TRANSACTIONS
OF THE
AMERICAN MATHEMATICAL SOCIETY

EDITED BY
Avner D. Ash
James E. Baumgartner
James W. Cannon
Sun-Yung A. Chang
Ralph Cohen
Burgess Davis
Eugene Fabes
Jerry L. Kazdan
Roger D. Nussbaum
Carl Pomerance
Judith D. Sally
David J. Saltman, Managing Editor
Masamichi Takesaki
Audrey Terras

PROVIDENCE, RHODE ISLAND USA
ISSN 0002-9947
THIS JOURNAL is devoted entirely to research in pure and applied mathematics, and includes, in general, longer papers than those in the PROCEEDINGS. Papers should be at least 16 typed pages in length.

PREPARATION OF THE MANUSCRIPT. All papers should be typewritten double-spaced, and two copies should be sent to the appropriate editor. The author should keep a complete copy. To encourage the submission of manuscripts in electronic form using \TeX\ and the \AMS-\TeX\ macro package, the Executive Committee of the Council has adopted a policy that allows for accelerating the publication date of such manuscripts by as much as 20 weeks, which is approximately equal to the time normally needed by the Society for copyediting, typesetting, and proofreading an average manuscript.

FORM OF MANUSCRIPT. The first page should consist of a descriptive title, followed by an abstract which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The descriptive title should be short, but informative; useless or vague phrases such as “Some remarks about” or “concerning” should be avoided. Also avoid proper names unless mathematical usage associates them with the work. The abstract should be at least one complete sentence, and at most 300 words, with the upper limit primarily for longer papers. Included with the footnotes to your paper, but placed before the first footnote, there should be first the 1991 Mathematics Subject Classification representing the primary and secondary subjects of the article, which may be followed by a list of key words and phrases describing the subject matter of the article and taken from it. A list of the numbers may be found in the annual subject index of Mathematical Reviews, published with the December issue starting in 1990.

SUBMISSION OF MANUSCRIPT. See the back of this journal.

COPYRIGHT TRANSFER AGREEMENT. The signing of a Copyright Transfer Agreement is a requirement for publication.

GALLEY PROOF. When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate on the original manuscript which of them should receive galley proof in the event that the manuscript is accepted for publication.

BACKLOG. 100 pages. Two-thirds of the papers currently being accepted by the editors will be published in 18 months.

SUBSCRIPTION INFORMATION. TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY is published monthly. Subscription prices for Volumes 323–328 (1991) are $780 list; $624 institutional member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of $27; subscribers in India must pay a postage surcharge of $50. Expedited delivery to destinations in North America $35; elsewhere $127.

BACK NUMBER INFORMATION. Back number prices per volume are: for Volumes 78–280, $108 list, $86 institutional members; for Volumes 281–286, $125 list, $100 institutional members; for Volumes 287–292, $153 list, $122 institutional members; for Volumes 293–298, $170 list, $136 institutional members; for Volumes 299–304, $182 list, $146 institutional members; for Volumes 305–310, $186 list, $149 institutional members; for Volumes 311–316, $188 list, $150 institutional members; for Volumes 317–322, $179 list, $143 institutional members. Volumes 1–77 may be ordered from Johnson Reprint Corporation, 111 Fifth Avenue, New York, New York 10003. Back numbers may be purchased on microfilm or microfiche from University Microfilms International, 300 North Zeeb Road, Ann Arbor, Michigan 48106.

Subscriptions and orders for publications of the American Mathematical Society should be addressed to American Mathematical Society, P. O. Box 1571, Annex Station, Providence, R. I. 02901-1571. All orders must be accompanied by payment. Other correspondence should be addressed to P. O. Box 6248, Providence, R. I. 02940-6248.

TRANSACTIONS of the American Mathematical Society is published monthly by the American Mathematical Society at 201 Charles Street, Providence, R. I. 02904-2213. Second-class postage is paid at Providence, Rhode Island. Postmaster: Send address changes to TRANSACTIONS, American Mathematical Society, P. O. Box 6248, Providence, R. I. 02940-6248.

MEMOIRS OF THE AMERICAN MATHEMATICAL SOCIETY

This bimonthly journal is devoted to research in pure and applied mathematics of much the same nature as appears in TRANSACTIONS. An issue consists of one or more separately bound research tracts for which the author(s) has provided reproduction copy. Prior to 1975 this was published as a monograph series. The editorial committee is identical with that for the TRANSACTIONS so that papers intended for publication in this series should be addressed to one of the editors.

SUBMISSION OF MANUSCRIPT

Two copies of mathematical papers intended for publication in the TRANSACTIONS or the MEMOIRS should be addressed to one of the editors. Subjects, and the editors associated with them, follow.

