Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

Submission information. See **Information for Authors** at the end of this issue.

Publisher Item Identifier. The Publisher Item Identifier (PII) appears at the top of the first page of each article published in this journal. This alphanumeric string of characters uniquely identifies each article and can be used for future cataloging, searching, and electronic retrieval.

Postings to the AMS website. Articles are posted to the AMS website individually after proof is returned from authors and before appearing in an issue.

Subscription information. *Transactions of the American Mathematical Society* is published monthly and is also accessible electronically from www.ams.org/journals/. Subscription prices for Volume 362 (2010) are as follows: for paper delivery, US\$1905 list, US\$1524 institutional member, US\$1715 corporate member; for electronic delivery, US\$1715 list, US\$1372 institutional member, US\$1544 corporate member. Upon request, subscribers to paper delivery of this journal are also entitled to receive electronic delivery. If ordering the paper version, add US\$81 for surface delivery outside the United States and India; US\$114 to India. Expedited delivery to destinations in North America is US\$89; elsewhere US\$240. Subscription renewals are subject to late fees. See www.ams.org/help-faq for more journal subscription information.

Back number information. For back issues see www.ams.org/bookstore.

Subscriptions and orders should be addressed to the American Mathematical Society, P.O. Box 845904, Boston, MA 02284-5904 USA. *All orders must be accompanied by payment.* Other correspondence should be addressed to 201 Charles Street, Providence, RI 02904-2294 USA.

Copying and reprinting. Material in this journal may be reproduced by any means for educational and scientific purposes without fee or permission with the exception of reproduction by services that collect fees for delivery of documents and provided that the customary acknowledgment of the source is given. This consent does not extend to other kinds of copying for general distribution, for advertising or promotional purposes, or for resale. Requests for permission for commercial use of material should be addressed to the Acquisitions Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA. Requests can also be made by e-mail to reprint-permission@ams.org.

Excluded from these provisions is material in articles for which the author holds copyright. In such cases, requests for permission to use or reprint should be addressed directly to the author(s). (Copyright ownership is indicated in the notice in the lower right-hand corner of the first page of each article.)

Transactions of the American Mathematical Society (ISSN 0002-9947) is published monthly by the American Mathematical Society at 201 Charles Street, Providence, RI 02904-2294 USA. Periodicals postage is paid at Providence, Rhode Island. Postmaster: Send address changes to *Transactions*, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA.

This journal is indexed in *Mathematical Reviews*, *Zentralblatt MATH*, *Science Citation Index*[®], *Science Citation Index*TM-*Expanded*, *ISI Alerting Services*SM, *CompuMath Citation Index*[®], and *Current Contents*[®]/*Physical, Chemical & Earth Sciences*. This journal is archived in *Portico*.

Printed in the United States of America.

⊗ The paper used in this journal is acid-free and falls within the guidelines established to ensure permanence and durability.

TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY

CONTENTS

Vol. 362, No. 12

Whole No. 907

December 2010

Louiza Fouli, Claudia Polini, and Bernd Ulrich, <i>Annihilators of graded components of the canonical module, and the core of standard graded algebras</i>	6183
Ronald DeVore and Amos Ron, <i>Approximation using scattered shifts of a multivariate function</i>	6205
Luc Hillairet and Chris Judge, <i>The eigenvalues of the Laplacian on domains with small slits</i>	6231
G. Berkolaiko and B. Winn, <i>Relationship between scattering matrix and spectrum of quantum graphs</i>	6261
Peter Borwein, Stephen K. K. Choi, and Michael Coons, <i>Completely multiplicative functions taking values in $\{-1, 1\}$</i>	6279
Kei Kondo and Minoru Tanaka, <i>Total curvatures of model surfaces control topology of complete open manifolds with radial curvature bounded below. II</i>	6293
D. Burns, N. Levenberg, S. Ma'u, and Sz. Révész, <i>Monge-Ampère measures for convex bodies and Bernstein-Markov type inequalities</i> ..	6325
Jiří Matoušek and Anastasios Sidiropoulos, <i>Inapproximability for metric embeddings into \mathbb{R}^d</i>	6341
Jiří Lebl, <i>Levi-flat hypersurfaces with real analytic boundary</i>	6367
Manuel del Pino, Pierpaolo Esposito, and Monica Musso, <i>Two-dimensional Euler flows with concentrated vorticities</i>	6381
Kevin Zumbrun, <i>Stability of noncharacteristic boundary layers in the standing-shock limit</i>	6397
Ben Kane and Zhi-Wei Sun, <i>On almost universal mixed sums of squares and triangular numbers</i>	6425
J. Basto-Gonçalves, <i>Linearization of resonant vector fields</i>	6457
Hongjie Dong and N. V. Krylov, <i>Second-order elliptic and parabolic equations with $B(\mathbb{R}^2, VMO)$ coefficients</i>	6477
Juan B. Gil, Thomas Krainer, and Gerardo A. Mendoza, <i>Trace expansions for elliptic cone operators with stationary domains</i>	6495
Chris J. Conidis, <i>Chain conditions in computable rings</i>	6523
Brian D. Boe, Jonathan R. Kujawa, and Daniel K. Nakano, <i>Cohomology and support varieties for Lie superalgebras</i>	6551
Govind Menon, Barbara Niethammer, and Robert L. Pego, <i>Dynamics and self-similarity in min-driven clustering</i>	6591
Robert S. Lubarsky and Fred Richman, <i>Zero sets of univariate polynomials</i>	6619
John P. Steinberger, <i>An unavoidable set of D-reducible configurations</i> ..	6633
Mikhail Ershov, <i>On the commensurator of the Nottingham group</i>	6663
Daniel Pellicer and Egon Schulte, <i>Regular polygonal complexes in space, I</i>	6679
Daisuke Kishimoto and Akira Kono, <i>Splitting of gauge groups</i>	6715

