MEMOIRS OF THE AMERICAN MATHEMATICAL SOCIETY

This bimonthly journal is devoted to research in pure and applied mathematics of much the same nature as appears in TRANSACTIONS. An issue consists of one or more separately bound research tracts for which the author(s) has provided reproduction copy. Prior to 1975 this was published as a monograph series. The editorial committee is identical with that for the TRANSACTIONS so that papers intended for publication in this series should be addressed to one of the editors.

SUBMISSION OF MANUSCRIPT

Two copies of mathematical papers intended for publication in the TRANSACTIONS or the MEMOIRS should be addressed to one of the editors. Subjects, and the editors associated with them, follow:

Real analysis (excluding harmonic analysis) and applied mathematics to JOEL A. SMOLLER, Department of Mathematics, University of Michigan, Ann Arbor, MI 48109.

Harmonic and complex analysis to LINDA PREISS ROTHSCILD, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093.

Abstract analysis to WILLIAM B. JOHNSON, Department of Mathematics, Ohio State University, Columbus, OH 43210.

Algebra and number theory (excluding universal algebras) to LANCE W. SMALL, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093.

Logic, foundations, universal algebras and combinatorics to JAN MYCIELSKI, Department of Mathematics, University of Colorado, Boulder, CO 80309.

Topology to WALTER D. NEUMANN, Department of Mathematics, University of Maryland, College Park, MD 20742.

Global analysis and differential geometry to TILLA KLOTZ MILNOR, Department of Mathematics, Hill Center, Rutgers University, New Brunswick, NJ 08903.

Probability and statistics to DONALD L. BURKHOLDER, Department of Mathematics, University of Illinois, Urbana, IL 61801.

Combinatorics and number theory to RONALD L. GRAHAM, Mathematical Studies Department, Bell Laboratories, Murray Hill, NJ 07974.

All other communications to the editors should be addressed to the Managing Editor, R. O. WELLS, JR., Department of Mathematics, University of Colorado, Boulder, CO 80309.

COPYING AND REPRINTING

Individual readers of this publication, and nonprofit libraries acting for them are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner’s consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.
Graphs with relations, coverings and group-graded algebras
By Edward L. Green  297

Characterization of recursively enumerable sets with superset effectively isomorphic to all recursively enumerable sets
By Wolfgang Maass  311

Groups and simple languages
By Robert H. Haring-Smith  337

The slice map problem for σ-weakly closed subspaces of von Neumann algebras
By Jon Kraus  357

Hamburger-Noether expansions over rings
By Antonio Campillo  377

Group rings which are Azumaya algebras
By F. R. DeMeyer and G. J. Janusz  389

Improved Sobolev inequalities
By Robert S. Strichartz  397

Borel games and the Baire property
By Kenneth Schilling and Robert Vaught  411

Erratum to "Homotopy in functor categories"
By Alex Heller  429
CONTENTS

Vol. 279, No. 1 September 1983 Whole No. 580

On the deformation of algebra morphisms and diagrams
By M. GERSTENHABER and S. D. SCHACK ........................................ 1

Weighted iterates and variants of the Hardy-Littlewood maximal operator
By M. A. LECKBAND and C. J. NEUGEBAUER ........................................ 51

On the distribution of the principal series in $L^2(T\backslash G)$
By ROBERTO J. MIATELLO and JORGE A. VARGAS ................................. 63

Handle attaching on generic maps
By YOUN W. LEE ............................................................................. 77

Operators of $P$-variation and the evolution representation problem
By M. A. FREEDMAN .................................................................... 95

Sign-embeddings of $l^n_1$
By JOHN ELTON ........................................................................... 113

Certain reflexive sheaves on $P^n_C$ and a problem in approximation theory
By PETER F. STILLER ...................................................................... 125

Stability criteria for Volterra equations
By T. A. BURTON and W. E. MAHFoud ........................................... 143

An extension of the theory of completely decomposable torsion-free abelian groups
By FRED RICHMAN .................................................................... 175

Spherical harmonics and integral geometry on projective spaces
By ERIC L. GRINBERG .................................................................. 187

Chaotic difference equations: Generic aspects
By HANS-WILLI SIEGBERG .............................................................. 205

Elementary first integrals of differential equations
By M. J. PRELLE and M. F. SINGER ............................................... 215

Symbolic dynamics in flows on three-manifolds
By JOHN FRANKS .......................................................................... 231

On compact cohomology theories and Pontrjagin duality
By KEITH JOHNSON ....................................................................... 237

Nakayama algebras and graded trees
By B. ROHNES and S. O. SMALØ ................................................... 249

Cohomology detects failures of the axiom of choice
By ANDREAS BLASS ....................................................................... 257

Finitely additive $F$-processes
By THOMAS E. ARMSTRONG ........................................................... 271

(Continued on inside back cover)
