## Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

**Submission information.** See **Information for Authors** at the end of this issue.

**Publisher Item Identifier.** The Publisher Item Identifier (PII) appears at the top of the first page of each article published in this journal. This alphanumeric string of characters uniquely identifies each article and can be used for future cataloging, searching, and electronic retrieval.

**Postings to the AMS website.** Articles are posted to the AMS website individually after proof is returned from authors and before appearing in an issue.

**Subscription information.** *Transactions of the American Mathematical Society* is published monthly. Beginning in January 1996 *Transactions* is accessible from [www.ams.org/journals/](http://www.ams.org/journals/). Subscription prices for Volume 359 (2007) are as follows: for paper delivery, US\$1744 list, US\$1395 institutional member, US\$1570 corporate member; for electronic delivery, US\$1570 list, US\$1256 institutional member, US\$1413 corporate member. Upon request, subscribers to paper delivery of this journal are also entitled to receive electronic delivery. If ordering the paper version, add US\$49 for surface delivery outside the United States and India; US\$53 to India. Expedited delivery to destinations in North America is US\$79; elsewhere US\$144. For paper delivery a late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year.

**Back number information.** For back issues see [www.ams.org/bookstore](http://www.ams.org/bookstore).

Subscriptions and orders should be addressed to the American Mathematical Society, P.O. Box 845904, Boston, MA 02284-5904 USA. *All orders must be accompanied by payment.* Other correspondence should be addressed to 201 Charles Street, Providence, RI 02904-2294 USA.

**Copying and reprinting.** Material in this journal may be reproduced by any means for educational and scientific purposes without fee or permission with the exception of reproduction by services that collect fees for delivery of documents and provided that the customary acknowledgment of the source is given. This consent does not extend to other kinds of copying for general distribution, for advertising or promotional purposes, or for resale. Requests for permission for commercial use of material should be addressed to the Acquisitions Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA. Requests can also be made by e-mail to [reprint-permission@ams.org](mailto:reprint-permission@ams.org).

Excluded from these provisions is material in articles for which the author holds copyright. In such cases, requests for permission to use or reprint should be addressed directly to the author(s). (Copyright ownership is indicated in the notice in the lower right-hand corner of the first page of each article.)

---

*Transactions of the American Mathematical Society* is published monthly by the American Mathematical Society at 201 Charles Street, Providence, RI 02904-2294 USA. Periodicals postage is paid at Providence, Rhode Island. Postmaster: Send address changes to *Transactions*, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA.

© 2007 by the American Mathematical Society. All rights reserved.

This journal is indexed in *Mathematical Reviews*, *Zentralblatt MATH*, *Science Citation Index*<sup>®</sup>, *Science Citation Index*<sup>TM</sup>-*Expanded*, *ISI Alerting Services*<sup>SM</sup>, *CompuMath Citation Index*<sup>®</sup>, and *Current Contents*<sup>®</sup>/*Physical, Chemical & Earth Sciences*. This journal is archived in *Portico*.

Printed in the United States of America.

⊗ The paper used in this journal is acid-free and falls within the guidelines established to ensure permanence and durability.

TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY

CONTENTS

Vol. 359, No. 12

Whole No. 871

December 2007

|  |      |
|--|------|
| Ingo Witt, Green's formulas for cone differential operators .....  | 5669 |
| Jianguo Cao, Huijun Fan, and François Ledrappier, Martin points on open manifolds of non-positive curvature .....                  | 5697 |
| Graziano Crasta and Annalisa Malusa, The distance function from the boundary in a Minkowski space .....                            | 5725 |
| Yunyan Yang, A sharp form of the Moser-Trudinger inequality on a compact Riemannian surface .....                                  | 5761 |
| Peter Kuchment and Yehuda Pinchover, Liouville theorems and spectral edge behavior on abelian coverings of compact manifolds ..... | 5777 |
| Andrew E. M. Lewis, A single minimal complement for the c.e. degrees .....   | 5817 |
| Rolf Farnsteiner and Andrzej Skowroński, Galois actions and blocks of tame infinitesimal group schemes .....                       | 5867 |
| Sun-Sig Byun and Lihe Wang, Quasilinear elliptic equations with BMO coefficients in Lipschitz domains .....                        | 5899 |
| Thierry De Pauw and Washek F. Pfeffer, The divergence theorem for unbounded vector fields .....                                    | 5915 |
| Nathan Reading, Clusters, Coxeter-sortable elements and noncrossing partitions .....   | 5931 |
| Geoffrey D. Dietz, Big Cohen-Macaulay algebras and seeds .....   | 5959 |
| Janusz R. Prajs and Keith Whittington, Filament sets, aposynthesis, and the decomposition theorem of Jones .....                   | 5991 |
| Megumi Harada and Gregory D. Landweber, Surjectivity for Hamiltonian $G$ -spaces in $K$ -theory .....                              | 6001 |
| William Arveson, Quotients of standard Hilbert modules .....   | 6027 |
| Wayne Raskind and Xavier Xarles, On $p$ -adic intermediate Jacobians .....   | 6057 |
| Jonathan Pakianathan and Ergün Yalçın, Quadratic maps and Bockstein closed group extensions .....                                  | 6079 |
| Anne de Roton, Généralisation du critère de Beurling-Nyman pour l'hypothèse de Riemann .....                                       | 6111 |
| A. Iosevich and M. Rudnev, Erdős distance problem in vector spaces over finite fields .....  | 6127 |
| Bo-Hae Im, Heegner points and Mordell-Weil groups of elliptic curves over large fields .....                                       | 6143 |
| Randall Dougherty, R. Daniel Mauldin, and Andrew Yingst, On homeomorphic Bernoulli measures on the Cantor space .....              | 6155 |
| Xiangdong Ye and Guohua Zhang, Entropy points and applications ..  | 6167 |

