AMERICAN
MATHEMATICAL
SOCIETY

Providence, Rhode Island USA

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

Submission information. See **Information for Authors** at the end of this issue.

Publication on the AMS website. Articles are published on the AMS website individually after proof is returned from authors and before appearing in an issue.

Subscription information. The *Proceedings of the American Mathematical Society* is published monthly and is also accessible electronically from www.ams.org/journals/. Individual subscription prices for Volume 151 (2023) are as follows. For electronic only: non-member US\$1639.00, member, US\$983.40. For paper delivery: non-member, US\$1866.00, member, US\$1119.60. Add US\$10 for delivery within the United States; US\$56 for surface delivery outside the United States. Upon request, subscribers to paper delivery of this journal are also entitled to receive electronic delivery. For information on institutional pricing, please visit <https://www.ams.org/publications/journals/subscriberinfo>. Subscription renewals are subject to late fees. See www.ams.org/journal-faq for more journal subscription information.

Back number information. For back issues see www.ams.org/backvols.

Subscriptions and orders should be addressed to the American Mathematical Society, P.O. Box 845904, Boston, MA 02284-5904 USA. *All orders must be accompanied by payment.* Other correspondence should be addressed to 201 Charles Street, Providence, RI 02904-2213 USA.

Copying and reprinting. Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews, provided the customary acknowledgment of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication is permitted only under license from the American Mathematical Society. Requests for permission to reuse portions of AMS publication content are handled by the Copyright Clearance Center. For more information, please visit www.ams.org/publications/pubpermissions.

Excluded from these provisions is material for which the author holds copyright. In such cases, requests for permission to reuse or reprint material should be addressed directly to the author(s). Copyright ownership is indicated in the notice in the lower right-hand corner of the first page of each article.

Proceedings of the American Mathematical Society (ISSN 0002-9939 (print); ISSN 1088-6826 (online)) is published monthly by the American Mathematical Society at 201 Charles Street, Providence, RI 02904-2213 USA. Periodicals postage is paid at Providence, Rhode Island. Postmaster: Send address changes to Proceedings, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2213 USA.

© 2023 by the American Mathematical Society. All rights reserved.

This journal is indexed in *Mathematical Reviews*, *Zentralblatt MATH*, *Science Citation Index*[®], *Science Citation Index*TM-Expanded, *ISI Alerting Services*SM, *CompuMath Citation Index*[®], and *Current Contents*[®]/*Physical, Chemical & Earth Sciences*. This journal is archived in *Portico* and in *CLOCKSS*.

Printed in the United States of America.

⊗ The paper used in this journal is acid-free and falls within the guidelines established to ensure permanence and durability.

A. ALGEBRA, NUMBER THEORY, AND COMBINATORICS

Tamás Erdélyi, Improved results on the oscillation of the modulus of the Rudin-Shapiro polynomials on the unit circle	2733
Kevin Kordek, The commutator subgroup of the braid group is generated by two elements	2741
Anthony Genevois, CAT(0) cube complexes with flat hyperplanes	2749
Ming Lu, Quantum Borchers-Bozec algebras via semi-derived Ringel-Hall algebras	2759
José Alves Oliveira, On maximal and minimal hypersurfaces of Fermat type ..	2773
Guillermo Mantilla-Soler, Density questions on arithmetic equivalence	2783
Asaf Shapira and Mykhaylo Tyomkyn, Weakly saturated hypergraphs and a conjecture of Tuza	2795
Be’eri Greenfeld, Affine Noetherian algebras, filtrations and presentations	2807
Ivan Arzhantsev and Mikhail Zaidenberg, Tits-type alternative for certain groups acting on algebraic surfaces	2813
Yuanqing Cai, Solomon Friedberg, Dmitry Gourevitch, and Eyal Kaplan, The generalized doubling method: (k, c) models	2831
Mohsen Asgharzadeh, Shinnosuke Ishiro, and Kazuma Shimomoto, Surjectivity of some local cohomology map and the second vanishing theorem	2847
Xuan Kien Phung, A geometric generalization of Kaplansky’s direct finiteness conjecture	2863
Piotr Pokora, \mathcal{Q} -conic arrangements in the complex projective plane	2873

