MEMOIRS OF THE AMERICAN MATHEMATICAL SOCIETY

This bimonthly journal is devoted to research in pure and applied mathematics of much the same nature as appears in TRANSACTIONS. An issue consists of one or more separately bound research tracts for which the author(s) has provided reproduction copy. Prior to 1975 this was published as a monograph series. The editorial committee is identical with that for the TRANSACTIONS so that papers intended for publication in this series should be addressed to one of the editors.

SUBMISSION OF MANUSCRIPT

Two copies of mathematical papers intended for publication in the TRANSACTIONS or the MEMOIRS should be addressed to one of the editors. Subjects, and the editors associated with them, follow.

Harmonic analysis, representation theory, and Lie theory to AVNER D. ASH, Department of Pure Mathematics and Mathematical Statistics, University of Cambridge, 16 Mill Lane, Cambridge, CB2 1SB, England

Abstract analysis to MASAMICHI TAKESAKI, Department of Mathematics, University of California, Los Angeles, CA 90024

Classical analysis (including complex, real, and harmonic) to EUGENE FABES, Department of Mathematics, University of Minnesota, Minneapolis, MN 55455

Algebra and algebraic geometry to JUDITH D. SALLY, Department of Mathematics, Northwestern University, Evanston, IL 60208

Geometric topology and general topology to JAMES W. CANNON, Department of Mathematics, Brigham Young University, Provo, UT 84602

Algebraic topology and differential topology to RALPH COHEN, Department of Mathematics, Stanford University, Stanford, CA 94305

Ordinary differential equations, partial differential equations, and applied mathematics to ROGER D. NUSSBAUM, Department of Mathematics, Rutgers University, New Brunswick, NJ 08903

Global analysis and differential geometry to JERRY L. KAZDAN, Department of Mathematics, University of Pennsylvania, E1, Philadelphia, PA 19104-6395

Probability and statistics to BURGESS DAVIS, Department of Mathematics and Statistics, Purdue University, West Lafayette, IN 47907

Combinatorics and number theory to CARL POMERANCE, Department of Mathematics, University of Georgia, Athens, GA 30602

Logic, set theory, general topology, and universal algebra to JAMES E. BAUMGARTNER, Department of Mathematics, Dartmouth College, Hanover, NH 03750

Algebra, analytic number theory, and modular forms to AUDREY TERRAS, Department of Mathematics, University of California at San Diego, La Jolla, CA 92039

All other communications to the editors should be addressed to the Managing Editor, DAVID J. SALTMAN, Department of Mathematics, University of Texas at Austin, Austin, TX 78713

COPYING AND REPRINTING

Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews, provided the customary acknowledgment of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940-6248.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to the Copyright Clearance Center, Inc., 27 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale.
# TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY

## CONTENTS

Vol. 317, No. 1    January 1990    Whole No. 656

Application of the generalized Weierstrass preparation theorem to the study of homogeneous ideals  
By Mutsumi Amasaki ............................................. 1

Invariant tori for the billiard ball map  
By Valery Kovachev and Georgi Popov ......................... 45

Replacing homotopy actions by topological actions. II  
By Larry Smith .................................................. 83

Representing sets of ordinals as countable unions of sets in the core model  
By Menachem Magidor .......................................... 91

Laws of trigonometry on $SU(3)$  
By Helmer Aslaksen ............................................ 127

Topological equivalence of foliations of homogeneous spaces  
By Dave Witte ................................................... 143

Rapidly decreasing functions in reduced $C^*$-algebras of groups  
By Paul Jolissaint ............................................. 167

The number of solutions of norm form equations  
By Wolfgang M. Schmidt ....................................... 197

Almost periodic operators in $VN(G)$  
By Ching Chou .................................................. 229

Complex interpolation of normed and quasinormed spaces in several dimensions. II. Properties of harmonic interpolation  
By Zbigniew Slodkowski ....................................... 255

Extensions of valuation rings in central simple algebras  
By H. H. Brungs and J. Gräter ................................ 287

A fixed point theorem for weakly chainable plane continua  
By Piotr Minc ................................................... 303

Zero integrals on circles and characterizations of harmonic and analytic functions  
By Josip Globevnik ............................................. 313

Eventual finite order generation for the kernel of the dimension group representation  
By J. B. Wagoner ................................................ 331

Extending $H^p$ functions from subvarieties to real ellipsoids  
By Kenzô Adachi ............................................... 351

 Centers of generic Hecke algebras  
By Lenney K. Jones ............................................. 361

Topological spaces whose Baire measure admits a regular Borel extension  
By Haruto Ohta and Ken-ichi Tamano ......................... 393
