NOTICE TO SUBSCRIBERS

Starting with the 1995 subscription year, *Transactions of the American Mathematical Society* will change to an annual volume numbering system. The number of issues per year will not change, but they will all be contained in one volume. The 1995 subscription for *Transactions* will consist of Vol. 347, Nos. 1–12 instead of Vol. 347, Nos. 1 and 2 through Vol. 352, Nos. 1 and 2.
Ancona, Vincenzo and Ottaviani, Giorgio. Stability of special instanton bundles on $\mathbb{P}^{2n+1}$, 341, 677.

Akutagawa, Kazuo. Harmonic diffeomorphisms of the hyperbolic plane, 342, 325.

Alspach, Brian, Goddyn, Luis and Zhang, Cun-Quan. Graphs with the circuit cover property, 344, 131.

Amick, C. J. On the theory of internal waves of permanent form in fluids of great depth, 346, 399.

An, Jianbei. Weights for classical groups, 342, 1.

Anderson, James W. Intersections of analytically and geometrically finite subgroups of Kleinian groups, 343, 87.

Andersson, Mats. The $H^2$ corona problem and $\overline{\partial}_b$ in weakly pseudoconvex domains, 342, 241.

Arapura, Donu and Oh, Kyungho. Abel’s theorem for twisted jacobians, 342, 421.

Auscher, P. and Carro, M. J. Transference for radial multipliers and dimension free estimates, 342, 575.

Auslander, J. and Furstenberg, H. Product recurrence and distal points, 343, 221.

Baez, John C. Hochschild homology in a braided tensor category, 344, 885.

Baldwin, John T. An almost strongly minimal non-Desarguesian projective plane, 342, 695.

Ballico, Edoardo. On the number of singularities in meromorphic foliations on compact complex surfaces, 343, 417.

Barge, Marcy and Diamond, Beverly. The dynamics of continuous maps of finite graphs through inverse limits, 344, 773.

Barnard, Roger W., FitzGerald, Carl H. and Gong, Sheng. A distortion theorem for biholomorphic mappings in $\mathbb{C}^2$, 344, 907.

Baumslag, Gilbert, Cannonito, Frank B. and Robinson, Derek J. S. The algorithmic theory of finitely generated metabelian groups, 344, 629.

Bendersky, Martin and Davis, Donald M. 3-primary $v_1$-periodic homotopy groups of $F_4$ and $E_6$, 344, 291.

Benson, D. J. and Carlson, Jon F. Projective resolutions and Poincaré duality complexes, 342, 447.

Bessenrodt, C. See Andrews, G. E.

Biane, Philippe. Théorème de Ney-Spitzer sur le dual de $SU(2)$, 345, 179.

Bigatti, Anna, Geramita, Anthony V. and Migliore, Juan C. Geometric consequences of extremal behavior in a theorem of Macaulay, 346, 203.

Binding, Paul and Najman, Branko. A variational principle in Krein space, 342, 489.

Binegar, B. and Zierau, R. A singular representation of $E_6$, 341, 771.

Blanc, David. Operations on resolutions and the reverse Adams spectral sequence, 342, 197.

de Boor, Carl, DeVore, Ronald A. and Ron, Amos. Approximation from shift-invariant subspaces of $L_2(\mathbb{R}^d)$, 341, 787.

Borwein, J. M., Borwein, P. B. and Garvan, F. G. Some cubic modular identities of Ramanujan, 343, 35.

Borwein, P. B. See Borwein, J. M.

Borwein, Peter, Erdélyi, Tamás and Zhang, John. Müntz systems and orthogonal Müntz-Legendre polynomials, 342, 523.
INDEX TO VOLUME 341–346

Bouziad, Ahmed. Notes sur la propriété de Namioka, 344, 873.

Bowditch, B. H. and Mess, G. A 4-dimensional Kleinian group, 344, 391.

Branson, Thomas P. and Gilkey, Peter B. The functional determinant of a four-dimensional boundary value problem, 344, 479.

Brazil, Marcus. Growth functions for some nonautomatic Baumslag-Solitar groups, 342, 137.

Cannonito, Frank B. See Baumslag, Gilbert

Carlson, Jon F. See Benson, D. J.

Carro, M. J. See Auscher, P.

Chace, Charles E. Writing integers as sums of products, 345, 367.

Chang, Jen-Tseh. Characteristic cycles of discrete series for R-rank one groups, 341, 603.

