Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

Submission information. See **Information for Authors** at the end of this issue.

Publisher Item Identifier. The Publisher Item Identifier (PII) appears at the top of the first page of each article published in this journal. This alphanumeric string of characters uniquely identifies each article and can be used for future cataloging, searching, and electronic retrieval.

Postings to the AMS website. Articles are posted to the AMS website individually after proof is returned from authors and before appearing in an issue.

Subscription information. *Transactions of the American Mathematical Society* is published monthly. Beginning in January 1996 *Transactions* is accessible from www.ams.org/journals/. Subscription prices for Volume 357 (2005) are as follows: for paper delivery, US\$1628 list, US\$1302 institutional member, US\$1465 corporate member; for electronic delivery, US\$1465 list, US\$1172 institutional member, US\$1319 corporate member. Upon request, subscribers to paper delivery of this journal are also entitled to receive electronic delivery. If ordering the paper version, add US\$39 for surface delivery outside the United States and India; US\$50 to India. Expedited delivery to destinations in North America is US\$48; elsewhere US\$144. For paper delivery a late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year.

Back number information. For back issues see www.ams.org/bookstore.

Subscriptions and orders should be addressed to the American Mathematical Society, P.O. Box 845904, Boston, MA 02284-5904 USA. *All orders must be accompanied by payment.* Other correspondence should be addressed to 201 Charles Street, Providence, RI 02904-2294 USA.

Copying and reprinting. Material in this journal may be reproduced by any means for educational and scientific purposes without fee or permission with the exception of reproduction by services that collect fees for delivery of documents and provided that the customary acknowledgment of the source is given. This consent does not extend to other kinds of copying for general distribution, for advertising or promotional purposes, or for resale. Requests for permission for commercial use of material should be addressed to the Acquisitions Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA. Requests can also be made by e-mail to reprint-permission@ams.org.

Excluded from these provisions is material in articles for which the author holds copyright. In such cases, requests for permission to use or reprint should be addressed directly to the author(s). (Copyright ownership is indicated in the notice in the lower right-hand corner of the first page of each article.)

Transactions of the American Mathematical Society is published monthly by the American Mathematical Society at 201 Charles Street, Providence, RI 02904-2294 USA. Periodicals postage is paid at Providence, Rhode Island. Postmaster: Send address changes to *Transactions*, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA.

© 2005 by the American Mathematical Society. All rights reserved.

This journal is indexed in *Mathematical Reviews*, *Zentralblatt MATH*, *Science Citation Index*[®], *Science Citation Index*TM-*Expanded*, *ISI Alerting Services*SM, *CompuMath Citation Index*[®], and *Current Contents*[®]/*Physical, Chemical & Earth Sciences*.

Printed in the United States of America.

⊗ The paper used in this journal is acid-free and falls within the guidelines established to ensure permanence and durability.

TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY
CONTENTS

Vol. 357, No. 12

Whole No. 847

December 2005

J. Kustermans, G. J. Murphy, and L. Tuset, Quantum groups, differential calculi and the eigenvalues of the Laplacian	4681
Raúl E. Curto and Woo Young Lee, k -hyponormality of finite rank perturbations of unilateral weighted shifts	4719
Olaf Klein and Otmar Spinas, Canonical forms of Borel functions on the Milliken space	4739
Xinfu Chen, Shangbin Cui, and Avner Friedman, A hyperbolic free boundary problem modeling tumor growth: Asymptotic behavior	4771
Russell A. Goward, Jr., A simple algorithm for principalization of monomial ideals	4805
Pierre Matet, Andrzej Rosłanowski, and Saharon Shelah, Cofinality of the nonstationary ideal	4813
Alain Louveau and Christian Rosendal, Complete analytic equivalence relations	4839
Kayo Masuda and Masayoshi Miyanishi, Affine pseudo-planes and cancellation problem	4867
Hichem Hajaiej, Extended Hardy-Littlewood inequalities and some applications	4885
Ivan Kausz, A Gieseker type degeneration of moduli stacks of vector bundles on curves	4897
Sérgio R. Fenley, Regulating flows, topology of foliations and rigidity ...	4957
Siva R. Athreya, Richard F. Bass, and Edwin A. Perkins, Hölder norm estimates for elliptic operators on finite and infinite-dimensional spaces	5001
Richard Foote, An algebraic approach to multiresolution analysis	5031
D. S. Passman, Filtrations in semisimple rings	5051
Chong-Qing Cheng, Minimal invariant tori in the resonant regions for nearly integrable Hamiltonian systems	5067
Frédéric Gourdeau, B. E. Johnson, and Michael C. White, The cyclic and simplicial cohomology of $l^1(\mathbf{N})$	5097

INDEX TO VOLUME 357 (2005)

