Journals Published by the

American Mathematical Society

Bulletin of the
American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings, with abstracts of all research papers presented. It contains numerous short original papers on mathematical topics, and some of the longer officially invited addresses presented before the Society. It contains also announcements and notes on matters of current interest, and reviews of advanced mathematical books.

The Bulletin is published monthly. The price per annual volume is $11.00. Sets of volumes are available as follows: vols. 1–36 (1894–1930), $7.00 each; vols. 37–53 (1931–1947), $9.00 each.

Transactions of the
American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

Two volumes of three numbers each are published annually. The price per volume is $6.00, or per year $12.00. Volumes 1–36 (1900–1934) consist of four numbers each. Sets of volumes are available as follows: vols. 1–21 (1900–1920), $7.00 each; vols. 22–32 (1921–1930), $8.00 each; vols. 33–36 (1931–1934), $9.00 each; vols. 37–63 (1935–1948), $6.00 each.

Mathematical Reviews

This journal contains abstracts and reviews of the current mathematical literature of the world. It is sponsored jointly with the Society by such organizations as the Mathematical Association of America, the Institute of Mathematical Statistics, the London Mathematical Society, the Edinburgh Mathematical Society, the Argentine Mathematical Union, etc.

The publication of Mathematical Reviews was begun in 1940. It appears monthly excepting July and the price per annual volume is $13.00. Orders for complete volumes only are accepted.

Published in January, March, May, July, September, and November by the American Mathematical Society, Menasha, Wis., and 531 West 116th Street, New York 27, N. Y.

Entered as second class matter at the post office at Menasha, Wis. Acceptance for mailing at special rate of postage provided for in the Act of February 28, 1925, embodied in paragraph 4, section 538, P. L. and R., authorized May 9, 1935.

Subscriptions for the Bulletin of the American Mathematical Society and the Transactions of the American Mathematical Society may be addressed to the publication office, Menasha, Wis., and subscriptions for Mathematical Reviews may be addressed to the publication office, Lancaster, Pa. However, subscriptions for all these journals should preferably be addressed to the American Mathematical Society, 531 West 116th Street, New York 27, N. Y.

TABLE OF CONTENTS
VOLUME 64, JULY TO DECEMBER, 1948

ALBERT, A. A. Power-associative rings ................................. 552
BAER, R. Direct decompositions into infinitely many summands ...... 519
BELL, P. O., and GREER, E. A study of analytic surfaces by means of a projective theory of envelopes ........................................ 253
BELLMAN, R. On the existence and boundedness of solutions of nonlinear partial differential equations of parabolic type ....................... 21
BIRKHOFF, G. and FRINK, O. Representations of lattices by sets ... 299
BUCK, R. C. Interpolation series ........................................... 283
CHUNG, K. L. On the maximum partial sums of sequences of independent random variables .............................................. 205, 596
COHN, R. M. Manifolds of difference polynomials ..................... 133
EILENBERG, S., and MACLANE, S. Cohomology and Galois theory. I. Normality of algebras and Teichmuller's cocycle ..................... 1
FRINK, O., and BIRKHOFF, G. Representations of lattices by sets ... 299
GREER, E., and BELL, P. O. A study of analytic surfaces by means of a projective theory of envelopes ........................................ 253
HALL, D. W., and LEWIS, D. C. Coloring six-rings ..................... 184
HALL, M., and RÁDO, T. On Schreier systems in free groups ........ 386
HEWITT, E. Rings of real-valued continuous functions. I ............. 45, 596
HILLE, E. Non-oscillation theorems .................................... 234
HODGES, J. L., and HORN, A. On Maharam's conditions for measure . 594
HORN, A., and HODGES, J. L. On Maharam's conditions for measure . 594
HORN A., and TARSKI, A. Measures in Boolean algebras ............. 467
HU, S. T. Mappings of a normal space into an absolute neighborhood retract ............................................................. 336
LAWSON, J. W. A sufficiency theorem for the plateau problem ....... 192
LEWIS, D. C., and HALL, D. W. Coloring six-rings ..................... 184
MacLane, S., and Eilenberg, S. Cohomology and Galois theory. I. Normality of algebras and Teichmuller’s cocycle............................. 1
Mittleman, D. The unions of trajectoryal series of lineal elements generated by the plane motion of a rigid body.............................. 498
Rádo, T., and Hall, M. On Schreier systems in free groups.............. 386
Samuel, P. Ultrafilters and compactification of uniform spaces....... 100
Stephens, C. F. Nonlinear difference equations analytic in a parameter. 268
Strodt, W. Linear difference equations and exponential polynomials... 439
Tarski, A., and Horn, A. Measures in Boolean algebras................. 467
Thrall, R. M. Some generalizations of quasi-Frobenius algebras..... 173
Wilkins, J. E. Neumann series of Bessel functions....................... 359, 596
Wright, E. M. The asymptotic expansion of integral functions and of the coefficients in their Taylor series................................. 409
Young, L. C. Some applications of the Dirichlet integral to the theory of surfaces......................................................... 317

