Journals Published by the
American Mathematical Society

Bulletin of the
American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings, with abstracts of all research papers presented. It contains some of the officially invited addresses presented before the Society. It contains also announcements and notes on matters of current interest, and reviews of advanced mathematical books.

One volume of six numbers is planned for 1951. The subscription price is $7.00. Sets of volumes of the Bulletin are available as follows: Vols. 1–36 (1894–1930), $7.00 each; Vols. 37–53 (1931–1947), $9.00 each; Vols. 54–55 (1948–1949), $11.00 each; Vol. 56 (1950), $7.00.

Proceedings of the
American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and is devoted principally to the publication of original papers of moderate length. Volume 1 appeared in 1950.

One volume of six numbers is planned for 1951. The subscription price is $11.00. Vol. 1 (1950) is available at the price of $11.00.

Transactions of the
American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general longer memoirs than the Proceedings.

Normally two volumes of three numbers each are published annually. The price per volume is $6.00. Volumes 1–36 (1900–1934) consist of four numbers each. Volumes 66–67 (1949) consist of two numbers each. Sets of volumes are available as follows: Vol. 1–21 (1900–1920), $7.00 each; Vols. 22–32 (1921–1930), $8.00 each; Vols. 33–36 (1931–1934), $9.00 each; Vols. 37–70 (1935–1951), $6.00 each.

Mathematical Reviews

This journal contains abstracts and reviews of the current mathematical literature of the world. It is sponsored by 13 mathematical organizations both in the United States and abroad.

The publication of Mathematical Reviews was begun in 1940. It appears monthly excepting July and the price per annual volume is $20.00. Orders for complete volumes only are accepted. Volumes 1–11 are available at $20.00 per volume.

Published in January, March, May, July, September, and November by the American Mathematical Society, Menasha, Wis., and 531 West 116th Street, New York 27, N. Y.

Entered as second class matter at the post office at Menasha, Wis. Acceptance for mailing at special rate of postage provided for in the Act of February 28, 1925, embodied in paragraph 4, section 538, P. L. and R., authorized May 9, 1935.

Subscriptions for the Bulletin of the American Mathematical Society, the Proceedings of the American Mathematical Society, and the Transactions of the American Mathematical Society may be addressed to the publication office, Menasha, Wis., and subscriptions for Mathematical Reviews may be addressed to the publication office, Lancaster, Pa. However, subscriptions for all these journals should preferably be addressed to the American Mathematical Society, 531 West 116th Street, New York 27, N. Y.

TABLE OF CONTENTS
VOLUME 71, JULY TO DECEMBER, 1951

Barsotti, I. Local properties of algebraic correspondences........... 349
Bateman, P. T. On the representations of a number as the sum of three squares......................................................... 70
Bing, R. H. Higher-dimensional hereditarily indecomposable continua. 267
Eilenberg, S., and MacLane, S. Homology theories for multiplicative systems................................................................. 294
Elliott, H. M. On approximation to functions satisfying a generalized continuity condition....................................................... 1
Grosswald, E. On some algebraic properties of the Bessel polynomials. 197
Hoffman, A. J. On the foundations of inversion geometry............... 218
Hua, L. K., and Reiner, I. Automorphisms of the unimodular group... 331
Hunt, G. A. Random Fourier transforms..................................... 38
Kelly, L. M., and Nordhaus, E. A. Distance sets in metric spaces. 440
Lorch, E. R. Differentiable inequalities and the theory of convex bodies................................................................. 243
Lyndon, R. C. Identities in two-valued calculi.............................. 457
MacLane, S., and Eilenberg, S. Homology theories for multiplicative systems................................................................. 294
Michael, E. Topologies on spaces of subsets................................ 152
Mills, W. H. Multiple holomorphs of finitely generated abelian groups. 379
Mitchell, J. On the spherical summability of multiple orthogonal series................................................................. 136
Moyls, B. N. The structure of valuations of the rational function field $K(x)$................................................................. 102
Myers, S. B. Curvature of closed hypersurfaces, and nonexistence of closed minimal hypersurfaces........................................... 211
Nordhaus, E. A., and Kelly, L. M. Distance sets in metric spaces. 440
Phillips, R. S. Spectral theory for semi-groups of linear operators.... 393

Mathematical papers intended for publication in the Transactions should be addressed to one of the editors:
- Papers in algebra, number theory, logic and foundations to Saunders MacLane, University of Chicago, Chicago 37, Ill.
- Papers in probability, theory of measure, and real variables to J. L. Doob, Department of Mathematics, University of Illinois, Urbana, Ill.
- Other papers in analysis and applied mathematics to L. V. Ahlfors, Department of Mathematics, Harvard University, Cambridge 38, Mass.
- Papers in geometry and topology to G. T. Whyburn, School of Mathematics, University of Virginia, Charlottesville, Va.

All papers should be typewritten, double spaced, and the author should keep a complete copy.

Transactions of the American Mathematical Society is indexed regularly by Engineering Index, Inc.

A Statement of Editorial Policy. Because of the large accumulation of manuscripts and the heavy demand for space and in order to avoid long delay in publication, the editors of the Transactions may require substantial condensation of manuscripts before they are accepted. Authors must present their results in as compact a form as possible and should avoid space-consuming exposition and discussion. Long manuscripts will be subject to especial scrutiny on these points by the editors.
