Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes, in general, longer papers than the PROCEEDINGS.

Annual subscription is $114.00; in 1970 six volumes will be published. All inquiries for Volumes 1–77 should be directed to Johnson Reprint Corporation, 111 Fifth Avenue, New York, New York 10003. Orders for Volumes 78 through the present volume should be directed to the American Mathematical Society.

Mathematical papers intended for publication in the TRANSACTIONS should be addressed to one of the editors:

Papers in analysis and applied mathematics to J. J. Kohn, Department of Mathematics, Princeton University, Princeton, New Jersey 08540.

Papers in algebra, logic and number theory to D. A. Buchsbaum, Department of Mathematics, Brandeis University, Waltham, Massachusetts 02154.

Papers in statistics and probability to H. P. McKean, Department of Mathematics, Rockefeller University, New York, New York 10021.

Papers in geometry and abstract analysis to Shlomo Sternberg, Department of Mathematics, Harvard University, Cambridge, Massachusetts 02138.

Papers in topology to Steve Armentrout, Department of Mathematics, Pennsylvania State University, University Park, Pennsylvania 16802.

Papers in mathematical logic and foundations to Dana Scott, Department of Philosophy, Princeton University, Princeton, New Jersey 08540.

All other communications to the editors should be addressed to the Managing Editor, Dana Scott.

All papers should be typewritten, double-spaced, and the author should keep a complete copy.

The first page should consist of a descriptive title, followed by an abstract which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The descriptive title should be short, but informative; useless or vague phrases such as "some remarks about" or "concerning" should be avoided. Also avoid proper names unless mathematical usage associates them with the work. The abstract should be at least one complete sentence, and at most 300 words, with the upper limit primarily for longer papers. Included with the footnotes to your paper, but placed before the first footnote, there should be first the AMS (MOS) subject classification numbers representing the primary and secondary subjects of the article, followed by a list of key words and phrases describing the subject matter of the article and taken from it. The AMS (MOS) Subject Classification Scheme (1970) with instructions for its use can be found as an appendix to Mathematical Reviews, Index to Volume 39 (June 1970). See the June 1970 Notices for more details, as well as illustrative examples.

Memoirs of the American Mathematical Society

These are a series of paperbound research tracts which are of the same general character as the papers published in the TRANSACTIONS. The editorial committee is identical with that for the TRANSACTIONS so that papers intended for publication in this series should be addressed to one of the editors listed above.
Finite groups with quasi-dihedral and wreathed Sylow 2-subgroups
By J. L. Alperin, Richard Brauer and Daniel Gorenstein 1

Strong renewal theorems with infinite mean
By K. Bruce Erickson 263

Meromorphic functions of elements of a commutative Banach algebra
By Barnett W. Glickfeld 293

Quadratic functionals of second order
By Walter Leighton 309

Dual spaces of weighted spaces
By W. H. Summers 323

Global dimension of orders
By Richard B. Tarsy 335

Spaces of countable and point-countable type
By J. E. Vaughan 341
