Rimon, Elon and Koditschek, Daniel E.  The construction of analytic diffeomorphisms for exact robot navigation on star worlds, 71.
Schubert, David.  Linear series with an N-fold point on a general curve, 117.
Schwardmann, U.  See Thompson, G.
Shah, Kishor.  Coefficient ideals, 373.
Singer, M. F.  See Grigor’ev, D. Yu.
Stephenson, Kenneth.  See Lyzzaik, A. K.
Thompson, G. and Schwardmann, U.  Almost tangent and cotangent structures in the large, 313.
Valov, Vesko M.  Linear topological classifications of certain function spaces, 583.
Verchota, Gregory.  See Pipher, Jill
Wallace, D. I.  Terms in the Selberg trace formula for $SL(3, \mathcal{E}) \backslash SL(3, \mathcal{A}) / SO(3, \mathcal{A})$ associated to Eisenstein series coming from a minimal parabolic subgroup, 781.
Waterhouse, William C.  Automorphisms and twisted forms of generalized Witt Lie algebras, 185.
Williams, R. J.  See Kwon, Y.
The Schwartz space of a general semisimple Lie group. II: Wave packets associated to Schwartz functions

By Rebecca A. Herb .................................................. 1

The construction of analytic diffeomorphisms for exact robot navigation on star worlds

By Elon Rimon and Daniel E. Koditschek .......................... 71

Linear series with an $N$-fold point on a general curve

By David Schubert ...................................................... 117

Weighted Sobolev-Poincaré inequalities and pointwise estimates for a class of degenerate elliptic equations

By Bruno Franchi ..................................................... 125

A dense set of operators with tiny commutants

By Domingo A. Herrero .............................................. 159

Automorphisms and twisted forms of generalized Witt Lie algebras

By William C. Waterhouse ........................................... 185

Alexander duality and Hurewicz fibrations

By Steven C. Ferry ................................................... 201

On the relative reflexivity of finitely generated modules of operators

By Bojan Magajna ................................................... 221

$q$-tensor space and $q$-Weyl modules

By Richard Dipper and Gordon James ......................... 251

A modified Schur algorithm and an extended Hamburger moment problem

By Olav Njåstad ....................................................... 283

Almost tangent and cotangent structures in the large

By G. Thompson and U. Schwarmann ............................. 313

Solving ordinary differential equations in terms of series with real exponents

By D. Yu. Grigor'ev and M. F. Singer ............................ 329

First steps in descriptive theory of locales

By John Isbell ....................................................... 353

Coefficient ideals

By Kishor Shah ..................................................... 373

On complete congruence lattices of complete lattices

By G. Grätzer and H. Lakser ....................................... 385

Definable singularity

By William J. Mitchell ........................................... 407
Control of degenerate diffusions in $\mathbb{R}^d$
By **Omar Hijab** ........................................... 427

Flowbox manifolds
By **J. M. Aarts** and **L. G. Oversteegen** .......................... 449

Vol. 327, No. 2 October 1991 Whole No. 677

Stability of travelling wave solutions of diffusive predator-prey systems
By **R. Gardner** and **C. K. R. T. Jones** ......................... 465

The structure of open continuous mappings having two valences
By **A. K. Lyzzaik** and **Kenneth Stephenson** .................... 525

A formal Mellin transform in the arithmetic of function fields
By **David Goss** .................................................... 567

Linear topological classifications of certain function spaces
By **Vesko M. Valov** .............................................. 583

On the range of the Radon $d$-plane transform and its dual
By **Fulton B. Gonzalez** ........................................... 601

Modèle minimal équivariant et formalité
By **Thierry Lambre** ............................................... 621

$k$-cobordism for links in $S^3$
By **Tim D. Cochran** ............................................... 641

Isotopy invariants of graphs
By **D. Jonish** and **K. C. Millett** ................................. 655

Derived functors of unitary highest weight modules at reduction points
By **Pierluigi Möseneder Frajria** ................................ 703

Reflected Brownian motion in a cone with radially homogeneous reflection field
By **Y. Kwon** and **R. J. Williams** ................................. 739

