SUBMISSION OF MANUSCRIPT

Two copies of mathematical papers intended for publication in the TRANSACTIONS or the MEMOIRS should be addressed to one of the editors. Subjects, and the editors associated with them, follow:

- Real analysis (excluding harmonic analysis) and applied mathematics to PAUL H. RABINOWITZ, Department of Mathematics, University of Wisconsin, Madison, WI 53706.
- Harmonic and complex analysis to R. O. WELLS, JR., Department of Mathematics, Rice University, Houston, TX 77001.
- Abstract analysis to W. A. J. LUXEMBURG, Department of Mathematics 253–37, California Institute of Technology, Pasadena, CA 91125.
- Algebra and number theory (excluding universal algebras) to MICHAEL ARTIN, Department of Mathematics, Room 2-239, Massachusetts Institute of Technology, Cambridge, MA 02139.
- Logic, foundations, universal algebras and combinatorics to JAN MYCIELSKI, Department of Mathematics, University of Colorado, Boulder, CO 80309.
- Topology to JAMES D. STASHEFF, Department of Mathematics, University of North Carolina, Chapel Hill, NC 27514.
- Global analysis and differential geometry to ALAN D. WEINSTEIN, Department of Mathematics, University of California, Berkeley, CA 94720.
- Probability and statistics to STEVEN OREY, School of Mathematics, University of Minnesota, Minneapolis, MN 55455.

All other communications to the editors should be addressed to the Managing Editor, JAMES D. STASHEFF

COPYING AND REPRINTING

Individual readers of this publication, and nonprofit libraries acting for them are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, or for creating new collective works, or for resale.
On a relation between $\widetilde{SL}_2$ cusp forms and cusp forms on tube domains associated to orthogonal groups

By S. Rallis and G. Shiffmann ................................................................. 1

Families of real and symmetric analytic functions

By Yusuf Abu-Muhanna and Thomas H. MacGregor ................................ 59

On the prevalence of horseshoes

By Lai-Sang Young .................................................................................. 75

Nonstandard analysis and lattice statistical mechanics: A variational principle

By A. E. Hurd ........................................................................................... 89

Stationary logic and ordinals

By D. G. Seese .......................................................................................... 111

Subnormal operators, Toeplitz operators and spectral inclusion

By Gerard E. Keough ................................................................................ 125

A partition theorem for the infinite subtrees of a tree

By Keith R. Milliken .................................................................................. 137

Multivariate rearrangements and Banach function spaces with mixed norms

By A. P. Blozinski ...................................................................................... 149

Fine convergence and admissible convergence for symmetric spaces of rank one

By Adam Korányi and J. C. Taylor ........................................................... 169

On the Picard group of a continuous trace $C^*$-algebra

By Iain Raeburn ........................................................................................ 183

Holomorphic actions of $\text{Sp}(n, R)$ with noncompact isotropy groups

By Hugo Rossi ............................................................................................ 207

Robinson’s consistency theorem in soft model theory

By Daniele Mundici .................................................................................... 231

Plane models for Riemann surfaces admitting certain half-canonical linear series. II

By Robert D. M. Accola .......................................................................... 243

Monotone decompositions of $\theta_n$-continua

By E. E. Grace and Eldon J. Vought ....................................................... 261
