INDEX TO VOLUME 332
July–August 1992

Adams, M. E. and Gould, Matthew. Finite semilattices whose monoids of endomorphisms are regular, 647.

Adimurthi and Yadava, S. L. Nonexistence of nodal solutions of elliptic equations with critical growth in \( \mathbb{R}^2 \), 449.

Barrett, David E. Global convexity properties of some families of three-dimensional compact Levi-flat hypersurfaces, 459.

Cauty, Robert. L’espace des arcs d’une surface, 193.

Cheng, Kuo-Shung and Lin, Tai-Chia. The structure of solutions of a semilinear elliptic equation, 535.

Cholak, Peter, Downey, Rod and Stob, Michael. Automorphisms of the lattice of recursively enumerable sets: Promptly simple sets, 555.

Cifuentes, Patricio, Dorronsoro, José R. and Sueiro, Juan. Boundary tangential convergence on spaces of homogeneous type, 331.

Connett, William C., Markett, Clemens and Schwartz, Alan L. Convolution and hypergroup structures associated with a class of Sturm-Liouville systems, 365.

Currey, Bradley N. The structure of the space of coadjoint orbits of an exponential solvable Lie group, 241.

De Mari, F., Procesi, C. and Shayman, M. A. Hessenberg varieties, 529.

Derezinski, Jan. N-body observables in the Calkin algebra, 571.

Dorronsoro, José R. See Cifuentes, Patricio

Sueiro, Juan. See Cifuentes, Patricio

Downey, Rod. See Cholak, Peter

Dugas, Manfred and Göbel, Rüdiger. Automorphisms of torsion-free nilpotent groups of class two, 633.

Forstneric, Franc. Admissible boundary values of bounded holomorphic functions in wedges, 583.

Friedman, Avner. See Bellout, Hamid

Friedman, Harvey and Mansfield, Richard. Algorithmic procedures, 297.

Göbel, Rüdiger. See Dugas, Manfred

Gould, Matthew. See Adams, M. E.

Huntley, Jonathan. Spectral multiplicity for \( \text{Gl}_n(R) \), 875.

Isakov, Victor. See Bellout, Hamid

James, Donald G. Orbits in unimodular hermitian lattices, 849.

Keisler, H. Jerome. A law of large numbers for fast price adjustment, 1.

Kiralis, Jeff. Pseudo-isotopies of irreducible 3-manifolds, 53.

Komjáth, P. See Hajnal, A.

Kounchev, Ognyan Iv. Sharp estimate of the Laplacian of a polyharmonic function and applications, 121.

Lin, Song-Sun. Existence of positive nonradial solutions for nonlinear elliptic equations in annular domains, 775.

Lin, Tai-Chia. See Cheng, Kuo-Shung

Lin, Zongzhu. Loewy series of certain indecomposable modules for Frobenius subgroups, 391.
INDEX TO VOLUME 332