INDEX TO VOLUME 362 (2010)

- Abe, Takeshi. *Projective normality of the moduli space of rank 2 vector bundles on a generic curve*, 477
- Achar, Pramod N. *On the quasi-hereditary property for staggered sheaves*, 4735
- Achter, Jeffrey D., and Peter Norman. *Local monodromy of p -divisible groups*, 985
- Adler, Jeffrey D., and Joshua M. Lansky. *Depth-zero base change for ramified $U(2, 1)$* , 5569
- Agol, Ian, Marc Culler, and Peter B. Shalen. *Singular surfaces, mod 2 homology, and hyperbolic volume, I*, 3463
- Aistleitner, Christoph. *On the law of the iterated logarithm for the discrepancy of lacunary sequences*, 5967
- Aizenbud, Avraham, and Dmitry Gourevitch. *Some regular symmetric pairs*, 3757
- Alarcón, Antonio. *Compact complete minimal immersions in \mathbb{R}^3* , 4063
- Alías, Luis J., Ana Hurtado, and Vicente Palmer. *Geometric analysis of Lorentzian distance function on spacelike hypersurfaces*, 5083
- Aljadeff, Eli, Darrell Haile, and Michael Natapov. *Graded identities of matrix algebras and the universal graded algebra*, 3125
- Ammari, Habib, Hyeonbae Kang, Mikyoung Lim, and Habib Zribi. *Conductivity interface problems. Part I: Small perturbations of an interface*, 2435
- . *Layer potential techniques in spectral analysis. Part I: Complete asymptotic expansions for eigenvalues of the Laplacian in domains with small inclusions*, 2901
- Andersen, Nils Byrial, and Marcel de Jeu. *Real Paley–Wiener theorems and local spectral radius formulas*, 3613
- Andersson, Martin. *Robust ergodic properties in partially hyperbolic dynamics*, 1831
- Andruchow, Esteban, Gabriel Larotonda, and Lázaro Recht. *Finsler geometry and actions of the p -Schatten unitary groups*, 319
- Ara, Pere. *The regular algebra of a poset*, 1505
- Ardila, Federico, and Alexander Postnikov. *Combinatorics and geometry of power ideals*, 4357
- Arendt, Wolfgang, and Michal Chovanec. *Dirichlet regularity and degenerate diffusion*, 5861
- Avalos, George, and Roberto Triggiani. *Backwards uniqueness of the C_0 -semigroup associated with a parabolic-hyperbolic Stokes-Lamé partial differential equation system*, 3535
- Avigad, Jeremy, Philipp Gerhardy, and Henry Towsner. *Local stability of ergodic averages*, 261
- Avilés, Antonio, Vladimir Kadets, Miguel Martín, Javier Merí, and Varvara Shepelska. *Slicely countably determined Banach spaces*, 4871
- Axelsson, Andreas. *Non-unique solutions to boundary value problems for non-symmetric divergence form equations*, 661
- Balmer, Paul. *Picard groups in triangular geometry and applications to modular representation theory*, 3677
- Ban, Jungchao, Yongluo Cao, and Huyi Hu. *The dimensions of a non-conformal repeller and an average conformal repeller*, 727
- Banakh, T., J. Higes, and I. Zarichnyi. *The coarse classification of countable abelian groups*, 4755
- Banyaga, Augustin, and David E. Hurtubise. *Morse-Bott homology*, 3997
- Baranovsky, Vladimir. *Algebraization of bundles on non-proper schemes*, 427
- Barmpalias, George, Rod Downey, and Noam Greenberg. *Working with strong reducibilities above totally ω -c.e. and array computable degrees*, 777
- Barot, M., D. Kussin, and H. Lenzen. *The cluster category of a canonical algebra*, 4313
- Basto-Gonçalves, J. *Linearization of resonant vector fields*, 6457
- Bate, Michael, Benjamin Martin, Gerhard Röhrle, and Rudolf Tange. *Complete reducibility and separability*, 4283
- Baughner, Benjamin. *Metric dependence and asymptotic minimization of the expected number of critical points of random holomorphic sections*, 4537
- Bazzanella, Danilo, Alessandro Languasco, and Alessandro Zaccagnini. *Prime numbers in logarithmic intervals*, 2667
- Behrens, Mark, and Daniel G. Davis. *The homotopy fixed point spectra of profinite Galois extensions*, 4983
- Bekkara, E., C. Frances, and A. Zeghib. *Actions of semisimple Lie groups preserving a degenerate Riemannian metric*, 2415
- Beli, Constantin N. *A new approach to classification of integral quadratic forms over dyadic local fields*, 1599

