INDEX TO VOLUME 288
March–April 1985

Alexander, Ralph. Lipschitzian mappings and total mean curvature of polyhedral surfaces, 661.

Barnsley, M. F., Geronimo, J. S. and Harrington, A. N. Condensed Julia sets, with an application to a fractal lattice model Hamiltonian, 537.

Bellow, A. and Losert, V. The weighted pointwise ergodic theorem and the individual ergodic theorem along subsequences, 307.

Bercovici, Hari. A reflexivity theorem for weakly closed subspaces of operators, 139.

Bloch, Ethan D. Simplexwise linear near-embeddings of a 2-disk into $\mathbb{R}^2$, 701.

Boas, Harold P. Sobolev space projections in strictly pseudoconvex domains, 227.

Boe, Brian D. Homomorphisms between generalized Verma modules, 791.

Bowers, Philip L. General position properties satisfied by finite products of dendrites, 739.

Brookes, Christopher J. B. and Brown, Kenneth A. Primitive group rings and Noetherian rings of quotients, 605.

Brown, Kenneth A. See Brookes, Christopher J. B.

do Carmo, Manfredo, Dajczer, Marcos and Mercuri, Francesco. Compact conformally flat hypersurfaces, 189.

Chipot, Michel and Sideris, Thomas. An upper bound for the waiting time for nonlinear degenerate parabolic equations, 423.

Dadok, Jiri. Polar coordinates induced by actions of compact Lie groups, 125.

Dajczer, Marcos. See do Carmo, Manfredo.

Daverman, R. J. and Walsh, J. J. Decompositions into codimension-two manifolds, 273.

Dorfmeister, Josef. Simply transitive groups and Kähler structures on homogeneous Siegel domains, 293.

Droste, Manfred. Cubes of conjugacy classes covering the infinite symmetric group, 381.

Feeman, Timothy G. Best approximation and quasitriangular algebras, 179.

Fouché, Willem. A reciprocity law for polynomials with Bernoulli coefficients, 59.

Freese, Ralph and Nation, J. B. Covers in free lattices, 1.

Goulden, I. P. A bijective proof of Stanley's shuffling theorem, 147.

Graham, R. L. and Winkler, P. M. On isometric embeddings of graphs, 527.

Groenew, John R. A relation between invariant means on Lie groups and invariant means on their discrete subgroups, 813.

Harrington, A. N. See Barnsley, M. F.

Harris, Gary A. Lowest order invariants for real-analytic surfaces in $\mathbb{C}^2$, 413.

Haskell, Peter. Index theory on curves, 591.

Hilgert, Joachim and Hofmann, Karl H. Semigroups in Lie groups, semialgebras in Lie algebras, 481.

Hill, Paul. On the structure of abelian p-groups, 505.

Hofmann, Karl H. See Hilgert, Joachim.

Ioffe, A. D. Erratum to “Approximate subdifferentials and applications”, 429.

Isen, Steven. Regularization of $L^2$ norms of Lagrangian distributions, 363.

Labute, John P. The determination of the Lie algebra associated to the lower central series of a group, 51.

Liem, Vo Thanh. On infinite deficiency in $\mathbb{R}^n$-manifolds, 205.

Losert, V. See Bellow, A.

MEMOIRS OF THE AMERICAN MATHEMATICAL SOCIETY

This bimonthly journal is devoted to research in pure and applied mathematics of much the same nature as appears in TRANSACTIONS. An issue consists of one or more separately bound research tracts for which the author(s) has provided reproduction copy. Prior to 1975 this was published as a monograph series. The editorial committee is identical with that for the TRANSACTIONS so that papers intended for publication in this series should be addressed to one of the editors.

SUBMISSION OF MANUSCRIPT

Two copies of mathematical papers intended for publication in the TRANSACTIONS or the MEMOIRS should be addressed to one of the editors. Subjects, and the editors associated with them, follow.

Ordinary differential equations, partial differential equations and applied mathematics to JOEL A. SMOLLER, Department of Mathematics, University of Michigan, Ann Arbor, MI 48109

Complex and harmonic analysis to LINDA PREISS ROTHSCCHILD, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093

Abstract analysis to WILLIAM B. JOHNSON, Department of Mathematics, Texas A & M University, College Station, TX 77843-3368

Classical analysis to PETER W. JONES, Department of Mathematics, University of Chicago, Chicago, IL 60637

Algebra, algebraic geometry and number theory to LANCE W. SMALL, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093

Topology to WALTER D. NEUMANN, Mathematical Sciences Research Institute, 2223 Fulton Street, Berkeley, CA 94720

Global analysis and differential geometry to TILLA KLOTZ MILNOR, Department of Mathematics, Hill Center, Rutgers University, New Brunswick, NJ 08903

Probability and statistics to DONALD L. BURKHOLDER, Department of Mathematics, University of Illinois, Urbana, IL 61801

Combinatorics and number theory to RONALD L. GRAHAM, Mathematical Sciences Research Center, AT & T Bell Laboratories, 600 Mountain Avenue, Murray Hill, NJ 07974

Logic, set theory and general topology to KENNETH KUNEN, Department of Mathematics, University of Wisconsin, Madison, WI 53706

All other communications to the editors should be addressed to the Managing Editor, R. O. WELLS, JR., Department of Mathematics, Rice University, Houston, TX 77251

COPYING AND REPRINTING

Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, P. O. Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner’s consent for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.

CONTENTS

Vol. 288, No. 2        April 1985        Whole No. 599

Analysis on analytic spaces and non-self-dual Young-Mills fields
By N. P. BUCHDAHL .......................................................... 431

No $L_1$-contractive metrics for systems of conservation laws
By Blake Temple ................................................................. 471

Semigroups in Lie groups, semialgebras in Lie algebras
By Joachim Hilgert and Karl H. Hofmann .................................. 481

On the structure of abelian $p$-groups
By Paul Hill ................................................................. 505

On isometric embeddings of graphs
By R. L. Graham and P. M. Winkler ..................................... 527

Condensed Julia sets, with an application to a fractal lattice model Hamiltonian
By M. F. Barnsley, J. S. Geronimo and A. N. Harrington ............ 537

Grade schemes and grade functions
By Stephen McAdam .......................................................... 563

Index theory on curves
By Peter Haskell .................................................................. 591

Primitive group rings and Noetherian rings of quotients
By Christopher J. B. Brookes and Kenneth A. Brown ................. 605

Some remarks on the intrinsic measures of Eisenman
By Ian Graham and H. Wu ................................................... 625

Lipschitzian mappings and total mean curvature of polyhedral surfaces. I
By Ralph Alexander ........................................................... 661

Packing measure, and its evaluation for a Brownian path
By S. James Taylor and Claude Tricot .................................... 679

Simplexwise linear near-embeddings of a 2-disk into $R^2$
By Ethan D. Bloch ............................................................. 701

Strictly convex simplexwise linear embeddings of a 2-disk
By Ethan D. Bloch ............................................................. 723

General position properties satisfied by finite products of dendrites
By Philip L. Bowers ........................................................... 739

Varieties of automorphism groups of orders
By W. Charles Holland ....................................................... 755

Helical minimal immersions of compact Riemannian manifolds into a unit sphere
By Kunio Sakamoto .......................................................... 765

(Continued on inside back cover)
