Journals Published by the
American Mathematical Society

Bulletin of the
American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the
details of its meetings. It contains some of the officially invited addresses presented before the
Society, reviews of advanced mathematical books, research problems and a department of
research announcements.

One volume of six numbers is planned for 1966.

Proceedings of the
American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and is devoted
principally to the publication of original papers of moderate length. Volume 1 appeared in 1950.
The journal contains a department called Shorter Notes. This purpose of this department is to
publish very short papers of an unusually elegant and polished character, for which there is
normally no other outlet.

One volume of six numbers is planned for 1966.

Transactions of the
American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes
in general, longer papers than the Proceedings.

The price per volume is $10.00. All inquiries for Volumes 1–69 should be directed to Johnson
Reprint Corporation, 111 Fifth Avenue, New York, New York 10012. Orders for Volumes
70–121 should be directed to the American Mathematical Society.

Mathematical Reviews

This journal is devoted to abstracts and reviews of the current mathematical literature of
the world. Two volumes will be published in 1966, Volume 31 and Volume 32. Each volume
will consist of 6 regular issues plus an index issue. In each regular issue the abstracts and reviews
are grouped under subject headings. Publication began in 1940.

Published monthly by the American Mathematical Society. Subscriptions for Journals
published by the American Mathematical Society should be addressed to American Mathematical
Society, P. O. Box 6248, Providence, Rhode Island 02904.

CONTENTS (Continued)

Asymptotic behavior of the solution of an \( n \)th order nonhomogeneous ordinary differential equation

By T. G. HALLAM .................................................. 177

Fixed points and multiplicative left invariant means

By THEODORE MITCHELL ........................................... 195

Sums of solid horned spheres

By L. O. CANNON .................................................. 203

On the Radon-Nikodym derivatives of measurable transformations

By DOROTHY MAHARAM ........................................... 229

Journals Published by the

American Mathematical Society

Soviet Mathematics—Doklady

This journal contains the entire pure mathematics section of the DOKLADY AKADEMII NAUK SSSR in translation. It appears six times a year, each bimonthly issue corresponding to one volume of the Soviet DOKLADY. (The DOKLADY AKADEMII NAUK SSSR is issued three times a month, six issues constituting a volume.)

Notices of the American Mathematical Society

This journal announces the programs of the meetings of the Society. It carries the abstracts of all contributed papers presented at the meetings of the Society and publishes news items of interest to mathematical scientists.

All communications should be addressed to the Editor, P. O. Box 6248, Providence, Rhode Island 02904. News items and insertions for each issue must be in the hands of the editor on or before the deadline for the abstracts for papers to be presented at the meetings announced in that issue. These deadlines are published regularly on the back of the title page.

Mathematics of Computation

A journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices and other aids to computation. In addition it publishes reviews and notes in these and related fields.

Chinese Mathematics—Acta

This is a cover to cover translation into English of Acta Mathematica Sinica, published by Academia Sinica, Peking, People’s Republic of China. Acta Mathematica Sinica contains current research in all fields of pure mathematics.

New Publications

This quarterly contains listings of new and forthcoming mathematical titles. Included are listings of recent reprints, lecture notes, new journals, journals in microform, and addresses of book, journal and microform publishers. Information to be included in the journal should be addressed to: New Publications, P. O. Box 6248, Providence, Rhode Island 02904.
