Journals Published by the
American Mathematical Society

Bulletin of the
American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings, with abstracts of all research papers presented. It contains numerous short original papers on mathematical topics, and some of the longer officially invited addresses presented before the Society. It contains also announcements and notes on matters of current interest, and reviews of advanced mathematical books.

The Bulletin is published monthly. The price per annual volume is $11.00. Sets of volumes are available as follows: vols. 1–36 (1894–1930), $7.00 each; vols. 37–53 (1931–1947), $9.00 each.

Transactions of the
American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

Two volumes of three numbers each are published annually. The price per volume is $6.00, or per year $12.00. Volumes 1–36 (1900–1934) consist of four numbers each. Sets of volumes are available as follows: vols. 1–21 (1900–1920), $7.00 each; vols. 22–32 (1921–1930), $8.00 each; vols. 33–36 (1931–1934), $9.00 each; vols. 37–63 (1935–1948), $6.00 each.

Mathematical Reviews

This journal contains abstracts and reviews of the current mathematical literature of the world. It is sponsored jointly with the Society by such organizations as the Mathematical Association of America, the Institute of Mathematical Statistics, the London Mathematical Society, the Edinburgh Mathematical Society, the Argentine Mathematical Union, etc.

The publication of Mathematical Reviews was begun in 1940. It appears monthly excepting July and the price per annual volume is $13.00. Orders for complete volumes only are accepted.
Books Published by the American Mathematical Society

Colloquium Publications

31. E. Hille, Functional analysis and semi-groups, xii, 528 pp. To appear soon. $7.50
30. T. Radó, Length and area, 1948, vi, 572 pp. 6.75
29. A. Weil, Foundations of algebraic geometry, 1946, xx, 188 pp. 5.50
28. G. T. Whyburn, Analytic topology, 1942, x, 278 pp.; reprinted, 1948, x, 280 pp. 4.75
27. S. Lefschetz, Algebraic topology, 1942, vi, 389 pp.; reprinted, 1948, vi, 393 pp. 6.00
26. N. Levinson, Gap and density theorems, 1940, viii, 246 pp. 4.00
25. A. A. Albert, Structure of algebras, 1939, xii, 210 pp. 4.00
24. C. H. Moore, Summable series and convergence factors, 1938, vi, 105 pp. 2.00
23. J. M. Thomas, Differential systems, 1937, x, 118 pp. 2.00
22. J. L. Walsh, Interpolation and approximation by rational functions in the complex domain, 1935, x, 382 pp. 6.00
21. M. Morse, The calculus of variations in the large, 1934, x, 368 pp.; reprinted, 1948, x, 368 pp. 5.35
18. J. F. Ritt, Differential equations from the algebraic standpoint, 1932, x, 172 pp.; reprinted, 1948, x, 172 pp. 3.00
16. A. B. Coble, Algebraic geometry and theta functions, 1929, viii, 184 pp.; reprinted, 1948, viii, 184 pp. 4.00
14. L. P. Eisenhart, Non-Riemannian geometry, 1927, viii, 184 pp.; reprinted, 1934, viii, 184 pp. 2.70
11. H. S. White, Linear systems of curves on algebraic surfaces; F. S. Woods, Forms of non-Euclidean space; E. B. Van Vleck, Selected topics in the theory of divergent series and of continued fractions; 1905, xii, 187 pp. 3.00
10. G. D. Birkhoff, Semicentennial addresses, 1938, vi, 315 pp. 4.50
8. R. C. Archibald, A semicentennial history of the American Mathematical Society 1888–1938, with biographies and bibliographies of the past presidents, 1938, xii, 261 pp. + 30 plates. $3.00

Mathematical Surveys

1. J. A. Shohat and J. D. Tamarkin, The problem of moments, 1943, xiv, 140 pp. $2.25

Semicentennial Publications

1. W. H. E. Beek, W. H. E. Beek, A semicentennial history of the American Mathematical Society 1888–1938, with biographies and bibliographies of the past presidents, 1938, xii, 261 pp. + 30 plates. $3.00

The price to members of the American Mathematical Society is 25% less than list. Volumes which are not listed above are out of print.
CONTENTS

Vol. 64, No. 2 SEPTEMBER, 1948 Whole No. 227

On the maximum partial sums of sequences of independent random variables. By K. L. Chung................................................. 205
Non-oscillation theorems. By EINAR HILLE.................................. 234
A study of analytic surfaces by means of a projective theory of envelopes. By E. GREER and P. O. BELL................. 253
Nonlinear difference equations analytic in a parameter. By C. F. STEPHENS................................................................. 268
Interpolation series. By R. C. BUCK........................................... 283
Representations of lattices by sets. By GARRETT BIRKHOFF and ORRIN FRINK............................................................ 299
Some applications of the Dirichlet integral to the theory of surfaces. By L. C. YOUNG......................................................... 317
Mappings of a normal space into an absolute neighborhood retract. By S. T. HU.............................................................. 336
Neumann series of Bessel functions. By J. E. WILKINS.............. 359
On Schreier systems in free groups. By MARSHALL HALL and TIBOR RADó.............................................................. 386

Mathematical papers intended for publication in the Transactions should be addressed to one of the editors:
Papers in algebra, number theory, logic and foundations to A. A. Albert, University of Chicago, Chicago 37, Ill.
Papers in analysis, applied mathematics, probability and statistics to Antoni Zygmund, University of Chicago, Chicago 37, Ill.
Papers in geometry and topology to G. T. Whyburn, School of Mathematics, University of Virginia, Charlottesville, Va.
All papers should be typewritten, double spaced, and the author should keep a complete copy.
Authors are required to present abstracts of their papers to the Society on blanks which may be obtained from the general office of the Society at 531 West 116th Street, New York 27, N. Y.