- Belov-Kanel, Alexei, Louis Rowen, and Uzi Vishne. *Structure of Zariski-closed algebras*, 4695
- Ben Yaacov, Itai, and Alexander Usvyatsov. *Continuous first order logic and local stability*, 5213
- Berenstein, Arkady, and Yuri Burman. *Quasiharmonic polynomials for Coxeter groups and representations of Cherednik algebras*, 229
- Berkolaiko, G., and B. Winn. *Relationship between scattering matrix and spectrum of quantum graphs*, 6261
- Berman, Joel, Paweł Idziak, Petar Marković, Ralph McKenzie, Matthew Valeriote, and Ross Willard. *Varieties with few subalgebras of powers*, 1445
- Biswas, Indranil. *Tangent bundle of a complete intersection*, 3149
- Boe, Brian D., Jonathan R. Kujawa, and Daniel K. Nakano. *Cohomology and support varieties for Lie superalgebras*, 6551
- Boggiatto, P., G. De Donno, and A. Oliaro. *Time-frequency representations of Wigner type and pseudo-differential operators*, 4955
- Bogopolski, O., A. Martino, and E. Ventura. *Orbit decidability and the conjugacy problem for some extensions of groups*, 2003
- Bolte, Jérôme, Aris Daniilidis, Olivier Ley, and Laurent Mazet. *Characterizations of Lojasiewicz inequalities: Subgradient flows, talweg, convexity*, 3319
- Borwein, Peter, Stephen K. K. Choi, and Michael Coons. *Completely multiplicative functions taking values in $\{-1, 1\}$* , 6279
- Bourdaud, Gérard. *Superposition in homogeneous and vector valued Sobolev spaces*, 6105
- Boyle, Mike, Ronnie Pavlov, and Michael Schraudner. *Multidimensional sofic shifts without separation and their factors*, 4617
- Bray, John N., and Robert T. Curtis. *The Leech lattice Λ and the Conway group $\cdot O$ revisited*, 1351
- Breuer, Jonathan. *Spectral and dynamical properties of certain random Jacobi matrices with growing parameters*, 3161
- Brown, R., I. Mitrea, M. Mitrea, and M. Wright. *Mixed boundary value problems for the Stokes system*, 1211
- Bruggeman, Roelof W., and Roberto J. Miatello. *Density results for automorphic forms on Hilbert modular groups II*, 3841
- Bujalance, Emilio, Marston D. E. Conder, and Antonio F. Costa. *Pseudo-real Riemann surfaces and chiral regular maps*, 3365
- Burman, Yuri. *See Berenstein, Arkady*
- Burns, D., N. Levenberg, S. Ma'u, and Sz. Révész. *Monge-Ampère measures for convex bodies and Bernstein-Markov type inequalities*, 6325
- Byeon, Jaeyoung. *Singularly perturbed nonlinear Dirichlet problems with a general nonlinearity*, 1981
- Cao, Yongluo. *See Ban, Jungchao*
- Capogna, Luca, Scott D. Pauls, and Jeremy T. Tyson. *Convexity and horizontal second fundamental forms for hypersurfaces in Carnot groups*, 4045
- Carneiro, Emanuel, and Jeffrey D. Vaaler. *Some extremal functions in Fourier analysis. II*, 5803
- Cautis, Sabin, and David M. Jackson. *On Tutte's chromatic invariant*, 491
- Cedó, Ferran, Eric Jespers, and Ángel del Río. *Involutive Yang-Baxter groups*, 2541
- Chakraborty, Partha Sarathi, and Arupkumar Pal. *Equivariant spectral triples and Poincaré duality for $SU_q(2)$* , 4099
- Chan, Daniel. *McKay correspondence for canonical orders*, 1765
- Chang, Shu-Cheng, Hung-Lin Chiu, and Chin-Tung Wu. *The Li-Yau-Hamilton inequality for Yamabe flow on a closed CR 3-manifold*, 1681
- Chemin, Jean-Yves, and Isabelle Gallagher. *Large, global solutions to the Navier-Stokes equations, slowly varying in one direction*, 2859
- Chen, Jing, and Changjiang Zhu. *Decay rates of strong planar rarefaction waves to scalar conservation laws with degenerate viscosity in several space dimensions*, 1797
- Ching, Michael. *A chain rule for Goodwillie derivatives of functors from spectra to spectra*, 399
- Chiu, Hung-Lin. *See Chang, Shu-Cheng*
- Choi, Stephen K. K. *See Borwein, Peter*
- Choi, Suyoung, Mikiya Masuda, and Dong Youp Suh. *Topological classification of generalized Bott towers*, 1097
- Chovanec, Michal. *See Arendt, Wolfgang*

