submit-book-journal/](http://www.ams.org/submit-book-journal/), sent via email to [pub-submit@ams.org](mailto:pub-submit@ams.org) (Internet), or sent on diskette to the Electronic Prepress Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA. When sending a manuscript electronically via e-mail or diskette, please be sure to include a message indicating in which publication the paper has been accepted. No corrections will be accepted electronically. Authors must mark their changes on their proof copies and return them to the Providence office. Complete instructions on how to send files are included in the author package.

**Electronic graphics.** Comprehensive instructions on preparing graphics are available starting from [www.ams.org/jourhtml/authors.html](http://www.ams.org/jourhtml/authors.html). A few of the major requirements are given here.

Submit files for graphics as EPS (Encapsulated PostScript) files. This includes graphics originated via a graphics application as well as scanned photographs or other computer-generated images. If this is not possible, TIFF files are acceptable as long as they can be opened in Adobe Photoshop or Illustrator. No matter what method was used to produce the graphic, it is necessary to provide a paper copy to the AMS.

Authors using graphics packages for the creation of electronic art should also avoid the use of any lines thinner than 0.5 points in width. Many graphics packages allow the user to specify a “hairline” for a very thin line. Hairlines often look acceptable when proofed on a typical laser printer. However, when produced on a high-resolution laser imagesetter, hairlines become nearly invisible and will be lost entirely in the final printing process.

Screens should be set to values between 15% and 85%. Screens which fall outside of this range are too light or too dark to print correctly. Variations of screens within a graphic should be no less than 10%.

**AMS policy on making changes to articles after posting.** Articles are posted to the AMS website individually after proof is returned from authors and before appearing in an issue. To preserve the integrity of electronically published articles, once an article is individually posted to the AMS website but not yet in an issue, changes cannot be made in place in the paper. However, an “Added after posting” section may be added to the paper right before the References when there is a critical error in the content of the paper. The “Added after posting” section gives the author an opportunity to correct this type

of critical error before the article is put into an issue for printing and before it is then reposted with the issue. The “Added after posting” section remains a permanent part of the paper. The AMS does not keep author-related information, such as affiliation, current address, and email address, up to date after a paper is initially posted.

Once the article is assigned to an issue, even if the issue has not yet been posted to the AMS website, corrections may be made to the paper by submitting a traditional errata article. The errata article will appear in a future print issue and will link back and forth on the web to the original article online.

**Secure manuscript tracking on the Web.** Authors can track their manuscripts through the AMS journal production process using the personal AMS ID and Article ID printed in the upper right-hand corner of the Consent to Publish form sent to each author who publishes in AMS journals. Access to the tracking system is available from [www.ams.org/mstrack/](http://www.ams.org/mstrack/). An explanation of each production step is provided on the web through links from the manuscript tracking screen. Questions can be sent to [proc-query@ams.org](mailto:proc-query@ams.org).

**T<sub>E</sub>X files available upon request.** T<sub>E</sub>X files are available upon request for authors by sending email to [file-request@ams.org](mailto:file-request@ams.org) or by contacting the Electronic Prepress Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA. The request should include the title of the paper, the name(s) of the author(s), the name of the publication in which the paper has or will appear, and the volume and issue numbers if known. The T<sub>E</sub>X file will be sent to the author making the request after the article goes to the printer. If the requestor can receive Internet email, please include the email address to which the file should be sent. Otherwise please indicate a diskette format and postal address to which a disk should be mailed. **Note:** Because T<sub>E</sub>X production at the AMS sometimes requires extra fonts and macros that are not yet publicly available, T<sub>E</sub>X files cannot be guaranteed to run through the author’s version of T<sub>E</sub>X without errors. The AMS regrets that it cannot provide support to eliminate such errors in the author’s T<sub>E</sub>X environment.

**Inquiries.** Any inquiries concerning a paper that has been accepted for publication that cannot be answered via the manuscript tracking system mentioned above should be sent to [proc-query@ams.org](mailto:proc-query@ams.org) or directly to the Electronic Prepress Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA.

## Editors

The AMS uses Centralized Manuscript Processing for initial submissions to AMS journals. Authors should follow instructions listed on the Initial Submission page found at [www.ams.org/proc/procsubmit.html](http://www.ams.org/proc/procsubmit.html).

