Journals Published by the
American Mathematical Society

Bulletin of the
American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, research problems and a department of research announcements.

One volume of six numbers is planned for 1960. The subscription price is $7.00. The prices for back issues, insofar as they are available, are $2.35 per single issue and $3.35 per double issue.

Proceedings of the
American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and is devoted principally to the publication of original papers of moderate length. Volume 1 appeared in 1950.

One volume of six numbers is planned for 1960. The subscription price is $11.00. Vols. 1–10 (1950–1959) are available at the price of $2.35 per issue.

Transactions of the
American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general, longer papers than the PROCEEDINGS.

Four volumes of three numbers each will be published in 1960. The price per volume is $8.00. Volumes 1–36 (1900–1934) consist of four numbers each. Volumes 66–67 (1949) and 78–89 (1955–1958) consist of two numbers each. All other volumes consist of three numbers each. The prices for back issues, insofar as they are available, are $4.00 per issue.

Mathematical Reviews

This journal contains abstracts and reviews of the current mathematical literature of the world. It is sponsored by 13 mathematical organizations both in the United States and abroad.

The publication of MATHEMATICAL REVIEWS was begun in 1940. It appears monthly excepting July and the price per annual volume is $50.00. Volumes 10 and 17 are not available. Volumes 1–9, 11–16 and 18–20 are available at the following prices: Vols. 1–14 (1940–1953) $24.00 each; all other volumes $50.00.
TABLE OF CONTENTS
VOLUME 96, JULY TO SEPTEMBER, 1960

ACCOLA, R. D. M. The bilinear relation on open Riemann surfaces... 143
BARCUS, W. D. The stable suspension of an Eilenberg-MacLane space. 101
BAXTER, GLEN. A two-dimensional operator identity with application
to the change of sign in sums of random variables................. 210
DE BRANGES, LOUIS. Some Hilbert spaces of entire functions......... 259
BROWN, LEON, SHIELDS, ALLEN and ZELLER, KARL. On absolutely con-
vergent exponential sums............................................. 162
BROWN, MORTON. On the inverse limit of Euclidean N-spheres...... 129
CARLITZ, L. and LEVINE, JACK. Some problems concerning Kummer's
congruences for the Euler numbers and polynomials.................. 23
COHEN, ECKFORD. A class of arithmetical functions in several variables
with applications to congruences........................................ 355
CRAWLEY, PETER and DILWORTH, R. P. Decomposition theory for latt-
tices without chain conditions......................................... 1
CURTIS, C. W. On the dimensions of the irreducible modules of Lie
algebras of classical type............................................... 135
DIAZ, J. B. and WALTER, W. L. On uniqueness theorems for ordinary
differential equations and for partial differential equations of hyper-
oblic type................................................................. 90
DILWORTH, R. P. and CRAWLEY, PETER. Decomposition theory for latt-
tices without chain conditions....................................... 1
FRANK, EVELYN. A new class of continued fraction expansions for the
ratios of Heine functions. III........................................... 312
GINSBURG, SEYMOUR. Some remarks on abstract machines.......... 400
HARTMAN, PHILIP. On boundary value problems for systems of ordi-
nary, nonlinear, second order differential equations.................. 493
HARTNETT, W. E. and KRUSE, A. H. Differentiation of set functions us-
ing Vitali coverings..................................................... 185
HAYNSWORTH, E. V. Bounds for determinants with positive diagonals. 395
HELLER, ALEX. The loop-space functor in homological algebra...... 382
HILTON, P. J. Remark on free products of groups...................... 478
HOWARD, HENRY. Oscillation criteria for fourth-order linear differential
equations................................................................. 296
JENKINS, J. A. On certain coefficients of univalent functions. II.... 534
JOHNSON, R. S. On monosplines of least deviation.................... 458
KELLY, PAUL and MERRIELL, DAVID. A class of graphs............. 488
Kelman, R. B. A class of differential-functional systems. I. 54
Kruse, A. H. and Hartnett, W. E. Differentiation of set functions using Vitali coverings. 185
Levine, Jack and Carlitz, L. Some problems concerning Kummer's congruences for the Euler numbers and polynomials. 23
Lyndon, R. C. Equations in free groups. 445
———. Groups with parametric exponents. 518
Merriell, David and Kelly, Paul. A class of graphs. 488
Mostert, P. S. and Shields, A. L. One-parameter semigroups in a semigroup. 510
Osserman, Robert. On the Gauss curvature of minimal surfaces. 115
Rice, J. R. The characterization of best nonlinear Tchebycheff approximations. 322
Robinson, Abraham and Zakon, Elias. Elementary properties of ordered abelian groups. 222
Segal, I. E. Erratum to Distributions in Hilbert space and canonical systems of operations. 546
Shields, A. L. and Mostert, P. S. One-parameter semigroups in a semigroup. 510
Shields, Allen, Brown, Leon and Zeller, Karl. On absolutely convergent exponential sums. 162
Sion, Maurice. On uniformization of sets in topological spaces. 237
———. On analytic sets in topological spaces. 341
Thomas, Emery. On the cohomology of the real Grassmann complexes and the characteristic classes of n-plane bundles. 67
Thron, W. J. Sequences generated by iteration. 38
Walsh, J. L. Note on degree of approximation by bounded analytic functions: Problem β. 246
Walter, W. L. and Diaz, J. B. On uniqueness theorems for ordinary differential equations and for partial differential equations of hyperbolic type. 90
Zakon, Elias and Robinson, Abraham. Elementary properties of ordered abelian groups. 222
Zeller, Karl, Brown, Leon and Shields, Allen. On absolutely convergent exponential sums. 162
Journals Published by the
American Mathematical Society

