Journals Published by the
American Mathematical Society

Bulletin of the
American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings, with abstracts of all research papers presented. It contains numerous short original papers on mathematical topics, and some of the longer officially invited addresses presented before the Society. It contains also announcements and notes on matters of current interest, and reviews of advanced mathematical books.

The BULLETIN is published monthly. The price per annual volume is $9.00. Sets of volumes are available as follows: vols. 1-36 (1894-1930), $7.00 each; vols. 37-48 (1931-1942), $9.00 each.

Transactions of the
American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

Two volumes of three numbers each have been published annually since 1935. The price per volume is $6.00, or per year $12.00. Volumes 1-36 (1900-1934) consist of four numbers each. Sets of volumes are available as follows: vols. 1-21 (1900-1920), $7.00 each; vols. 22-32 (1921-1930), $8.00 each; vols. 33-36 (1931-1934), $9.00 each; vols. 37-52 (1935-1942), $6.00 each.

Mathematical Reviews

This journal contains abstracts and reviews of the current mathematical literature of the world. It is sponsored jointly with the Society by such organizations as the Mathematical Association of America, the London Mathematical Society, the Argentine Mathematical Union, and the Academy of Sciences of Lima.

The publication of MATHEMATICAL REVIEWS was begun in 1940. It appears monthly and the price per annual volume is $13.00. Orders for complete volumes only are accepted.

A microfilm service has been inaugurated in connection with the publication of this journal. A subscriber may obtain at cost a microfilm or photoprint copy of any article reviewed in the journal, except in a few cases where reproduction is prohibited by copyright law.

Subscriptions for the BULLETIN of the American Mathematical Society and the TRANSACTIONS of the American Mathematical Society may be addressed to the publication office, Menasha, Wis., and subscriptions for MATHEMATICAL REVIEWS may be addressed to the publication office, Lancaster, Pa. However, subscriptions for all these journals should preferably be addressed to the American Mathematical Society, 531 West 116th St., New York, N.Y.
American Mathematical Society
Colloquium Series

F. Klein, *The Evanston Colloquium Lectures on Mathematics*, 1894, x, 109 pp.; reprinted, 1911, xii, 109 pp. $1.00

Mathematical Papers Read at the International Mathematical Congress, 1896, vi, 411 pp. 4.70

1. H. S. White, *Linear Systems of Curves on Algebraic Surfaces*;
2. F. S. Woods, *Forms of Non-Euclidean Space*;
4. E. H. Moore, *Introduction to a Form of General Analysis*;
9. L. E. Dickson, *On Invariants and the Theory of Numbers*;

1. H. S. White, *Linear Systems of Curves on Algebraic Surfaces*;
2. F. S. Woods, *Forms of Non-Euclidean Space*;
4. E. H. Moore, *Introduction to a Form of General Analysis*;
9. L. E. Dickson, *On Invariants and the Theory of Numbers*;

8. E. T. Bell, *Algebraic Arithmetic*, 1927, iv, 180 pp. 2.70
14. J. F. Ritt, *Differential Equations from the Algebraic Standpoint*, 1932, x, 172 pp. 2.70
16. G. A. Bliss, *Algebraic Functions*, 1933, x, 218 pp. 3.35
18. M. Morse, *The Calculus of Variations in the Large*, 1934, x, 368 pp. 5.35
22. C. N. Moore, *Summable Series and Convergence Factors*, 1938, vi, 105 pp. 2.00
23. G. Szegö, *Orthogonal Polynomials*, 1939, x, 401 pp. 6.00
24. A. A. Albert, *Structure of Algebras*, 1939, xii, 210 pp. 4.00
26. N. Levinson, *Gap and Density Theorems*, 1940, viii, 246 pp. 4.00
27. S. Lefschetz, *Algebraic Topology*, 1942, vi, 389 pp. 6.00

Semicentennial Publications

1. R. C. Archibald, *A Semicentennial History of the American Mathematical Society 1888-1938*, with Biographies and Bibliographies of the Past Presidents, 1938, xii, 261 pp. + 30 plates. $3.00

* Out of print.

The price to members of the American Mathematical Society is 25% less than that listed above for each volume.
Some Einstein spaces with conformally separable fundamental tensors.  
By Y. C. Wong ............................................ 157

On the direct product of Banach spaces. By Robert Schatten ....... 195

Direct methods in geometrical optics. By M. Herzberger .......... 218

Mean-values and harmonic polynomials. By E. F. Beckenbach and  
Maxwell Reade ........................................... 230

The converse of the Fatou theorem for positive harmonic functions.  
By L. H. Loomis ........................................... 239

On bounded variation and absolute continuity for parametric representations of continuous surfaces. By P. V. Reichelderfer .... 251

A theory for ordinary differential boundary problems of the second order and of the highly irregular type. By R. E. Langer ......... 292