- Abdulla, Ugur G. *Well-posedness of the Dirichlet problem for the non-linear diffusion equation in non-smooth domains*, 247
- Adin, Ron M., Francesco Brenti, and Yuval Roichman. *Descent representations and multivariate statistics*, 3051
- Akhtar, Reza. *Cycles on curves over global fields of positive characteristic*, 2557
- Akin, Ethan. *Good measures on Cantor space*, 2681
- Alberich-Carramiñana, Maria. *Plane Cremona maps, exceptional curves and roots*, 1901
- van Alten, C. J. *See Blok, W. J.*
- Archbold, Robert J., and Eberhard Kaniuth. *Stable rank and real rank for some classes of group C^* -algebras*, 2165
- Ash, J. Marshall, and Stefan Catoiu. *Telescoping, rational-valued series, and zeta functions*, 3339
- Athanasiadis, Christos A. *On a refinement of the generalized Catalan numbers for Weyl groups*, 179
- Athreya, Siva R., Richard F. Bass, and Edwin A. Perkins. *Hölder norm estimates for elliptic operators on finite and infinite-dimensional spaces*, 5001
- Aussel, D., A. Daniilidis, and L. Thibault. *Subsmooth sets: Functional characterizations and related concepts*, 1275
- d'Azevedo, Antonio Breda, Roman Nedela, and Jozef Širáň. *Classification of regular maps of negative prime Euler characteristic*, 4175
- Baaĵ, Saad, Georges Skandalis, and Stefaan Vaes. *Measurable Kac cohomology for bicrossed products*, 1497
- Babson, Eric, and Patricia Hersh. *Discrete Morse functions from lexicographic orders*, 509
- Badzioch, Bernard. *From Γ -spaces to algebraic theories*, 1779
- Bakan, Andrew, Frank Deutsch, and Wu Li. *Strong CHIP, normality, and linear regularity of convex sets*, 3831
- Barbu, Viorel, Irena Lasiecka, and Mohammad A. Rammaha. *On nonlinear wave equations with degenerate damping and source terms*, 2571
- Barnard, Roger W., Petros Hadjicostas, and Alexander Yu. Solynin. *The Poincaré metric and isoperimetric inequalities for hyperbolic polygons*, 3905
- Bass, Richard F. *See Athreya, Siva R.*
- Bass, Richard F., and Moritz Kassmann. *Harnack inequalities for non-local operators of variable order*, 837
- Belkhirat, Abdelhadi, Athanase Papadopoulos, and Marc Troyanov. *Thurston's weak metric on the Teichmüller space of the torus*, 3311
- Benjamini, Itai, Noam Berger, Christopher Hoffman, and Elchanan Mossel. *Mixing times of the biased card shuffling and the asymmetric exclusion process*, 3013
- Bennett, Michael A. *Powers in recurrence sequences: Pell equations*, 1675
- Bennett, Michael A., and Patrick Ingram. *Torsion subgroups of elliptic curves in short Weierstrass form*, 3325
- Bergamasco, Adalberto P., and Sérgio Luís Zani. *Prescribing analytic singularities for solutions of a class of vector fields on the torus*, 4159
- Berger, Arno, Leonid A. Bunimovich, and Theodore P. Hill. *One-dimensional dynamical systems and Benford's law*, 197
- Berger, Noam. *See Benjamini, Itai*
- Berkovich, Alexander, and S. Ole Warnaar. *Positivity preserving transformations for q -binomial coefficients*, 2291
- Berndt, Bruce C., and Paul R. Bialek. *On the power series coefficients of certain quotients of Eisenstein series*, 4379
- Bertoldi, Marcello, and Luca Lorenzi. *Estimates of the derivatives for parabolic operators with unbounded coefficients*, 2627
- Bertolim, M. A., M. P. Mello, and K. A. de Rezende. *Poincaré-Hopf inequalities*, 4091
- Bialek, Paul R. *See Berndt, Bruce C.*
- Bieske, Thomas, and Luca Capogna. *The Aronsson-Euler equation for absolutely minimizing Lipschitz extensions with respect to Carnot-Carathéodory metrics*, 795
- Biliotti, Leonardo, and Anna Gori. *Coisotropic and polar actions on complex Grassmannians*, 1731
- Björner, Anders, Michelle L. Wachs, and Volkmar Welker. *Poset fiber theorems*, 1877