Soviet Mathematics—Doklady

This journal contains the entire pure mathematics section of the Doklady Akademii Nauk SSSR in translation. It appears six times a year, each bimonthly issue corresponding to one volume of the Soviet Doklady. (The Doklady Akademii Nauk SSSR is issued three times a month, six issues constituting a volume.)

Rates per annual volume are as follows: Domestic subscriptions, $17.50; foreign subscriptions, $20.00. Single issues are $5.00.

Notices of the American Mathematical Society

This journal announces the programs of the meetings of the Society. It carries the abstracts of all contributed papers presented at the meetings of the Society and publishes news items of interest to mathematical scientists.

The subscription price is $7.00 per annual volume of 7 numbers. A single copy is $2.00.

All communications should be addressed to the Editor G. L. Walker, 190 Hope Street, Providence 6, Rhode Island. News items and insertions for each issue must be in the hands of the editor on or before the deadline for the abstracts for the papers to be presented in the meetings announced in that issue. These deadlines are published regularly on the back of the Table of Contents of each issue.

Memoirs of the American Mathematical Society

This is a series of paperbound research tracts which are of the same general character as papers published in the Transactions. An issue contains either a single monograph or a group of cognate papers. Published at irregular intervals. The latest numbers in this series are:

26. Walter Strodt, Principal solutions of ordinary differential equations in the complex domain. 107 pp. 1957.......................... $2.00
27. Emery Thomas, The generalized Pontrjagin cohomology operations and rings with divided powers. 82 pp. 1957......................... 1.70
28. Ernst Snapper, Cohomology groups and genera of higher-dimensional fields. 100 pp. 1957.............................................. 1.90
29. Edward Halpern, Twisted polynomial hyperalgebras. 61 pp. 1958.......................... 1.50
30. L. Auslander and L. Markus, Flat Lorentz 3-manifolds. 60 pp. 1959.......................... 2.00
31. W. S. Loud, Periodic solutions of $x''+cx'+g(x)=ef(t)$. 58 pp. 1959..................... 2.00
32. R. S. Pierce, Translation lattices. 66 pp. 1959............................................. 1.70
33. Ernst Snapper, Cohomology theory and algebraic correspondences. 96 pp. 1959........... 1.90
34. E. M. Zaustinsky, Spaces with non-symmetric distance. 91 pp. 1959.......................... 2.00
A class of arithmetical functions in several variables with applications to congruences. By Eckford Cohen. .................................................. 355

The loop-space functor in homological algebra. By Alex Heller .... 382

Bounds for determinants with positive diagonals.
By E. V. Haynsworth................................................................. 395

Some remarks on abstract machines. By Seymour Ginsburg........ 400

Equations in free groups. By R. C. Lyndon............................ 445

On monosplines of least deviation. By R. S. Johnson................. 458

Remark on free products of groups. By P. J. Hilton.................. 478

A class of graphs. By Paul Kelly and David Merriell.............. 488

One-parameter semigroups in a semigroup. By P. S. Mostert and A. L. Shields ................................................................. 510

Groups with parametric exponents. By R. C. Lyndon................. 518

On certain coefficients of univalent functions. II. By J. A. Jenkins... 534

Errata to Volume 88................................................................. 546
