Transactions of the American Mathematical Society
This journal is devoted entirely to research in pure and applied mathematics.

Subscription information. Transactions of the American Mathematical Society is published monthly. Subscription prices for Volumes 329-334 (1992) are $842 list; $674 institutional member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of $27; subscribers in India must pay a postage surcharge of $50. Expedited delivery to destinations in North America $38; elsewhere $127.

Back number information. For back issues see the AMS Catalog of Publications.

Subscriptions and orders should be addressed to the American Mathematical Society, P.O. Box 1571, Annex Station, Providence, RI 02901-1571. All orders must be accompanied by payment. Other correspondence should be addressed to P. O. Box 6248, Providence, RI 02940-6248.

Copying and reprinting. Individual readers of this publication, and nonprofit libraries acting for them are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Manager of Editorial Services, American Mathematical Society, P. O. Box 6248, Providence, RI 02940-6248.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to the Copyright Clearance Center, Inc., 27 Congress Street, Salem, MA 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.

Transactions of the American Mathematical Society is published monthly by the American Mathematical Society at 201 Charles Street, Providence, RI 02904-2213. Second-class postage is paid at Providence, Rhode Island. Postmaster: Send address changes to Transactions, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248.

Contents

Vol. 334, No. 1 November 1992 Whole No. 690

Transfinite graphs and electrical networks
By A. H. Zemanian ........................................ 1

Isotropy groups of homotopy classes of maps
By G. Triantafillou ........................................ 37

The classification of complete minimal surfaces with total curvature greater than \(-12\pi\)
By Francisco J. Lopez .................................... 49

Subcriticality and gaugeability of the Schrödinger operator
By Z. Zhao .................................................. 75

QED domains and NED sets in \(\mathbb{R}^n\)
By Shanshuang Yang ....................................... 97

Mixed groups
By Paul Hill and Charles Megibben ....................... 121

Central extensions of current algebras
By Paul Zusmanovich ..................................... 143

Subgroup conditions for groups acting freely on products of spheres
By Judith H. Silverman .................................. 153

Meromorphic extension of analytic continued fractions across their divergence line with applications to orthogonal polynomials
By Hans-J. Runckel ........................................ 183

Characteristic cycles of holomorphic discrete series
By Jen-Tseh Chang ......................................... 213

On conjugacy separability of fundamental groups of graphs of groups
By M. Shirvani ............................................. 229

Fundamental solutions for hypoelliptic differential operators depending analytically on a parameter
By Frank Mantlik .......................................... 245

Delta methods in enveloping algebras of Lie superalgebras
By Jeffrey Bergen and D. S. Passman .................... 259

Generalized second-order derivatives of convex functions in reflexive Banach spaces
By Chi Ngoc Do ............................................ 281

Nonnegative curvature on piecewise constant curvature spaces
By Robert Peszek .......................................... 303

Strong Tutte functions of matroids and graphs
By Thomas Zaslavsky .................................... 317

\(\Sigma_n\) definable sets without \(\Sigma_n\) induction
By C. T. Chong and K. J. Mourad .......................... 349
Cohomological aspects of hypergraphs
By F. R. K. Chung and R. L. Graham 365

Algebra for heckoid groups
By Robert Riley 389

Universal spaces for R-trees
By John C. Mayer, Jacek Nikiel and Lex G. Oversteegen 411

Geometric aspects of reduction of order
By James Sherring and Geoff Prince 433

Stable-homotopy and homology invariants of boundary links
By Michael Farber 455

Characteristic matrices and spectral properties of evolutionary systems
By M. A. Kaashoek and S. M. Verduyn Lunel 479

Generalized group presentation and formal deformations of CW complexes
By Richard A. Brown 519

Estimates of the Caccioppoli-Schauder type in weighted function spaces
By Giovanni Maria Troianiello 551

Cohomology of the symplectic group $Sp_4(Z)$, Part I: The odd torsion case
By Alan Brownstein and Ronnie Lee 575

Hausdorff dimension of wild fractals
By T. B. Rushing 597

Hypoellipticity on Cauchy-Riemann manifolds
By Johannes A. Petersen 615

The Mizohata structure on the sphere
By Jorge Hounie 641

The monotonicity of the entropy for a family of degree one circle maps
By Lluís Alsedà and Francesc Manosas 651

On the structure of twisted group C*-algebras
By Judith A. Packer and Iain Raeburn 685

$H^p$- and $L^p$-variants of multiparameter Calderón-Zygmund theory
By Anthony Carbery and Andreas Seeger 719

Anomalies associated to the polar decomposition of $GL(n, C)$
By Steven Rosenberg 749

Eta invariants of Dirac operators on foliated manifolds
By Goran Perić 761

A PL geometric study of algebraic $K$-theory
By Bizhong Hu 783

On the generalized Ramanujan-Nagell equation $x^2 - D = 2^{n+2}$
By Le Maohua 809

Editorial Information

To be published in the Transactions, a paper must be correct, new, nontrivial, and significant. Further, it must be well written and of interest to a substantial number of mathematicians. Piecemeal results, such as an inconclusive step toward an unproved major theorem or a minor variation on a known result, are in general not acceptable for publication. Transactions Editors shall solicit and encourage publication of worthy papers of length exceeding 10 published pages. Published pages are the same size as those generated in the style files provided for \texttt{AMS-\TeX} or \texttt{AMS-\LaTeX}.

As of September 1, 1992, the backlog for this journal was approximately 18 issues. This estimate is the result of dividing the number of manuscripts for this journal in the Providence office that have not yet gone to the printer on the above date by the average number of articles per issue over the previous twelve months.

A Copyright Transfer Agreement is required before a paper will be published in this journal. By submitting a paper to this journal, authors certify that the manuscript has not been submitted to nor is it under consideration for publication by another journal, conference proceedings, or similar publication.

