INDEX TO VOLUME 343
May–June 1994

Anderson, James W. Intersections of analytically and geometrically finite subgroups of Kleinian groups, 87.
Auslander, J. and Furstenberg, H. Product recurrence and distal points, 221.
Ballico, Edoardo. On the number of singularities in meromorphic foliations on compact complex surfaces, 417.
Borwein, J. M., Borwein, P. B. and Garvan, F. G. Some cubic modular identities of Ramanujan, 35.
Borwein, P. B. See Borwein, J. M.
Cohen, Joel M. and Colonna, Flavia. Bounded holomorphic functions on bounded symmetric domains, 135.
Colonna, Flavia. See Cohen, Joel M.
Coornaert, M. and Papadopoulos, A. Une dichotomie de Hopf pour les flots géodésiques associés aux groupes discrets d'isométries des arbres, 883.
Cox, Ben. 8-categories and 8-functors in the representation theory of Lie algebras, 433.
Crauder, Bruce and Morrison, David R. Minimal models and degenerations of surfaces with Kodaira number zero, 525.
Curtis, Cynthia L. Generalized Casson invariants for SO(3), U(2), Spin(4), and SO(4), 49.
Denis, Laurent. Le théorème de Fermat-Goss, 713.
Echterhoff, Siegfried. On transformation group C*-algebras with continuous trace, 117.
Felmer, Patricio L. See de Figueiredo, Djairo G.
Forrest, Brian. Amenability and the structure of the algebras Ap(G), 233.
Fox, Jeffrey and Haskell, Peter. Hodge decompositions and Dolbeault complexes on normal surfaces, 765.
Furstenberg, H. See Auslander, J.
Garvan, F. G. See Borwein, J. M.
Gateva-Ivanova, Tatiana. Noetherian properties of skew polynomial rings with binomial relations, 203.
Golé, Christophe. Periodic orbits for Hamiltonian systems in cotangent bundles, 327.
Haiman, Mark. On realization of Björner's 'continuous partition lattice' by measurable partitions, 695.
Haskell, Peter. See Fox, Jeffrey
Hawkins, Jane M. Amenable relations for endomorphisms, 169.
Hofbauer, Franz and Urbaniński, Mariusz. Fractal properties of invariant subsets for piecewise monotonic maps on the interval, 659.
Housworth, Elizabeth Ann. Escape rate for 2-dimensional Brownian motion conditioned to be transient and application to Zygmund functions, 843.
Ishiguro, Kenshi and Notbohm, Dietrich. Fibrations of classifying spaces, 391.
Kennedy, Judy A. and Yorke, James A. Pseudocircles in dynamical systems, 349.
INDEX TO VOLUME 343

Kisliakov, Serguei V. and Xu, Quanhua. Interpolation of weighted and vector-valued Hardy spaces, 1.

Kra, I. See Earle, C. J.

Krushkal', S. L. See Earle, C. J.

Kuczumow, Tadeusz, Reich, Simeon and Stachura, Adam. Minimal displacement of points under holomorphic mappings and fixed point properties for unions of convex sets, 575.

Kurepa, Alexandra. See Castro, Alfonso

MacManus, Paul. Quasiconformal mappings and Ahlfors-David curves, 853.

Marhuenda, F. Microlocal analysis of some isospectral deformations, 245.

Mordukhovich, Boris. Stability theory for parametric generalized equations and variational inequalities via nonsmooth analysis, 609.

Morrison, David R. See Crauder, Bruce

Notbohm, Dietrich. See Ishiguro, Kenshi

Papadopoulos, A. See Coornaert, M.

Radford, David E. Solutions to the quantum Yang-Baxter equation arising from pointed bialgebras, 455.

Raghavan, K. N. Powers of ideals generated by quadratic sequences, 727.

Reich, Simeon. See Kuczumow, Tadeusz

Ren, Xiaofeng and Wei, Juncheng. On a two-dimensional elliptic problem with large exponent in nonlinearity, 749.

Schneider, Hans. See Tam, Bit-Shun

Skula, Ladislav. The orders of solutions of the Kummer system of congruences, 587.

Stachura, Adam. See Kuczumow, Tadeusz

Tam, Bit-Shun and Schneider, Hans. On the core of a cone-preserving map, 479.

Trnková, Vera. Semirigid spaces, 305.

Urbański, Mariusz. See Hofbauer, Franz

Vazquez, J. L. See Escobedo, M.

Wei, Juncheng. See Ren, Xiaofeng

Weinstein, Gilbert. On the force between rotating coaxial black holes, 899.

Weyman, Jerzy. Calculating discriminants by higher direct images, 367.

Xu, Quanhua. See Kisliakov, Serguei V.

Xu, Yuan. Multivariate orthogonal polynomials and operator theory, 193.