- Blocki, Zbigniew. *The Bergman metric and the pluricomplex Green function*, 2613
- Blok, W. J., and C. J. van Alten. *On the finite embeddability property for residuated ordered groupoids*, 4141
- Bocci, C., G. Dalzotto, R. Notari, and M. L. Spreafico. *An iterative construction of Gorenstein ideals*, 1417
- Boyer, Steve, Marc Culler, Peter B. Shalen, and Xingru Zhang. *Characteristic subsurfaces and Dehn filling*, 2389
- Brenti, Francesco. *See Adin, Ron M.*
- Bruce, J. W., and F. Tari. *Dupin indicatrices and families of curve congruences*, 267
- Brudnyi, Alexander. *Graphs of zeros of analytic families*, 1859
- Bruin, Nils, and E. Victor Flynn. *Towers of 2-covers of hyperelliptic curves*, 4329
- Bruner, Robert R., Lê M. Hà, and Nguyễn H. V. Hưng. *On the behavior of the algebraic transfer*, 473
- Bubenik, Peter. *Free and semi-inert cell attachments*, 4533
- Buch, Anders Skovsted. *Quantum cohomology of partial flag manifolds*, 443
- Buhler, J., and Z. Reichstein. *Symmetric functions and the phase problem in crystallography*, 2353
- Buium, Alexandru. *Geometry of Fermat adeles*, 901
- Bunimovich, Leonid A. *See Berger, Arno*
- Byun, Sun-Sig. *Elliptic equations with BMO coefficients in Lipschitz domains*, 1025
- Cáceres, María J., J. A. Carrillo, and G. Toscani. *Long-time behavior for a nonlinear fourth-order parabolic equation*, 1161
- Camerlo, Riccardo, Udayan B. Darji, and Alberto Marcone. *Classification problems in continuum theory*, 4301
- Capogna, Luca. *See Bieske, Thomas*
- Carrillo, J. A. *See Cáceres, María J.*
- Casacuberta, Carles, and Javier J. Gutiérrez. *Homotopical localizations of module spectra*, 2753
- Catoiu, Stefan. *See Ash, J. Marshall*
- Chen, Shuxing. *Stability of transonic shock fronts in two-dimensional Euler systems*, 287
- Chen, Xinfu, Shangbin Cui, and Avner Friedman. *A hyperbolic free boundary problem modeling tumor growth: Asymptotic behavior*, 4771
- Cheng, Chong-Qing. *Minimal invariant tori in the resonant regions for nearly integrable Hamiltonian systems*, 5067
- Clelland, Jeanne N., and Thomas A. Ivey. *Parametric Bäcklund transformations I: Phenomenology*, 1061
- Cohen, Daniel C., and Peter Orlik. *Gauss-Manin connections for arrangements, III Formal connections*, 3031
- Colmenárez Rodríguez, Wilmer J. *Nonuniform hyperbolicity for singular hyperbolic attractors*, 4131
- Cui, Shangbin. *See Chen, Xinfu*
- Culler, Marc. *See Boyer, Steve*
- Curto, Raúl E., and Woo Young Lee. *k-hyponormality of finite rank perturbations of unilateral weighted shifts*, 4719
- Dalzotto, G. *See Bocci, C.*
- Dancer, E. N. *Stable and finite Morse index solutions on \mathbf{R}^n or on bounded domains with small diffusion*, 1225
- Dani, S. G., and Meera G. Mainkar. *Anosov automorphisms on compact nilmanifolds associated with graphs*, 2235
- Daniilidis, A. *See Aussel, D.*
- Darji, Udayan B. *See Camerlo, Riccardo*
- Das, Manav. *Hausdorff measures, dimensions and mutual singularity*, 4249
- Dávila, Juan, and Marcelo Montenegro. *Existence and asymptotic behavior for a singular parabolic equation*, 1801
- DeBlassie, Dante, and Robert Smits. *Brownian motion in twisted domains*, 1245
- Del Corso, Ilaria, and Roberto Dvornicich. *On Ore's conjecture and its developments*, 3813
- Denisov, S., and S. Kupin. *On the singular spectrum of Schrödinger operators with decaying potential*, 1525
- Deutsch, Frank. *See Bakan, Andrew*

- Devinatz, Ethan S. *A Lyndon-Hochschild-Serre spectral sequence for certain homotopy fixed point spectra*, 129
- De Volder, Cindy, and Antonio Laface. *Degeneration of linear systems through fat points on $K3$ surfaces*, 3673
- DeVos, Matt, Luis Goddyn, Bojan Mohar, Dirk Vertigan, and Xuding Zhu. *Coloring-flow duality of embedded graphs*, 3993
- Diacu, Florin, Ernesto Pérez-Chavela, and Manuele Santoprete. *Saari's conjecture for the collinear n -body problem*, 4215
- Dijkstra, Jan J. *On homeomorphism groups of Menger continua*, 2665
- Dilcher, Karl, and Kenneth B. Stolarsky. *Resultants and discriminants of Chebyshev and related polynomials*, 965
- Dokuchaev, M., and R. Exel. *Associativity of crossed products by partial actions, enveloping actions and partial representations*, 1931
- Donnelly, Harold. *Compactness of isospectral potentials*, 1717
- Dritschel, Michael A., and Hugo J. Woerdeman. *Outer factorizations in one and several variables*, 4661
- Druet, Olivier, and Emmanuel Hebey. *Blow-up examples for second order elliptic PDEs of critical Sobolev growth*, 1915
- Dvornicich, Roberto. *See Del Corso, Ilaria*
- Dyachenko, M. I., and D. Waterman. *Convergence of double Fourier series and W -classes*, 397
- Ebmeyer, Carsten, and José Miguel Urbano. *The smoothing property for a class of doubly nonlinear parabolic equations*, 3239
- Eisworth, Todd, and Peter Nyikos. *First countable, countably compact spaces and the continuum hypothesis*, 4269
- Endo, Hisaaki, and Seiji Nagami. *Signature of relations in mapping class groups and non-holomorphic Lefschetz fibrations*, 3179
- Erdélyi, Tamás, and Harvey Friedman. *The number of certain integral polynomials and nonrecursive sets of integers, Part 1*, 999
- Etgü, Tolga, David McKinnon, and B. Doug Park. *Lagrangian tori in homotopy elliptic surfaces*, 3757
- Everitt, W. N., L. Markus, and M. Plum. *An unusual self-adjoint linear partial differential operator*, 1303
- Exel, R. *See Dokuchaev, M.*
- Fang, Fuquan, and Sérgio Mendonça. *Complex immersions in Kähler manifolds of positive holomorphic k -Ricci curvature*, 3725
- Farley, Daniel S. *Homological and finiteness properties of picture groups*, 3567
- Farmer, David W., and Robert C. Rhoades. *Differentiation evens out zero spacings*, 3789
- Fedotov, Alexander, and Frédéric Klopp. *On the absolutely continuous spectrum of one-dimensional quasi-periodic Schrödinger operators in the adiabatic limit*, 4481
- Fenley, Sérgio R. *Regulating flows, topology of foliations and rigidity*, 4957
- Fleischmann, Peter, Gregor Kemper, and R. James Shank. *Depth and cohomological connectivity in modular invariant theory*, 3605
- Flynn, E. Victor. *See Bruin, Nils*
- Foote, Richard. *An algebraic approach to multiresolution analysis*, 5031
- Ford, Kevin. *On Bombieri's asymptotic sieve*, 1663
- Foreman, Matthew, and Stevo Todorovic. *A new Löwenheim-Skolem theorem*, 1693
- Freiman, Gregory A., and Boris L. Granovsky. *Clustering in coagulation-fragmentation processes, random combinatorial structures and additive number systems: Asymptotic formulae and limiting laws*, 2483
- Friedman, Avner. *See Chen, Xinfu*
- Friedman, Harvey. *See Erdélyi, Tamás*
- Friedman, Harvey M. *The number of certain integral polynomials and nonrecursive sets of integers, Part 2*, 1013
- Fuchs, Laszlo, William Heinzer, and Bruce Olberding. *Commutative ideal theory without finiteness conditions: Primal ideals*, 2771
- Fuglede, Bent. *The Dirichlet problem for harmonic maps from Riemannian polyhedra to spaces of upper bounded curvature*, 757
- Fulman, Jason. *Stein's method and Plancherel measure of the symmetric group*, 555