## INDEX TO VOLUME 359 (2007)

- Abe, Takuro. *The elementary transformation of vector bundles on regular schemes*, 4285
- Aguilar, Raúl M. *Tangentially positive isometric actions and conjugate points*, 789
- Aimar, H., L. Forzani, and R. Scotto. *On Riesz transforms and maximal functions in the context of Gaussian Harmonic Analysis*, 2137
- Alarcón, Antonio, Leonor Ferrer, and Francisco Martín. *A uniqueness theorem for the singly periodic genus-one helicoid*, 2819
- Albeverio, Sergio, Yeneng Sun, and Jiang-Lun Wu. *Martingale property of empirical processes*, 517
- Aldaz, J. M., and J. Pérez Lázaro. *Functions of bounded variation, the derivative of the one dimensional maximal function, and applications to inequalities*, 2443
- Aledo, Juan A., Rosa M. B. Chaves, and José A. Gálvez. *The Cauchy problem for improper affine spheres and the Hessian one equation*, 4183
- Alekseevsky, Dmitri, and Andreas Arvanitoyeorgos. *Riemannian flag manifolds with homogeneous geodesics*, 3769
- Aleman, Alexandru, Stefan Richter, and Carl Sundberg. *Analytic contractions, nontangential limits, and the index of invariant subspaces*, 3369
- An, Ta Thi Hoai, and Julie Tzu-Yueh Wang. *Unique range sets and uniqueness polynomials for algebraic curves*, 937
- Ando, Yoshifumi. *A homotopy principle for maps with prescribed Thom-Boardman singularities*, 489
- André, Nelly, and Itai Shafrir. *On a singular perturbation problem involving a “circular-well” potential*, 4729
- Ardakov, Konstantin, and Kenneth A. Brown. *Primeness, semiprimeness and localisation in Iwasawa algebras*, 1499
- Ardizzoni, A., C. Menini, and D. Ştefan. *A monoidal approach to splitting morphisms of bialgebras*, 991
- Arouche, A., M. Deffaf, and A. Zeghib. *On Lorentz dynamics: From group actions to warped products via homogeneous spaces*, 1253
- Artal Bartolo, Enrique, Jorge Carmona Ruber, and José Ignacio Cogolludo Agustín. *Effective invariants of braid monodromy*, 165
- Arvanitoyeorgos, Andreas. *See Alekseevsky, Dmitri*
- Arveson, William. *Quotients of standard Hilbert modules*, 6027
- Aschenbrenner, Matthias, and Christopher J. Hillar. *Finite generation of symmetric ideals*, 5171
- Baker, Andrew, and Birgit Richter. *Realizability of algebraic Galois extensions by strictly commutative ring spectra*, 827
- Bangert, Victor, Christopher Croke, Sergei V. Ivanov, and Mikhail G. Katz. *Boundary case of equality in optimal Loewner-type inequalities*, 1
- Bechler, Paweł, Ronald DeVore, Anna Kamont, Guergana Petrova, and Przemysław Wojtaszczyk. *Greedy wavelet projections are bounded on BV*, 619
- Bégout, Pascal, and Ana Vargas. *Mass concentration phenomena for the  $L^2$ -critical nonlinear Schrödinger equation*, 5257
- Bendikov, Alexander, and Patrick Maheux. *Nash type inequalities for fractional powers of non-negative self-adjoint operators*, 3085
- Berchtold, Florian, and Jürgen Hausen. *Cox rings and combinatorics*, 1205
- Bergner, Julia E. *A model category structure on the category of simplicial categories*, 2043
- Berndt, Jürgen, and Hiroshi Tamaru. *Cohomogeneity one actions on noncompact symmetric spaces of rank one*, 3425
- Białkowski, Jerzy, Karin Erdmann, and Andrzej Skowroński. *Deformed preprojective algebras of generalized Dynkin type*, 2625
- Böckle, Gebhard, and Urs Hartl. *Uniformizable families of  $t$ -motives*, 3933
- Bögvad, Rikard, and Rolf Källström. *Geometric interplay between function subspaces and their rings of differential operators*, 2075
- Boivin, André, and Hualiang Zhong. *Completeness of systems of complex exponentials and the Lambert  $W$  functions*, 1829
- Bonfiglioli, Andrea, and Francesco Uguzzoni. *Harnack inequality for non-divergence form operators on stratified groups*, 2463
- Borcea, Julius. *Equilibrium points of logarithmic potentials induced by positive charge distributions. I. Generalized de Bruijn-Springer relations*, 3209