Information for Authors

The first page must consist of a descriptive title, followed by an abstract that summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The descriptive title should be short, but informative; useless or vague phrases such as “some remarks about” or “concerning” should be avoided. The abstract should be at least one complete sentence, and at most 300 words. Included with the footnotes to the paper, there should be the 1991 Mathematics Subject Classification representing the primary and secondary subjects of the article. This may be followed by a list of key words and phrases describing the subject matter of the article and taken from it. A list of the numbers may be found in the annual index of Mathematical Reviews, published with the December issue starting in 1990, as well as from the electronic service e-MATH [telnet e-MATH.ams.org (or telnet 130.44.1.100). Login and password are e-math]. For journal abbreviations used in bibliographies, see the list of serials in the latest Mathematical Reviews annual index. When the manuscript is submitted, authors should supply the editor with electronic addresses if available. These will be printed after the postal address at the end of each article.

Electronically-prepared manuscripts. The AMS encourages submission of electronically-prepared manuscripts in \texttt{AMS-\TeX} or \texttt{AMS-\LaTeX} because properly prepared electronic manuscripts save the author proofreading time and move more quickly through the production process. To this end, the Society has prepared “preprint” style files, specifically the amspt style of \texttt{AMS-\TeX} and the amsart style of \texttt{AMS-\LaTeX}, which will simplify the work of authors and of the production staff. Those authors who make use of these style files from the beginning of the writing process will further reduce their own effort.

Guidelines for Preparing Electronic Manuscripts provide additional assistance and are available for use with either \texttt{AMS-\TeX} or \texttt{AMS-\LaTeX}. Authors with
FTP access may obtain these *Guidelines* from the Society's Internet node e-MATH.ams.org (130.44.1.100). For those without FTP access they can be obtained free of charge from the e-mail address guide-elec@math.ams.org (Internet) or from the Publications Department, P. O. Box 6248, Providence, RI 02940-6248. When requesting *Guidelines* please specify which version you want.

Electronic manuscripts should be sent to the Providence office only after the paper has been accepted for publication. Please send electronically prepared manuscript files via e-mail to pub-submit@math.ams.org (Internet) or on diskettes to the Publications Department address listed above. When submitting electronic manuscripts please be sure to include a message indicating in which publication the paper has been accepted.

Two copies of the paper should be sent directly to the appropriate Editor and the author should keep one copy. At that time authors should indicate if the paper has been prepared using *AMS-TEX* or *AMS-\LaTeX*. The *Manual for Authors of Mathematical Papers* should be consulted for symbols and style conventions. The *Manual* may be obtained free of charge from the e-mail address cust-serv@math.ams.org or from AMS, Customer Services Department, P. O. Box 6248, Providence, RI 02940-6248.

Any inquiries concerning a paper that has been accepted for publication should be sent directly to the Editorial Department, American Mathematical Society, P. O. Box 6248, Providence, RI 02940-6248.
Editors

Two copies of papers intended for publication in Transactions or Memoirs should be addressed to the appropriate editor. Subjects, and the editors associated with them, follow.

Harmonic analysis, representation theory, and Lie theory to AVNER D. ASH, Department of Mathematics, The Ohio State University, 231 West 18th Avenue, Columbus, OH 43210

Abstract analysis to MASAMICHI TAKESAKI, Department of Mathematics, University of California, Los Angeles, CA 90024

Real and harmonic analysis to DAVID JERISON, Department of Mathematics, Room 2-180, Massachusetts Institute of Technology, Cambridge, MA 02139

Algebra and algebraic geometry to JUDITH D. SALLY, Department of Mathematics, Northwestern University, Evanston, IL 60208

Geometric topology, hyperbolic geometry, infinite group theory, and general topology to PETER SHALEN, Department of Mathematics, Statistics and Computer Science, University of Illinois, Chicago, IL 60680

Algebraic topology and differential topology to RALPH COHEN, Department of Mathematics, Stanford University, Stanford, CA 94305

Ordinary differential equations, partial differential equations, and applied mathematics to JOHN MALLET-PARET, Division of Applied Mathematics, Brown University, Providence, RI 02912-9000

Global analysis and differential geometry to ROBERT L. BRYANT, Department of Mathematics, Duke University, Durham, NC 27706-7706

Probability and statistics to RICHARD DURRETT, Department of Mathematics, Cornell University, Ithaca, NY 14853-7901

Combinatorics and Lie theory to PHILIP J. HANLON, Department of Mathematics, University of Michigan, Ann Arbor, MI 48109-1003

Logic, set theory, general topology, and universal algebra to JAMES E. BAUMGARTNER, Department of Mathematics, Dartmouth College, Hanover, NH 03755

Algebraic number theory, analytic number theory, and automorphic forms to WENCHING WINNIE LI, Department of Mathematics, Pennsylvania State University, University Park, PA 16802-6401

Complex analysis and nonlinear partial differential equations to SUN-YUNG A. CHANG, Department of Mathematics, University of California, Los Angeles, CA 90024

All other communications to the editors should be addressed to the Managing Editor, JAMES E. BAUMGARTNER, Department of Mathematics, Dartmouth College, Hanover, NH 03755.

MEMOIRS OF THE AMERICAN MATHEMATICAL SOCIETY

This bimonthly journal is devoted to research in pure and applied mathematics of much the same nature as appears in Transactions. An issue consists of one or more separately bound research tracts for which the author(s) has provided reproduction copy. Prior to 1975 this was published as a monograph series. The editorial committee is identical with that for the Transactions so that papers intended for publication in this series should be addressed to one of the editors.
Generation and propagation of interfaces in reaction-diffusion systems
   By XINFU CHEN ............................................................... 877