Harmonic analysis, representation theory, and Lie theory to AVNER D. ASH, Department of Mathematics, The Ohio State University, 231 West 18th Avenue, Columbus, OH 43210

Abstract analysis to MASAMICHI TAKESAKI, Department of Mathematics, University of California, Los Angeles, CA 90024

Real and harmonic analysis to EUGENE FABES, Department of Mathematics, University of Minnesota, Minneapolis, MN 55455

Algebra and algebraic geometry to JUDITH D. SALLY, Department of Mathematics, Northwestern University, Evanston, IL 60208

Geometric topology and general topology to JAMES W. CANNON, Department of Mathematics, Brigham Young University, Provo, UT 84602

Algebraic topology and differential topology to RALPH COHEN, Department of Mathematics, Stanford University, Stanford, CA 94305

Ordinary differential equations, partial differential equations, and applied mathematics to ROGER D. NUSSBAUM, Department of Mathematics, Rutgers University, New Brunswick, NJ 08903

Global analysis and differential geometry to JERRY L. KAZDAN, Department of Mathematics, University of Pennsylvania, E1, Philadelphia, PA 19104-6395

Probability and statistics to BURGESS DAVIS, Departments of Mathematics and Statistics, Purdue University, West Lafayette, IN 47907

Combinatorics and number theory to CARL POMERANCE, Department of Mathematics, University of Georgia, Athens, GA 30602

Logic, set theory, general topology, and universal algebra to JAMES E. BAUMGARTNER, Department of Mathematics, Dartmouth College, Hanover, NH 03755

Algebraic number theory, analytic number theory, and modular forms to AUDREY TERRAS, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093

Complex analysis and nonlinear partial differential equations to SUN-YUNG A. CHANG, Department of Mathematics, University of California, Los Angeles, CA 90024

All other communications to the editors should be addressed to the Managing Editor, DAVID J. SALTMAN, Department of Mathematics, University of Texas at Austin, Austin, TX 78713

COPYING AND REPRINTING

Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews, provided the customary acknowledgment of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Manager of Editorial Services, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940-6248.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to the Copyright Clearance Center, Inc., 27 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale.

Theorems of Hardy and Paley for vector-valued analytic functions and related classes of Banach spaces

By O. BLASCO and A. PELCZYNSKI ........................................ 335

Indecomposable Cohen-Macaulay modules and their multiplicities

By DORIN POPESCU ....................................................... 369

On collectionwise normality of locally compact, normal spaces

By ZOLTÁN BALOGH ...................................................... 389

Univalent functions which map onto regions of given transfinite diameter

By P. L. DUREN and M. M. SCHIFFER ................................ 413

Inner functions and cyclic vectors in the Bloch space

By J. M. ANDERSON, J. L. FERNÁNDEZ and A. L. SHIELDS ........ 429

Circuit partitions and the homfly polynomial of closed braids

By FRANÇOIS JAEGER ..................................................... 449
TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY

CONTENTS

Vol. 323, No. 1 January 1991 Whole No. 668

Closed convex hulls of unitary orbits in von Neumann algebras
By FUMIO HIAI and YOSHIHIRO NAKAMURA ...................... 1

Computing the topological entropy of general one-dimensional maps
By P. GÖRA and A. BOYARSKY ................................ 39

Microlocal Holmgren's theorem for a class of hypo-analytic structures
By S. BERHANU ............................................. 51

A discrete approach to monotonicity of zeros of orthogonal polynomials
By MOURAD E. H. ISMAIL and MARTIN E. MULDOON ......... 65

Commuting fully invariant congruences on free completely regular semigroups
By F. PASTIJN .............................................. 79

On Hermite-Fejér interpolation in a Jordan domain
By CHARLES K. CHUI and XIE-CHANG SHEN .................. 93

Genericity of nontrivial H-superrecurrent H-cocycles
By KARMA DAJANI ......................................... 111

Stability of Newton boundaries of a family of real analytic singularities
By MASAHiko SUZUKI ...................................... 133

Lie supergroup actions on supermanifolds
By CHARLES P. BOYER and O. A. SÁNCHEZ VALENZUELA .... 151

Hypersurface variations are maximal, II
By JAMES A. CARLSON ...................................... 177

A characterization of the complemented translation-invariant subspaces of $H^1(\mathbb{R})$
By DALE E. ALSPACH ..................................... 197

The hull of holomorphicity of a nonisotropic ball in a real hypersurface of finite type
By A. BOGGESS, R. DWILEWICZ and A. NAGEL ............... 209

Finite group actions on the moduli space of self-dual connections. I
By YONG SEUNG CHO ..................................... 233

Sobolev interpolation inequalities with weights
By CRISTIAN E. GUTIERREZ and RICHARD L. WHEEDEN ...... 263

Pureté, rigidité, et morphismes entiers
By GABRIEL PICAVET ..................................... 283

Structure locale de l'espace des rétractions d'une surface
By ROBERT CAUTY ........................................ 315

(Continued on inside back cover)