- Borthwick, David, and Alejandro Uribe. *The semiclassical structure of low-energy states in the presence of a magnetic field*, 1875
- Borwein, Peter, and Kwok-Kwong Stephen Choi. *The average norm of polynomials of fixed height*, 923
- Bothmer, Hans-Christian Graf v. *Scrollar syzygies of general canonical curves with genus  $\leq 8$* , 465
- Braden, Tom. *Koszul duality for toric varieties*, 385
- Brandolini, Luca, Allan Greenleaf, and Giancarlo Travaglini.  *$L^p - L^{p'}$  estimates for overdetermined Radon transforms*, 2559
- Breuer, Florian. *CM points on products of Drinfeld modular curves*, 1351
- Broto, C., N. Castellana, J. Grodal, R. Levi, and B. Oliver. *Extensions of  $p$ -local finite groups*, 3791
- Brown, Kenneth A. *See Ardakov, Konstantin*
- Brown, Richard J. *The algebraic entropy of the special linear character automorphisms of a free group on two generators*, 1445
- Brussel, Eric S. *Alternating forms and the Brauer group of a geometric field*, 3025
- Bryc, Włodzimierz, Wojciech Matysiak, and Jacek Wesolowski. *Quadratic harnesses,  $q$ -commutations, and orthogonal martingale polynomials*, 5449
- Buan, Aslak Bakke, Robert J. Marsh, and Idun Reiten. *Cluster-tilted algebras*, 323
- Byun, Sun-Sig, and Lihe Wang. *Quasilinear elliptic equations with BMO coefficients in Lipschitz domains*, 5899
- Caenepeel, S., E. De Groot, and J. Vercruyssen. *Galois theory for comatrix corings: Descent theory, Morita theory, Frobenius and separability properties*, 185
- Calabri, Alberto, Ciro Ciliberto, and Margarida Mendes Lopes. *Numerical Godeaux surfaces with an involution*, 1605
- Candel, Alberto. *Eigenvalue estimates for minimal surfaces in hyperbolic space*, 3567
- Cannarsa, P., P. Cardaliaguet, and E. Giorgieri. *Hölder regularity of the normal distance with an application to a PDE model for growing sandpiles*, 2741
- Cao, Jianguo, Huijun Fan, and François Ledrappier. *Martin points on open manifolds of non-positive curvature*, 5697
- Caporaso, Lucia, Cinzia Casagrande, and Maurizio Cornalba. *Moduli of roots of line bundles on curves*, 3733
- Carayol, Henri, and A. W. Knap. *Limits of discrete series with infinitesimal character zero*, 5611
- Cardaliaguet, P. *See Cannarsa, P.*
- Cardona, Gabriel, and Jordi Quer. *Curves of genus 2 with group of automorphisms isomorphic to  $D_8$  or  $D_{12}$* , 2831
- Carles, Rémi, and Sahbi Keraani. *On the role of quadratic oscillations in nonlinear Schrödinger equations II. The  $L^2$ -critical case*, 33
- Carmona Ruber, Jorge. *See Artal Bartolo, Enrique*
- Casagrande, Cinzia. *See Caporaso, Lucia*
- Castellana, N. *See Broto, C.*
- Castellana, Natália, Juan A. Crespo, and Jérôme Scherer. *Postnikov pieces and  $B\mathbb{Z}/p$ -homotopy theory*, 1099
- Cavalcanti, Gil Ramos. *The Lefschetz property, formality and blowing up in symplectic geometry*, 333
- Ceccherini-Silberstein, Tullio. *Growth and ergodicity of context-free languages II: The linear case*, 605
- Černe, Miran, and Manuel Flores. *Generalized Ahlfors functions*, 671
- Chaves, Rosa M. B. *See Aledo, Juan A.*
- Chen, William Y. C., Eva Y. P. Deng, Rosena R. X. Du, Richard P. Stanley, and Catherine H. Yan. *Crossings and nestings of matchings and partitions*, 1555
- Chen, Xinfu, Yuanwei Qi, and Mingxin Wang. *Singular solutions of parabolic  $p$ -Laplacian with absorption*, 5653
- Chen, Yang, James Griffin, and Mourad E.H. Ismail. *Generalizations of Chebyshev polynomials and polynomial mappings*, 4787
- Choi, Kwok-Kwong Stephen. *See Borwein, Peter*

- Cichoń, J., J. D. Mitchell, and M. Morayne. *Generating continuous mappings with Lipschitz mappings*, 2059
- Ciliberto, Ciro. *See Calabri, Alberto*
- Cirstea, Florica-Corina, and Vicențiu Rădulescu. *Boundary blow-up in nonlinear elliptic equations of Bieberbach–Rademacher type*, 3275
- Cogolludo Agustín, José Ignacio. *See Artal Bartolo, Enrique*
- Collion, Stephane, Emmanuel Hebey, and Michel Vaugon. *Sharp Sobolev inequalities in the presence of a twist*, 2531
- Colpi, Riccardo, and Kent R. Fuller. *Tilting objects in abelian categories and quasitilted rings*, 741
- Conti, Diego, and Simon Salamon. *Generalized Killing spinors in dimension 5*, 5319
- Corcho, A. J., and F. Linares. *Well-posedness for the Schrödinger-Korteweg-de Vries system*, 4089
- Cornalba, Maurizio. *See Caporaso, Lucia*
- Cortez, Maria Isabel, Jean-Marc Gambaudo, and Alejandro Maass. *Rotation topological factors of minimal  $\mathbb{Z}^d$ -actions on the Cantor set*, 2305
- Coulombel, Jean-François, and Thierry Goudon. *The strong relaxation limit of the multidimensional isothermal Euler equations*, 637
- Crasta, Graziano, and Annalisa Malusa. *The distance function from the boundary in a Minkowski space*, 5725
- Crespo, Juan A. *See Castellana, Natàlia*
- Crisp, John, and Bert Wiest. *Quasi-isometrically embedded subgroups of braid and diffeomorphism groups*, 5485
- Croke, Christopher. *See Bangert, Victor*
- Curbera, Guillermo P., and Werner J. Ricker. *Compactness properties of Sobolev imbeddings for rearrangement invariant norms*, 1471
- Dahmen, Sander R. *Counting integral Lamé equations by means of dessins d'enfants*, 909
- Dai, Feng. *Characterizations of function spaces on the sphere using frames*, 567
- Dajczer, M., L. A. Florit, and R. Tojeiro. *The vectorial Ribaucour transformation for submanifolds and applications*, 4977
- Dancer, Andrew, and Andrew Swann. *Toric hypersymplectic quotients*, 1265
- Dancer, E. N., and Shusen Yan. *A new type of concentration solutions for a singularly perturbed elliptic problem*, 1765
- Davis, Donald M. *See Sun, Zhi-Wei*
- Deaconu, Valentin, and Fred Shultz.  *$C^*$ -algebras associated with interval maps*, 1889
- DeBlassie, R. Dante, and Pedro J. Méndez-Hernández.  *$\alpha$ -continuity properties of the symmetric  $\alpha$ -stable process*, 2343
- Deffaf, M. *See Arouche, A.*
- De Groot, E. *See Caenepeel, S.*
- Dekimpe, Karel, and Hannes Pouseele. *The real cohomology of virtually nilpotent groups*, 2539
- Deng, Eva Y. P. *See Chen, William Y. C.*
- De Pauw, Thierry, and Washek F. Pfeffer. *The divergence theorem for unbounded vector fields*, 5915
- Derbez, Pierre. *Nonzero degree maps between closed orientable three-manifolds*, 3887
- Detle, Holger, and Lorens A. Imhof. *Uniform approximation of eigenvalues in Laguerre and Hermite  $\beta$ -ensembles by roots of orthogonal polynomials*, 4999
- Devaney, Robert L., and Sebastian M. Marotta. *The McMullen domain: Rings around the boundary*, 3251
- DeVore, Ronald. *See Bechler, Pawel*
- DeVos, Matt, and Bojan Mohar. *An analogue of the Descartes-Euler formula for infinite graphs and Higuchi's conjecture*, 3287
- Díaz, Antonio, Albert Ruiz, and Antonio Viruel. *All  $p$ -local finite groups of rank two for odd prime  $p$* , 1725
- Diestel, Reinhard, Imre Leader, Alex Scott, and Stéphan Thomassé. *Partitions and orientations of the Rado graph*, 2395
- Dietz, Geoffrey D. *Big Cohen-Macaulay algebras and seeds*, 5959
- Diller, Jeffrey, Daniel Jackson, and Andrew Sommese. *Invariant curves for birational surface maps*, 2973