- Garaev, M. Z. *Upper bounds for the number of solutions of a Diophantine equation*, 2527
- Gasparis, Ioannis. *Operators on $C(K)$ spaces preserving copies of Schreier spaces*, 1
- Geiß, Christof, and Jan Schröer. *Extension-orthogonal components of preprojective varieties*, 1953
- Goddyn, Luis. *See DeVos, Matt*
- Goebel, Rafal. *Duality and uniqueness of convex solutions to stationary Hamilton-Jacobi equations*, 2187
- Goldstein, Daniel, Robert M. Guralnick, and I. M. Isaacs. *Inequalities for finite group permutation modules*, 4017
- Goldstern, Martin, and Saharon Shelah. *Clones from creatures*, 3525
- Gori, Anna. *See Biliotti, Leonardo*
- Gornet, Ruth. *Riemannian nilmanifolds and the trace formula*, 4445
- Gourdeau, Frédéric, B. E. Johnson, and Michael C. White. *The cyclic and simplicial cohomology of $l^1(\mathbf{N})$* , 5097
- Goward, Russell A., Jr. *A simple algorithm for principalization of monomial ideals*, 4805
- Graña, Matías, and Vladimir Turaev. *Knot theory for self-indexed graphs*, 535
- Granovsky, Boris L. *See Freiman, Gregory A.*
- Grines, V., and E. Zhuzhoma. *On structurally stable diffeomorphisms with codimension one expanding attractors*, 617
- Guan, Daniel. *On compact symplectic manifolds with Lie group symmetries*, 3359
- Guivarc'h, Yves, and Riddhi Shah. *Asymptotic properties of convolution operators and limits of triangular arrays on locally compact groups*, 3683
- Gulisashvili, Archil. *Nonautonomous Kato classes of measures and Feynman-Kac propagators*, 4607

PROVIDENCE, RHODE ISLAND USA

ISSN 0002-9947

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

Submission information. See **Information for Authors** at the end of this issue.

Publisher Item Identifier. The Publisher Item Identifier (PII) appears at the top of the first page of each article published in this journal. This alphanumeric string of characters uniquely identifies each article and can be used for future cataloging, searching, and electronic retrieval.

Postings to the AMS website. Articles are posted to the AMS website individually after proof is returned from authors and before appearing in an issue.

Subscription information. *Transactions of the American Mathematical Society* is published monthly. Beginning in January 1996 *Transactions* is accessible from www.ams.org/journals/. Subscription prices for Volume 357 (2005) are as follows: for paper delivery, US\$1628 list, US\$1302 institutional member, US\$1465 corporate member; for electronic delivery, US\$1465 list, US\$1172 institutional member, US\$1319 corporate member. Upon request, subscribers to paper delivery of this journal are also entitled to receive electronic delivery. If ordering the paper version, add US\$39 for surface delivery outside the United States and India; US\$50 to India. Expedited delivery to destinations in North America is US\$48; elsewhere US\$144. For paper delivery a late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year.

Back number information. For back issues see www.ams.org/bookstore.

Subscriptions and orders should be addressed to the American Mathematical Society, P.O. Box 845904, Boston, MA 02284-5904 USA. *All orders must be accompanied by payment.* Other correspondence should be addressed to 201 Charles Street, Providence, RI 02904-2294 USA.

Copying and reprinting. Material in this journal may be reproduced by any means for educational and scientific purposes without fee or permission with the exception of reproduction by services that collect fees for delivery of documents and provided that the customary acknowledgment of the source is given. This consent does not extend to other kinds of copying for general distribution, for advertising or promotional purposes, or for resale. Requests for permission for commercial use of material should be addressed to the Acquisitions Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA. Requests can also be made by e-mail to reprint-permission@ams.org.

Excluded from these provisions is material in articles for which the author holds copyright. In such cases, requests for permission to use or reprint should be addressed directly to the author(s). (Copyright ownership is indicated in the notice in the lower right-hand corner of the first page of each article.)

Transactions of the American Mathematical Society is published monthly by the American Mathematical Society at 201 Charles Street, Providence, RI 02904-2294 USA. Periodicals postage is paid at Providence, Rhode Island. Postmaster: Send address changes to *Transactions*, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA.

TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY

CONTENTS

Vol. 357, No. 1

Whole No. 836

January 2005

Ioannis Gasparis , Operators on $C(K)$ spaces preserving copies of Schreier spaces	1
P. D. Humke and M. Laczkovich , Symmetrically approximately continuous functions, consistent density theorems, and Fubini type inequalities	31
Jian Song , The α -invariant on certain surfaces with symmetry groups	45
M. J. Saia and W. A. Zuniga-Galindo , Local zeta function for curves, non-degeneracy conditions and Newton polygons	59
Ulrich Kohlenbach , Some logical metatheorems with applications in functional analysis	89
Ethan S. Devinatz , A Lyndon-Hochschild-Serre spectral sequence for certain homotopy fixed point spectra	129
Christine Laurent-Thiébaud and Mei-Chi Shaw , Boundary Hölder and L^p estimates for local solutions of the tangential Cauchy-Riemann equation	151
Christos A. Athanasiadis , On a refinement of the generalized Catalan numbers for Weyl groups	179
Arno Berger, Leonid A. Bunimovich, and Theodore P. Hill , One-dimensional dynamical systems and Benford's law	197
R. Lawther , Elements of specified order in simple algebraic groups	221
Ugur G. Abdulla , Well-posedness of the Dirichlet problem for the non-linear diffusion equation in non-smooth domains	247
J. W. Bruce and F. Tari , Dupin indicatrices and families of curve congruences	267
Shuxing Chen , Stability of transonic shock fronts in two-dimensional Euler systems	287
Morton E. Harris , Glauberman-Watanabe corresponding p -blocks of finite groups with normal defect groups are Morita equivalent	309
Hong-Quan Li , Estimations L^p des fonctions du Laplacien sur les variétés cuspidales	337
Ku Yong Ha, Jong Bum Lee, and Kyung Bai Lee , Maximal holonomy of infra-nilmanifolds with 2-dimensional quaternionic Heisenberg geometry	355
José María Martell, Carlos Pérez, and Rodrigo Trujillo-González , Lack of natural weighted estimates for some singular integral operators	385
M. I. Dyachenko and D. Waterman , Convergence of double Fourier series and W -classes	397
Jigen Peng and Zongben Xu , A novel dual approach to nonlinear semigroups of Lipschitz operators	409

Bernd Ulrich and Wolmer V. Vasconcelos, On the complexity of the integral closure	425
Anders Skovsted Buch, Quantum cohomology of partial flag manifolds .	443
Greg Kuperberg, A tracial quantum central limit theorem	459
Robert R. Bruner, Lê M. Hà, and Nguyễn H. V. Hưng, On the behavior of the algebraic transfer	473
John R. Klein, Moduli of suspension spectra	489
Eric Babson and Patricia Hersh, Discrete Morse functions from lexicographic orders	509
Matfias Graña and Vladimir Turaev, Knot theory for self-indexed graphs	535
Jason Fulman, Stein's method and Plancherel measure of the symmetric group	555
Robert S. Strichartz, Analysis on products of fractals	571
V. Grines and E. Zhuzhoma, On structurally stable diffeomorphisms with codimension one expanding attractors	617
Wen Huang and Xiangdong Ye, Dynamical systems disjoint from any minimal system	669
Nets Hawk Katz and Nataša Pavlović, Finite time blow-up for a dyadic model of the Euler equations	695
Osamu Iyama, The relationship between homological properties and representation theoretic realization of artin algebras	709
Douglas Hanes, On the Cohen-Macaulay modules of graded subrings	735
Bent Fuglede, The Dirichlet problem for harmonic maps from Riemannian polyhedra to spaces of upper bounded curvature	757
Ruth Kellerhals, A note on the hyperbolic 4-orbifold of minimal volume .	793
Thomas Bieske and Luca Capogna, The Aronsson-Euler equation for absolutely minimizing Lipschitz extensions with respect to Carnot-Carathéodory metrics	795
Zhi-Guo Liu, A theta function identity and its implications	825
Richard F. Bass and Moritz Kassmann, Harnack inequalities for non-local operators of variable order	837

Michael J. Miller, A quadratic approximation to the Sendov radius near the unit circle	851
V. Gutlyanskiĭ, O. Martio, T. Sugawa, and M. Vuorinen, On the degenerate Beltrami equation	875
Alexandru Buium, Geometry of Fermat adeles	901
Karl Dilcher and Kenneth B. Stolarsky, Resultants and discriminants of Chebyshev and related polynomials	965
Hui Li, On the construction of certain 6-dimensional symplectic manifolds with Hamiltonian circle actions	983

Tamás Erdélyi and Harvey Friedman , The number of certain integral polynomials and nonrecursive sets of integers, Part 1	999
Harvey M. Friedman , The number of certain integral polynomials and nonrecursive sets of integers, Part 2	1013
Sun-Sig Byun , Elliptic equations with BMO coefficients in Lipschitz domains	1025
Andreas Schweizer , On the p^e -torsion of elliptic curves and elliptic surfaces in characteristic p	1047
Jeanne N. Clelland and Thomas A. Ivey , Parametric Bäcklund transformations I: Phenomenology	1061
Yuji Kobayashi , Gröbner bases of associative algebras and the Hochschild cohomology	1095
Edward Odell and Hans-Olav Tylli , Weakly compact approximation in Banach spaces	1125
María J. Cáceres, J. A. Carrillo, and G. Toscani , Long-time behavior for a nonlinear fourth-order parabolic equation	1161
Gabriel Katz , Harmonic maps $M^3 \rightarrow S^1$ and 2-cycles, realizing the Thurston norm	1177
E. N. Dancer , Stable and finite Morse index solutions on \mathbf{R}^n or on bounded domains with small diffusion	1225
Dante DeBlassie and Robert Smits , Brownian motion in twisted domains	1245

