TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY

THIS JOURNAL is devoted entirely to research in pure and applied mathematics, and includes, in general, longer papers than those in the PROCEEDINGS. Papers should be at least 16 typed pages in length.

PREPARATION OF THE MANUSCRIPT. All papers should be typewritten double-spaced, and two copies should be sent to the appropriate editor. The author should keep a complete copy. To encourage the submission of manuscripts in electronic form using \text{T}_{\text{E}}X and the \text{AMS-}\text{T}_{\text{E}}X macro package, the Executive Committee of the Council has adopted a policy that allows for accelerating the publication date of such manuscripts by as much as 20 weeks, which is approximately equal to the time normally needed by the Society for copyediting, typesetting, and proofreading an average manuscript.

FORM OF MANUSCRIPT. The first page should consist of a descriptive title, followed by an abstract which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The descriptive title should be short, but informative; useless or vague phrases such as “Some remarks about” or “concerning” should be avoided. Also avoid proper names unless mathematical usage associates them with the work. The abstract should be at least one complete sentence, and at most 300 words, with the upper limit primarily for longer papers. Included with the footnotes to your paper, but placed before the first footnote, there should be first the 1991 Mathematics Subject Classification representing the primary and secondary subjects of the article, which may be followed by a list of key words and phrases describing the subject matter of the article and taken from it. A list of the numbers may be found in the annual subject index of Mathematical Reviews, published with the December issue starting in 1990.

SUBMISSION OF MANUSCRIPT. See the back of this journal.

COPYRIGHT TRANSFER AGREEMENT. The signing of a Copyright Transfer Agreement is a requirement for publication.

GALEXY PROOF. When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate on the original manuscript which of them should receive galley proof in the event that the manuscript is accepted for publication.

BACKLOG. 100 pages. Two-thirds of the papers currently being accepted by the editors will be published in 18 months.

SUBSCRIPTION INFORMATION. TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY is published monthly. Subscription prices for Volumes 323–328 (1991) are $780 list; $624 institutional member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of $27; subscribers in India must pay a postage surcharge of $50. Expedited delivery to destinations in North America $35; elsewhere $127.

BACK NUMBER INFORMATION. Back number prices per volume are: for Volumes 78–280, $108 list, $86 institutional members; for Volumes 281–286, $125 list, $100 institutional members; for Volumes 287–292, $153 list, $122 institutional members; for Volumes 293–298, $170 list, $136 institutional members; for Volumes 299–304, $182 list, $146 institutional members; for Volumes 305–310, $186 list, $149 institutional members; for Volumes 311–316, $188 list, $150 institutional members; for Volumes 317–322, $179 list, $143 institutional members. Volumes 1–77 may be ordered from Johnson Reprint Corporation, 111 Fifth Avenue, New York, New York 10003. Back numbers may be purchased on microfilm or microfiche from University Microfilms International, 300 North Zeeb Road, Ann Arbor, Michigan 48106.

**Vol. 328, No. 1**  
**November 1991**  
**Whole No. 678**

### Cohomology of metacyclic groups
By Johannes Huebschmann ............................................. 1

### $L^p$ bounds for spectral multipliers on nilpotent groups
By Michael Christ ..................................................... 73

### Pair-dense relation algebras
By Roger D. Maddux .................................................... 83

### An infinite family in $2\pi^*$ at Adams filtration seven
By Wen-Hsiung Lin ..................................................... 131

### Waldhausen's classification theorem for finitely uniformizable 3-orbifolds
By Yoshihiro Takeuchi ................................................. 151

### The associated Askey-Wilson polynomials
By Mourad E. H. Ismail and Mizan Rahman .......................... 201

### Twisted calibrations
By Timothy A. Murdoch ................................................ 239

### Grothendieck's existence theorem in analytic geometry and related results
By Siegmund Kosarew .................................................. 259

### On topological classification of function spaces $C_p(X)$ of low Borel complexity
By T. Dobrowolski, W. Marciszewski and J. Mogilski .............. 307

### A representation theorem for cyclic analytic two-isometries
By Stefan Richter ....................................................... 325

### Homogeneous distributions on the Heisenberg group and representations of $SU(2, 1)$
By R. C. Fabec ........................................................ 351

### Sharp square-function inequalities for conditionally symmetric martingales
By Gang Wang .......................................................... 393

### Szegö's theorem on a bidisc
By Takahiko Nakazi .................................................... 421

### 2-to-1 maps on hereditarily indecomposable continua
By Jo Heath .............................................................. 433

### Polarized surfaces of $\Delta$-genus 3
By Maria Lucia Fania and Elvira Laura Livorni ..................... 445
The Stefan problem with small surface tension
   By Avner Friedman and Fernando Reitich ....................... 465