- Dimca, Alexandru, and Laurentiu Maxim. *Multivariable Alexander invariants of hypersurface complements*, 3505
- Ding, Hongming. *Differential equations and recursion relations for Laguerre functions on symmetric cones*, 3239
- Ding, Longyun, and Su Gao. *On generalizations of Lavrentieff's theorem for Polish group actions*, 417
- Dolbeault, Jean, and Isabel Flores. *Geometry of phase space and solutions of semilinear elliptic equations in a ball*, 4073
- Dorfmeister, J., and S.-P. Kobayashi. *Coarse classification of constant mean curvature cylinders*, 2483
- Dougherty, Randall, R. Daniel Mauldin, and Andrew Yingst. *On homeomorphic Bernoulli measures on the Cantor space*, 6155
- Drăgulete, Oana M., Tudor S. Ratiu, and Miguel Rodríguez-Olmos. *Singular cosphere bundle reduction*, 4209
- Du, Rosena R. X. *See Chen, William Y. C.*
- Du, Yihong, and Junping Shi. *Allee effect and bistability in a spatially heterogeneous predator-prey model*, 4557
- Duren, Peter, and Rachel Weir. *The pseudohyperbolic metric and Bergman spaces in the ball*, 63
- Dyakonov, Konstantin, and Artur Nicolau. *Free interpolation by nonvanishing analytic functions*, 4449
- Efrat, Ido. *Compatible valuations and generalized Milnor K-theory*, 4695
- Ekhholm, Tobias, John Etnyre, and Michael Sullivan. *Legendrian contact homology in  $P \times \mathbb{R}$* , 3301
- Epstein, Neil M. *Phantom depth and stable phantom exactness*, 4829
- Erdmann, Karin. *See Bialkowski, Jerzy*
- Esteves, Eduardo, and Parham Salehyan. *Limit Weierstrass points on nodal reducible curves*, 5035
- Etnyre, John. *See Ekhholm, Tobias*
- Evans, Steven N. *See Steinsaltz, David*
- Fan, Huijun. *See Cao, Jianguo*
- Farnsteiner, Rolf, and Andrzej Skowroński. *Galois actions and blocks of tame infinitesimal group schemes*, 5867
- Fenn, Roger, Colin Rourke, and Brian Sanderson. *The rack space*, 701
- Fernández, M., V. Muñoz, and L. Ugarte. *Weakly Lefschetz symplectic manifolds*, 1851
- Ferrer, Leonor. *See Alarcón, Antonio*
- Flores, Isabel. *See Dolbeault, Jean*
- Flores, Manuel. *See Černe, Miran*
- Flores, Ramón J. *Nullification and cellularization of classifying spaces of finite groups*, 1791
- Florit, L. A. *See Dajczer, M.*
- Foias, C., I. B. Jung, E. Ko, and C. Percay. *Hyperinvariant subspaces for some subnormal operators*, 2899
- Forzani, L. *See Aimar, H.*
- Friedman, Greg. *Singular chain intersection homology for traditional and super-perversities*, 1977
- Friedman, Sy-David, and John Krueger. *Thin stationary sets and disjoint club sequences*, 2407
- Fujita, Yasutsugu, and Tetsuo Nakamura. *Torsion on elliptic curves in isogeny classes*, 5505
- Fuller, Kent R. *See Colpi, Riccardo*
- Galindo, P., T. W. Gamelin, and M. Lindström. *Composition operators on uniform algebras, essential norms, and hyperbolically bounded sets*, 2109
- Gálvez, José A. *See Aledo, Juan A.*
- Gambaudo, Jean-Marc. *See Cortez, Maria Isabel*
- Gamelin, T. W. *See Galindo, P.*
- Gao, Fuchang, and Wenbo V. Li. *Small ball probabilities for the Slepian Gaussian fields*, 1339
- Gao, Su. *See Ding, Longyun*
- García, Stephan Ramon, and Mihai Putinar. *Complex symmetric operators and applications II*, 3913
- Giorgieri, E. *See Cannarsa, P.*