- Chuah, Meng-Kiat, and Jing-Song Huang. *Double Vogan diagrams and semisimple symmetric spaces*, 1721
- Cicognani, Massimo, and Ferruccio Colombini. *The Cauchy problem for p -evolution equations*, 4853
- Ciucu, Mihai. *The emergence of the electrostatic field as a Feynman sum in random tilings with holes*, 4921
- Cluckers, Raf. *Exponential sums: Questions by Denef, Sperber, and Igusa*, 3745
- Cobo, Milton, Carlos Gutierrez, and Jaume Llibre. *Flows without wandering points on compact connected surfaces*, 4569
- Colman, Hellen. *The Lusternik-Schirelmann category of a Lie groupoid*, 5529
- Colombini, Ferruccio. *See Cicognani, Massimo*
- Colombini, Ferruccio, and Herbert Koch. *Strong unique continuation for products of elliptic operators of second order*, 345
- Colombo, Elisabetta, and Paola Frediani. *Siegel metric and curvature of the moduli space of curves*, 1231
- Conder, Marston D. E. *See Bujalance, Emilio*
- Conidis, Chris J. *Chain conditions in computable rings*, 6523
- Contreras, Manuel D., Santiago Díaz-Madrigal, and Christian Pommerenke. *Second angular derivatives and parabolic iteration in the unit disk*, 357
- Coons, Michael. *See Borwein, Peter*
- Corvaja, P., W. M. Schmidt, and U. Zannier. *The Diophantine equation $\alpha_1^{x_1} \cdots \alpha_n^{x_n} = f(x_1, \dots, x_n)$. II*, 2115
- Costa, Antonio F. *See Bujalance, Emilio*
- Cowen, Carl C., and Eungil Ko. *Hermitian weighted composition operators on H^2* , 5771
- Culler, Marc. *See Agol, Ian*
- Curran, Stephen. *Quantum rotatability*, 4831
- Curtis, Robert T. *See Bray, John N.*
- Danilidis, Aris. *See Bolte, Jérôme*
- Davis, Daniel G. *See Behrens, Mark*
- De Donno, G. *See Boggiatto, P.*
- Delorme, Patrick. *Constant term of smooth H_ψ -spherical functions on a reductive p -adic group*, 933
- Derdzinski, Andrzej, and Tadeusz Januszkiewicz. *Totally real immersions of surfaces*, 53
- DeVore, Ronald, and Amos Ron. *Approximation using scattered shifts of a multivariate function*, 6205
- Di Nasso, Mauro, and Marco Forti. *Numerosities of point sets over the real line*, 5355
- Díaz-Madrigal, Santiago. *See Contreras, Manuel D.*
- Dokuchaev, M., R. Exel, and J. J. Simón. *Globalization of twisted partial actions*, 4137
- Dolcetta, I. Capuzzo, F. Leoni, and A. Porretta. *Hölder estimates for degenerate elliptic equations with coercive Hamiltonians*, 4511
- Dolich, Alfred, Chris Miller, and Charles Steinhorn. *Structures having o -minimal open core*, 1371
- Dong, Hongjie, and N. V. Krylov. *Second-order elliptic and parabolic equations with $B(\mathbb{R}^2, VMO)$ coefficients*, 6477
- Dousmanis, Gerasimos. *Rank two filtered (φ, N) -modules with Galois descent data and coefficients*, 3883
- Downey, Rod. *See Barmpalias, George*
- van den Dries, Lou, and Ayhan Günaydin. *Mann pairs*, 2393
- Druţu, Cornelia, Shahar Mozes, and Mark Sapir. *Divergence in lattices in semisimple Lie groups and graphs of groups*, 2451
- Duits, Maurice, and Kurt Johansson. *Powers of large random unitary matrices and Toeplitz determinants*, 1169
- Duong, Xuan Thinh, Loukas Grafakos, and Lixin Yan. *Multilinear operators with non-smooth kernels and commutators of singular integrals*, 2089
- Edigarian, Armen, and Ragnar Sigurdsson. *Relative extremal functions and characterization of pluripolar sets in complex manifolds*, 5321
- Epstein, Inessa, and Todor Tsankov. *Modular actions and amenable representations*, 603
- Ershov, Mikhail. *On the commensurator of the Nottingham group*, 6663
- Esposito, Pierpaolo. *See del Pino, Manuel*

