Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes, in general, longer papers than those in the PROCEEDINGS.

Annual subscription is $156.00; in 1971 ten volumes will be published. All inquiries for Volumes 1–77 should be directed to Johnson Reprint Corporation, 111 Fifth Avenue, New York, New York 10003. Orders for Volumes 78 through the present volume should be directed to the American Mathematical Society.

Mathematical papers intended for publication in the TRANSACTIONS should be addressed to one of the editors:

- Papers in analysis and applied mathematics to J. J. Kohn, Department of Mathematics, Princeton University, Princeton, New Jersey 08540.
- Papers in algebra and number theory to Dock S. Rim, Department of Mathematics, University of Pennsylvania, Philadelphia, Pennsylvania 19104.
- Papers in statistics and probability to Harry Kesten, Department of Mathematics, Cornell University, Ithaca, New York 14850.
- Papers in geometry and abstract analysis to Shlomo Sternberg, Department of Mathematics, Harvard University, Cambridge, Massachusetts 02138.
- Papers in topology to Steve Armentrout, Department of Mathematics, Pennsylvania State University, University Park, Pennsylvania 16802.
- Papers in mathematical logic and foundations to Dana Scott, Department of Philosophy, Princeton University, Princeton, New Jersey 08540.
- All other communications to the editors should be addressed to the Managing Editor, Dana Scott.

All papers should be typewritten, double-spaced, and the author should keep a complete copy.

The first page should consist of a descriptive title, followed by an abstract which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The descriptive title should be short, but informative; useless or vague phrases such as "some remarks about" or "concerning" should be avoided. Also avoid proper names unless mathematical usage associates them with the work. The abstract should be at least one complete sentence, and at most 300 words, with the upper limit primarily for longer papers. Included with the footnotes to your paper, but placed before the first footnote, there should be first the AMS (MOS) subject classification numbers representing the primary and secondary subjects of the article, followed by a list of key words and phrases describing the subject matter of the article and taken from it. The AMS (MOS) Subject Classification Scheme (1970) with instructions for its use can be found as an appendix to Mathematical Reviews, Index to Volume 39 (June 1970). See the June 1970 Notices for more details, as well as illustrative examples.

Memoirs of the American Mathematical Society

These are a series of paperbound research tracts which are of the same general character as the papers published in the TRANSACTIONS. The editorial committee is identical with that for the TRANSACTIONS so that papers intended for publication in this series should be addressed to one of the editors listed above.

Published monthly by the American Mathematical Society. Subscriptions for Journals published by the American Mathematical Society should be addressed to American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02904.

Second-class postage paid at Providence, Rhode Island, and additional mailing offices.

CONTENTS

Vol. 158 JULY, 1971 Whole No. 430

Noncommutative Jordan rings
By KEVIN McCrimmon ................. 1

Isolated invariant sets and isolating blocks
By C. CONLEY and R. EASTON ........ 35

Structure of the semigroup of semigroup extensions
By R. O. FULP and J. W. STEPP ...... 63

Generating and cogenerating structures
By JOHN A. BEACHY .................. 75

Algebraic models for probability measures associated with stochastic processes
By B. M. SCHREIBER, T.-C. SUN and A. T. BHARUCHA-REID .. 93

Cyclic vectors and irreducibility for principal series representations
By NOLAN R. WALLACH ............... 107

Involuntary automorphisms of operator algebras
By E. B. DAVIES .................... 115

The curvature of level curves
By DOROTHY BROWNE SHAFFER ........ 143

Noncommutative Jordan algebras of capacity two
By KIRBY C. SMITH .................. 151

Arcwise connectedness of semiaposyndetic plane continua
By CHARLES L. HAGopian ............. 161

A priori estimates and unique continuation theorems for second order parabolic equations
By RAYMOND JOHNSON ................ 167

Regular identities in lattices
By R. PADMANABHAN .................. 179

On the order of a starlike function
By F. HOLLAND and D. K. THOMAS .... 189

On the C*-algebra of Toeplitz operators on the quarter-plane
By R. G. DOUGLAS and ROGER HOWE .. 203

Operations in polyadic algebras
By AUBERT DAIGNEAULT .............. 219

Matching theory for combinatorial geometries
By MARTIN AIGNER and THOMAS A. DOWLING ................. 231

On the classification of symmetric graphs with a prime number of vertices
By CHONG-YUN CHAO ................. 247