- Globevnik, Josip. *Analyticity on translates of a Jordan curve*, 5555
- Goldberg, Moshé. *Minimal polynomials and radii of elements in finite-dimensional power-associative algebras*, 4055
- Gönye, Zsuzsanna. *Differentiability of quasi-conformal maps on the jungle gym*, 19
- Goudon, Thierry. *See Coulombel, Jean-François*
- Goulden, I. P., and A. Rattan. *An explicit form for Kerov's character polynomials*, 3669
- Graham, Colin C., and Anthony T. M. Lau. *Relative weak compactness of orbits in Banach spaces associated with locally compact groups*, 1129
- Gramlich, Ralf, Georg W. Hofmann, and Karl-Hermann Neeb. *Semi-edges, reflections and Coxeter groups*, 3647
- Greene, Curtis, and Herbert S. Wilf. *Closed form summation of  $C$ -finite sequences*, 1161
- Greenleaf, Allan. *See Brandolini, Luca*
- Griffin, James. *See Chen, Yang*
- Grodal, J. *See Broto, C.*
- Grosse-Klönne, Elmar. *The Čech filtration and monodromy in log crystalline cohomology*, 2945
- Guediri, Mohammed. *Closed timelike geodesics in compact spacetimes*, 2663
- Hahn, Rebekah, and Stephen Mitchell. *Iwasawa theory for  $K(1)$ -local spectra*, 5207
- Han, Fei, and Xiaoling Huang. *Even dimensional manifolds and generalized anomaly cancellation formulas*, 5365
- Handel, Michael, and Lee Mosher. *Parageometric outer automorphisms of free groups*, 3153
- . *The expansion factors of an outer automorphism and its inverse*, 3185
- Harada, Megumi, and Gregory D. Landweber. *Surjectivity for Hamiltonian  $G$ -spaces in  $K$ -theory*, 6001
- Hartl, Urs. *See Böckle, Gebhard*
- Hasanis, T., A. Savas-Halilaj, and T. Vlachos. *Complete minimal hypersurfaces in the hyperbolic space  $\mathbb{H}^4$  with vanishing Gauss-Kronecker curvature*, 2799
- Hausen, Jürgen. *See Berchtold, Florian*
- He, Xuhua. *The  $G$ -stable pieces of the wonderful compactification*, 3005
- Hebey, Emmanuel. *See Collion, Stéphane*
- Hill, C. Denson, and Michael Taylor. *The complex Frobenius theorem for rough involutive structures*, 293
- Hillar, Christopher J. *See Aschenbrenner, Matthias*
- Hofmann, Georg W. *See Gramlich, Ralf*
- Holm, Thorsten, and Wolfgang Willems. *A local conjecture on Brauer character degrees of finite groups*, 591
- Hone, A. N. W. *Sigma function solution of the initial value problem for Somos 5 sequences*, 5019
- Hong, Jaehyun. *Rigidity of smooth Schubert varieties in Hermitian symmetric spaces*, 2361
- Hough, J. Ben, and Yuval Peres. *An LIL for cover times of disks by planar random walk and Wiener sausage*, 4653
- Howe, Roger, and Soo Teck Lee. *Bases for some reciprocity algebras I*, 4359
- Huang, Xiaojun, and Shanyu Ji. *Every real ellipsoid in  $\mathbb{C}^2$  admits CR umbilical points*, 1191
- Huang, Xiaoling. *See Han, Fei*
- Huisgen-Zimmermann, Birge. *Classifying representations by way of Grassmannians*, 2687
- Hultman, Axel. *The combinatorics of twisted involutions in Coxeter groups*, 2787
- Im, Bo-Hae. *Heegner points and Mordell-Weil groups of elliptic curves over large fields*, 6143
- Imhof, Lorenz A. *See Dette, Holger*
- Intermont, M., and J. Strom. *Homotopical complexity and good spaces*, 687
- Iosevich, A., and M. Rudnev. *Erdős distance problem in vector spaces over finite fields*, 6127
- Ismail, Mourad E.H. *See Chen, Yang*
- Ivanov, Sergei V. *See Bangert, Victor*
- Iwase, Norio, and Akira Kono. *Lusternik-Schnirelmann category of  $\mathbf{Spin}(9)$* , 1517
- Jackson, Daniel. *See Diller, Jeffrey*
- Jensen, Craig, Jon McCammond, and John Meier. *The Euler characteristic of the Whitehead automorphism group of a free product*, 2577
- Jerome, Joseph W. *See Linnér, Anders*
- Ji, Shanyu. *See Huang, Xiaojun*

- Jin, Lu, and Min Ru. *Values of Gauss maps of complete minimal surfaces in  $\mathbb{R}^m$  on annular ends*, 1547
- Jung, I. B. *See* Foias, C.
- Junge, Marius, and Magdalena Musat. *A noncommutative version of the John-Nirenberg theorem*, 115
- Källström, Rolf. *See* Bögvar, Rikard
- Kamont, Anna. *See* Bechler, Pawel
- Kaniuth, Eberhard, and Anthony T. Lau. *Extension and separation properties of positive definite functions on locally compact groups*, 447
- Kapovich, Ilya, Gilbert Levitt, Paul Schupp, and Vladimir Shpilrain. *Translation equivalence in free groups*, 1527
- Katsoulis, Elias, and Justin R. Peters. *Compact operators and nest representations of limit algebras*, 2721
- Katz, Mikhail G. *See* Bangert, Victor
- Keraani, Sahbi. *See* Carles, Rémi
- Khoshnevisan, Davar, and Yimin Xiao. *Images of the Brownian sheet*, 3125
- Knapp, A. W. *See* Carayol, Henri
- Ko, E. *See* Foias, C.
- Kobayashi, S.-P. *See* Dorfmeister, J.
- Kono, Akira. *See* Iwase, Norio

## Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

**Submission information.** See **Information for Authors** at the end of this issue.

**Publisher Item Identifier.** The Publisher Item Identifier (PII) appears at the top of the first page of each article published in this journal. This alphanumeric string of characters uniquely identifies each article and can be used for future cataloging, searching, and electronic retrieval.

**Postings to the AMS website.** Articles are posted to the AMS website individually after proof is returned from authors and before appearing in an issue.

**Subscription information.** *Transactions of the American Mathematical Society* is published monthly. Beginning in January 1996 *Transactions* is accessible from [www.ams.org/journals/](http://www.ams.org/journals/). Subscription prices for Volume 359 (2007) are as follows: for paper delivery, US\$1744 list, US\$1395 institutional member, US\$1570 corporate member; for electronic delivery, US\$1570 list, US\$1256 institutional member, US\$1413 corporate member. Upon request, subscribers to paper delivery of this journal are also entitled to receive electronic delivery. If ordering the paper version, add US\$49 for surface delivery outside the United States and India; US\$53 to India. Expedited delivery to destinations in North America is US\$79; elsewhere US\$144. For paper delivery a late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year.