Colloquium Publications

30. T. Radó, Length and area, 1948, vi, 572 pp. $6.75
29. A. Weil, Foundations of algebraic geometry, 1946, xx, 188 pp. 5.50
26. N. Levinson, Gap and density theorems, 1940, viii, 246 pp. 4.00
24. A. A. Albert, Structure of algebras, 1939, xii, 210 pp. 4.00
22. C. N. Moore, Summable series and convergence factors, 1938, vi, 105 pp. 2.00
21. J. M. Thomas, Differential systems, 1937, x, 118 pp. 2.00
20. J. L. Walsh, Interpolation and approximation by rational functions in the complex domain, 1935, x, 382 pp. 6.00
18. M. Morse, The calculus of variations in the large, 1934, x, 368 pp.; reprinted, 1948, x, 368 pp. 5.35
16. G. A. Bliss, Algebraic functions, 1933, x, 220 pp.; reprinted, 1948, x, 220 pp. 6.00
14. J. F. Ritt, Differential equations from the algebraic standpoint, 1932, x, 172 pp.; reprinted, 1948, x, 172 pp. 3.00
10. A. B. Coble, Algebraic geometry and theta functions, 1929, viii, 184 pp.; reprinted, 1948, viii, 184 pp. 4.00
8. L. P. Eisenhart, Non-Riemannian geometry, 1927, viii, 184 pp.; reprinted, 1934, viii, 184 pp. 2.70
1. H. S. White, Linear systems of curves on algebraic surfaces; F. S. Woods, Forms of non-Euclidean space; E. B. Van Vleck, Selected topics in the theory of divergent series and of continued fractions; 1905, xii, 187 pp. 3.00
F. Klein, The Evanston colloquium lectures on mathematics, 1894, x, 109 pp.; reprinted, 1911, xii, 109 pp. 1.00

Mathematical Surveys

1. J. A. Shohat and J. D. Tamarkin, The problem of moments, 1943, xiv, 140 pp. $2.25

Semicentennial Publications

1. R. C. Archibald, A semicentennial history of the American Mathematical Society 1888–1938, with biographies and bibliographies of the past presidents, 1938, xii, 261 pp.; 30 plates. $3.00

The price to members of the American Mathematical Society is 25% less than list. Volumes which are not listed above are out of print.
CONTENTS

Vol. 64, No. 1                      JULY, 1948                    Whole No. 226

Page

Cohomology and Galois theory. I. Normality of algebras and Teichmüller's cocycle. By Samuel Eilenberg and Saunders MacLane.............. 1

On the existence and boundedness of solutions of nonlinear partial differential equations of parabolic type. By Richard Bellman........... 21

Rings of real-valued continuous functions. I. By Edwin Hewitt............. 45

Ultrafilters and compactification of uniform spaces. By Pierre Samuel 100

Manifolds of difference polynomials. By R. M. Cohn...................... 133

Some generalizations of quasi-Frobenius algebras. By R. M. Thrall... 173

Coloring six rings. By D. W. Hall and D. C. Lewis....................... 184

Mathematical papers intended for publication in the Transactions should be addressed to one of the editors:
Papers in algebra, number theory, logic and foundations to A. A. Albert, University of Chicago, Chicago 37, Ill.
Papers in analysis, applied mathematics, probability and statistics to Antoni Zygmund, University of Chicago, Chicago 37, Ill.
Papers in geometry and topology to G. T. Whyburn, School of Mathematics, University of Virginia, Charlottesville, Va.

All papers should be typewritten, double spaced, and the author should keep a complete copy.

Authors are required to present abstracts of their papers to the Society on blanks which may be obtained from the general office of the Society at 531 West 116th Street, New York 27, N. Y.