Managing Editor: Ronald A. Fintushel, Michigan State University, East Lansing, MI 48824-1027 USA; e-mail: [ronfint@math.msu.edu](mailto:ronfint@math.msu.edu)

### 1. ODE, PDE, GLOBAL ANALYSIS, AND DYNAMICAL SYSTEMS

Coordinating Editor: Chuu-Lian Terng, University of California, Irvine, CA 92697-3875 USA; e-mail: [cterng@math.uci.edu](mailto:cterng@math.uci.edu)

**Dynamical systems and ergodic theory**, Jane M. Hawkins, CB #3250, University of North Carolina at Chapel Hill, Chapel Hill, NC 27599 USA; e-mail: [jmh@math.unc.edu](mailto:jmh@math.unc.edu)

**Global analysis**, Mikhail Shubin, Northeastern University, Boston, MA 02115 USA; e-mail: [shubin@neu.edu](mailto:shubin@neu.edu)

**Ordinary differential equations and special functions**, Carmen C. Chicone, University of Missouri, Columbia, MO 65211-0001 USA; e-mail: [carmen@chicone.math.missouri.edu](mailto:carmen@chicone.math.missouri.edu)

**Partial differential equations**, Matthew J. Gursky, University of Notre Dame, 255 Hurley Hall, Notre Dame, IN 46556-4618 USA; e-mail: [mgursky@nd.edu](mailto:mgursky@nd.edu)

### 2. TOPOLOGY AND GEOMETRY

Coordinating Editor: Jon G. Wolfson, Michigan State University, East Lansing, MI 48824-1027 USA; e-mail: [wolfson@math.msu.edu](mailto:wolfson@math.msu.edu)

**Algebraic topology**, Paul Goerss, Northwestern University, Evanston, IL 60208-2730 USA; e-mail: [pgoerss@math.northwestern.edu](mailto:pgoerss@math.northwestern.edu)

**Differential geometry (Riemannian geometry, complex geometry, and symplectic geometry)**, Jon G. Wolfson

**Geometric analysis (geometric PDE, minimal surfaces, and harmonic maps)**, Richard A. Wentworth, Johns Hopkins University, Baltimore, MD 21218 USA; e-mail: [wentworth@jhu.edu](mailto:wentworth@jhu.edu)

**Geometric topology**, Alexander N. Dranishnikov, University of Florida, 358 Little Hall, Gainesville, FL 32611-8105 USA; e-mail: [dranish@math.ufl.edu](mailto:dranish@math.ufl.edu)

**Low dimensional topology, gauge theory, 4-manifolds**, Daniel Ruberman, Brandeis University, Waltham, MA 02254-9110 USA; e-mail: [ruberman@brandeis.edu](mailto:ruberman@brandeis.edu)

### 3. ANALYSIS

Coordinating Editor: Andreas Seeger, University of Wisconsin, Madison, WI 53706 USA; e-mail: [seeger@math.wisc.edu](mailto:seeger@math.wisc.edu)

**Banach spaces and linear functional analysis**, N. Tomczak-Jaegermann, University of Alberta, Edmonton, AB, Canada T6G 2G1; e-mail: [ntomczak@math.ualberta.ca](mailto:ntomczak@math.ualberta.ca); [nicole.tomczak@ualberta.ca](mailto:nicole.tomczak@ualberta.ca)

**Fourier analysis and dispersive PDE**, Hart F. Smith, University of Washington, Box 354350, Seattle, WA 98195-4350 USA; e-mail: [hart@math.washington.edu](mailto:hart@math.washington.edu)

**Geometric function theory**, Mario Bonk, University of Michigan, Ann Arbor, MI 48109-1043 USA; e-mail: [mbonk@umich.edu](mailto:mbonk@umich.edu)

**Geometric measure theory and its applications**, Tatiana Toro, University of Washington, Box 354350, Seattle, WA 98195-4350 USA; e-mail: [toro@math.washington.edu](mailto:toro@math.washington.edu)

**Harmonic analysis**, Michael T. Lacey, School of Mathematics, Georgia Institute of Technology, 686 Cherry Street NW, Atlanta, GA 30332-4301 USA; e-mail: [lacey@math.gatech.edu](mailto:lacey@math.gatech.edu)

**Operator algebras**, Marius Junge, University of Illinois at Urbana-Champaign, 1409 W. Green Street, Urbana, IL 61801-2975 USA; e-mail: [junge@math.uiuc.edu](mailto:junge@math.uiuc.edu)