**Back number information.** For back issues see [www.ams.org/bookstore](http://www.ams.org/bookstore).

Subscriptions and orders should be addressed to the American Mathematical Society, P.O. Box 845904, Boston, MA 02284-5904 USA. *All orders must be accompanied by payment.* Other correspondence should be addressed to 201 Charles Street, Providence, RI 02904-2294 USA.

**Copying and reprinting.** Material in this journal may be reproduced by any means for educational and scientific purposes without fee or permission with the exception of reproduction by services that collect fees for delivery of documents and provided that the customary acknowledgment of the source is given. This consent does not extend to other kinds of copying for general distribution, for advertising or promotional purposes, or for resale. Requests for permission for commercial use of material should be addressed to the Acquisitions Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA. Requests can also be made by e-mail to [reprint-permission@ams.org](mailto:reprint-permission@ams.org).

Excluded from these provisions is material in articles for which the author holds copyright. In such cases, requests for permission to use or reprint should be addressed directly to the author(s). (Copyright ownership is indicated in the notice in the lower right-hand corner of the first page of each article.)

---

*Transactions of the American Mathematical Society* is published monthly by the American Mathematical Society at 201 Charles Street, Providence, RI 02904-2294 USA. Periodicals postage is paid at Providence, Rhode Island. Postmaster: Send address changes to *Transactions*, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA.

© 2007 by the American Mathematical Society. All rights reserved.

This journal is indexed in *Mathematical Reviews*, *Zentralblatt MATH*, *Science Citation Index*<sup>®</sup>, *Science Citation Index*<sup>TM</sup>-*Expanded*, *ISI Alerting Services*<sup>SM</sup>, *CompuMath Citation Index*<sup>®</sup>, and *Current Contents*<sup>®</sup>/*Physical, Chemical & Earth Sciences*. This journal is archived in *Portico*.

Printed in the United States of America.

⊗ The paper used in this journal is acid-free and falls within the guidelines established to ensure permanence and durability.

## Editorial Information

To be published in the *Transactions*, a paper must be correct, new, nontrivial, and significant. Further, it must be well written and of interest to a substantial number of mathematicians. Piecemeal results, such as an inconclusive step toward an unproved major theorem or a minor variation on a known result, are in general not acceptable for publication.

Papers submitted to the *Transactions* should exceed 10 published journal pages in length. Shorter papers may be submitted to the *Proceedings of the American Mathematical Society*. Published pages are the same size as those generated in the style files provided for  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$  or  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{T}\mathcal{E}\mathcal{X}$ .

Information on the backlog for this journal can be found on the AMS website starting from <http://www.ams.org/tran>.

In an effort to make articles available as quickly as possible, articles are posted to the AMS website individually after proof is returned from authors and before appearing in an issue.

A Consent to Publish and Copyright Agreement is required before a paper will be published in this journal. After a paper is accepted for publication, the Providence office will send a Consent to Publish and Copyright Agreement to all authors of the paper. By submitting a paper to this journal, authors certify that the results have not been submitted to nor are they under consideration for publication by another journal, conference proceedings, or similar publication.

## Information for Authors

**Initial submission.** The AMS uses Centralized Manuscript Processing for initial submissions. Authors should submit a PDF file using the Initial Manuscript Submission form found at [www.ams.org/cgi-bin/peertrack/submission.pl](http://www.ams.org/cgi-bin/peertrack/submission.pl), or send one copy of the manuscript to the following address: Centralized Manuscript Processing, TRANSACTIONS OF THE AMS, 201 Charles Street, Providence, RI 02904-2294 USA. If a paper copy is being forwarded to the AMS, indicate that it is for *Transactions* and include the name of the corresponding author, contact information such as email address or mailing address, and the name of an appropriate Editor to review the paper (see the list of Editors below).

The first page of an article must consist of a *descriptive title*, followed by an *abstract* that summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The *descriptive title* should be short, but informative; useless or vague phrases such as “some remarks about” or “concerning” should be avoided. The *abstract* should be at least one complete sentence, and at most 300 words. Included with the footnotes to the paper should be the 2000 *Mathematics Subject Classification* representing the primary and secondary subjects of the article. The classifications are accessible from [www.ams.org/msc/](http://www.ams.org/msc/). The list of classifications is also available in print starting with the 1999 annual index of *Mathematical Reviews*. The Mathematics Subject Classification footnote may be followed by a list of *key words and phrases* describing the subject matter of the article and taken from it. Journal abbreviations used in bibliographies are listed in the latest *Mathematical Reviews* annual index. The series abbreviations are also accessible from [www.ams.org/publications/](http://www.ams.org/publications/). To help in preparing and verifying references, the AMS offers MR Lookup, a Reference Tool for Linking, at [www.ams.org/mrlookup/](http://www.ams.org/mrlookup/).

**Electronically prepared manuscripts.** The AMS encourages electronically prepared manuscripts, with a strong preference for  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ . To this end, the

Society has prepared  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\text{\LaTeX}$  author packages for each AMS publication. Author packages include instructions for preparing electronic manuscripts, samples, and a style file that generates the particular design specifications of that publication series. Articles properly prepared using the  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\text{\LaTeX}$  style file and the `\label` and `\ref` commands automatically enable extensive intra-document linking to the bibliography and other elements of the article for searching electronically on the Web. Because linking must often be added manually to electronically prepared manuscripts in other forms of  $\text{\TeX}$ , using  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\text{\LaTeX}$  also reduces the amount of technical intervention once the files are received by the AMS. This results in fewer errors in processing and saves the author proofreading time.  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\text{\LaTeX}$  papers also move more efficiently through the production stream, helping to minimize publishing costs.

