Periodical Publications
of the
American Mathematical Society

Bulletin of the
American Mathematical Society

This journal is published monthly. It is the official organ of the Society. One of its functions is to report official acts of the Society and the details of its meetings, with abstracts of all research papers presented. In addition to these official reports, it publishes, also, short original papers on mathematical topics, and some of the longer officially invited addresses presented before the Society. These papers form the body of the Bulletin. It contains also announcements and notes on matters of current interest, and reviews of advanced mathematical books.

Price per annual volume, $9.00. Sets of early volumes are available as follows: vols. 1-36 (1894-1930), $7.00 each; vols. 37-45 (1931-1939), $9.00 each.

Transactions of the
American Mathematical Society

This journal is devoted to research in pure and applied mathematics. Two volumes of three numbers each of the Transactions are published per year. The price per volume is $6.00, so that the annual subscription price (six issues) is $12.00. The Transactions appeared as a quarterly from 1900 to 1934, with the exception of the year 1922, when two volumes, of four numbers each, were published (vols. 23-24).

Sets of early volumes are available as follows: vols. 1-21 (1900-1920), $7.00 each; vols. 22-32 (1921-1930), $8.00 each; vols. 33-36 (1931-1934), $9.00 each; vols. 37-47 (1935-1940), $6.00 each.

Subscriptions and orders for the Bulletin or Transactions should be addressed to the American Mathematical Society, Menasha, Wis., or 531 West 116th Street, New York, N.Y.

Colloquium Series

F. Klein, The Evanston Colloquium Lectures on Mathematics, 1894, x, 109 pp.; reprinted, 1911, xii, 109 pp. $1.00
Mathematical Papers Read at the International Mathematical Congress, 1896, xvi, 411 pp. 4.70

1. H. S. White, Linear Systems of Curves on Algebraic Surfaces; E. B. Van Vleck, Selected Topics in the Theory of Divergent Series and of Continued Fractions; 1905, xii, 187 pp. 3.00
2. E. H. Moore, Introduction to a Form of General Analysis; M. Mason, Selected Topics in the Theory of Boundary Value Problems of Differential Equations; E. J. Wilczynski, Projective Differential Geometry; 1910, x, 222 pp. 1.00
3. G. A. Bliss, Fundamental Existence Theorems, 1913, x, 107 pp.; reprinted, 1934, iv, 107 pp. 2.00
4. L. E. Dickson, On Invariants and the Theory of Numbers; W. F. Osgood, Topics in the Theory of Functions of Several Complex Variables; 1914, xvi, 230 pp. 3.50
5. G. C. Evans, Functional and their Applications. Selected Topics, Including Integral Equations, 1918, xii, 136 pp. 3.50
5. O. Veblen, Analysis Situs, 1922, vii, 150 pp.; second ed., 1931, x, 194 pp. 3.50
7. E. T. Bell, Algebraic Arithmetic, 1927, iv, 180 pp. 2.70
8. L. P. Eisenhart, Non-Riemannian Geometry, 1927, viii, 184 pp.; reprinted, 1934, viii, 184 pp. 2.70
9. G. D. Birkhoff, Dynamical Systems, 1927, viii, 295 pp. 3.50
10. A. B. Coble, Algebraic Geometry and Theta Functions, 1929, viii, 282 pp. 3.50
12. S. Leibnitz, Topology, 1930, x, 410 pp. 3.50
13. R. L. Moore, Foundations of Point Set Theory, 1932, viii, 486 pp. 6.00
14. J. F. Ritt, Differential Equations from the Algebraic Standpoint, 1932, x, 172 pp. 2.70
15. M. H. Stone, Linear Transformations in Hilbert Space and their Applications to Analysis, 1932, viii, 622 pp. 3.50
16. G. A. Bliss, Algebraic Functions, 1933, x, 218 pp. 3.50
17. J. H. M. Wedderburn, Lectures on Matrices, 1934, viii, 200 pp. 3.50
18. M. Morse, The Calculus of Variations in the Large, 1934, x, 368 pp. 5.35
19. R. E. A. C. Paley and N. Wiener, Fourier Transforms in the Complex Domain, 1934, viii, 184 pp. + portrait plate. 3.50
20. J. L. Walsh, Interpolation and Approximation by Rational Functions in the Complex Domain, 1935, x, 382 pp. 6.00
22. C. N. Moore, Summable Series and Convergence Factors, 1938, vi, 105 pp. 2.00
23. G. Szegö, Orthogonal Polynomials, 1939, x, 401 pp. 6.00
24. A. A. Albert, Structure of Algebras, 1939, xii, 210 pp. 4.00

Semicentennial Publications

1. R. C. Archibald, A Semicentennial History of the American Mathematical Society 1888-1938, with Biographies and Bibliographies of the Past Presidents, 1938, xii, 261 pp. + 30 plates. $3.00

* Out of print.

The price to members of the American Mathematical Society is 25% less than that listed above for each volume.
CONTENTS

Vol. 47, No. 3      MAY, 1940      Whole No. 177

Linear operations on summable functions. By Nelson Dunford and B. J. Pettis. .................................................. 323

Nilpotent groups and their generalizations. By Reinhold Baer. ................. 393

Nets and groups. II. By Reinhold Baer. ...................................... 435

Regular normal extensions over complete fields. By O. F. G. Schilling. .... 440

Regularity properties of certain families of chance variables. By J. L. Doob. 455

On the arithmetic of quaternions. By Gordon Pall. .......................... 487

A theorem on quadratic forms and its application in the calculus of vari-
tations. By M. R. Hestenes and E. J. McShane. ............................ 501

Published in January, March, May, July, September, and November by the American Mathematical Society, Menasha, Wis., and 531 West 116th Street, New York, N.Y.

Entered as second class matter at the post office at Menasha, Wis. Acceptance for mailing at special rate of postage provided for in the Act of February 28, 1925, embodied in paragraph 4, section 538, P. L. and R., authorized May 9, 1935.

Subscriptions to the TRANSACTIONS may be addressed to the Treasurer, B. P. Gill, Menasha, Wis., or 531 West 116th Street, New York, N.Y. Two volumes, of three numbers each, are published annually, at $6.00 per volume.

Notice: Postal regulations require prominent display of the address of the office of publication of the TRANSACTIONS; namely, 450 Ahnaip Street, Menasha, Wis. Note, however, that correspondence pertaining to the general business of the Society may be addressed to Menasha, but should preferably be sent to the general headquarters of the Society at 531 West 116th Street, New York, N.Y.

Mathematical papers intended for publication in the TRANSACTIONS should be addressed to one of the editors:

Papers in algebra to C. C. MacDuffee, North Hall, University of Wisconsin, Madison, Wis.
Papers in analysis to Einar Hille, Yale University, New Haven, Conn.
Papers in geometry and other fields to W. C. Graustein, Harvard University, Cambridge, Mass.

All papers should be typewritten, double spaced, and the author should keep a complete copy.
