THIS JOURNAL is devoted entirely to research in pure and applied mathematics, and includes, in general, longer papers than those in the PROCEEDINGS.

PREPARATION OF THE MANUSCRIPT. All papers should be typewritten double-spaced, and two copies should be sent to the appropriate editor. The author should keep a complete copy.

FORM OF MANUSCRIPT. The first page should consist of a descriptive title, followed by an abstract which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The descriptive title should be short, but informative; useless or vague phrases such as “Some remarks about” or “concerning” should be avoided. Also avoid proper names unless mathematical usage associates them with the work. The abstract should be at least one complete sentence, and at most 300 words, with the upper limit primarily for longer papers. Included with the footnotes to your paper, but placed before the first footnote, there should be first the 1980 Mathematics Subject Classification (1985 Revision) representing the primary and secondary subjects of the article, which may be followed by a list of key words and phrases describing the subject matter of the article and taken from it. A list of the numbers may be found in the annual subject index of Mathematical Reviews, published with the December issue starting in 1984.

SUBMISSION OF MANUSCRIPT. See the back of this journal.

COPYRIGHT TRANSFER AGREEMENT. The signing of a Copyright Transfer Agreement is a requirement for publication.

GALLEY PROOF. When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate on the original manuscript which of them should receive galley proof in the event that the manuscript is accepted for publication.

PUBLICATION CHARGES. The research journals of the American Mathematical Society carry a page charge of $50.00 per page to help defray the cost of publication. The amount is charged to the institution or to a contract supporting the research reported in the published paper. The publication charge policy of the United States Federal Council for Science and Technology (FCST) is reported on page 112 of the February, 1975 issue of the NOTICES of the American Mathematical Society. In no case is the author personally responsible for paying the page charge, nor is acceptance of his paper for publication dependent upon payment of the page charge.

BACKLOG. 100 pages. Two-thirds of the papers currently being accepted by the editors will be published in 10–12 months.

SUBSCRIPTION INFORMATION. TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY is published monthly. Subscription prices for Volumes 299–304 (1987) are $643.00 list; $514.00 institutional member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of $25.00; subscribers in India must pay a postage surcharge of $48.00.

BACK NUMBER INFORMATION. Back number prices per volume are: for Volumes 78–280, $96.00 list, $77.00 institutional members; for Volumes 281–286, $111 list, $89 institutional members; for Volumes 287–292, $135 list, $108 institutional members; for Volumes 293–298, $150 list, $120 institutional members. Volumes 1–77 may be ordered from Johnson Reprint Corporation, 111 Fifth Avenue, New York, New York 10003. Volumes 1–298 may be purchased on microfilm or microfiche from University Microfilms International, 300 North Zeeb Road, Ann Arbor, Michigan 48106.
INDEX TO VOLUME 299
January–February 1987

Benilan, Philippe and Vazquez, Juan Luis.  *Concavity of solutions of the porous medium equation*, 81.

Benzinger, Harold E.  *Nonharmonic Fourier series and spectral theory*, 245.

Britten, D. J. and Lemire, F. W.  *A classification of simple Lie modules having a 1-dimensional weight space*, 683.

Datskovsky, Boris A.  *The adelic zeta function associated with the space of binary cubic forms with coefficients in a function field*, 719.

Dutta, Sankar P.  *On the canonical element conjecture*, 803.

Eizenbud, A. and Lichtman, A. I.  *On embedding of group rings of residually torsion free nilpotent groups into skew fields*, 373.

Elliott, P. D. T. A.  *Persistence of form and the value group of reducible cubics*, 133.

Fraenkel, L. E.  *See Amick, C. J.*

Hebda, James J.  *Parallel translation of curvature along geodesics*, 559.

Jackson, D. M.  *Counting cycles in permutations by group characters, with an application to a topological problem*, 785.

Johnston, Bernard.  *A finiteness condition on regular local overrings of a local domain*, 513.

Kaper, Hans G. and Spellman, Beth E.  *Best constants in norm inequalities for the difference operator*, 351.

