MEMOIRS OF THE AMERICAN MATHEMATICAL SOCIETY

This bimonthly journal is devoted to research in pure and applied mathematics of much the same nature as appears in TRANSACTIONS. An issue consists of one or more separately bound research tracts for which the author(s) has provided reproduction copy. Prior to 1975 this was published as a monograph series. The editorial committee is identical with that for the TRANSACTIONS so that papers intended for publication in this series should be addressed to one of the editors.

SUBMISSION OF MANUSCRIPT

Two copies of mathematical papers intended for publication in the TRANSACTIONS or the MEMOIRS should be addressed to one of the editors. Subjects, and the editors associated with them, follow:

Ordinary differential equations, partial differential equations and applied mathematics to JOEL A. SMOLLER, Department of Mathematics, University of Michigan, Ann Arbor, MI 48109

Complex and harmonic analysis to LINDA PREISS ROTHSCILD, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093

Abstract analysis to WILLIAM B. JOHNSON, Department of Mathematics, Ohio State University, Columbus, OH 43210

Algebra, algebraic geometry and number theory to LANCE W. SMALL, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093

Topology to WALTER D. NEUMANN, Department of Mathematics, University of Maryland, College Park, MD 20742

Global analysis and differential geometry to TILLA KLOTZ MILNOR, Department of Mathematics, University of Maryland, College Park, MD 20742

Probability and statistics to DONALD L. BURKHOLDER, Department of Mathematics, University of Illinois, Urbana, IL 61801

Combinatorics and number theory to RONALD L. GRAHAM, Mathematical Sciences Research Center, AT & T Bell Laboratories, 600 Mountain Avenue, Murray Hill, New Jersey 07974

Logic, set theory and general topology to KENNETH KUNEN, Department of Mathematics, University of Wisconsin, Madison, WI 53706

All other communications to the editors should be addressed to the Managing Editor, R. O. WELLS, JR., Department of Mathematics, University of Colorado, Boulder, CO 80309

COPYING AND REPRINTING

Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, P. O. Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.
On the Weil-Petersson metric on Teichmüller space
By A. E. Fischer and A. J. Tromba ........................................... 319
Fixed point sets of metric and nonmetric spaces
By John R. Martin and William Weiss ...................................... 337
The family approach to total cocompleteness and toposes
By Ross Street ................................................................. 355
Liouville theorems, partial regularity and Hölder continuity of weak solutions to quasilinear elliptic systems
By Michael Meier .................................................................. 371
Universal families for conull FK spaces
By A. K. Snyder ...................................................................... 389
Milnor’s invariants and the completions of link modules
By Lorenzo Traldi .................................................................... 401
Proper holomorphic mappings that must be rational
By Steven Bell ......................................................................... 425
CONTENTS

Vol. 284, No. 1  July 1984  Whole No. 590

Filters and the weak almost periodic compactification of a discrete semigroup
   By John F. Berglund and Neil Hindman........................................... 1

Sieved ultraspherical polynomials
   By Waleed Al-Salam, W. R. Allaway and Richard Askey.............. 39

Stable rank 2 reflexive sheaves on $\mathbb{P}^3$ with small $c_2$ and applications
   By Mei-Chu Chang ........................................................................... 57

Localization of equivariant cohomology rings
   By J. Duflot...................................................................................... 91

The law of exponential decay for expanding transformations of the unit interval into itself
   By M. Jabłoński.............................................................................. 107

The heat equation with a singular potential
   By Pierre Baras and Jerome A. Goldstein................................. 121

Actions of finite groups on homotopy 3-spheres
   By M. E. Feighn.............................................................................. 141

Operators with $C^*$-algebra generated by a unilateral shift
   By John B. Conway and Paul McGuire ........................................ 153

On the universal theory of classes of finite models
   By S. Tulipani................................................................................ 163

The theory of ordered abelian groups does not have the independence property
   By Y. Gurevich and P. H. Schmitt .............................................. 171

Points of continuity for semigroup actions
   By Jimmie D. Lawson................................................................. 183

Complexity of subcases of Presburger arithmetic
   By Bruno Scarpellini..................................................................... 203

Mean value properties of the Laplacian via spectral theory
   By Robert S. Strichartz............................................................... 219

Unicellular operators
   By José Barría and Kenneth R. Davidson .................................. 229

Positive-definiteness and its applications to interpolation problems for holomorphic functions
   By Frank Beatrous, Jr. and Jacob Burbea................................. 247

Moments of balanced measures on Julia sets
   By M. F. Barnsley and A. N. Harrington................................... 271

Singular Vietoris-Begle theorems for relations
   By D. G. Bourgin and Robert M. Nehs................................. 281

(Continued on inside back cover)