B. ANALYSIS

Changbao Pang, Antti Perälä, Maofa Wang, and Xin Guo, Maximal estimate and integral operators in Bergman spaces with doubling measure ..	2881
Guangming Hu and Hideki Miyachi, Estimates of the Bergman kernel on Teichmüller space	2895
Fedor Sukochev and Dmitriy Zanin, Symmetric Banach sequence spaces respect Weyl submajorization	2907
Arash Ghaani Farashahi, Harmonic analysis of covariant functions of characters of normal subgroups	2919
Jian-Wen Sun and Hoang-Hung Vo, Local approximation of heterogeneous porous medium equation by some nonlocal dispersal problems	2935
Pu-Zhao Kow and Jenn-Nan Wang, Landis-type conjecture for the half-Laplacian	2951
Erik Lundberg, The valence of harmonic polynomials viewed through the probabilistic lens	2963
Andrey Gogolev and Federico Rodriguez Hertz, Smooth rigidity for codimension one Anosov flows	2975
Chao Min, Yuan Cheng, and Yang Chen, Differential and difference equations for recurrence coefficients of orthogonal polynomials with a singularly perturbed Laguerre-type weight	2989
Jinsong Liu, Fei Tao, and Huaying Wei, A description of A_∞ -weights for VMO	2997
Hanfei Song and Chun Wang, Identities involving mock theta functions and theta functions	3009

P. Galanopoulos and G. Stylogiannis , Hausdorff operators on Fock spaces and a coefficient multiplier problem	3023
Wanshan Lin and Xueting Tian , Uniqueness of ergodic optimization of top Lyapunov exponent for typical matrix cocycles	3037
Enhui Shi, Suhua Wang, Zhiwen Xie, and Hui Xu , The nonexistence of expansive polycyclic group actions on the circle \mathbb{S}^1	3049
Zhisu Liu , On the eigenvalue problem of Schrödinger-Poisson system	3059

D. GEOMETRY

Marcos Dajczer and Miguel Ibieta Jimenez , A construction of Sbrana-Cartan hypersurfaces in the discrete class	3069
Yasufumi Nitta , On relations between Mabuchi's generalized Kähler-Einstein metrics and various canonical Kähler metrics	3083

E. LOGIC AND FOUNDATIONS

Sandra Müller and Philipp Schlicht , Uniformization and internal absoluteness	3089
Dilip Raghavan and Stevo Todorcevic , Galvin's problem in higher dimensions	3103

F. STATISTICS AND PROBABILITY

Rong Wei, Saisai Yang, and Tusheng Zhang , Neumann boundary value problems for elliptic operators with measure-valued coefficients	3111
Hoi H. Nguyen , Concentration of the number of intersections of random eigenfunctions on flat tori	3127

G. TOPOLOGY

Alice K. M. Libardi, Denise de Mattos, and Edivaldo L. dos Santos , On intersection and transversality of maps	3145
Ryo Kato , Retract conjecture on a sublattice of monoidal posets	3157
Miguel Barrero , Global transfer systems of abelian compact Lie groups	3169
Nicola Cavallucci , The L^2 -completion of the space of Riemannian metrics is CAT(0): A shorter proof	3183

Editorial Information

To be published in the *Proceedings*, a paper must be correct, new, nontrivial, and significant. Further, it must be well written and of interest to a substantial number of mathematicians. Piecemeal results, such as an inconclusive step toward an unproved major theorem or a minor variation on a known result, are in general not acceptable for publication. *Proceedings* Editors solicit and encourage publication of worthy papers of **length not exceeding 15 published pages**. Published pages are the same size as those generated in the style files provided for $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$.

Information on the backlog for this journal can be found on the AMS website starting from <http://www.ams.org/proc>.

In an effort to make articles available as quickly as possible, articles are electronically published on the AMS website individually after proof is returned from authors and before appearing in an issue.

A Consent to Publish is required before we can begin processing your paper. After a paper is accepted for publication, the Providence office will send a Consent to Publish to all authors of the paper. By submitting a paper to this journal, authors certify that the results have not been submitted to nor are they under consideration for publication by another journal, conference proceedings, or similar publication.

Information for Authors

Initial submission. All articles submitted to this journal are peer reviewed. The AMS has a single blind peer-review process in which the reviewers know who the authors of the manuscript are, but the authors do not have access to the information on who the peer reviewers are. The AMS uses Centralized Manuscript Processing for initial submission. Authors should submit a PDF file using the Initial Manuscript Submission form found at www.ams.org/submission/proc or send one copy of the manuscript to the following address: Centralized Manuscript Processing, PROCEEDINGS OF THE AMS, 201 Charles Street, Providence, RI 02904-2213 USA. If a paper copy is being forwarded to the AMS, indicate that it is for *Proceedings* and include the name of the corresponding author, contact information such as email address or mailing address, and the name of an appropriate Editor to review the paper (see the list of Editors below).

