INDEX TO VOLUME 336
March–April 1993

Adámek, Jiří and Rosicky, Jiří. On injectivity in locally presentable categories, 785.
Adimurthi and Yadava, S. L. On a conjecture of Lin-Ni for a semilinear Neumann problem, 631.
Basmajian, Ara. Hyperbolic structures for surfaces of infinite type, 421.
Boyle, Mike and Handelman, David. Algebraic shift equivalence and primitive matrices, 121.
Cheng, Kuo-Shung and Smoller, Joel A. Conformal metrics with prescribed Gaussian curvature on $S^2$, 219.
Clarke, F. H. An indirect method in the calculus of variations, 655.
Conte, A. and Verra, A. Reye constructions for nodal Enriques surfaces, 79.
Dahlberg, Björn E. J. and Kenig, Carlos E. Weak solutions of the porous medium equation, 711.
——. Weak solutions of the porous medium equation in a cylinder, 701.
Duoandikoetxea, Javier. Weighted norm inequalities for homogeneous singular integrals, 869.
Frasca, Michele. See Chiarenza, Filippo
Gordon, B. Brent. Algebraic cycles and the Hodge structure of a Kuga fiber variety, 933.
Gurevič, R. H. Detecting algebraic (in)dependence of explicitly presented functions (some applications of Nevanlinna theory to mathematical logic), 1.
Handelman, David. See Boyle, Mike
Hata, Masayoshi. Rational approximations to the dilogarithm, 363.
Heinzer, William. See Gilmer, Robert
Kellerer, Hans G. Uniqueness in bounded moment problems, 727.
Kenig, Carlos E. See Dahlberg, Björn E. J.
Longo, Placido. See Chiarenza, Filippo
Manderscheid, David. Supercuspidal representations and the theta correspondence. II: SL(2) and the anisotropic O(3), 805.
Maskit, Bernard. On Klein’s combination theorem. IV, 265.
Meyer, Gabriele. Attracting and repelling point pairs for vector fields on manifolds. I, 497.
Noh, Sunsook. The value semigroups of prime divisors of the second kind in 2-dimensional regular local rings, 607.
O’Leary, Robbin and Vaaler, Jeffrey D. Small solutions to inhomogeneous linear equations over number fields, 915.
Pedersen, Sharon L. Volumes of vector fields on spheres, 69.
Rosický, Jiří. See Adámek, Jiří
Salinas, Norberto. Toeplitz operators and weighted Wiener-Hopf operators, pseudoconvex Reinhardt and tube domains, 675.
Scharlemann, Martin. Unlinking via simultaneous crossing changes, 855.
Segovia, Carlos and Torrea, José L. Higher order commutators for vector-valued Calderón-Zygmund operators, 537.
INDEX TO VOLUME 336

Shen, Xie-Chang. See Chui, Charles K.
Smoller, Joel A. See Cheng, Kuo-Shung
Stade, Eric. GL(4, R)-Whittaker functions and \( _4F_3(1) \) hypergeometric series, 253.
Strichartz, Robert S. Self-similar measures and their Fourier transforms. II, 335.
Swan, Richard G. Failure of cancellation for direct sums of line bundles, 581.
Tan, Eng-Chye. Geometry of weight diagrams for \( U(n) \), 173.
Tholen, Walter. See Dimov, Georgi D.
Tintarev, Kyril. Mountain impasse theorem and spectrum of semilinear elliptic problems, 621.
Torrea, José L. See Segovia, Carlos
Vaaler, Jeffrey D. See O'Leary, Robbin
van de Vel, M. A selection theorem for topological convex structures, 463.
van Douwen, Eric K. The product of two normal initially \( k \)-compact spaces, 509.
Verra, A. See Conte, A.
Willard, Ross. Decidable discriminator varieties from unary classes, 311.
Wood, Jay A. Witt's extension theorem for mod four valued quadratic forms, 445.
Xu, Xingwang and Yang, Paul C. Remarks on prescribing Gauss curvature, 831.
Yadava, S. L. See Adimurthi
Yang, Paul C. See Xu, Xingwang
Zhong, Lefan. See Chui, Charles K.
Zhu, Chen-bo. Functional equations satisfied by intertwining operators of reductive groups, 881.
Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

Subscription information. Transactions of the American Mathematical Society is published monthly. Subscription prices for Volumes 335–340 (1993) are $893 list; $714 institutional member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of $27; subscribers in India must pay a postage surcharge of $50. Expedited delivery to destinations in North America $38; elsewhere $127.

Back number information. For back issues see the AMS Catalog of Publications.