Cho, Sanghyun. Boundary behavior of the Bergman kernel function on some pseudoconvex domains in C^n, 345, 803.

Cohen, Joel M. and Colonna, Flavia. Bounded holomorphic functions on bounded symmetric domains, 343, 135.

Cohen, Stephen D. and Matthews, Rex W. A class of exceptional polynomials, 345, 897.

Colonna, Flavia. See Cohen, Joel M.

Coornaert, M. and Papadopoulos, A. Une dichotomie de Hopf pour les flots géodésiques associés aux groupes discrets d’isométries des arbres, 343, 883.

Cornea, Octavian. There is just one rational cone-length, 344, 835.

Cox, Ben. 3-categories and 3-functors in the representation theory of Lie algebras, 343, 433.

Crauder, Bruce and Morrison, David R. Minimal models and degenerations of surfaces with Kodaira number zero, 343, 525.

Curtis, Cynthia L. Generalized Casson invariants for SO(3), U(2), Spin(4), and SO(4), 343, 49.

Daverman, R. J. and Tinsley, F. C. A controlled plus construction for crumpled laminations, 342, 807.

Davidson, Kenneth R. and Orr, John Lindsay. The Jacobson radical of a CSL algebra, 344, 925.

Davis, Donald M. See Bendersky, Martin

DeVore, Ronald A. See de Boor, Carl

Dehornoy, Patrick. Braid groups and left distributive operations, 345, 115.

Denis, Laurent. Le théorème de Fermat-Goss, 343, 713.

Diamond, Beverly. See Barge, Marcy

Diestel, R. See Brochet, J.-M.

Donnelly, Harold. Dirichlet problem at infinity for harmonic maps: rank one symmetric spaces, 344, 713.

Donohoe, Liam A. Generalised Castelfnuovo inequalities, 344, 217.

Dou, Ze-Li. On the fundamental periods of Hilbert modular forms, 346, 147.

Driver, Bruce K. A Cameron-Martin type quasi-invariance theorem for pinned brownian motion on a compact Riemannian manifold, 342, 375.

Belisario A. Ventura, Nonproduct type analytic TUHF algebras ........ 719
**Editorial Information**

To be published in the *Transactions*, a paper must be correct, new, nontrivial, and significant. Further, it must be well written and of interest to a substantial number of mathematicians. Piecemeal results, such as an inconclusive step toward an unproved major theorem or a minor variation on a known result, are in general not acceptable for publication. *Transactions* Editors shall solicit and encourage publication of worthy papers of length exceeding 10 published pages. Published pages are the same size as those generated in the style files provided for AMSTeX or AMS-LaTeX.

As of September 1, 1994, the backlog for this journal was approximately 0 issues. This estimate is the result of dividing the number of manuscripts for this journal in the Providence office that have not yet gone to the printer on the above date by the average number of articles per issue over the previous twelve months, reduced by the number of issues published in four months (the time necessary for editing and composing a typical issue).

A Copyright Transfer Agreement is required before a paper will be published in this journal. By submitting a paper to this journal, authors certify that the manuscript has not been submitted to nor is it under consideration for publication by another journal, conference proceedings, or similar publication.

**Information for Authors and Editors**

The first page must consist of a *descriptive title*, followed by an *abstract* that summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The *descriptive title* should be short, but informative; useless or vague phrases such as "some remarks about" or "concerning" should be avoided. The *abstract* should be at least one complete sentence, and at most 300 words. Included with the footnotes to the paper, there should be the 1991 *Mathematics Subject Classification* representing the primary and secondary subjects of the article. This may be followed by a list of *key words and phrases* describing the subject matter of the article and taken from it. A list of the numbers may be found in the annual index of *Mathematical Reviews*, published with the December issue starting in 1990, as well as from the electronic service e-MATH [telnet e-MATH.ams.org (or telnet 130.44.1.100). Login and password are e-math]. For journal abbreviations used in bibliographies, see the list of serials in the latest *Mathematical Reviews* annual index. When the manuscript is submitted, authors should supply the editor with electronic addresses if available. These will be printed after the postal address at the end of each article.

Two copies of the paper should be sent directly to the appropriate Editor and the author should keep one copy.

