TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY

THIS JOURNAL is devoted entirely to research in pure and applied mathematics, and includes, in general, longer papers than those in the PROCEEDINGS.

PREPARATION OF THE MANUSCRIPT. All papers should be typewritten double-spaced, and two copies should be sent to the appropriate editor. The author should keep a complete copy.

FORM OF MANUSCRIPT. The first page should consist of a descriptive title, followed by an abstract which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The descriptive title should be short, but informative; useless or vague phrases such as "Some remarks about" or "concerning" should be avoided. Also avoid proper names unless mathematical usage associates them with the work. The abstract should be at least one complete sentence, and at most 300 words, with the upper limit primarily for longer papers. Included with the footnotes to your paper, but placed before the first footnote, there should be first the AMS (MOS) subject classification numbers representing the primary and secondary subjects of the article, which may be followed by a list of key words and phrases describing the subject matter of the article and taken from it. The AMS (MOS) Subject Classification Scheme (1970) with instructions for its use can be found as an appendix to Mathematical Reviews, Index to Volume 39 (June 1970). See the June 1970 Notices for more details, as well as illustrative examples.

SUBMISSION OF MANUSCRIPT. See the inside back cover of this journal.

GALLEY PROOF. When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate on the original manuscript which of them should receive galley proof in the event that the manuscript is accepted for publication.

PUBLICATION CHARGES. The research journals of the American Mathematical Society carry a page charge of $40.00 per page to help defray the cost of publication. This amount is charged to the institution or to a contract supporting the research reported in the published paper. The publication charge policy of the United States Federal Council for Science and Technology (FCST) is reported on page 112 of the February, 1975 issue of the NOTICES of the American Mathematical Society. In no case is the author personally responsible for paying the page charge, nor is acceptance of his paper for publication dependent upon payment of the page charge.

BACKLOG. 300 pages. Two-thirds of the papers currently being accepted by the editors will be published in 12–15 months.

SUBSCRIPTION INFORMATION. TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY is published monthly. Subscription prices for Volumes 247–256 (1979) are $288.00 list; $144.00 member.

BACK NUMBER INFORMATION. Back number prices per volume are: for Volumes 78–134, $18.00 list, $13.50 member; for Volumes 135–214, $30.00 list, $22.50 member; for Volumes 215–224, $32.00 list, $24.00 member; for Volumes 225–246, $36.00 list, $27.00 member. Volumes 1–77 may be ordered from Johnson Reprint Corporation, 111 Fifth Avenue, New York, New York 10003. Volumes 1–224 are available on 35mm microfilm from University Microfilms International, 300 North Zeeb Road, Ann Arbor, Michigan 48106.

MEMOIRS OF THE AMERICAN MATHEMATICAL SOCIETY

This bimonthly journal is devoted to research in pure and applied mathematics of much the same nature as appears in TRANSACTIONS. An issue consists of one or more separately bound research tracts for which the author(s) has provided reproduction copy. Prior to 1975 this was published as a monograph series. The editorial committee is identical with that for the TRANSACTIONS so that papers intended for publication in this series should be addressed to one of the editors listed on the inside back cover.

Subscriptions and orders for publications of the American Mathematical Society should be addressed to American Mathematical Society, P. O. Box 1571, Annex Station, Providence, R. I. 02901. All orders must be accompanied by payment. Other correspondence should be addressed to P. O. Box 6248, Providence, R. I. 02940.

Second class postage paid at Providence, Rhode Island, and additional mailing offices.

AUTHOR INDEX

Vol. 254 October 1979

ADLER, ALLAN, Antiholomorphic involutions of analytic families of abelian varieties, 69
BAKER, B. M., Free states of the gauge invariant canonical anticommutation relations. II, 135
BLEECKER, DAVID D., Critical mappings of Riemannian manifolds, 319
BLOCK, LOUIS, Simple periodic orbits of mappings of the interval, 391
CHONG, C. T., Generic sets and minimal α-degrees, 157
DAVERMAN, R. J. and ROW, W. H., Cell-like 0-dimensional decompositions of S^3 are 4-manifold factors, 217
GLOBEVNIK, J., Analytic extensions and selections, 171
GUASPARI, D., Partially conservative extensions of arithmetic, 47
KAPLAN, STEVE J., Constructing framed 4-manifolds with given almost framed boundaries, 237
KORÁNYI, ADAM and VÁGI, STEPHEN, Rational inner functions on bounded symmetric domains, 179
KRIER, NICHOLAS, Some constructions of infinite Möbius planes, 95
LANCE, TIMOTHY, Local H-maps of classifying spaces, 195
LORENZ, MARTIN, Analogs of Clifford’s theorem for polycyclic-by-finite groups, 295
ROW, W. H. and DAVERMAN, R. J., Cell-like 0-dimensional decompositions of S^3 are 4-manifold factors, 217
SAITOH, SABUROU, The Dirichlet norm and the norm of Szegő type, 355
SHERMAN, JON, A new characterization of amenable groups, 365
SRIVASTAVA, S. M., Selection theorems for G_δ-valued multifunctions, 283
STOLTZFUS, NEAL W., Equivariant concordance of invariant knots, 1
TAM, P. K., Isometries of L_p-spaces associated with semifinite von Neumann algebras, 339
VÁGI, STEPHEN and KORÁNYI, ADAM, Rational inner functions on bounded symmetric domains, 179
WALKER, RUSSELL B., Morse and generic contact between foliations, 265
YAU, STEPHEN SHING-TOUNG, Normal two-dimensional elliptic singularities, 117
SUBMISSION OF MANUSCRIPT

Two copies of mathematical papers intended for publication in the TRANSACTIONS or the MEMOIRS should be addressed to one of the editors. Subjects, and the editors associated with them, follow:

Real analysis (excluding harmonic analysis) and applied mathematics to ROBERT T. SEELEY, Department of Mathematics, University of Massachusetts—Boston, Harbor Campus, Boston, MA 02125.

Harmonic and complex analysis to R. O. WELLS, JR., School of Mathematics, Institute for Advanced Study, Princeton, New Jersey 08540.

Abstract analysis to W. A. J. LUXEMBURG, Department of Mathematics 253–37, California Institute of Technology, Pasadena, CA 91125.

Algebra and number theory (excluding universal algebras) to MICHAEL ARTIN, Department of Mathematics, Room 2-239, Massachusetts Institute of Technology, Cambridge, MA 02139.

Logic, foundations, universal algebras and combinatorics to SOLOMON FEFERMAN, Department of Mathematics, Stanford University, Stanford, CA 94305.

Topology to JAMES D. STASHEFF, Department of Mathematics, University of North Carolina, Chapel Hill, NC 27514.

Global analysis and differential geometry to ALAN D. WEINSTEIN, Department of Mathematics, California Institute of Technology, Pasadena, California 91125.

Probability and statistics to STEVEN OREY, School of Mathematics, University of Minnesota, Minneapolis, MN 55455.

All other communications to the editors should be addressed to the Managing Editor, JAMES D. STASHEFF.

COPYING AND REPRINTING

Individual readers of this publication, and nonprofit libraries acting for them are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner’s consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc., Operations Center, P.O. Box 765, Schenectady, New York 12301. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.