Macula, Anthony J.  Free α-extensions of an Archimedean vector lattice and their topological duals, 437.
Mansfield, Richard.  See Friedman, Harvey
Marcos, Eduardo do Nascimento.  Grothendieck groups of quotient singularities, 93.
Markett, Clemens.  See Connett, William C.
van Mill, J.  See Dijkstra, J. J.
Minc, Piotr and Transue, W. R. R.  Accessible points of hereditarily decomposable chainable continua, 711.
Minsky, Yair N.  Harmonic maps into hyperbolic 3-manifolds, 607.
Mogilski, J.  See Dijkstra, J. J.
Moran, Gadi.  The center of Z[Sn+1] is the set of symmetric polynomials in n commuting transposition-sums, 167.
Nabutovsky, Alexander.  Number of solutions with a norm bounded by a given constant of a semilinear elliptic PDE with a generic right-hand side, 135.
Narayan, Sivaram K.  Quasidiagonality of direct sums of weighted shifts, 757.
Noronha, Maria Helena.  Nonnegatively curved submanifolds in codimension two, 351.
Platzeck, M. I.  See Auslander, M.
Plebanek, Grzegorz.  Families of sets of positive measure, 181.
Poliquin, René A.  An extension of Attouch’s theorem and its application to second-order epi-differentiability of convexly composite functions, 861.
Procesi, C.  See De Mari, F.
Rigoli, Marco and Tribuzy, Renato.  The Gauss map for Kählerian submanifolds of R^n, 515.
Rimlinger, Frank.  Free actions on R-trees, 313.
Robertson, Neil, Seymour, P. D. and Thomas, Robin.  Excluding subdivisions of infinite cliques, 211.
Rong, Yongwu.  Degree one maps between geometric 3-manifolds, 411.
Rynes, Jean.  Nonsingular affine k* -surfaces, 889.
Schwartz, Alan L.  See Connett, William C.
Seymour, P. D.  See Robertson, Neil
Shayan, M. A.  See De Mari, F.
Solel, Baruch.  Isometries of CSL algebras, 595.
Stob, Michael.  See Cholak, Peter
Thomas, Robin.  See Robertson, Neil
Todorov, G.  See Auslander, M.
Transue, W. R. R.  See Minc, Piotr
Tribuzy, Renato.  See Rigoli, Marco
Wang, Hann-Tzong.  L^p estimates for the X-ray transform restricted to line complexes of Kirillov type, 793.
Willson, Stephen J.  Iterating maps on cellular complexes, 225.
Yadava, S. L.  See Adimurthi
Zhang, Wen-Bin.  Elementary proofs of the abstract prime number theorem for algebraic function fields, 923.
A law of large numbers for fast price adjustment

By Wen-Bin Zhang ........................................... 923
Editorial Information

To be published in the Transactions, a paper must be correct, new, nontrivial, and significant. Further, it must be well written and of interest to a substantial number of mathematicians. Piecemeal results, such as an inconclusive step toward an unproved major theorem or a minor variation on a known result, are in general not acceptable for publication. Transactions Editors shall solicit and encourage publication of worthy papers of length exceeding 10 published pages. Published pages are the same size as those generated in the style files provided for AMSTEX or AMS-TEX.

As of June 1, 1992, the backlog for this journal was approximately 22 issues. This estimate is the result of dividing the number of manuscripts for this journal in the Providence office that have not yet gone to the printer on the above date by the average number of articles per issue over the previous twelve months.

A Copyright Transfer Agreement is required before a paper will be published in this journal. By submitting a paper to this journal, authors certify that the manuscript has not been submitted to nor is it under consideration for publication by another journal, conference proceedings, or similar publication.

Information for Authors

The first page must consist of a descriptive title, followed by an abstract that summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The descriptive title should be short, but informative; useless or vague phrases such as "some remarks about" or "concerning" should be avoided. The abstract should be at least one complete sentence, and at most 300 words. Included with the footnotes to the paper, there should be the 1991 Mathematics Subject Classification representing the primary and secondary subjects of the article. This may be followed by a list of key words and phrases describing the subject matter of the article and taken from it. A list of the numbers may be found in the annual index of Mathematical Reviews, published with the December issue starting in 1990, as well as from the electronic service e-MATH [telnet e-MATH.ams.com (or telnet 130.44.1.100)]. Login and password are e-math. For journal abbreviations used in bibliographies, see the list of serials in the latest Mathematical Reviews annual index. When the manuscript is submitted, authors should supply the editor with electronic addresses if available. These will be printed after the postal address at the end of each article.

Electronically-prepared manuscripts. The AMS encourages submission of electronically-prepared manuscripts in AMSTEX or AMS-TEX because properly prepared electronic manuscripts save the author proofreading time and move more quickly through the production process. To this end, the Society has prepared "preprint" style files, specifically the amsppt style of AMSTEX and the amsart style of AMS-TEX, which will simplify the work of authors and of the production staff. Those authors who make use of these style files from the beginning of the writing process will further reduce their own effort.

