# TABLE OF CONTENTS

## VOLUME 32, 1930

<table>
<thead>
<tr>
<th>Author(s)</th>
<th>Title and Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Agnew, R. P., of Ithaca, N. Y.</td>
<td>The behavior of bounds and oscillations of sequences of functions under regular transformations</td>
</tr>
<tr>
<td>Albert, A. A., of New York, N. Y.</td>
<td>New results in the theory of normal division algebras</td>
</tr>
<tr>
<td>Bamforth, F. R., of Ithaca, N. Y.</td>
<td>Surface transformations</td>
</tr>
<tr>
<td>Bell, E. T., of Pasadena, Calif.</td>
<td>Numbers of representations of integers in a certain triad of ternary quadratic forms</td>
</tr>
<tr>
<td>———</td>
<td>Analytic functions in the irregular field of all numerical functions</td>
</tr>
<tr>
<td>Calugareano, G., of Bucarest, Roumania.</td>
<td>On differential equations admitting polygenic integrals</td>
</tr>
<tr>
<td>Cook, A. J., of Edmonton, Canada.</td>
<td>Pairs of rectilinear congruences with generators in one-to-one correspondence</td>
</tr>
<tr>
<td>Dickson, L. E., of Chicago, Ill.</td>
<td>Construction of division algebras</td>
</tr>
<tr>
<td>Dye, L. A., of Ithaca, N. Y.</td>
<td>Involutorial transformations in $S_3$ of order $n$ with an $(n-1)$-fold line</td>
</tr>
<tr>
<td>Earl, J. M., of Iowa City, Iowa.</td>
<td>Polynomials of best approximation on an infinite interval</td>
</tr>
<tr>
<td>Engstrom, H. T., of New Haven, Conn.</td>
<td>On the common index divisors of an algebraic field</td>
</tr>
<tr>
<td>———</td>
<td>The theorem of Dedekind in the ideal theory of Zolotarev</td>
</tr>
<tr>
<td>Féraud, L., of Cambridge, Mass.</td>
<td>On Birkhoff’s Pfaffian systems</td>
</tr>
<tr>
<td>Ghosh, S., of Calcutta, India.</td>
<td>On the solution of the equations of elastic equilibrium suitable for elliptic boundaries</td>
</tr>
<tr>
<td>Gillespie, D. C., and Hurwitz, W. A., of Ithaca, N. Y.</td>
<td>On sequences of continuous functions having continuous limits</td>
</tr>
<tr>
<td>Gourin, E., of New York, N. Y.</td>
<td>On irreducible polynomials in several variables which become reducible when the variables are replaced by powers of themselves</td>
</tr>
<tr>
<td>Hazlett, O. C., of Urbana, Ill.</td>
<td>On division algebras</td>
</tr>
<tr>
<td>Hotelling, H., of Stanford University, Calif.</td>
<td>The consistency and ultimate distribution of optimum statistics</td>
</tr>
<tr>
<td>Hurwitz, W. A., and Gillespie, D. C., of Ithaca, N. Y.</td>
<td>On sequences of continuous functions having continuous limits</td>
</tr>
<tr>
<td>Lamson, K. W., of Bethlehem, Pa.</td>
<td>Some differential and algebraic consequences of the Einstein field equations</td>
</tr>
<tr>
<td>Author</td>
<td>Title</td>
</tr>
<tr>
<td>-----------------------</td>
<td>----------------------------------------------------------------------</td>
</tr>
<tr>
<td>Lane, E. P., of Chicago, Ill.</td>
<td>Hypergeodesic mapping of a surface on a plane</td>
</tr>
<tr>
<td>———</td>
<td>Integral surfaces of pairs of partial differential equations of the third order</td>
</tr>
<tr>
<td>Langer, R. E., of Madison, Wis.</td>
<td>The boundary problem associated with a differential system rational in the parameter</td>