The first page of an article must consist of a *descriptive title*, followed by an *abstract* that summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The *descriptive title* should be short but informative; useless or vague phrases such as “some remarks about” or “concerning” should be avoided. The *abstract* should be at least one complete sentence and at most 150 words. Included with the footnotes to the paper should be the 2020 *Mathematics Subject Classification* representing the primary and secondary subjects of the article. The classifications are accessible from www.ams.org/msc/. The Mathematics Subject Classification footnote may be followed by a list of *key words and phrases* describing the subject matter of the article and taken from it. Journal abbreviations used in bibliographies are listed in the latest *Mathematical Reviews* annual index. The series abbreviations are also accessible from www.ams.org/msnhtml/serials.pdf. To help in preparing and verifying references, the AMS offers MR Lookup, a Reference Tool for Linking, at www.ams.org/mrlookup/.

Electronically prepared manuscripts. Manuscripts should be electronically prepared in $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$. To this end, the Society has prepared $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ author packages for each AMS publication. Author packages include instructions for preparing electronic manuscripts, samples, and a style file that generates the particular design specifications of that publication series. Articles properly prepared using the $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ style file and the `\label` and `\ref` commands automatically enable extensive intra-document linking to the bibliography and other elements of the article for searching electronically on the Web.

Authors may retrieve an author package for *Proceedings of the AMS* from www.ams.org/proc/procauthorpac.html. The *AMS Author Handbook* is available in PDF format from the author package link. The author package can also be obtained free of charge by sending email to tech-support@ams.org or from the Publication Division, American Mathematical

Society, 201 Charles Street, Providence, RI 02904-2213 USA. When requesting an author package, please specify the publication in which your paper will appear. Please be sure to include your complete email address.

After acceptance. The source files for the final version of the electronic manuscript should be sent to the Providence office immediately after the paper has been accepted for publication. The author should also submit a PDF of the final version of the paper to the Editor, who will forward a copy to the Providence office. Accepted electronically prepared manuscripts can be submitted via the Web at www.ams.org/submit-book-journal/, sent via email to pub-submit@ams.org, or sent on CD to the Electronic Prepress Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2213 USA. When sending a manuscript electronically via email or CD, please be sure to include a message indicating in which publication the paper has been accepted. Complete instructions on how to send files are included in the author package.

Electronic graphics. Comprehensive instructions on preparing graphics are available starting from www.ams.org/authors/journals.html. A few of the major requirements are given here.

Submit files for graphics as EPS (Encapsulated PostScript) files. This includes graphics originated via a graphics application as well as scanned photographs or other computer-generated images. If this is not possible, TIFF files are acceptable as long as they can be opened in Adobe Photoshop or Illustrator.

Authors using graphics packages for the creation of electronic art should also avoid the use of any lines thinner than 0.5 points in width. Many graphics packages allow the user to specify a “hairline” for a very thin line. Hairlines often look acceptable when proofed on a typical laser printer. However, when produced on a high-resolution laser imagesetter, hairlines become nearly invisible and will be lost entirely in the final printing process.

Screens should be set to values between 15% and 85%. Screens which fall outside of this range are too light or too dark to print correctly. Variations of screens within a graphic should be no less than 10%.

Any graphics created in color will be rendered in grayscale for the printed version unless color printing is authorized by the Managing Editor and the Publisher. In general, color graphics will appear in color in the online version.

AMS policy on making changes to articles after publication. Articles are published on the AMS website individually after proof is returned from authors and before appearing in an issue. To preserve the integrity of electronically published articles, once an article is individually published to the AMS website, changes cannot be made in place in the paper. The AMS does not keep author-related information such as affiliation, current address, and email address up to date after a paper is electronically published.

Corrections of critical errors may be made to the paper by submitting an errata article to the Editor. The errata article will be published electronically, will appear in a future print issue, and will link back and forth on the Web with the original article.

Secure manuscript tracking on the Web. Authors can track their manuscripts through the AMS journal production process using the personal AMS ID and Article ID printed in the upper right-hand corner of the Consent to Publish form sent to each author who publishes in AMS journals. Access to the tracking system is available from www.ams.org/mstrack/. An explanation of each production step is provided on the Web through links from the manuscript tracking screen. Questions can be sent to proc-query@ams.org.

Inquiries. Any inquiries concerning a paper that has been accepted for publication that cannot be answered via the manuscript tracking system mentioned above should be sent to proc-query@ams.org or directly to the Electronic Prepress Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2213 USA.

Editors

The AMS uses Centralized Manuscript Processing for initial submissions to AMS journals. Authors should follow instructions listed on the Initial Submission page found at www.ams.org/proc/procsubmit.html.