- Several complex variables**, Mei-Chi Shaw, University of Notre Dame, Notre Dame, IN 46556-0398 USA; e-mail: [mei-chi.shaw.1@nd.edu](mailto:mei-chi.shaw.1@nd.edu)
4. **ALGEBRA, NUMBER THEORY, COMBINATORICS, AND LOGIC**  
Coordinating Editor: Martin Lorenz, Temple University, Philadelphia, PA 19122-6094 USA; e-mail: [lorenz@temple.edu](mailto:lorenz@temple.edu)
- Algebraic geometry**, Ted Chinburg, University of Pennsylvania, Philadelphia, PA 19104-6395 USA; e-mail: [ted@math.upenn.edu](mailto:ted@math.upenn.edu)
- Automorphic forms, number theory, and applications of number theory**, Wen-Ching Winnie Li, Pennsylvania State University, University Park, PA 16802-6401 USA; e-mail: [wli@math.psu.edu](mailto:wli@math.psu.edu)
- Combinatorics**, Jim Haglund, University of Pennsylvania, 209 S. 33rd Street, Philadelphia, PA 19104-6395 USA; e-mail: [jhaglund@math.upenn.edu](mailto:jhaglund@math.upenn.edu)
- Commutative algebra**, Bernd Ulrich, Purdue University, West Lafayette, IN 47907-1395 USA; e-mail: [ulrich@math.purdue.edu](mailto:ulrich@math.purdue.edu)
- Group theory**, Jonathan I. Hall, Michigan State University, East Lansing, MI 48824-1027 USA; e-mail: [jhall@math.msu.edu](mailto:jhall@math.msu.edu)
- Lie algebras and quantized enveloping algebras**, Gail R. Letzter; e-mail: [letzter.pams@verizon.net](mailto:letzter.pams@verizon.net)
- Logic and foundations**, Julia Knight, University of Notre Dame, 255 Hurley, Notre Dame, IN 46556-4618 USA; e-mail: [knight.1@nd.edu](mailto:knight.1@nd.edu)
- Noncommutative algebra**, Birge Huisgen-Zimmerman, University of California, Santa Barbara, Santa Barbara, CA 93106-3080 USA; e-mail: [bhz.pams@math.ucsb.edu](mailto:bhz.pams@math.ucsb.edu)
- Number theory**, Ken Ono, University of Wisconsin, Madison, WI 53706 USA; e-mail: [ono@math.wisc.edu](mailto:ono@math.wisc.edu)
5. **APPLIED MATHEMATICS, PROBABILITY, AND STATISTICS**  
Coordinating Editor: Peter A. Clarkson, Institute of Mathematics, Statistics and Actuarial Science, University of Kent, Canterbury, CT2 7NF, United Kingdom; e-mail: [P.A.Clarkson@kent.ac.uk](mailto:P.A.Clarkson@kent.ac.uk)
- Applied probability and statistics**, Edward C. Waymire, Oregon State University, Corvallis, OR 97331-4605 USA; e-mail: [waymire@math.orst.edu](mailto:waymire@math.orst.edu)
- Differential equations**, Michael I. Weinstein, Department of Applied Physics and Applied Mathematics, Columbia University, 200 S.W. Mudd MC 4701, New York, NY 10027 USA; e-mail: [miw2103@columbia.edu](mailto:miw2103@columbia.edu)
- Integrable systems and special functions**, Peter A. Clarkson
- Partial differential equations and dynamical systems**, Walter Craig, Department of Mathematics and Statistics, McMaster University, Hamilton, Ontario, L8S 4K1 Canada; e-mail: [craig@math.mcmaster.ca](mailto:craig@math.mcmaster.ca)
- Probability**, Richard C. Bradley, Indiana University, Bloomington, IN 47405-4301 USA; e-mail: [bradleyr@indiana.edu](mailto:bradleyr@indiana.edu)

<b>Ihab Al Alam</b> , A Müntz space having no complement in $L_1$ .....	193
<b>Jan-Fredrik Olsen and Kristian Seip</b> , Local interpolation in Hilbert spaces of Dirichlet series .....	203
<b>Daniel M. Oberlin</b> , Convolution and restriction estimates for measures on curves in $\mathbb{R}^2$ .....	213
<b>Severino T. Melo and Marcela I. Merklen</b> , Pseudodifferential operators with $C^*$ -algebra-valued symbols: Abstract characterizations .....	219
<b>Wenchang Chu</b> , Partial fraction decompositions and trigonometric sum identities .....	229
<b>Evgenia Soprunova</b> , Exponential Gelfond–Khovanskii formula in dimension one .....	239
<b>Matthew D. Blair, Hart F. Smith, and Christopher D. Sogge</b> , On Strichartz estimates for Schrödinger operators in compact manifolds with boundary ...	247
<b>Hantaek Bae</b> , Global well-posedness of dissipative quasi-geostrophic equations in critical spaces .....	257
<b>N. J. Kalton and T. Kucherenko</b> , Rademacher bounded families of operators on $L_1$ .....	263
<b>Manav Das</b> , Billingsley’s packing dimension .....	273
<b>Ravi P. Agarwal, Kanishka Perera, and Donal O’Regan</b> , Positive solutions in the sense of distributions of singular boundary value problems .....	279