Vol. 357, No. 4

Whole No. 839

April 2005

D. Aussel, A. Daniilidis, and L. Thibault , Subsmooth sets: Functional characterizations and related concepts	1275
W. N. Everitt, L. Markus, and M. Plum , An unusual self-adjoint linear partial differential operator	1303
Shin Kiriki and Teruhiko Soma , Parameter-shifted shadowing property for geometric Lorenz attractors	1325
Donald Yau , On adic genus and lambda-rings	1341
Adam Nyman , Serre duality for non-commutative \mathbb{P}^1 -bundles	1349
C. Bocci, G. Dalzotto, R. Notari, and M. L. Spreafico , An iterative construction of Gorenstein ideals	1417
Megumi Harada and Nicholas Proudfoot , Hyperpolygon spaces and their cores	1445
Zengjian Lou and Alan McIntosh , Hardy space of exact forms on \mathbb{R}^N .	1469
Saad Baaĵ, Georges Skandalis, and Stefaan Vaes , Measurable Kac cohomology for bicrossed products	1497
S. Denisov and S. Kupin , On the singular spectrum of Schrödinger operators with decaying potential	1525
Jiyeon Suh , A sharp weak type (p, p) inequality ($p > 2$) for martingale transforms and other subordinate martingales	1545

Yong Li and Yingfei Yi , Persistence of lower dimensional tori of general types in Hamiltonian systems	1565
Roger Howe, Eng-Chye Tan, and Jeb F. Willenbring , Stable branching rules for classical symmetric pairs	1601
Xiangdong Xie , The Tits boundary of a CAT(0) 2-complex	1627
Kevin Ford , On Bombieri's asymptotic sieve	1663
Michael A. Bennett , Powers in recurrence sequences: Pell equations	1675

Vol. 357, No. 5

Whole No. 840

May 2005

Matthew Foreman and Stevo Todorćević , A new Löwenheim-Skolem theorem	1693
Harold Donnelly , Compactness of isospectral potentials	1717
Leonardo Biliotti and Anna Gori , Coisotropic and polar actions on complex Grassmannians	1731
Wen-Xiu Ma and Yuncheng You , Solving the Korteweg-de Vries equation by its bilinear form: Wronskian solutions	1753
Bernard Badzioch , From Γ -spaces to algebraic theories	1779
Juan Dávila and Marcelo Montenegro , Existence and asymptotic behavior for a singular parabolic equation	1801
Chris Odden , The baseleaf preserving mapping class group of the universal hyperbolic solenoid	1829
Alexander Brudnyi , Graphs of zeros of analytic families	1859
Anders Björner, Michelle L. Wachs, and Volkmar Welker , Poset fiber theorems	1877
Maria Alberich-Carramiñana , Plane Cremona maps, exceptional curves and roots	1901
Olivier Druet and Emmanuel Hebey , Blow-up examples for second order elliptic PDEs of critical Sobolev growth	1915
M. Dokuchaev and R. Exel , Associativity of crossed products by partial actions, enveloping actions and partial representations	1931
Christof Geiß and Jan Schröer , Extension-orthogonal components of preprojective varieties	1953
Ivan Soprounov , Toric residue and combinatorial degree	1963
Jing Zhang , Threefolds with vanishing Hodge cohomology	1977
Emily Hamilton , Finite quotients of rings and applications to subgroup separability of linear groups	1995
Adam S. Sikora , Cut numbers of 3-manifolds	2007
S. Kaliszewski and John Quigg , Mansfield's imprimitivity theorem for full crossed products	2021
Li-Chien Shen , On the theory of elliptic functions based on ${}_2F_1(\frac{1}{3}, \frac{2}{3}; \frac{1}{2}; z)$	2043
Mikhail A. Lifshits and Werner Linde , Small deviations of weighted fractional processes and average non-linear approximation	2059
Jing-Song Huang and Marko Tadić , Generalized spherical functions on reductive p -adic groups	2081

Xiaosheng Li , The limit sets of Schottky quasiconformal groups are uniformly perfect	2119
M. Tidriri , Analysis of a coupled system of kinetic equations and conservation laws: Rigorous derivation and existence theory via defect measures	2133
Robert J. Archbold and Eberhard Kaniuth , Stable rank and real rank for some classes of group C^* -algebras	2165
Rafal Goebel , Duality and uniqueness of convex solutions to stationary Hamilton-Jacobi equations	2187
Xiaonan Ma , Orbifolds and analytic torsions	2205
S. G. Dani and Meera G. Mankar , Anosov automorphisms on compact nilmanifolds associated with graphs	2235
Joana Ventura , Homological algebra for the representation Green functor for abelian groups	2253
Alexander Berkovich and S. Ole Warnaar , Positivity preserving transformations for q -binomial coefficients	2291
J. Buhler and Z. Reichstein , Symmetric functions and the phase problem in crystallography	2353
W. Willems , On degrees of irreducible Brauer characters	2379
Steve Boyer, Marc Culler, Peter B. Shalen, and Xingru Zhang , Characteristic subsurfaces and Dehn filling	2389
Andrei K. Lerner , Weighted rearrangement inequalities for local sharp maximal functions	2445
Thomas Keilen , Smoothness of equisingular families of curves	2467
Gregory A. Freiman and Boris L. Granovsky , Clustering in coagulation-fragmentation processes, random combinatorial structures and additive number systems: Asymptotic formulae and limiting laws	2483
Tetsuya Takahashi , On some constants in the supercuspidal characters of GL_l , l a prime $\neq p$	2509
M. Z. Garaev , Upper bounds for the number of solutions of a Diophantine equation	2527

L. Brian Lawrence , A rigid subspace of the real line whose square is a homogeneous subspace of the plane	2535

Editorial Information

To be published in the *Transactions*, a paper must be correct, new, nontrivial, and significant. Further, it must be well written and of interest to a substantial number of mathematicians. Piecemeal results, such as an inconclusive step toward an unproved major theorem or a minor variation on a known result, are in general not acceptable for publication.