- Everest, G., R. Miles, S. Stevens, and T. Ward. *Dirichlet series for finite combinatorial rank dynamics*, 199
- Exel, R. *See* Dokuchaev, M.
- Farsi, Carla, and Christopher Seaton. *Nonvanishing vector fields on orbifolds*, 509
- Felikson, Anna, and Pavel Tumarkin. *Reflection subgroups of Coxeter groups*, 847
- Ferenczi, Valentin, and Elói Medina Galego. *Countable groups of isometries on Banach spaces*, 4385
- Fisher, Tom. *Pfaffian presentations of elliptic normal curves*, 2525
- Fletcher, Alastair. *On asymptotic Teichmüller space*, 2507
- Foreman, Brendan. *Discrete groups and the complex contact geometry of $SL(2, \mathbb{C})$* , 4191
- Forti, Marco. *See* Di Nasso, Mauro
- Fouli, Louiza, Claudia Polini, and Bernd Ulrich. *Annihilators of graded components of the canonical module, and the core of standard graded algebras*, 6183
- Fourati, Sonia. *Fluctuations of Lévy processes and scattering theory*, 441
- Frances, C. *See* Bekkara, E.
- Franke, B., C.-R. Hwang, H.-M. Pai, and S.-J. Sheu. *The behavior of the spectral gap under growing drift*, 1325
- Frediani, Paola. *See* Colombo, Elisabetta
- Fu, Changjian, and Bernhard Keller. *On cluster algebras with coefficients and 2-Calabi-Yau categories*, 859
- Fu, Lei, and Daqing Wan. *Functional equations of L-functions for symmetric products of the Kloosterman sheaf*, 5947
- Galaktionov, V. A., and I. V. Kamotski. *On nonexistence of Baras–Goldstein type for higher-order parabolic equations with singular potentials*, 4117
- Galego, Elói Medina. *See* Ferenczi, Valentin
- Galindo, C., and F. Monserrat. *On the characterization of algebraically integrable plane foliations*, 4557
- Gallagher, Isabelle. *See* Chemin, Jean-Yves
- García, Isaac A., Héctor Giacomini, and Maite Grau. *The inverse integrating factor and the Poincaré map*, 3591
- Garcia, Stephan Ramon, and Warren R. Wogen. *Some new classes of complex symmetric operators*, 6065
- Gardner, Richard J., and Artem Zvavitch. *Gaussian Brunn–Minkowski inequalities*, 5333
- Geiss, Stefan, Stephen Montgomery-Smith, and Eero Saksman. *On singular integral and martingale transforms*, 553
- Gerhardy, Philipp. *See* Avigad, Jeremy
- Giacomini, Héctor. *See* García, Isaac A.
- Giamb Bruno, Antonio, and Mikhail Zaicev. *Codimension growth of special simple Jordan algebras*, 3107
- Gil, Juan B., Thomas Krainer, and Gerardo A. Mendoza. *Trace expansions for elliptic cone operators with stationary domains*, 6495
- Giulietti, M., and G. Korchmáros. *Algebraic curves with a large non-tame automorphism group fixing no point*, 5983
- Gol'dshtein, V., and M. Ju. Vasilchik. *Embedding theorems and boundary-value problems for cusp domains*, 1963
- Gómez González, Esteban, José M. Muñoz Porras, Francisco J. Plaza Martín, and Rubí E. Rodríguez. *Characterizations of Jacobians of curves with automorphisms*, 5373
- Gourevitch, Dmitry. *See* Aizenbud, Avraham
- Grafakos, Loukas. *See* Duong, Xuan Thinh
- Grau, Maite. *See* García, Isaac A.
- Greb, Daniel. *Projectivity of analytic Hilbert and Kähler quotients*, 3243
- Greenberg, Noam. *See* Barmpalias, George
- Griffeth, Stephen. *Orthogonal functions generalizing Jack polynomials*, 6131
- Guest, Simon. *A solvable version of the Baer–Suzuki theorem*, 5909
- Günaydin, Ayhan. *See* van den Dries, Lou
- Gutierrez, Carlos. *See* Cobo, Milton
- Haagerup, Uffe, Marius Junge, and Quanhua Xu. *A reduction method for noncommutative L_p -spaces and applications*, 2125