Subscriptions and orders should be addressed to the American Mathematical Society, P.O. Box 1571, Annex Station, Providence, RI 02901-1571. All orders must be accompanied by payment. Other correspondence should be addressed to P.O. Box 6248, Providence, RI 02940-6248.

Copying and reprinting. Individual readers of this publication, and nonprofit libraries acting for them are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Manager of Editorial Services, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to the Copyright Clearance Center, Inc., 27 Congress Street, Salem, MA 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.
Detecting algebraic (in)dependence of explicitly presented functions (some applications of Nevanlinna theory to mathematical logic)

By R. H. Gurevič .............................................. 1

Volumes of vector fields on spheres

By Sharon L. Pedersen ........................................ 69

Reye constructions for nodal Enriques surfaces

By A. Conte and A. Verra .................................... 79

Nonstandard topology on function spaces with applications to hyperspaces

By Hermann Render .......................................... 101

Algebraic shift equivalence and primitive matrices

By Mike Boyle and David Handelman .......................... 121

Zero-equivalence in function fields defined by algebraic differential equations

By John Shackell .............................................. 151

Geometry of weight diagrams for $U(n)$

By Eng-Chye Tan ............................................ 173

Countable closed LFC-groups with $p$-torsion

By Felix Leinen .............................................. 193

Conformal metrics with prescribed Gaussian curvature on $S^2$

By Kuo-Shung Cheng and Joel A. Smoller .................... 219

$GL(4, \mathbb{R})$-Whittaker functions and $4F_3(1)$ hypergeometric series

By Eric Stade ................................................. 253

On Klein’s combination theorem. IV

By Bernard Maskit ........................................... 265

Artinian subrings of a commutative ring

By Robert Gilmer and William Heinzer ...................... 295

Decidable discriminator varieties from unary classes

By Ross Willard .............................................. 311

Self-similar measures and their Fourier transforms. II

By Robert S. Strichartz ..................................... 335

Rational approximations to the dilogarithm

By Masayoshi Hata ........................................... 363

An extension theorem for closing maps of shifts of finite type

By Jonathan Ashley .......................................... 389

Hyperbolic structures for surfaces of infinite type

By Ara Basmajian ........................................... 421

Witt’s extension theorem for mod four valued quadratic forms

By Jay A. Wood ............................................. 445
A selection theorem for topological convex structures
   By M. van de Vel ........................................... 463
Attracting and repelling point pairs for vector fields on manifolds. I
   By Gabriele Meyer ......................................... 497
The product of two normal initially k-compact spaces
   By Eric K. van Douwen ...................................... 509
Semilinear evolution equations in Banach spaces with application to parabolic partial differential equations
   By Samuel M. Rankin III ..................................... 523
Higher order commutators for vector-valued Calderón-Zygmund operators
   By Carlos Segovia and José L. Torrea ....................... 537
Cohen-Macaulayness of semi-invariants for tori
   By Michel Van den Bergh ..................................... 557
Failure of cancellation for direct sums of line bundles
   By Richard G. Swan ......................................... 581
The value semigroups of prime divisors of the second kind in 2-dimensional regular local rings
   By Sunsook Noh .............................................. 607
Mountain impasse theorem and spectrum of semilinear elliptic problems
   By Kyril Tintarev .......................................... 621
On a conjecture of Lin-Ni for a semilinear Neumann problem
   By Adimurthi and S. L. Yadava ............................... 631
A unique continuation property on the boundary for solutions of elliptic equations
   By Zhiren Jin ............................................... 639
An indirect method in the calculus of variations
   By F. H. Clarke ............................................. 655
Toeplitz operators and weighted Wiener-Hopf operators, pseudoconvex Reinhardt and tube domains
   By Norberto Salinas ......................................... 675
Weak solutions of the porous medium equation in a cylinder
   By Björn E. J. Dahlberg and Carlos E. Kenig ................. 701
Weak solutions of the porous medium equation
   By Björn E. J. Dahlberg and Carlos E. Kenig ................. 711
Uniqueness in bounded moment problems
   By Hans G. Kellerer ......................................... 727
Branched surfaces and attractors. I: Dynamic branched surfaces
   By Joe Christy .............................................. 759
On injectivity in locally presentable categories
   By Jiří Adámek and Jiří Rosický ............................. 785
Supercuspidal representations and the theta correspondence. II: SL(2) and the anisotropic O(3)
   By David Manderscheid ......................................... 805

On Lagrange interpolation at disturbed roots of unity
   By Charles K. Chui, Xie-Chang Shen and Lefan Zhong ....... 817