</tr>
<tr>
<td>La Paz, L., of Chicago, Ill.</td>
<td>An inverse problem of the calculus of variations for multiple integrals</td>
</tr>
<tr>
<td>Latimer, C. G., of Lexington, Ky.</td>
<td>On certain identities in theta functions</td>
</tr>
<tr>
<td>Maier, W. E., of Chicago, Ill.</td>
<td>Elementary properties of the ( t )-functions</td>
</tr>
<tr>
<td>Marden, M., of Cambridge, Mass.</td>
<td>On the zeros of linear partial fractions</td>
</tr>
<tr>
<td>———</td>
<td>On the zeros of certain rational functions</td>
</tr>
<tr>
<td>Moore, C. N., of Cincinnati, Ohio.</td>
<td>On Gibbs's phenomenon for the developments in Bessel's functions</td>
</tr>
<tr>
<td>Morse, M., of Cambridge, Mass.</td>
<td>The foundations of a theory of the calculus of variations in the large in ( m )-space (second paper)</td>
</tr>
<tr>
<td>Poor, V. C., of Ann Arbor, Mich.</td>
<td>Residues of polygenic functions</td>
</tr>
<tr>
<td>Post, E. L., of New York, N. Y.</td>
<td>Generalized differentiation</td>
</tr>
<tr>
<td>Reid, W. T., of Austin, Texas.</td>
<td>Properties of solutions of an infinite system of ordinary linear differential equations of the first order with auxiliary boundary conditions</td>
</tr>
<tr>
<td>Ritt, J. F., of New York, N. Y.</td>
<td>On a certain ring of functions of two variables</td>
</tr>
<tr>
<td>———</td>
<td>Manifolds of functions defined by systems of algebraic differential equations</td>
</tr>
<tr>
<td>Roberts, J. H., of Austin, Texas.</td>
<td>Concerning non-dense plane continua</td>
</tr>
<tr>
<td>Roth, W. E., of Milwaukee, Wis.</td>
<td>On the unilateral equation in matrices</td>
</tr>
<tr>
<td>Tamarkin, J. D., of Providence, R. I.</td>
<td>The notion of the Green's function in the theory of integro-differential equations</td>
</tr>
<tr>
<td>Trjitzinsky, W. J., of Bethlehem, Pa.</td>
<td>On composition of singularities</td>
</tr>
<tr>
<td>Vandiver, H. S., of Austin, Texas.</td>
<td>On power characters of singular integers in a properly irregular cyclotomic field</td>
</tr>
<tr>
<td>Walsh, J. L., of Cambridge, Mass.</td>
<td>Boundary values of an analytic function and the Tchebycheff method of approximation</td>
</tr>
<tr>
<td>———</td>
<td>On the overconvergence of sequences of polynomials of best approximation</td>
</tr>
<tr>
<td>Ward, L. E., of Iowa City, Iowa.</td>
<td>Series associated with certain irregular third-order boundary value problems</td>
</tr>
<tr>
<td>Ward, M., of Pasadena, Calif.</td>
<td>Postulates for the inverse operations in a group</td>
</tr>
<tr>
<td>Weiss, M. J., of Chicago, Ill.</td>
<td>The limit of transitivity of a substitution group</td>
</tr>
<tr>
<td>Author(s)</td>
<td>Title and Details</td>
</tr>
<tr>
<td>-----------</td>
<td>-------------------</td>
</tr>
<tr>
<td>Whyburn, G. T., of Austin, Texas.</td>
<td>Cut points of connected sets and of continua.</td>
</tr>
<tr>
<td>———</td>
<td>On the structure of connected and connected im kleinen point sets.</td>
</tr>
<tr>
<td>Whyburn, W. M., of Los Angeles, Calif.</td>
<td>Functional properties of the solutions of differential systems.</td>
</tr>
<tr>
<td>Errata, volumes 26 and 31</td>
<td></td>
</tr>