Yorke, James A. See Kennedy, Judy A.

Zuazua, Enrike. See Escobedo, M.
Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

**Subscription information.** *Transactions of the American Mathematical Society* is published monthly. Subscription prices for Volumes 341–346 (1994) are $938 list; $750 institutional member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of $27; subscribers in India must pay a postage surcharge of $50. Expedited delivery to destinations in North America $38; elsewhere $127.

**Back number information.** For back issues see the *AMS Catalog of Publications.*

Subscriptions and orders should be addressed to the American Mathematical Society, P.O. Box 5904, Boston, MA 02206-5904. *All orders must be accompanied by payment.* Other correspondence should be addressed to P.O. Box 6248, Providence, RI 02940-6248.

**Copying and reprinting.** Individual readers of this publication, and nonprofit libraries acting for them are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Manager of Editorial Services, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248. Requests can also be made by e-mail to reprint-permission@math.ams.org.

The appearance of the code on the first page of an article in this journal indicates the copyright owner’s consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to the Copyright Clearance Center, Inc., 222 Rosewood Drive, Danvers, MA 01923. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.

---

*Transactions of the American Mathematical Society* is published monthly by the American Mathematical Society at 201 Charles Street, Providence, RI 02904-2213. Second-class postage is paid at Providence, Rhode Island. Postmaster: Send address changes to Transactions, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248.

©Copyright 1994 by the American Mathematical Society. All rights reserved.

The paper used in this book is acid-free and falls within the guidelines established to ensure permanence and durability.

This publication was typeset using \AMS-\TeX, the American Mathematical Society’s \TeX macro system.

Editorial Information

To be published in the Transactions, a paper must be correct, new, nontrivial, and significant. Further, it must be well written and of interest to a substantial number of mathematicians. Piecemeal results, such as an inconclusive step toward an unproved major theorem or a minor variation on a known result, are in general not acceptable for publication. Transactions Editors shall solicit and encourage publication of worthy papers of length exceeding 10 published pages. Published pages are the same size as those generated in the style files provided for \texttt{AMS-\TeX} or \texttt{AMS-La\TeX}.

As of March 4, 1994, the backlog for this journal was approximately 2 issues. This estimate is the result of dividing the number of manuscripts for this journal in the Providence office that have not yet gone to the printer on the above date by the average number of articles per issue over the previous twelve months, reduced by the number of issues published in four months (the time necessary for editing and composing a typical issue).

A Copyright Transfer Agreement is required before a paper will be published in this journal. By submitting a paper to this journal, authors certify that the manuscript has not been submitted to nor is it under consideration for publication by another journal, conference proceedings, or similar publication.

Information for Authors and Editors

The first page must consist of a descriptive title, followed by an abstract that summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The descriptive title should be short, but informative; useless or vague phrases such as “some remarks about” or “concerning” should be avoided. The abstract should be at least one complete sentence, and at most 300 words. Included with the footnotes to the paper, there should be the 1991 Mathematics Subject Classification representing the primary and secondary subjects of the article. This may be followed by a list of key words and phrases describing the subject matter of the article and taken from it. A list of the numbers may be found in the annual index of Mathematical Reviews, published with the December issue starting in 1990, as well as from the electronic service e-MATH [telnet e-MATH.ams.org (or telnet 130.44.1.100). Login and password are e-math]. For journal abbreviations used in bibliographies, see the list of serials in the latest Mathematical Reviews annual index. When the manuscript is submitted, authors should supply the editor with electronic addresses if available. These will be printed after the postal address at the end of each article.

Two copies of the paper should be sent directly to the appropriate Editor and the author should keep one copy.

Electronically prepared manuscripts. The AMS encourages submission of electronically prepared manuscripts in \texttt{AMS-\TeX} or \texttt{AMS-La\TeX} because properly prepared electronic manuscripts save the author proofreading time and move more quickly through the production process. To this end, the Society has prepared “preprint” style files, specifically the amsppt style of \texttt{AMS-\TeX} and the amsart style of \texttt{AMS-La\TeX}, which will simplify the work of authors and of the production staff. Those authors who make use of these style files from the
beginning of the writing process will further reduce their own effort. Electronically submitted manuscripts prepared in plain \TeX{} or \LaTeX{} do not mesh properly with the AMS production systems and cannot, therefore, realize the same kind of expedited processing. Users of plain \TeX{} should have little difficulty learning \AmS-\TeX{}, and \LaTeX{} users will find that \AmS-L\TeX{} is the same as \LaTeX{} with additional commands to simplify the typesetting of mathematics.

*Guidelines for Preparing Electronic Manuscripts* provides additional assistance and is available for use with either \AmS-\TeX{} or \AmS-L\TeX{}. Authors with FTP access may obtain *Guidelines* from the Society’s Internet node e-MATH.ams.org (130.44.1.100). For those without FTP access *Guidelines* can be obtained free of charge from the e-mail address guide-elec@math.ams.org (Internet) or from the Customer Services Department, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248. When requesting *Guidelines*, please specify which version you want.