#### D. GEOMETRY

<b>Marcos P. A. Cavalcante</b> , The $r$ -stability of hypersurfaces with zero Gauss-Kronecker curvature .....	287
<b>Kristopher Tapp</b> , Nonnegatively curved vector bundles with large normal holonomy groups .....	295
<b>Yasuhiro Yabuki</b> , Nayatani’s metric and conformal transformations of a Kleinian manifold .....	301

#### E. LOGIC AND FOUNDATIONS

<b>Moti Gitik and Assaf Sharon</b> , On SCH and the approachability property ....	311
<b>Alec Matheson and Timothy H. McNicholl</b> , Computable analysis and Blaschke products .....	321

#### F. STATISTICS AND PROBABILITY

<b>Philippe Clement and Wolfgang Desch</b> , An elementary proof of the triangle inequality for the Wasserstein metric .....	333
--	-----

#### G. TOPOLOGY

<b>Janusz J. Charatonik and Włodzimierz J. Charatonik</b> , Property of Kelley for the Cartesian products and hyperspaces .....	341
<b>Charles Livingston</b> , Slice knots with distinct Ozsváth-Szabó and Rasmussen invariants .....	347
<b>Fabio Nicola</b> , On local solvability of certain differential complexes .....	351
<b>Richard Miles and Thomas Ward</b> , Uniform periodic point growth in entropy rank one .....	359
<b>Mladen Božičević</b> , Characteristic cycles of standard sheaves associated with open orbits .....	367
<b>Harold Donnelly</b> , Positive curvature and eigenfunctions of the Laplacian .....	373

PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY  
CONTENTS

Vol. 136, No. 1

Whole No. 583

January 2008

A. ALGEBRA, NUMBER THEORY, AND COMBINATORICS

Mark Gross and Simone Pavanelli, A Calabi-Yau threefold with Brauer group $(\mathbb{Z}/8\mathbb{Z})^2$ .....	1
Edward B. Burger and Ashok M. Pillai, On diophantine approximation along algebraic curves .....	11
Enrique Artal Bartolo, José Ignacio Cogolludo, and Hiro-o Tokunaga, Pencils and infinite dihedral covers of $\mathbb{P}^2$ .....	21
Christopher Holden, Mod 4 Galois representations and elliptic curves .....	31
Daniel T. Wise, Nonpositive sectional curvature for $(p, q, r)$ -complexes .....	41
Thomas Marley, Mark W. Rogers, and Hideto Sakurai, Gorenstein rings and irreducible parameter ideals .....	49
W. Kucharz, Submanifolds of real algebraic varieties .....	55
Arnold Adelberg, Shaofang Hong, and Wenli Ren, Bounds of divided universal Bernoulli numbers and universal Kummer congruences .....	61
Christopher J. Hillar and Jiawang Nie, An elementary and constructive solution to Hilbert's 17th Problem for matrices .....	73
Alex Kasman, Kathryn Pedings, Amy Reiszl, and Takahiro Shiota, Universality of Rank 6 Plücker relations and Grassmann cone preserving maps .....	77

B. ANALYSIS

Wojciech Czała and Jacek Zienkiewicz, Atomic characterization of the Hardy space $H_L^1(\mathbb{R})$ of one-dimensional Schrödinger operators with nonnegative potentials .....	89
Eric Bedford and Sione Ma'u, Complex Monge-Ampère of a maximum .....	95
Kenneth S. Berenhaut, John D. Foley, and Stevo Stević, The global attractivity of the rational difference equation $y_n = A + \left(\frac{y_{n-k}}{y_{n-m}}\right)^p$ .....	103
Jacobo Pejsachowicz, Bifurcation of homoclinics .....	111
Eva A. Gallardo-Gutiérrez and Jonathan R. Partington, Common hypercyclic vectors for families of operators .....	119
Konrad J. Swanepoel and Rafael Villa, A lower bound for the equilateral number of normed spaces .....	127
Peter Lindqvist and Juan J. Manfredi, Note on a remarkable superposition for a nonlinear equation .....	133
Daniel Li, Hervé Queffélec, and Luis Rodríguez-Piazza, On some random thin sets of integers .....	141
José M. Arrieta, On boundedness of solutions of reaction-diffusion equations with nonlinear boundary conditions .....	151
Elias Wegert and Lothar von Wolfersdorf, Blaschke representation of functions on the circle .....	161
Stephan Ramon Garcia, Approximate antilinear eigenvalue problems and related inequalities .....	171

(Continued on inside back cover)