Lemire, F. W.  *See Britten, D. J*

Lichtman, A. I.  *See Eizenbud, A*

McLeod, J. B.  *The asymptotic behavior near the crest of waves of extreme form*, 299.

Makkai, M. and Pitts, A. M.  *Some results on locally finitely presentable categories*, 473.

Miró-Roig, Rosa M. Some moduli spaces for rank 2 stable reflexive sheaves on $\mathbb{P}^3$, 699.
Mitchell, W. Applications of the covering lemma for sequences of measures, 41.
Nakazi, Takahiko. Norms of Hankel operators and uniform algebras, 573.
Peters, Justin. On inductive limits of matrix algebras of holomorphic functions, 303.
Phillips, J. See Landstad, M. B
Pitts, A. M. See Makkai, M
Raeburn, I. See Landstad, M. B
Ralph, William J. Category and group rings in homotopy theory, 205.
Rosenberg, Steven. The variation of the de Rham zeta function, 535.
Rosenoer, Shlomo. Completely reducible operators that commute with compact operators, 33.
Rothstein, Mitchell J. Integration on noncompact supermanifolds, 387.
Sakai, Makoto. Isoperimetric inequalities for the least harmonic majorant of $|x|^p$, 431.
Schober, G. See Hengartner, W
Serrin, James. See Pucci, Patrizia
Sheh, Saharon. See Hajnal, Andras
Simon, Petr. A closed separable subspace of $\beta N$ which is not a retract, 641.
Spellman, Beth E. See Kaper, Hans G
Stafford, J. T. Endomorphisms of right ideals of the Weyl algebra, 623.
Stembridge, John R. First layer formulas for characters of $SL(n, C)$, 319.
Sutherland, C. E. See Landstad, M. B
Väisälä, Jussi. Porous sets and quasisymmetric maps, 525.
Vazquez, Juan Luis. See Benilan, Philippe
Wittmann, Rainer. Application of a theorem of M. G. Krein to singular integrals, 581.
MEMOIRS OF THE AMERICAN MATHEMATICAL SOCIETY

This bimonthly journal is devoted to research in pure and applied mathematics of much the same nature as appears in TRANSACTIONS. An issue consists of one or more separately bound research tracts for which the author(s) has provided reproduction copy. Prior to 1975 this was published as a monograph series. The editorial committee is identical with that for the TRANSACTIONS so that papers intended for publication in this series should be addressed to one of the editors.

SUBMISSION OF MANUSCRIPT

Two copies of mathematical papers intended for publication in the TRANSACTIONS or the MEMOIRS should be addressed to one of the editors. Subjects, and the editors associated with them, follow.

Ordinary differential equations, partial differential equations, and applied mathematics to JOEL A. SMOLLER, Department of Mathematics, University of Michigan, Ann Arbor, MI 48109.

Complex and harmonic analysis to ROBERT J. ZIMMER, Department of Mathematics, University of Chicago, Chicago, IL 60637.

Classical analysis to PETER W. JONES, Department of Mathematics, Box 2155 Yale Station, Yale University, New Haven, CT 06520.

Algebra, algebraic geometry, and number theory to DAVID J. SALTMAN, Department of Mathematics, University of Texas at Austin, Austin, TX 78713.

Geometric topology and general topology to ROBERT D. EDWARDS, Department of Mathematics, University of California, Los Angeles, CA 90024.

Algebraic topology and differential topology to RALPH COHEN, Department of Mathematics, Stanford University, Stanford, CA 94305.

Global analysis and differential geometry to JERRY L. KAZDAN, Department of Mathematics, University of Pennsylvania, E1, Philadelphia, PA 19104-6395.

Probability and statistics to RONALD K. GETOOR, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093.

Combinatorics and number theory to RONALD L. GRAHAM, Mathematical Sciences Research Center, AT&T Bell Laboratories, 600 Mountain Avenue, Murray Hill, NJ 07974.

Logic, set theory, and general topology to KENNETH KUNEN, Department of Mathematics, University of Wisconsin, Madison, WI 53706.

All other communications to the editors should be addressed to the Managing Editor, LANCE W. SMALL, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093.

COPYING AND REPRINTING

Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews, provided the customary acknowledgment of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale.