Remarks on prescribing Gauss curvature
   By Xingwang Xu and Paul C. Yang ............................. 831

$W^{2,p}$-solvability of the Dirichlet problem for nondivergence elliptic equations with VMO coefficients
   By Filippo Chiarenza, Michele Frasca and Placido Longo ... 841

Unlinking via simultaneous crossing changes
   By Martin Scharlemann ......................................... 855

Weighted norm inequalities for homogeneous singular integrals
   By Javier Duoandikoetxea ...................................... 869

Functional equations satisfied by intertwining operators of reductive groups
   By Chen-bo Zhu .................................................. 881

Groups of dualities

Small solutions to inhomogeneous linear equations over number fields
   By Robbin O'Leary and Jeffrey D. Vaaler ..................... 915

Algebraic cycles and the Hodge structure of a Kuga fiber variety
   By B. Brent Gordon .............................................. 933
Editorial Information

To be published in the Transactions, a paper must be correct, new, nontrivial, and significant. Further, it must be well written and of interest to a substantial number of mathematicians. Piecemeal results, such as an inconclusive step toward an unproved major theorem or a minor variation on a known result, are in general not acceptable for publication. Transactions Editors shall solicit and encourage publication of worthy papers of length exceeding 10 published pages. Published pages are the same size as those generated in the style files provided for \( \text{AMSTeX} \) or \( \text{AMS-LaTeX} \).

As of January 6, 1993, the backlog for this journal was approximately 9 issues. This estimate is the result of dividing the number of manuscripts for this journal in the Providence office that have not yet gone to the printer on the above date by the average number of articles per issue over the previous twelve months, reduced by the number of issues published in four months (the time necessary for editing and composing a typical issue).

A Copyright Transfer Agreement is required before a paper will be published in this journal. By submitting a paper to this journal, authors certify that the manuscript has not been submitted to nor is it under consideration for publication by another journal, conference proceedings, or similar publication.

Information for Authors

The first page must consist of a descriptive title, followed by an abstract that summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The descriptive title should be short, but informative; useless or vague phrases such as “some remarks about” or “concerning” should be avoided. The abstract should be at least one complete sentence, and at most 300 words. Included with the footnotes to the paper, there should be the 1991 Mathematics Subject Classification representing the primary and secondary subjects of the article. This may be followed by a list of key words and phrases describing the subject matter of the article and taken from it. A list of the numbers may be found in the annual index of Mathematical Reviews, published with the December issue starting in 1990, as well as from the electronic service e-MATH [telnet e-MATH.ams.org (or telnet 130.44.1.100). Login and password are e-math]. For journal abbreviations used in bibliographies, see the list of serials in the latest Mathematical Reviews annual index. When the manuscript is submitted, authors should supply the editor with electronic addresses if available. These will be printed after the postal address at the end of each article.

Electronically-prepared manuscripts. The AMS encourages submission of electronically-prepared manuscripts in \( \text{AMSTeX} \) or \( \text{AMS-LaTeX} \) because properly prepared electronic manuscripts save the author proofreading time and move more quickly through the production process. To this end, the Society has prepared “preprint” style files, specifically the amspt style of \( \text{AMSTeX} \) and the amsart style of \( \text{AMS-LaTeX} \), which will simplify the work of authors and of the production staff. Those authors who make use of these style files from the beginning of the writing process will further reduce their own effort.
Guidelines for Preparing Electronic Manuscripts provide additional assistance and are available for use with either \texttt{AMSTeX} or \texttt{AMSLaTeX}. Authors with FTP access may obtain these Guidelines from the Society's Internet node e-MATH.ams.org (130.44.1.100). For those without FTP access they can be obtained free of charge from the e-mail address guide-elec@math.ams.org (Internet) or from the Publications Department, P. O. Box 6248, Providence, RI 02940-6248. When requesting Guidelines please specify which version you want.

Electronic manuscripts should be sent to the Providence office only after the paper has been accepted for publication. Please send electronically prepared manuscript files via e-mail to pub-submit@math.ams.org (Internet) or on diskettes to the Publications Department address listed above. When submitting electronic manuscripts please be sure to include a message indicating in which publication the paper has been accepted.

Two copies of the paper should be sent directly to the appropriate Editor and the author should keep one copy. At that time authors should indicate if the paper has been prepared using \texttt{AMSTeX} or \texttt{AMSLaTeX}. The \textit{Manual for Authors of Mathematical Papers} should be consulted for symbols and style conventions. The \textit{Manual} may be obtained free of charge from the e-mail address cust-serv@math.ams.org or from AMS, Customer Services Department, P. O. Box 6248, Providence, RI 02940-6248.