Guidelines for Preparing Electronic Manuscripts provide additional assistance and are available for use with either AMSTEX or AMS-TEX. Authors with FTP access may obtain these Guidelines from the Society’s Internet node e-MATH.ams.com (130.44.1.100). For those without FTP access they can be
obtained free of charge from the e-mail address guide-elec@math.ams.com (Internet) or from the Publications Department, P. O. Box 6248, Providence, RI 02940-6248. When requesting Guidelines please specify which version you want.

Electronic manuscripts should be sent to the Providence office only after the paper has been accepted for publication. Please send electronically prepared manuscript files via e-mail to pub-submit@math.ams.com (Internet) or on diskettes to the Publications Department address listed above. When submitting electronic manuscripts please be sure to include a message indicating in which publication the paper has been accepted.

Two copies of the paper should be sent directly to the appropriate Editor and the author should keep one copy. At that time authors should indicate if the paper has been prepared using \TeX\ or \LaTeX. The Manual for Authors of Mathematical Papers should be consulted for symbols and style conventions. The Manual may be obtained free of charge from the e-mail address cust-serv@math.ams.com or from AMS, Customer Services Department, P. O. Box 6248, Providence, RI 02940-6248.

Any inquiries concerning a paper that has been accepted for publication should be sent directly to the Editorial Department, American Mathematical Society, P. O. Box 6248, Providence, RI 02940-6248.
Editors

Two copies of papers intended for publication in Transactions or Memoirs should be addressed to the appropriate editor. Subjects, and the editors associated with them, follow.

Harmonic analysis, representation theory, and Lie theory to AVNER D. ASH, Department of Mathematics, The Ohio State University, 231 West 18th Avenue, Columbus, OH 43210

Abstract analysis to MASAMICHI TAKESAKI, Department of Mathematics, University of California, Los Angeles, CA 90024

Real and harmonic analysis to DAVID JERISON, Department of Mathematics, Room 2-180, Massachusetts Institute of Technology, Cambridge, MA 02139

Algebra and algebraic geometry to JUDITH D. SALLY, Department of Mathematics, Northwestern University, Evanston, IL 60208

Geometric topology, hyperbolic geometry, infinite group theory, and general topology to PETER SHALEN, Department of Mathematics, Statistics and Computer Science, University of Illinois, Chicago, IL 60680

Algebraic topology and differential topology to RALPH COHEN, Department of Mathematics, Stanford University, Stanford, CA 94305

Ordinary differential equations, partial differential equations, and applied mathematics to JOHN MALLET-PARET, Division of Applied Mathematics, Brown University, Providence, RI 02912-9000

Global analysis and differential geometry to ROBERT L. BRYANT, Department of Mathematics, Duke University, Durham, NC 27706-7706

Probability and statistics to RICHARD DURRETT, Department of Mathematics, Cornell University, Ithaca, NY 14853-7901

Combinatorics and Lie theory to PHILIP J. HANLON, Department of Mathematics, University of Michigan, Ann Arbor, MI 48109-1003

Logic, set theory, general topology, and universal algebra to JAMES E. BAUMGARTNER, Department of Mathematics, Dartmouth College, Hanover, NH 03755

Algebraic number theory, analytic number theory, and automorphic forms to WEN-CHING WINNIE LI, Department of Mathematics, Pennsylvania State University, University Park, PA 16802-6401

Complex analysis and nonlinear partial differential equations to SUN-YUNG A. CHANG, Department of Mathematics, University of California, Los Angeles, CA 90024

All other communications to the editors should be addressed to the Managing Editor, JAMES E. BAUMGARTNER, Department of Mathematics, Dartmouth College, Hanover, NH 03755.

MEMOIRS OF THE AMERICAN MATHEMATICAL SOCIETY

This bimonthly journal is devoted to research in pure and applied mathematics of much the same nature as appears in Transactions. An issue consists of one or more separately bound research tracts for which the author(s) has provided reproduction copy. Prior to 1975 this was published as a monograph series. The editorial committee is identical with that for the Transactions so that papers intended for publication in this series should be addressed to one of the editors.
Existence of positive nonradial solutions for nonlinear elliptic equations in annular domains
   By Song-Sun Lin .............................................. 775
