TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY

THIS JOURNAL is devoted entirely to research in pure and applied mathematics, and includes, in general, longer papers than those in the PROCEEDINGS. Papers should be at least 16 typed pages in length.

PREPARATION OF THE MANUSCRIPT. All papers should be typewritten double-spaced, and two copies should be sent to the appropriate editor. The author should keep a complete copy. To encourage the submission of manuscripts in electronic form using \TeX and the \LaTeX\ macro package, the Executive Committee of the Council has adopted a policy that allows for accelerating the publication date of such manuscripts by as much as 20 weeks, which is approximately equal to the time normally needed by the Society for copyediting, typesetting, and proofreading an average manuscript.

FORM OF MANUSCRIPT. The first page should consist of a descriptive title, followed by an abstract which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The descriptive title should be short, but informative; useless or vague phrases such as “Some remarks about” or “concerning” should be avoided. Also avoid proper names unless mathematical usage associates them with the work. The abstract should be at least one complete sentence, and at most 300 words, with the upper limit primarily for longer papers. Included with the footnotes to your paper, but placed before the first footnote, there should be first the 1991 Mathematics Subject Classification representing the primary and secondary subjects of the article, which may be followed by a list of key words and phrases describing the subject matter of the article and taken from it. A list of the numbers may be found in the annual subject index of Mathematical Reviews, published with the December issue starting in 1990.

SUBMISSION OF MANUSCRIPT. See the back of this journal.

COPYRIGHT TRANSFER AGREEMENT. The signing of a Copyright Transfer Agreement is a requirement for publication.

GALLEY PROOF. When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate on the original manuscript which of them should receive galley proof in the event that the manuscript is accepted for publication.

BACKLOG. 100 pages. Two-thirds of the papers currently being accepted by the editors will be published in 18 months.

SUBSCRIPTION INFORMATION. TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY is published monthly. Subscription prices for Volumes 329–334 (1992) are $842 list; $674 institutional member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of $27; subscribers in India must pay a postage surcharge of $50. Expedited delivery to destinations in North America $38; elsewhere $127.

BACK NUMBER INFORMATION. Back number prices per volume are: for Volumes 78–280, $113 list, $90 institutional members; for Volumes 281–286, $131 list, $105 institutional members; for Volumes 287–292, $161 list, $129 institutional members; for Volumes 293–298, $179 list, $143 institutional members; for Volumes 299–304, $209 list, $153 institutional members; for Volumes 305–310, $195 list, $156 institutional members; for Volumes 311–316, $197 list, $159 institutional members; for Volumes 317–322, $188 list, $150 institutional members; for Volumes 323–328, $205 list, $164 institutional members. Volumes 1–77 may be ordered from Johnson Reprint Corporation, 111 Fifth Avenue, New York, New York 10003. Back numbers may be purchased on microfilm or microfiche from University Microfilms International, 300 North Zeeb Road, Ann Arbor, Michigan 48106.
INDEX TO VOLUME 329
January-February 1992

de Acosta, A. Moderate deviations and associated Laplace approximations for sums of independent random vectors, 357.
Aluffi, Paolo. Two characteristic numbers for smooth plane curves of any degree, 73.
Alvarez López, Jesús A. A decomposition theorem for the spectral sequence of Lie foliations, 173.
Canille Martins, Julio Cesar. Holomorphic flows in $C^3,0$ with resonances, 825.
Capietto, Anna, Mawhin, Jean and Zanolin, Fabio. Continuation theorems for periodic perturbations of autonomous systems, 41.
Chalmers, B. L. and Metcalf, F. T. The determination of minimal projections and extensions in $L^1$, 289.
Chlebowitz, M. and Külshammer, B. Symmetric local algebras with 5-dimensional center, 715.
Cummings, James. A model in which GCH holds at successors but fails at limits, 1.
Cygan, Jacek M. and Richardson, Leonard F. Global regularity on 3-dimensional solvmanifolds, 473.
Domínguez, Demetrio. On the linear independence of certain cohomology classes in the classifying space for subfoliations, 221.
Du, Jie. The modular representation theory of q-Schur algebras, 253.
———. The Green correspondence for the representations of Hecke algebras of type $A_{r-1}$, 273.
Exel, Ruy and Loring, Terry A. Extending cellular cohomology to C*-algebras, 141.
Ford, Richard L. Generalized potentials and obstacle scattering, 415.
Geller, William and Tolosa, Juan. Maximal entropy odd orbit types, 161.
Haas, Andrew and Susskind, Perry. The connectivity of multicurves determined by integral weight train tracks, 637.
Hale, Jack K. and Raugel, Geneviève. A damped hyperbolic equation on thin domains, 185.
Halperin, Stephen. See Felix, Yves
Ishiguro, Kenshi. Rigidity of p-completed classifying spaces of alternating groups and classical groups over a finite field, 697.
Ji, Shanyu, Kollár, János and Shiffman, Bernard. A global Lojasiewicz inequality for algebraic varieties, 813.
Just, Winfried. A modification of Shelah's oracle-c.c. with applications, 325.
Kollár, János. See Ji, Shanyu
Külshammer, B. See Chlebowitz, M.
Lafferty, John D., Yu, Yanlin and Zhang, Weiping. A direct geometric proof of the Lefschetz fixed point formulas, 571.
Lau, A. T., Milnes, P. and Pym, J. S. Compactifications of locally compact groups and closed subgroups, 97.
Lewis, L. Gaunce, Jr. The equivariant Hurewicz map, 433.
Lin, Peixiong. Young measures and an application of compensated compactness to one-dimensional nonlinear elastodynamics, 377.
Loring, Terry A. See Exel, Ruy
Luckhaus, S. See Jäger, W.

