Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes, in general, longer papers than those in the PROCEEDINGS. Mathematical papers intended for publication in the TRANSACTIONS should be addressed to one of the editors. Subjects, and the editors associated with them, follow:

Real analysis (excluding harmonic analysis) and applied mathematics to FRANÇOIS TREVES, Department of Mathematics, Rutgers University, New Brunswick, NJ 08903.

Harmonic and complex analysis to HUGO ROSSI, Department of Mathematics, University of Utah, Salt Lake City, UT 84112.

Abstract analysis to ALEXANDRA IONESCU TULCEA, Department of Mathematics, Northwestern University, Evanston, IL 60201.

Algebra and number theory (excluding universal algebras) to STEPHEN S. SHATZ, Department of Mathematics, University of Pennsylvania, Philadelphia, PA 19174.

Logic, foundations, universal algebras and combinatorics to ALISTAIR H. LACHLAN, Department of Mathematics, Simon Fraser University, Burnaby, B.C., Canada.

Topology to PHILIP T. CHURCH, Department of Mathematics, Syracuse University, Syracuse, NY 13210.

Global analysis and differential geometry to VICTOR W. GUillemin, c/o Ms. M. McQuillin, Department of Mathematics, Harvard University, Cambridge, MA 02138.

Probability and statistics to DANIEL W. STROOCK, Department of Mathematics, University of Colorado, Boulder, CO 80302.

All other communications to the editors should be addressed to Managing Editor, ALISTAIR H. LACHLAN.

All papers should be typewritten, double-spaced, and the author should keep a complete copy.

The first page should consist of a descriptive title, followed by an abstract which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The descriptive title should be short, but informative; useless or vague phrases such as "some remarks about" or "concerning" should be avoided. Also avoid proper names unless mathematical usage associates them with the work. The abstract should be at least one complete sentence, and at most 300 words, with the upper limit primarily for longer papers. Included with the footnotes to your paper, but placed before the first footnote, there should be first the AMS (MOS) subject classification numbers representing the primary and secondary subjects of the article, which may be followed by a list of key words and phrases describing the subject matter of the article and taken from it. The AMS (MOS) Subject Classification Scheme (1970) with instructions for its use can be found as an appendix to Mathematical Reviews, Index to Volume 39 (June 1970). See the June 1970 Notices for more details, as well as illustrative examples.

When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate on the original manuscript which of them should receive galley proof in the event that the manuscript is accepted for publication.

Annual subscription price is $210.00, list, $105.00 member; 14 volumes are planned for 1975. All inquiries for Volumes 1–77 should be directed to Johnson Reprint Corporation, 11 Fifth Avenue, New York 10003. Back volumes available from the American Mathematical Society (list prices are per volume) are: Volume 78 (1955), $12.00; Volumes 79–89 (1956–1958), $8.00; Volumes 90–120 (1959–1965), $12.00; Volumes 121–129 (1966–1967), $15.00; Volumes 130–134 (1968), $18.00; Volumes 135–146 (1969), $22.90; Volumes 147–152 (1970), $28.50; Volumes 153–162 (1971), $23.40; Volumes 163–200 (1972–1974), $23.50. Members may purchase back volumes at a 25% discount.

Memoirs of the American Mathematical Society

This bimonthly journal is devoted to research in pure and applied mathematics of much the same nature as appears in Transactions. An issue consists of one or more separately bound research tracts for which the author(s) has provided reproduction copy. Prior to 1975 this was published as a monograph series. The editorial committee is identical with that for the TRANSACTIONS so that papers intended for publication in this series should be addressed to one of the editors listed above.

Published monthly except two in April and October by the American Mathematical Society. Subscriptions and orders for publications of the American Mathematical Society should be addressed to American Mathematical Society, P. O. Box 1571, Annex Station, Providence, Rhode Island 02901. All orders must be accompanied by payment. Other correspondence should be addressed to P. O. Box 6248, Providence, Rhode Island 02940.

Second-class postage paid at Providence, Rhode Island, and additional mailing offices.
