MEMOIRS OF THE AMERICAN MATHEMATICAL SOCIETY

This bimonthly journal is devoted to research in pure and applied mathematics of much the same nature as appears in TRANSACTIONS. An issue consists of one or more separately bound research tracts for which the author(s) has provided reproduction copy. Prior to 1975 this was published as a monograph series. The editorial committee is identical with that for the TRANSACTIONS so that papers intended for publication in this series should be addressed to one of the editors.

SUBMISSION OF MANUSCRIPT

Two copies of mathematical papers intended for publication in the TRANSACTIONS or the MEMOIRS should be addressed to one of the editors. Subjects, and the editors associated with them, follow.

Harmonic analysis, representation theory, and Lie theory to AVNER D. ASH, Department of Mathematics, The Ohio State University, 231 West 18th Avenue, Columbus, OH 43210

Abstract analysis to MASAMICHI TAKESAKI, Department of Mathematics, University of California, Los Angeles, CA 90024

Classical analysis (including complex, real, and harmonic) to EUGENE FABES, Department of Mathematics, University of Minnesota, Minneapolis, MN 55455

Algebra and algebraic geometry to JUDITH D. SALLY, Department of Mathematics, Northwestern University, Evanston, IL 60208

Geometric topology and general topology to JAMES W. CANNON, Department of Mathematics, Brigham Young University, Provo, UT 84602

Algebraic topology and differential topology to RALPH COHEN, Department of Mathematics, Stanford University, Stanford, CA 94305

Ordinary differential equations, partial differential equations, and applied mathematics to ROGER D. NUSSBAUM, Department of Mathematics, Rutgers University, New Brunswick, NJ 08903

Global analysis and differential geometry to JERRY L. KAZDAN, Department of Mathematics, University of Pennsylvania, E1, Philadelphia, PA 19104-6395

Probability and statistics to BURGESS DAVIS, Departments of Mathematics and Statistics, Purdue University, West Lafayette, IN 47907

Combinatorics and number theory to CARL POMERANCE, Department of Mathematics, University of Georgia, Athens, GA 30602

Logic, set theory, general topology, and universal algebra to JAMES E. BAUMGARTNER, Department of Mathematics, Dartmouth College, Hanover, NH 37550

Algebraic number theory, analytic number theory, and modular forms to AUDREY TERRAS, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093

All other communications to the editors should be addressed to the Managing Editor, DAVID J. SALTMAN, Department of Mathematics, University of Texas at Austin, Austin, TX 78713

COPYING AND REPRINTING

Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews, provided the customary acknowledgment of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940-6248.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to the Copyright Clearance Center, Inc., 27 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale.

Continuous spatial semigroups of $\ast$-endomorphisms of $\mathcal{B}(\mathcal{H})$

By ROBERT T. POWERS and GEOFFREY PRICE .................. 347

Jacobi polynomials as generalized Faber polynomials

By AHMED I. ZAYED .............................................. 363

The nonstandard treatment of Hilbert's fifth problem

By JORAM HIRSCHFELD ........................................ 379

Generalized local Fatou theorems and area integrals

By B. A. MAIR, STAN PHILIPP and DAVID SINGMAN .............. 401

Erratum to "Weighted norm inequalities for the continuous square function"

By J. M. WILSON ................................................. 415
TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY

CONTENTS

Vol. 321, No. 1  September 1990  Whole No. 664

Abstract functional differential equations and reaction-diffusion systems
By R. H. Martin, Jr. and H. L. Smith .............................................. 1

The 27-dimensional module for $E_6$, III
By Michael Aschbacher ................................................................. 45

On Gelfand pairs associated with solvable Lie groups
By Chal Benson, Joe Jenkins and Gail Ratcliff ............................. 85

On the existence of central sequences in subfactors
By Dietmar H. Bisch ...................................................................... 117

On the bihomogeneity problem of Knaster
By Krystyna Kuperberg ................................................................. 129

Iterated spinning and homology spheres
By Alexander I. Suciu ..................................................................... 145

Identities on quadratic Gauss sums
By Paul Gérardin and Wen-Ch'ing Winnie Li ................................. 159

The Jacobian module of a Lie algebra
By J. P. Brennan, M. V. Pinto and W. V. Vasconcelos ............. 183

Dichromatic link invariants
By Jim Hoste and Mark E. Kidwell ............................................... 197

Composite ribbon number one knots have two-bridge summands
By Steven A. Bleiler and Mario Eudave-Muñoz ............................ 231

Gelfer functions, integral means, bounded mean oscillation, and univalency
By Shinji Yamashita ...................................................................... 245

Nonmonomial characters and Artin's conjecture
By Richard Foote .......................................................................... 261

Isometric isomorphisms between Banach algebras related to locally compact groups
By F. Ghahramani, A. T. Lau and V. Losert ................................. 273

Maximal polynomials and the Ilieff-Sendov conjecture
By Michael J. Miller ...................................................................... 285

Complex interpolation for normed and quasi-normed spaces in several dimensions. III. Regularity results for harmonic interpolation
By Zbigniew Slodkowski ............................................................... 305

Weakly almost periodic functions and thin sets in discrete groups
By Ching Chou ............................................................................. 333