At the time of submission, authors should indicate if the paper has been prepared using \AmS-\TeX{} or \AmS-L\TeX{}. The *Manual for Authors of Mathematical Papers* should be consulted for symbols and style conventions. The *Manual* may be obtained free of charge from the e-mail address cust-serv@math.ams.org or from the Customer Services Department, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248. The Providence office should be supplied with a manuscript that corresponds to the electronic file being submitted.

Electronic manuscripts should be sent to the Providence office immediately after the paper has been accepted for publication. They can be sent via e-mail to pub-submit@math.ams.org (Internet) or on diskettes to the Publications Department, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248. When submitting electronic manuscripts please be sure to include a message indicating in which publication the paper has been accepted. No corrections will be accepted electronically. Authors must mark their changes on their proof copies and return them to the Providence office. Authors and editors are encouraged to make the necessary submissions of electronically prepared manuscripts and proof copies in a timely fashion.

Any inquiries concerning a paper that has been accepted for publication should be sent directly to the Editorial Department, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248.
Editors

Two copies of papers intended for publication in Transactions or Memoirs should be addressed to the appropriate editor. Subjects, and the editors associated with them, follow.

**Harmonic analysis, representation theory, and Lie theory** to ROBERT J. STANTON, Department of Mathematics, Ohio State University, 231 West 18th Avenue, Columbus, OH 43210-1174; e-mail: stanton@function.mps.ohio-state.edu

**Ergodic theory, dynamical systems, abstract analysis** to DANIEL J. RUDOLPH, Department of Mathematics, University of Maryland, College Park, MD 20742; e-mail: djr@math.umd.edu

**Real and harmonic analysis** to DAVID JERISON, Department of Mathematics, Room 2-180, Massachusetts Institute of Technology, Cambridge, MA 02139; e-mail: jerison@math.mit.edu

**Algebra and algebraic geometry** to EFIM Zelmanov, Department of Mathematics, University of Wisconsin, 480 Lincoln Drive, Madison, WI 53706-1388; e-mail: zelmanov@math.wisc.edu

**Geometric topology, hyperbolic geometry, infinite group theory, and general topology** to PETER SHALEN, Department of Mathematics, Statistics and Computer Science, University of Illinois at Chicago, Chicago, IL 60607-4348; e-mail: u10123@uicvm.uic.edu

**Algebraic topology and differential topology** to MARK MAHOWALD, Department of Mathematics, Northwestern University, 2033 Sheridan Road, Evanston, IL 60288-2730; e-mail: mark@math.nwu.edu

**Ordinary differential equations, partial differential equations, and applied mathematics** to JOHN MALLET-PARET, Division of Applied Mathematics, Brown University, Providence, RI 02912-9000; e-mail: am438000@brownvm.brown.edu

**Global analysis and differential geometry** to ROBERT L. BRYANT, Department of Mathematics, Duke University, Durham, NC 27706-7706; e-mail: bryant@math.duke.edu

**Probability and statistics** to RICHARD DURRETT, Department of Mathematics, Cornell University, Ithaca, NY 14853-7901; e-mail: rtd@cornella.cit.cornell.edu

**Combinatorics and Lie theory** to PHILIP J. HANLON, Department of Mathematics, University of Michigan, Ann Arbor, MI 48109-1003; e-mail: phil.hanlon@math.lsa.umich.edu

**Logic and universal algebra** to GREGORY L. CHERLIN, Department of Mathematics, Hill Center, Busch Campus, New Brunswick, NJ 08903; e-mail: cherlin@math.rutgers.edu

**Algebraic number theory, analytic number theory, and automorphic forms** to WENCHING WINNIE LI, Department of Mathematics, Pennsylvania State University, University Park, PA 16802-6401

**Complex analysis and nonlinear partial differential equations** to SUN-YUNG A. CHANG, Department of Mathematics, University of California, Los Angeles, CA 90024; e-mail: chang@math.ucla.edu

All other communications to the editors should be addressed to the Managing Editor, PETER SHALEN, Department of Mathematics, Statistics and Computer Science, University of Illinois at Chicago, Chicago, IL 60607-4348; email: u10123@uicvm.uic.edu.

**MEMOIRS OF THE AMERICAN MATHEMATICAL SOCIETY**

This bimonthly journal is devoted to research in pure and applied mathematics of much the same nature as appears in Transactions. An issue consists of one or more separately bound research tracts for which the author(s) has provided reproduction copy. Prior to 1975 this was published as a monograph series. The editorial committee is identical with that for the Transactions so that papers intended for publication in this series should be addressed to one of the editors.
