MEMOIRS OF THE AMERICAN MATHEMATICAL SOCIETY

This bimonthly journal is devoted to research in pure and applied mathematics of much the same nature as appears in TRANSACTIONS. An issue consists of one or more separately bound research tracts for which the author(s) has provided reproduction copy. Prior to 1975 this was published as a monograph series. The editorial committee is identical with that for the TRANSACTIONS so that papers intended for publication in this series should be addressed to one of the editors.

SUBMISSION OF MANUSCRIPT

Two copies of mathematical papers intended for publication in the TRANSACTIONS or the MEMOIRS should be addressed to one of the editors. Subjects, and the editors associated with them, follow.

Ordinary differential equations, partial differential equations and applied mathematics to JOEL A. SMOLLER, Department of Mathematics, University of Michigan, Ann Arbor, MI 48109.

Complex and harmonic analysis to LINDA PREISS ROTHSCILD, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093

Abstract, analysis to WILLIAM B. JOHNSON, Department of Mathematics, Texas A & M University, College Station, TX 77843-3368

Classical analysis to PETER W. JONES, Department of Mathematics, Yale University, Box 2155 Yale Station, New Haven, CN 06520

Algebra, algebraic geometry and number theory to LANCE W. SMALL, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093

Topology to WALTER D. NEUMANN, Mathematical Sciences Research Institute, 2223 Fulton Street, Berkeley, CA 94720

Global analysis and differential geometry to TILLA KLOTZ MILNOR, Department of Mathematics, Hill Center, Rutgers University, New Brunswick, NJ 08903

Probability and statistics to DONALD L. BURKHOLDER, Department of Mathematics, University of Illinois, Urbana, IL 61801

Combinatorics and number theory to RONALD L. GRAHAM, Mathematical Sciences Research Center, AT & T Bell Laboratories, 600 Mountain Avenue, Murray Hill, NJ 07974

Logic, set theory and general topology to KENNETH KUNEN, Department of Mathematics, University of Wisconsin, Madison, WI 53706

All other communications to the editors should be addressed to the Managing Editor, R. O. WELLS, JR., Department of Mathematics, Rice University, Houston, TX 77251

COPYING AND REPRINTING

Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, P. O. Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner’s consent for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.
On monomial algebras of finite global dimension
   By David J. Anick .......................................................... 291
Uniqueness for a forward backward diffusion equation
   By Alan V. Lair............................................................... 311
On nonlinear scalar Volterra integral equations. I
   By Hans Engler ............................................................. 319
The degrees of r.e. sets without the universal splitting property
   By R. G. Downey ............................................................ 337
Remarks on the stability of shock profiles for conservation laws with dissipation
   By Robert L. Pego .......................................................... 353
Divisions of space by parallels
   By G. L. Alexanderson and John E. Wetzel.............................. 363
Correction to “Vanishing theorems and Kählerity for strongly pseudoconvex manifolds”
   By Vo Van Tan ............................................................. 379
Erratum to “Fine and parabolic limits for solutions of second-order linear parabolic equations on an infinite slab”
   By Bernard Mair ............................................................ 381
CONTENTS

Vol. 291, No. 1  September 1985  Whole No. 604

Connected simple systems and the Conley index of isolated invariant sets
By Dietmar Salamon ...................................................... 1

Subellipticity of the $\bar{\partial}$-Neumann problem on nonpseudoconvex domains
By Lop-hing Ho .......................................................... 43

On Lipschitz homogeneity of the Hilbert cube
By Aarno Hohti ............................................................ 75

Small zeros of quadratic forms
By Wolfgang M. Schmidt ................................................... 87

The traction problem for incompressible materials
By Y. H. Wan ............................................................... 103

Descriptive complexity of function spaces
By J. van Mill, D. Lutzer and R. Pol ................................ 121*

Propagation estimates for Schrödinger-type operators
By Arne Jensen ............................................................. 129

The Cauchy problem for $u_t = \Delta u^m$ when $0 < m < 1$
By Miguel A. Herrero and Michel Pierre .............................. 145

Probabilistic square functions and a priori estimates
By Andrew G. Bennett ................................................... 159

Symmetric positive systems with boundary characteristic of constant multiplicity
By Jeffrey Rauch ........................................................ 167

Baire sets of $k$-parameter words are Ramsey
By Hans Jürgen Promel and Bernd Voigt .............................. 189

Constant term identities extending the $q$-Dyson theorem
By D. M. Bressoud and I. P. Goulden ................................ 203

Hyponormal operators quasisimilar to an isometry
By Pei Yuan Wu .......................................................... 229

Entropy and knots
By John Franks and R. F. Williams .................................. 241

Global solvability and regularity for $\bar{\partial}$ on an annulus between two weakly pseudo-convex domains
By Mei-Chi Shaw ......................................................... 255

Cobordism of $(k)$-framed manifolds
By E. Micha ............................................................... 269

The homotopy theory of cyclic sets
By W. G. Dwyer, M. J. Hopkins and D. M. Kan ..................... 281

(Continued on inside back cover)