Any inquiries concerning a paper that has been accepted for publication should be sent directly to the Editorial Department, American Mathematical Society, P. O. Box 6248, Providence, RI 02940-6248.
Editors

Two copies of papers intended for publication in *Transactions* or *Memoirs* should be addressed to the appropriate editor. Subjects, and the editors associated with them, follow.

**Harmonic analysis, representation theory, and Lie theory** to AVNER D. ASH, Department of Mathematics, The Ohio State University, 231 West 18th Avenue, Columbus, OH 43210

**Abstract analysis** to MASAMICHI TAKESAKI, Department of Mathematics, University of California, Los Angeles, CA 90024

**Real and harmonic analysis** to DAVID JERISON, Department of Mathematics, Room 2-180, Massachusetts Institute of Technology, Cambridge, MA 02139

**Algebra and algebraic geometry** to JUDITH D. SALLY, Department of Mathematics, Northwestern University, Evanston, IL 60208

**Geometric topology, hyperbolic geometry, infinite group theory, and general topology** to PETER SHALEN, Department of Mathematics, Statistics and Computer Science, University of Illinois, Chicago, IL 60680

**Algebraic topology and differential topology** to MARK MAHOWALD, Department of Mathematics, Northwestern University, 2033 Sheridan Road, Evanston, IL 60288-2730

**Ordinary differential equations, partial differential equations, and applied mathematics** to JOHN MALLET-PARET, Division of Applied Mathematics, Brown University, Providence, RI 02912-9000

**Global analysis and differential geometry** to ROBERT L. BRYANT, Department of Mathematics, Duke University, Durham, NC 27706-7706

**Probability and statistics** to RICHARD DURRETT, Department of Mathematics, Cornell University, Ithaca, NY 14853-7901

**Combinatorics and Lie theory** to PHILIP J. HANLON, Department of Mathematics, University of Michigan, Ann Arbor, MI 48109-1003

**Logic, set theory, general topology, and universal algebra** to JAMES E. BAUMGARTNER, Department of Mathematics, Dartmouth College, Hanover, NH 03755

**Algebraic number theory, analytic number theory, and automorphic forms** to WENCHING WINNIE LI, Department of Mathematics, Pennsylvania State University, University Park, PA 16802-6401

**Complex analysis and nonlinear partial differential equations** to SUN-YUNG A. CHANG, Department of Mathematics, University of California, Los Angeles, CA 90024

All other communications to the editors should be addressed to the Managing Editor, JAMES E. BAUMGARTNER, Department of Mathematics, Dartmouth College, Hanover, NH 03755.

---

**MEMOIRS OF THE AMERICAN MATHEMATICAL SOCIETY**

This bimonthly journal is devoted to research in pure and applied mathematics of much the same nature as appears in *Transactions*. An issue consists of one or more separately bound research tracts for which the author(s) has provided reproduction copy. Prior to 1975 this was published as a monograph series. The editorial committee is identical with that for the *Transactions* so that papers intended for publication in this series should be addressed to one of the editors.
Weak solutions of the porous medium equation

By Björn E. J. Dahlberg and Carlos E. Kenig .......... 711

Uniqueness in bounded moment problems

By Hans G. Kellerer ........................................ 727

Branched surfaces and attractors. I: Dynamic branched surfaces

By Joe Christy ............................................. 759

On injectivity in locally presentable categories

By Jiří Adámek and Jiří Rosický ........................... 785

Supercuspidal representations and the theta correspondence. II: SL(2) and
the anisotropic O(3)

By David Manderscheid .................................. 805

On Lagrange interpolation at disturbed roots of unity

By Charles K. Chui, Xie-Chang Shen and Lefan Zhong....... 817

Remarks on prescribing Gauss curvature

By Xingwang Xu and Paul C. Yang ........................ 831

$W^{2,p}$-solvability of the Dirichlet problem for nondivergence elliptic equa-
tions with VMO coefficients

By Filippo Chiarenza, Michele Frasca and Placido Longo ... 841

Unlinking via simultaneous crossing changes

By Martin Scharlemann .................................... 855

Weighted norm inequalities for homogeneous singular integrals

By Javier Duoandikoetxea .................................. 869

Functional equations satisfied by intertwining operators of reductive groups

By Chen-bo Zhu ........................................... 881

Groups of dualities

By Georgi D. Dimov and Walter Tholen ....................... 901

Small solutions to inhomogeneous linear equations over number fields

By Robbin O'Leary and Jeffrey D. Vaaler ................... 915

Algebraic cycles and the Hodge structure of a Kuga fiber variety