**Electronically prepared manuscripts.** The AMS encourages submission of electronically prepared manuscripts in AMSTeX or AMS-LaTeX because properly prepared electronic manuscripts save the author proofreading time and move more quickly through the production process. To this end, the Society has prepared "preprint" style files, specifically the amsppt style of AMSTeX and the amsart style of AMS-LaTeX, which will simplify the work of authors and of the production staff. Those authors who make use of these style files from the
Electronic manuscripts should be sent to the Providence office immediately after the paper has been accepted for publication. They can be sent via e-mail to pub-submit@math.ams.org (Internet) or on diskettes to the Publications Department, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248. When submitting electronic manuscripts please be sure to include a message indicating in which publication the paper has been accepted. No corrections will be accepted electronically. Authors must mark their changes on their proof copies and return them to the Providence office. Authors and editors are encouraged to make the necessary submissions of electronically prepared manuscripts and proof copies in a timely fashion.

Any inquiries concerning a paper that has been accepted for publication should be sent directly to the Editorial Department, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248.
Editors

Two copies of papers intended for publication in *Transactions or Memoirs* should be addressed to the appropriate editor. Subjects, and the editors associated with them, follow.

Harmonic analysis, representation theory, and Lie theory to ROBERT J. STANTON, Department of Mathematics, Ohio State University, 231 West 18th Avenue, Columbus, OH 43210-1174; e-mail: stanton@function.mps.ohio-state.edu

Ergodic theory, dynamical systems, abstract analysis to DANIEL J. RUDOLPH, Department of Mathematics, University of Maryland, College Park, MD 20742; e-mail: djr@math.umd.edu

Real and harmonic analysis to DAVID JERISON, Department of Mathematics, Room 2-180, Massachusetts Institute of Technology, Cambridge, MA 02139; e-mail: jerison@math.mit.edu

Algebra and algebraic geometry to EFIM ZELMANOV, Department of Mathematics, University of Wisconsin, 480 Lincoln Drive, Madison, WI 53706-1388; e-mail: zelmanov@math.wisc.edu

Geometric topology, hyperbolic geometry, infinite group theory, and general topology to PETER SHALEN, Department of Mathematics, Statistics and Computer Science, University of Illinois at Chicago, Chicago, IL 60607-4348; e-mail: shalen@math.uic.edu

Algebraic topology and differential topology to MARK MAHOWALD, Department of Mathematics, Northwestern University, 2033 Sheridan Road, Evanston, IL 60288-2730; e-mail: mark@math.nwu.edu

Ordinary differential equations, partial differential equations, and applied mathematics to JOHN MALLET-PARET, Division of Applied Mathematics, Brown University, Providence, RI 02912-9000; e-mail: am4380000@brownvm.brown.edu

Global analysis and differential geometry to ROBERT L. BRYANT, Department of Mathematics, Duke University, Durham, NC 27706-7706; e-mail: bryant@math.duke.edu

Probability and statistics to RICHARD DURRETT, Department of Mathematics, Cornell University, Ithaca, NY 14853-7901; e-mail: rtd@cornell.ca.cit.cornell.edu

Combinatorics and Lie theory to PHILIP J. HANLON, Department of Mathematics, University of Michigan, Ann Arbor, MI 48109-1003; e-mail: phil.hanlon@math.lsa.umich.edu

Logic and universal algebra to GREGORY L. CHERLIN, Department of Mathematics, Hill Center, Busch Campus, New Brunswick, NJ 08903; e-mail: cherlin@math.rutgers.edu

Algebraic number theory, analytic number theory, and automorphic forms to WEN-CHING WINNIE LI, Department of Mathematics, Pennsylvania State University, University Park, PA 16802-6401

Complex analysis and nonlinear partial differential equations to SUN-YUNG A. CHANG, Department of Mathematics, University of California, Los Angeles, CA 90024; e-mail: chang@math.ucla.edu

All other communications to the editors should be addressed to the Managing Editor, PETER SHALEN, Department of Mathematics, Statistics and Computer Science, University of Illinois at Chicago, Chicago, IL 60607-4348; email: shalen@math.uic.edu.

---

MEMOIRS OF THE AMERICAN MATHEMATICAL SOCIETY

This bimonthly journal is devoted to research in pure and applied mathematics of much the same nature as appears in *Transactions*. An issue consists of one or more separately bound researchtracts for which the author(s) has provided reproduction copy. Prior to 1975 this was published as a monograph series. The editorial committee is identical with that for the *Transactions* so that papers intended for publication in this series should be addressed to one of the editors.