$\mathcal{A}\mathcal{M}\mathcal{S}$ - $\text{\LaTeX}$  is the highly preferred format of  $\text{\TeX}$ , but author packages are also available in  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\text{\TeX}$ . Those authors who make use of these style files from the beginning of the writing process will further reduce their own efforts. Manuscripts prepared electronically in  $\text{\LaTeX}$  or plain  $\text{\TeX}$  are normally not acceptable due to the high amount of technical time required to insure that the file will run properly through the AMS in-house production system.  $\text{\LaTeX}$  users will find that  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\text{\LaTeX}$  is the same as  $\text{\LaTeX}$  with additional commands to simplify the typesetting of mathematics, and users of plain  $\text{\TeX}$  should have the foundation for learning  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\text{\LaTeX}$ .

Authors may retrieve an author package from the AMS website starting from [www.ams.org/tex/](http://www.ams.org/tex/) or via FTP to [ftp.ams.org](ftp://ftp.ams.org) (login as `anonymous`, enter username as password, and type `cd pub/author-info`). The *AMS Author Handbook* and the *Instruction Manual* are available in PDF format following the author packages link from [www.ams.org/tex/](http://www.ams.org/tex/). The author package can also be obtained free of charge by sending email to [tech-support@ams.org](mailto:tech-support@ams.org) (Internet) or from the Publication Division, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA. When requesting an author package, please specify  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\text{\LaTeX}$  or  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\text{\TeX}$  and the publication in which your paper will appear. Please be sure to include your complete email address.

**After acceptance.** The final version of the electronic manuscript should be sent to the Providence office immediately after the paper has been accepted for publication.

The author should also send the final version of the paper to the Editor, who will forward a copy to the Providence office. Accepted electronically prepared manuscripts can be submitted via the web at [www.ams.org/submit-book-journal/](http://www.ams.org/submit-book-journal/) sent via email to [pub-submit@ams.org](mailto:pub-submit@ams.org) (Internet), or sent on diskette to the Electronic Prepress Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA. When sending a manuscript electronically via email or diskette, please be sure to include a message indicating in which publication the paper has been accepted. No corrections will be accepted electronically. Authors must mark their changes on their proof copies and return them to the Providence office. Complete instructions on how to send files are included in the author package.

**Electronic graphics.** Comprehensive instructions on preparing graphics are available starting from [www.ams.org/jourhtml/authors.html](http://www.ams.org/jourhtml/authors.html). A few of the major requirements are given here.

Submit files for graphics as EPS (Encapsulated PostScript) files. This includes graphics originated via a graphics application as well as scanned photographs or other computer-generated images. If this is not possible, TIFF files are acceptable

as long as they can be opened in Adobe Photoshop or Illustrator. No matter what method was used to produce the graphic, it is necessary to provide a paper copy to the AMS.

Authors using graphics packages for the creation of electronic art should also avoid the use of any lines thinner than 0.5 points in width. Many graphics packages allow the user to specify a “hairline” for a very thin line. Hairlines often look acceptable when proofed on a typical laser printer. However, when produced on a high-resolution laser imagesetter, hairlines become nearly invisible and will be lost entirely in the final printing process.

Screens should be set to values between 15% and 85%. Screens which fall outside of this range are too light or too dark to print correctly. Variations of screens within a graphic should be no less than 10%.

**AMS policy on making changes to articles after posting.** Articles are posted to the AMS website individually after proof is returned from authors and before appearing in an issue. To preserve the integrity of electronically published articles, once an article is individually posted to the AMS website but not yet in an issue, changes cannot be made in place in the paper. However, an “Added after posting” section may be added to the paper right before the References when there is a critical error in the content of the paper. The “Added after posting” section gives the author an opportunity to correct this type of critical error before the article is put into an issue for printing and before it is then reposted with the issue. The “Added after posting” section remains a permanent part of the paper. The AMS does not keep author-related information, such as affiliation, current address, and email address, up to date after a paper is initially posted.

Once the article is assigned to an issue, even if the issue has not yet been posted to the AMS website, corrections may be made to the paper by submitting a traditional errata article. The errata article will appear in a future print issue and will link back and forth on the web to the original article online.

**Secure manuscript tracking on the Web and via email.** Authors can track their manuscripts through the AMS journal production process using the personal AMS ID and Article ID printed in the upper right-hand corner of the Consent to Publish form sent to each author who publishes in AMS journals. Access to the tracking system is available from [www.ams.org/mstrack/](http://www.ams.org/mstrack/) or via email sent to [mstrack-query@ams.org](mailto:mstrack-query@ams.org). To access by email, on the subject line of the message simply enter the AMS ID and Article ID. To track more than one manuscript by email, choose one of the Article IDs and enter the AMS ID and the Article ID followed by the word *all* on the subject line. An explanation of each production step is provided on the web through links from the manuscript tracking screen. Questions can be sent to [tran-query@ams.org](mailto:tran-query@ams.org).

**T<sub>E</sub>X files available upon request.** T<sub>E</sub>X files are available upon request for authors by sending email to [file-request@ams.org](mailto:file-request@ams.org) or by contacting the Electronic Prepress Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA. The request should include the title of the paper, the name(s) of the author(s), the name of the publication in which the paper has or will appear, and the volume and issue numbers if known. The T<sub>E</sub>X file will be sent to the author making the request after the article goes to the printer. If the requestor can receive Internet email, please include the email address to which the file should be sent. Otherwise please indicate a diskette format and postal address to which a disk should be mailed. **Note:** Because T<sub>E</sub>X production at the AMS sometimes requires extra fonts and macros that are not yet publicly available, T<sub>E</sub>X

files cannot be guaranteed to run through the author's version of T<sub>E</sub>X without errors. The AMS regrets that it cannot provide support to eliminate such errors in the author's T<sub>E</sub>X environment.