Papers submitted to the *Transactions* should exceed 10 published journal pages in length. Shorter papers may be submitted to the *Proceedings of the American Mathematical Society*. Published pages are the same size as those generated in the style files provided for $\mathcal{A}\mathcal{M}\mathcal{S}$ - \LaTeX or $\mathcal{A}\mathcal{M}\mathcal{S}$ - \TeX .

Information on the backlog for this journal can be found on the AMS website starting from <http://www.ams.org/tran>.

In an effort to make articles available as quickly as possible, articles are posted to the AMS website individually after proof is returned from authors and before appearing in an issue.

A Consent to Publish and Copyright Agreement is required before a paper will be published in this journal. After a paper is accepted for publication, the Providence office will send a Consent to Publish and Copyright Agreement to all authors of the paper. By submitting a paper to this journal, authors certify that the results have not been submitted to nor are they under consideration for publication by another journal, conference proceedings, or similar publication.

Information for Authors

Initial submission. Two copies of the paper should be sent directly to the appropriate Editor and the author should keep a copy. *If an editor is agreeable*, an electronic manuscript prepared in \TeX or \LaTeX may be submitted by pointing to an appropriate URL on a preprint or e-print server.

The first page must consist of a *descriptive title*, followed by an *abstract* that summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The *descriptive title* should be short, but informative; useless or vague phrases such as “some remarks about” or “concerning” should be avoided. The *abstract* should be at least one complete sentence, and at most 300 words. Included with the footnotes to the paper should be the 2000 *Mathematics Subject Classification* representing the primary and secondary subjects of the article. The classifications are accessible from www.ams.org/msc/. The list of classifications is also available in print starting with the 1999 annual index of *Mathematical Reviews*. The Mathematics Subject Classification footnote may be followed by a list of *key words and phrases* describing the subject matter of the article and taken from it. Journal abbreviations used in bibliographies are listed in the latest *Mathematical Reviews* annual index. The series abbreviations are also accessible from www.ams.org/publications/. To help in preparing and verifying references, the AMS offers MR Lookup, a Reference Tool for Linking, at www.ams.org/mrlookup/. When the manuscript is submitted, authors should supply the editor with electronic addresses if available. These will be printed after the postal address at the end of each article.

Electronically prepared manuscripts. The AMS encourages electronically prepared manuscripts, with a strong preference for $\mathcal{A}\mathcal{M}\mathcal{S}$ - \LaTeX . To this end, the Society has prepared $\mathcal{A}\mathcal{M}\mathcal{S}$ - \LaTeX author packages for each AMS publication. Author packages include instructions for preparing electronic manuscripts, the *AMS Author Handbook*, samples, and a style file that generates the particular design specifications of that publication series. Articles properly prepared using the $\mathcal{A}\mathcal{M}\mathcal{S}$ - \LaTeX style file and the `\label` and `\ref` commands automatically enable extensive intra-document linking to the bibliography and other elements of the article for searching electronically on the Web. Because linking must often be added manually to electronically prepared manuscripts in other forms of \TeX , using $\mathcal{A}\mathcal{M}\mathcal{S}$ - \LaTeX also reduces the amount of technical intervention once the files are received by the AMS. This results in fewer errors in processing and saves the author proofreading time. $\mathcal{A}\mathcal{M}\mathcal{S}$ - \LaTeX papers also move more efficiently through the production stream, helping to minimize publishing costs.

$\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ is the highly preferred format of $\mathcal{T}\mathcal{E}\mathcal{X}$, but author packages are also available in $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{T}\mathcal{E}\mathcal{X}$. Those authors who make use of these style files from the beginning of the writing process will further reduce their own efforts. Manuscripts prepared electronically in $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ or plain $\mathcal{T}\mathcal{E}\mathcal{X}$ are normally not acceptable due to the high amount of technical time required to insure that the file will run properly through the AMS in-house production system. $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ users will find that $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ is the same as $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ with additional commands to simplify the typesetting of mathematics, and users of plain $\mathcal{T}\mathcal{E}\mathcal{X}$ should have the foundation for learning $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$.

Authors may retrieve an author package from the AMS website starting from www.ams.org/tex/ or via FTP to [ftp.ams.org](ftp://ftp.ams.org) (login as `anonymous`, enter username as password, and type `cd pub/author-info`). The *AMS Author Handbook* and the *Instruction Manual* are available in PDF format following the author packages link from www.ams.org/tex/. The author package can also be obtained free of charge by sending email to pub@ams.org (Internet) or from the Publication Division, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA. When requesting an author package, please specify $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ or $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{T}\mathcal{E}\mathcal{X}$, Macintosh or IBM (3.5) format, and the publication in which your paper will appear. Please be sure to include your complete mailing address.