Terms in the Selberg trace formula for $SL(3,\mathbb{Z}) \backslash SL(3,\mathbb{R})/SO(3,\mathbb{R})$ associated to Eisenstein series coming from a minimal parabolic subgroup
By **D. I. Wallace** .................................................... 781

Convex optimization and the epi-distance topology
By **Gerald Beer** and **Roberto Lucchetti** ......................... 795

Stable rank and approximation theorems in $H^\infty$
By **Leonardo A. Laroco, Jr.** ..................................... 815

A multidimensional Wiener-Wintner theorem and spectrum estimation
By **John J. Benedetto** ............................................... 833
Asymptotic integrations of nonoscillatory second order differential equations
By Shaozhu Chen ........................................ 853

On subordinated holomorphic semigroups
By Alfred S. Carasso and Tosio Kato .................. 867

Radon-Nikodym properties associated with subsets of countable discrete abelian groups
By Patrick N. Dowling .................................. 879

Shadows of convex bodies
By Keith Ball .............................................. 891

Area integral estimates for the biharmonic operator in Lipschitz domains
By Jill Pipher and Gregory Verchota .................. 903

Erratum to “Tiled orders of finite global dimension”
By Hisaaki Fujita ...................................... 919
MEMOIRS OF THE AMERICAN MATHEMATICAL SOCIETY

This bimonthly journal is devoted to research in pure and applied mathematics of much the same nature as appears in TRANSACTIONS. An issue consists of one or more separately bound research tracts for which the author(s) has provided reproduction copy. Prior to 1975 this was published as a monograph series. The editorial committee is identical with that for the TRANSACTIONS so that papers intended for publication in this series should be addressed to one of the editors.

SUBMISSION OF MANUSCRIPT

Two copies of mathematical papers intended for publication in the TRANSACTIONS or the MEMOIRS should be addressed to one of the editors. Subjects, and the editors associated with them, follow.

Harmonic analysis, representation theory, and Lie theory to AVNER D. ASH, Department of Mathematics, The Ohio State University, 231 West 18th Avenue, Columbus, OH 43210

Abstract analysis to MASAMICHI TAKESAKI, Department of Mathematics, University of California, Los Angeles, CA 90024

Real and harmonic analysis to DAVID JERISON, Department of Mathematics, Room 2-180, Massachusetts Institute of Technology, Cambridge, MA 02139

Algebra and algebraic geometry to JUDITH D. SALLY, Department of Mathematics, Northwestern University, Evanston, IL 60208

Geometric topology and general topology to JAMES W. CANNON, Department of Mathematics, Brigham Young University, Provo, UT 84602

Algebraic topology and differential topology to RALPH COHEN, Department of Mathematics, Stanford University, Stanford, CA 94305

Ordinary differential equations, partial differential equations, and applied mathematics to ROGER D. NUSSBAUM, Department of Mathematics, Rutgers University, New Brunswick, NJ 08903

Global analysis and differential geometry to JERRY L. KAZDAN, Department of Mathematics, University of Pennsylvania, El, Philadelphia, PA 19104-6395

Probability and statistics to RICHARD DURRETT, Department of Mathematics, Cornell University, Ithaca, NY 14853-7901

Combinatorics and number theory to CARL POMERANCE, Department of Mathematics, University of Georgia, Athens, GA 30602

Logic, set theory, general topology, and universal algebra to JAMES E. BAUMGARTNER, Department of Mathematics, Dartmouth College, Hanover, NH 03755

Algebraic number theory, analytic number theory, and modular forms to AUDREY TERRAS, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093

Complex analysis and nonlinear partial differential equations to SUN-YUNG A. CHANG, Department of Mathematics, University of California, Los Angeles, CA 90024

All other communications to the editors should be addressed to the Managing Editor, DAVID J. SALTMAN, Department of Mathematics, University of Texas at Austin, Austin, TX 78713

COPYING AND REPRINTING

Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews, provided the customary acknowledgment of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Manager of Editorial Services, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940-6248.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to the Copyright Clearance Center, Inc., 27 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale.
