Journals Published by the
American Mathematical Society

Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings, with abstracts of all research papers presented. It contains some of the officially invited addresses presented before the Society. It contains also announcements and notes on matters of current interest, and reviews of advanced mathematical books.

One volume of six numbers is planned for 1953. The subscription price is $7.00. The prices for back volumes, insofar as they are available, are as follows: Vols. 1–36 (1894–1930), $7.00 each; Vols. 37–53 (1931–1947), $9.00 each; Vols. 54–55 (1948–1949), $11.00 each; Vols. 56–59 (1950–1953), $7.00 each.

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and is devoted principally to the publication of original papers of moderate length. Volume 1 appeared in 1950.

One volume of six numbers is planned for 1953. The subscription price is $11.00. Vols. 1–4 (1950–1953) are available at the price of $11.00 each.

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general longer memoirs than the Proceedings.

Normally two volumes of three numbers each are published annually. The price per volume is $6.00. Volumes 1–36 (1900–1934) consist of four numbers each. Volumes 66–67 (1949) consist of two numbers each. The prices for back volumes, insofar as they are available, are as follows: Vols. 1–21 (1900–1920), $7.00 each; Vols. 22–32 (1921–1930), $8.00 each; Vols. 33–36 (1931–1934), $9.00 each; Vols. 37–75 (1935–1953), $6.00 each.

Mathematical Reviews

This journal contains abstracts and reviews of the current mathematical literature of the world. It is sponsored by 13 mathematical organizations both in the United States and abroad.

The publication of Mathematical Reviews was begun in 1940. It appears monthly excepting July and the price per annual volume is $20.00. Orders for complete volumes only are accepted. Volumes 1–14 are available at $20.00 per volume.

Published in January, March, May, July, September, and November by the American Mathematical Society, Menasha, Wis., and 80 Waterman Street, Providence 6, R. I.

Entered as second class matter at the post office at Menasha, Wis. Acceptance for mailing at special rate of postage provided for in the Act of February 28, 1925, embodied in paragraph 538, P. L. and R., authorized May 9, 1935.

Subscriptions for the Bulletin of the American Mathematical Society, the Proceedings of the American Mathematical Society, and the Transactions of the American Mathematical Society may be addressed to the publication office, Menasha, Wis., and subscriptions for Mathematical Reviews may be addressed to the publication office, Lancaster, Pa. However, subscriptions for all these journals should preferably be addressed to the American Mathematical Society, 80 Waterman Street, Providence 6, R. I.

The price to members of the American Mathematical Society is 25% less than list. Volumes which are not listed above are out of print.
CONTENTS

Vol. 76, No. 1 JANUARY, 1954 Whole No. 250

Interpolation series for integral functions of exponential type. By A. J. Macintyre .......................................................... 1

The conformal rigidity of certain subdomains on a Riemann surface. By H. L. Royden ................................................................. 14

Representations of semisimple Lie groups. II. By Harish-Chandra ................................................................. 26

Infinite general linear groups. By R. V. Kadison ................................................................. 66

Iterative methods for solving partial difference equations of elliptic type. By David Young ................................................................. 92

An extension of a theorem of G. Szegö and its application to the study of stochastic processes. By Ulf Grenander and Murray Rosenblatt ................................................................. 112

Global structure of ordinary differential equations in the plane. By L. Markus ................................................................. 127

Generalized $n$th primitives. By R. D. James ................................................................. 149

Mathematical papers intended for publication in the Transactions should be addressed to one of the editors:

Papers in algebra, number theory, logic and foundations to Saunders MacLane, University of Chicago, Chicago 37, Ill.

Papers in probability, theory of measure, and real variables to J. L. Doob, Department of Mathematics, University of Illinois, Urbana, Ill.

Other papers in analysis and applied mathematics to L. V. Ahlfors, Department of Mathematics, Harvard University, Cambridge 38, Mass.

Papers in geometry and topology to Herbert Busemann, University of Southern California, Los Angeles 7, Calif.

All other communications to the editors should be addressed to the Managing Editor, J. L. Doob, Department of Mathematics, University of Illinois, Urbana, Ill.

All papers should be typewritten, double spaced, and the author should keep a complete copy. A Manual for Authors may be obtained from the American Mathematical Society, 80 Waterman Street, Providence 6, R.I.

Transactions of the American Mathematical Society is indexed regularly by Engineering Index, Inc.

A Statement of Editorial Policy. Because of the large accumulation of manuscripts and the heavy demand for space and in order to avoid long delay in publication, the editors of the Transactions may require substantial condensation of manuscripts before they are accepted. Authors must present their results in as compact a form as possible and should avoid space-consuming exposition and discussion. Long manuscripts will be subject to especial scrutiny on these points by the editors.