On explosions of solutions to a system of partial differential equations modelling chemotaxis
   By **W. Jäger** and **S. Luckhaus** ............................... 819

Holomorphic flows in $\mathbb{C}^3, 0$ with resonances
   By **Julio Cesar Canille Martins** ................................. 825
MEMOIRS OF THE AMERICAN MATHEMATICAL SOCIETY

This bimonthly journal is devoted to research in pure and applied mathematics of much the same nature as appears in TRANSACTIONS. An issue consists of one or more separately bound research tracts for which the author(s) has provided reproduction copy. Prior to 1975 this was published as a monograph series. The editorial committee is identical with that for the TRANSACTIONS so that papers intended for publication in this series should be addressed to one of the editors.

SUBMISSION OF MANUSCRIPT

Two copies of mathematical papers intended for publication in the TRANSACTIONS or the MEMOIRS should be addressed to one of the editors. Subjects, and the editors associated with them, follow.

Harmonic analysis, representation theory, and Lie theory to AVNER D. ASH, Department of Mathematics, The Ohio State University, 231 West 18th Avenue, Columbus, OH 43210

Abstract analysis to MASAMICHI TAKESAKI, Department of Mathematics, University of California, Los Angeles, CA 90024

Real and harmonic analysis to DAVID JERISON, Department of Mathematics, Room 2-180, Massachusetts Institute of Technology, Cambridge, MA 02139

Algebra and algebraic geometry to JUDITH D. SALLY, Department of Mathematics, Northwestern University, Evanston, IL 60208

Geometric topology and general topology to JAMES W. CANNON, Department of Mathematics, Brigham Young University, Provo, UT 84602

Algebraic topology and differential topology to RALPH COHEN, Department of Mathematics, Stanford University, Stanford, CA 94305

Ordinary differential equations, partial differential equations, and applied mathematics to ROGER D. NUSSBAUM, Department of Mathematics, Rutgers University, New Brunswick, NJ 08903

Global analysis and differential geometry to JERRY L. KAZDAN, Department of Mathematics, University of Pennsylvania, E1, Philadelphia, PA 19104-6395

Probability and statistics to RICHARD DURRETT, Department of Mathematics, Cornell University, Ithaca, NY 14853-7901

Combinatorics and number theory to CARL POMERANCE, Department of Mathematics, University of Georgia, Athens, GA 30602

Logic, set theory, general topology, and universal algebra to JAMES E. BAUMGARTNER, Department of Mathematics, Dartmouth College, Hanover, NH 03755

Algebraic number theory, analytic number theory, and modular forms to AUDREY TERRAS, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093

Complex analysis and nonlinear partial differential equations to SUN-YUNG A. CHANG, Department of Mathematics, University of California, Los Angeles, CA 90024

All other communications to the editors should be addressed to the Managing Editor, DAVID J. SALTMAN, Department of Mathematics, University of Texas at Austin, Austin, TX 78713

COPYING AND REPRINTING

Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews, provided the customary acknowledgment of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Manager of Editorial Services, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940-6248.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to the Copyright Clearance Center, Inc., 27 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale.