At the time of submission, authors should indicate if the paper has been prepared using $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ or $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{T}\mathcal{E}\mathcal{X}$ and provide the Editor with a paper manuscript that matches the electronic manuscript. The final version of the electronic manuscript should be sent to the Providence office immediately after the paper has been accepted for publication. The author should also send the final version of the paper manuscript to the Editor, who will forward a copy to the Providence office. Editors will require authors to send their electronically prepared manuscripts to the Providence office in a timely fashion. Electronically prepared manuscripts can be submitted via the web at www.ams.org/submit-book-journal/, sent via email to pub-submit@ams.org (Internet), or sent on diskette to the Electronic Prepress Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA. When sending a manuscript electronically via email or diskette, please be sure to include a message indicating in which publication the paper has been accepted. No corrections will be accepted electronically. Authors must mark their changes on their proof copies and return them to the Providence office. Complete instructions on how to send files are included in the author package.

Electronic graphics. Comprehensive instructions on preparing graphics are available starting from www.ams.org/jourhtml/authors.html. A few of the major requirements are given here.

Submit files for graphics as EPS (Encapsulated PostScript) files. This includes graphics originated via a graphics application as well as scanned photographs or other computer-generated images. If this is not possible, TIFF files are acceptable as long as they can be opened in Adobe Photoshop or Illustrator. No matter what method was used to produce the graphic, it is necessary to provide a paper copy to the AMS.

Authors using graphics packages for the creation of electronic art should also avoid the use of any lines thinner than 0.5 points in width. Many graphics packages allow the user to specify a “hairline” for a very thin line. Hairlines often look acceptable when proofed on a typical laser printer. However, when produced on a high-resolution laser imagesetter, hairlines become nearly invisible and will be lost entirely in the final printing process.

Screens should be set to values between 15% and 85%. Screens which fall outside of this range are too light or too dark to print correctly. Variations of screens within a graphic should be no less than 10%.

AMS policy on making changes to articles after posting. Articles are posted to the AMS website individually after proof is returned from authors and before appearing in an issue. To preserve the integrity of electronically published articles, once an article is individually posted to the AMS website but not yet in an issue, changes cannot be made in place in the paper. However, an “Added after posting” section may be added to the paper right before the References when there is a critical error in the content of the paper. The “Added after posting” section gives the author an opportunity to correct this type

of critical error before the article is put into an issue for printing and before it is then reposted with the issue. The “Added after posting” section remains a permanent part of the paper. The AMS does not keep author-related information, such as affiliation, current address, and email address, up to date after a paper is initially posted.

Once the article is assigned to an issue, even if the issue has not yet been posted to the AMS website, corrections may be made to the paper by submitting a traditional errata article to the Editor. The errata article will appear in a future print issue and will link back and forth on the web to the original article online.

Secure manuscript tracking on the Web and via email. Authors can track their manuscripts through the AMS journal production process using the personal AMS ID and Article ID printed in the upper right-hand corner of the Consent to Publish form sent to each author who publishes in AMS journals. Access to the tracking system is available from www.ams.org/mstrack/ or via email sent to mstrack-query@ams.org. To access by email, on the subject line of the message simply enter the AMS ID and Article ID. To track more than one manuscript by email, choose one of the Article IDs and enter the AMS ID and the Article ID followed by the word *all* on the subject line. An explanation of each production step is provided on the web through links from the manuscript tracking screen. Questions can be sent to tran-query@ams.org.

T_EX files available. Beginning with the January 1992 issue of the *Bulletin* and the January 1996 issues of *Transactions*, *Proceedings*, *Mathematics of Computation*, and the *Journal of the AMS*, T_EX files can be downloaded from the AMS website, starting from www.ams.org/journals/. Authors without Web access may request their files at the address given below after the article has been published. For *Bulletin* papers published in 1987 through 1991 and for *Transactions*, *Proceedings*, *Mathematics of Computation*, and the *Journal of the AMS* papers published in 1987 through 1995, T_EX files are available upon request for authors without Web access by sending email to file-request@ams.org or by contacting the Electronic Prepress Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA. The request should include the title of the paper, the name(s) of the author(s), the name of the publication in which the paper has or will appear, and the volume and issue numbers if known. The T_EX file will be sent to the author making the request after the article goes to the printer. If the requestor can receive Internet email, please include the email address to which the file should be sent. Otherwise please indicate a diskette format and postal address to which a disk should be mailed. **Note:** Because T_EX production at the AMS sometimes requires extra fonts and macros that are not yet publicly available, T_EX files cannot be guaranteed to run through the author’s version of T_EX without errors. The AMS regrets that it cannot provide support to eliminate such errors in the author’s T_EX environment.

Inquiries. Any inquiries concerning a paper that has been accepted for publication that cannot be answered via the manuscript tracking system mentioned above should be sent to tran-query@ams.org or directly to the Electronic Prepress Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA.

Editors

The traditional method of submitting a paper is to send two hard copies to the appropriate editor. Subjects, and the editors associated with them, are listed below.

In principle the Transactions welcomes electronic submissions, and some of the editors, those whose names appear below with an asterisk (*), have indicated that they prefer them. Editors reserve the right to request hard copies after papers have been submitted electronically. Authors are advised to make preliminary inquiries to editors as to whether they are likely to be able to handle submissions in a particular electronic form.

MEMOIRS OF THE AMERICAN MATHEMATICAL SOCIETY

Memoirs is devoted to research in pure and applied mathematics of the same nature as *Transactions*. An issue consists of one or more separately bound research tracts for which the authors provide reproduction copy. Papers intended for *Memoirs* should normally be at least 80 pages in length. *Memoirs* has the same editorial committee as *Transactions*; so such papers should be addressed to one of the editors listed above.