Iteration of a composition of exponential functions
   By Xiaoying Dong ............................................. 517

Complete coinductive theories. II
   By A. H. Lachlan ............................................. 527

On the existence of conformal measures
   By Manfred Denker and Mariusz Urbański ....................... 563

Continuity of translation in the dual of $L^\infty(G)$ and related spaces
   By Colin C. Graham, Anthony T. M. Lau and Michael Leinert 589

Inequalities for the integral means of holomorphic functions and their
derivatives in the unit ball of $C^n$
   By Shi Ji-Huai .............................................. 619

Change of variable results for $A_p$- and reverse Hölder $RH_r$-classes
   By R. Johnson and C. J. Neugebauer ............................ 639

Cardinal representations for closures and preclosures
   By F. Galvin, E. C. Milner and M. Pouzet ....................... 667

Quantitative stability of variational systems: I. the epigraphical distance
   By Hedy Attouch and Roger J.-B. Wets .......................... 695

Equivariant fixed point index and fixed point transfer in nonzero dimen-
sions
   By Carlos Prieto and Hanno Ulrich ............................ 731

Regular points for ergodic Sinai measures
   By Masato Tsujii ............................................. 747

On weak convergence in dynamical systems to self-similar processes with
spectral representation
   By Michael T. Lacey ......................................... 767

Chebyshev polynomials in several variables and the radial part of the
Laplace-Beltrami operator
   By R. J. Beerends ........................................... 779

Regularity properties of commutators and layer potentials associated to
the heat equation
   By John L. Lewis and Margaret A. M. Murray .................. 815

Multibasic Eulerian polynomials
   By Dominique Foata and Doron Zeilberger ...................... 843
Heegaard diagrams of 3-manifolds
   By Mitsuyuki Ochiai ...................................... 863
On lifting Hecke eigenforms
   By Lynne H. Walling ..................................... 881
MEMOIRS OF THE AMERICAN MATHEMATICAL SOCIETY

This bimonthly journal is devoted to research in pure and applied mathematics of much the same nature as appears in TRANSACTIONS. An issue consists of one or more separately bound research tracts for which the author(s) has provided reproduction copy. Prior to 1975 this was published as a monograph series. The editorial committee is identical with that for the TRANSACTIONS so that papers intended for publication in this series should be addressed to one of the editors.

SUBMISSION OF MANUSCRIPT

Two copies of mathematical papers intended for publication in the TRANSACTIONS or the MEMOIRS should be addressed to one of the editors. Subjects, and the editors associated with them, follow.

Harmonic analysis, representation theory, and Lie theory to AVNER D. ASH, Department of Mathematics, The Ohio State University, 231 West 18th Avenue, Columbus, OH 43210

Abstract analysis to MASAMICHI TAKESAKI, Department of Mathematics, University of California, Los Angeles, CA 90024

Real and harmonic analysis to DAVID JERISON, Department of Mathematics, Room 2-180, Massachusetts Institute of Technology, Cambridge, MA 02139

Algebra and algebraic geometry to JUDITH D. SALLY, Department of Mathematics, Northwestern University, Evanston, IL 60208

Geometric topology and general topology to JAMES W. CANNON, Department of Mathematics, Brigham Young University, Provo, UT 84602

Algebraic topology and differential topology to RALPH COHEN, Department of Mathematics, Stanford University, Stanford, CA 94305

Ordinary differential equations, partial differential equations, and applied mathematics to ROGER D. NUSSBAUM, Department of Mathematics, Rutgers University, New Brunswick, NJ 08903

Global analysis and differential geometry to JERRY L. KAZDAN, Department of Mathematics, University of Pennsylvania, E1, Philadelphia, PA 19104-6395

Probability and statistics to RICHARD DURRETT, Department of Mathematics, Cornell University, Ithaca, NY 14853-7901

Combinatorics and number theory to CARL POMERANCE, Department of Mathematics, University of Georgia, Athens, GA 30602

Logic, set theory, general topology, and universal algebra to JAMES E. BAUMGARTNER, Department of Mathematics, Dartmouth College, Hanover, NH 03755

Algebraic number theory, analytic number theory, and modular forms to AUDREY TERRAS, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093

Complex analysis and nonlinear partial differential equations to SUN-YUNG A. CHANG, Department of Mathematics, University of California, Los Angeles, CA 90024

All other communications to the editors should be addressed to the Managing Editor, DAVID J. SALTMAN, Department of Mathematics, University of Texas at Austin, Austin, TX 78713

COPYING AND REPRINTING

Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews, provided the customary acknowledgment of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Manager of Editorial Services, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940-6248.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to the Copyright Clearance Center, Inc., 27 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale.
Heegaard diagrams of 3-manifolds
   By Mitsuyuki Ochiai ........................................ 863