**Inquiries.** Any inquiries concerning a paper that has been accepted for publication that cannot be answered via the manuscript tracking system mentioned above should be sent to [tran-query@ams.org](mailto:tran-query@ams.org) or directly to the Electronic Prepress Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA.

## Editors

The AMS uses Centralized Manuscript Processing for initial submissions to AMS journals. Authors should follow instructions listed on the Initial Submission page found at [www.ams.org/tran/transubmit.html](http://www.ams.org/tran/transubmit.html).

**Algebra**, ALEXANDER KLESHCHEV, Department of Mathematics, University of Oregon, Eugene, OR 97403-1222 USA; e-mail: [ams@noether.uoregon.edu](mailto:ams@noether.uoregon.edu)

**Algebra and its applications**, MINA TEICHER, Emmy Noether Research Institute for Mathematics, Bar-Ilan University, Ramat-Gan 52900, Israel; e-mail: [teicher@macs.biu.ac.il](mailto:teicher@macs.biu.ac.il), with cc to [eni@macs.biu.ac.il](mailto:eni@macs.biu.ac.il)

**Algebraic geometry**, DAN ABRAMOVICH, Department of Mathematics, Brown University, Box 1917, Providence, RI 02912 USA; e-mail: [amsedit@math.brown.edu](mailto:amsedit@math.brown.edu)

**Algebraic number theory**, V. KUMAR MURTY, Department of Mathematics, University of Toronto, 100 St. George Street, Toronto, Ontario, Canada M5S 3G3; e-mail: [murty@math.toronto.edu](mailto:murty@math.toronto.edu)

**Algebraic topology**, ALEJANDRO ADEM, Department of Mathematics, University of British Columbia, Room 121, 1984 Mathematics Road, Vancouver, British Columbia, Canada V6T 1Z2; e-mail: [transactions@math.ubc.ca](mailto:transactions@math.ubc.ca)

**Combinatorics**, JOHN R. STEMBRIDGE, Department of Mathematics, University of Michigan, Ann Arbor, MI 48109-1043 USA; e-mail: [jrs@umich.edu](mailto:jrs@umich.edu)

**Complex analysis and harmonic analysis**, ALEXANDER NAGEL, Department of Mathematics, University of Wisconsin, 480 Lincoln Drive, Madison, WI 53706-1313 USA; e-mail: [nagel@math.wisc.edu](mailto:nagel@math.wisc.edu)

**Differential geometry and global analysis**, LISA C. JEFFREY, Department of Mathematics, University of Toronto, Bahen Centre for Information Technology, 40 St. George Street 6th Floor, Toronto, Ontario, Canada M5S 2E4; e-mail: [jeffrey@math.toronto.edu](mailto:jeffrey@math.toronto.edu)

**Dynamical systems and ergodic theory**, AMIE WILKINSON, Department of Mathematics, Northwestern University, 2033 Sheridan Road, Evanston, IL 60208-2730 USA; e-mail: [transactions@math.northwestern.edu](mailto:transactions@math.northwestern.edu)

**Functional analysis and operator algebras**, DIMITRI SHLYAKHTENKO, Department of Mathematics, University of California, Los Angeles, CA 90095 USA; e-mail: [shlyakht@math.ucla.edu](mailto:shlyakht@math.ucla.edu)

**Geometric analysis**, WILLIAM P. MINICOZZI II, Department of Mathematics, Johns Hopkins University, 3400 N. Charles Street, Baltimore, MD 21218 USA; e-mail: [trans@math.jhu.edu](mailto:trans@math.jhu.edu)

**Geometric topology**, MLADEN BESTVINA, Department of Mathematics, University of Utah, 155 South 1400 East, JWB 233, Salt Lake City, UT 84112-0090 USA; e-mail: [bestvina@math.utah.edu](mailto:bestvina@math.utah.edu)

**Harmonic analysis, representation theory, and Lie theory**, ROBERT J. STANTON, Department of Mathematics, Ohio State University, 231 West 18th Avenue, Columbus, OH 43210-1174 USA; e-mail: [stanton@math.ohio-state.edu](mailto:stanton@math.ohio-state.edu)

**Logic**, STEFFEN LEMPP, Department of Mathematics, University of Wisconsin, 480 Lincoln Drive, Madison, WI 53706-1388 USA; e-mail: [lempp@math.wisc.edu](mailto:lempp@math.wisc.edu)

**Partial differential equations**, GUSTAVO PONCE, Department of Mathematics, South Hall, Room 6607, University of California, Santa Barbara, CA 93106 USA; e-mail: [ponce@math.ucsb.edu](mailto:ponce@math.ucsb.edu)

**Partial differential equations and dynamical systems**, PETER POLACIK, School of Mathematics, University of Minnesota, Minneapolis, MN 55455 USA; e-mail: [polacik@math.umn.edu](mailto:polacik@math.umn.edu)

**Probability and statistics**, KRZYSZTOF BURDZY, Department of Mathematics, University of Washington, Box 354350, Seattle, WA 98195-4350 USA; e-mail: [burdzy@math.washington.edu](mailto:burdzy@math.washington.edu)

**Real analysis and partial differential equations**, DANIEL TATARU, Department of Mathematics, University of California, Berkeley, CA 94720 USA; e-mail: [tataru@math.berkeley.edu](mailto:tataru@math.berkeley.edu)

All other communications to the editors should be addressed to the Managing Editor, ROBERT GURALNICK, Department of Mathematics, University of Southern California, Los Angeles, CA 90089-1113 USA; e-mail: [guralnic@math.usc.edu](mailto:guralnic@math.usc.edu)

---

## MEMOIRS OF THE AMERICAN MATHEMATICAL SOCIETY

*Memoirs* is devoted to research in pure and applied mathematics of the same nature as *Transactions*. An issue consists of one or more separately bound research tracts for which the authors provide reproduction copy. Papers intended for *Memoirs* should normally be at least 80 pages in length. *Memoirs* has the same editorial committee as *Transactions*; authors may choose an Editor from the list above upon submission.
