VOLUME 290 · JULY–AUGUST · 1985

Providence, Rhode Island, USA
ISSN 0002–9947
MEMOIRS OF THE AMERICAN MATHEMATICAL SOCIETY

This bimonthly journal is devoted to research in pure and applied mathematics of much the same nature as appears in TRANSACTIONS. An issue consists of one or more separately bound research tracts for which the author(s) has provided reproduction copy. Prior to 1975 this was published as a monograph series. The editorial committee is identical with that for the TRANSACTIONS so that papers intended for publication in this series should be addressed to one of the editors.

SUBMISSION OF MANUSCRIPT

Two copies of mathematical papers intended for publication in the TRANSACTIONS or the MEMOIRS should be addressed to one of the editors. Subjects, and the editors associated with them, follow.

Ordinary differential equations, partial differential equations and applied mathematics to JOEL A. SMOLLER, Department of Mathematics, University of Michigan, Ann Arbor, MI 48109.

Complex and harmonic analysis to LINDA PREISS ROTHSCCHILD, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093

Abstract, analysis to WILLIAM B. JOHNSON, Department of Mathematics, Texas A & M University, College Station, TX 77843-3368

Classical analysis to PETER W. JONES, Department of Mathematics, Yale University, Box 2155 Yale Station, New Haven, CN 06520

Algebra, algebraic geometry and number theory to LANCE W. SMALL, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093

Topology to WALTER D. NEUMANN, Mathematical Sciences Research Institute, 2223 Fulton Street, Berkeley, CA 94720

Global analysis and differential geometry to TILLA KLOTZ MILNOR, Department of Mathematics, Hill Center, Rutgers University, New Brunswick, NJ 08903

Probability and statistics to DONALD L. BURKHOLDER, Department of Mathematics, University of Illinois, Urbana, IL 61801

Combinatorics and number theory to RONALD L. GRAHAM, Mathematical Sciences Research Center, AT & T Bell Laboratories, 600 Mountain Avenue, Murray Hill, NJ 07974

Logic, set theory and general topology to KENNETH KUNEN, Department of Mathematics, University of Wisconsin, Madison, WI 53706

All other communications to the editors should be addressed to the Managing Editor, R. O. WELLS, JR., Department of Mathematics, Rice University, Houston, TX 77251

COPYING AND REPRINTING

Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, P. O. Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.
Strongly pure subgroups of separable torsion-free abelian groups
  By Loyiso G. Nongxa ................................................................. 363

Harmonic functions on semidirect extensions of type $H$ nilpotent groups
  By Ewa Damek ............................................................................. 375

Degree theory on oriented infinite dimensional varieties and the Morse number of minimal surfaces spanning a curve in $R^n$. Part I: $n \geq 4$
  By A. J. Tromba ........................................................................... 385

Spectral properties of elementary operators. II
  By Lawrence A. Fialkow .................................................................. 415
CONTENTS

Vol. 290, No. 1    July 1985    Whole No. 602

Homogeneous Borel sets of ambiguous class two
By Fons van Engelen .................................................. 1

Regular cardinals in models of ZF
By Moti Gitik ............................................................ 41

Free lattice-ordered groups represented as \(\sigma\)-2-transitive \(l\)-permutation groups
By Stephen H. McCleary .............................................. 69

An even better representation for free lattice-ordered groups
By Stephen H. McCleary .............................................. 81

Subspaces of \(BMO(\mathbb{R}^n)\)
By Michael Frazier ..................................................... 101

A proof of Andrews' \(q\)-Dyson conjecture for \(n = 4\)
By Kevin W. J. Kadell .................................................. 127

Good and OK ultrafilters
By Alan Dow ............................................................... 145

On twisted lifting
By Yuval Z. Flicker ..................................................... 161

On the relative consistency strength of determinacy hypotheses
By Alexander S. Kechris and Robert M. Solovay .................. 179

Bifurcation from a heteroclinic solution in differential delay equations
By Hans-Otto Walther .................................................. 213

Unitary structures on cohomology
By C. M. Patton and H. Rossi ....................................... 235

Minimal surfaces of constant curvature in \(S^n\)
By Robert L. Bryant .................................................... 259

On the boundary behaviour of generalized Poisson integrals on symmetric spaces
By Henrik Schlichtkrull ................................................. 273

Analytic uniformly bounded representations of \(SU(1, n + 1)\)
By Ronald J. Stanke .................................................... 281

Absolutely continuous invariant measures that are maximal
By W. Byers and A. Boyarsky ......................................... 303

On the decomposition numbers of the finite general linear groups
By Richard Dipper ........................................................ 315

Existence of weak solutions to stochastic differential equations in the plane with continuous coefficients
By J. Yeh ................................................................. 345