- Haagerup, Uffe, Todd Kemp, and Roland Speicher. *Resolvents of \mathcal{R} -diagonal operators*, 6029
- Haile, Darrell. *See* Aljadeff, Eli
- Halbout, Gilles, and Xiang Tang. *Noncommutative Poisson structures on orbifolds*, 2249
- Hambleton, Ian, and Özgin Ünlü. *Free actions of finite groups on $S^n \times S^n$* , 3289
- Hidano, Kunio, Jason Metcalfe, Hart F. Smith, Christopher D. Sogge, and Yi Zhou. *On abstract Strichartz estimates and the Strauss conjecture for nontrapping obstacles*, 2789
- Higes, J. *See* Banakh, T.
- Hillairet, Luc, and Chris Judge. *The eigenvalues of the Laplacian on domains with small slits*, 6231
- Hu, Huyi. *See* Ban, Jungchao
- Hu, Shengda, and François Lalonde. *A relative Seidel morphism and the Albers map*, 1135
- Huang, Jing-Song. *See* Chuah, Meng-Kiat
- Huang, Yi-Zhi, and Liang Kong. *Modular invariance for conformal full field algebras*, 3027
- Huff, Robert. *Conelike soap films spanning tetrahedra*, 5063
- Hurtado, Ana. *See* Alías, Luis J.
- Hurtubise, David E. *See* Banyaga, Augustin
- Hwang, C.-R. *See* Franke, B.
- Idziak, Paweł. *See* Berman, Joel

PROVIDENCE, RHODE ISLAND USA

ISSN 0002-9947

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

Submission information. See **Information for Authors** at the end of this issue.

Publisher Item Identifier. The Publisher Item Identifier (PII) appears at the top of the first page of each article published in this journal. This alphanumeric string of characters uniquely identifies each article and can be used for future cataloging, searching, and electronic retrieval.

Postings to the AMS website. Articles are posted to the AMS website individually after proof is returned from authors and before appearing in an issue.

Subscription information. *Transactions of the American Mathematical Society* is published monthly and is also accessible electronically from www.ams.org/journals/. Subscription prices for Volume 362 (2010) are as follows: for paper delivery, US\$1905 list, US\$1524 institutional member, US\$1715 corporate member; for electronic delivery, US\$1715 list, US\$1372 institutional member, US\$1544 corporate member. Upon request, subscribers to paper delivery of this journal are also entitled to receive electronic delivery. If ordering the paper version, add US\$81 for surface delivery outside the United States and India; US\$114 to India. Expedited delivery to destinations in North America is US\$89; elsewhere US\$240. Subscription renewals are subject to late fees. See www.ams.org/help-faq for more journal subscription information.

Back number information. For back issues see www.ams.org/bookstore.

Subscriptions and orders should be addressed to the American Mathematical Society, P.O. Box 845904, Boston, MA 02284-5904 USA. *All orders must be accompanied by payment.* Other correspondence should be addressed to 201 Charles Street, Providence, RI 02904-2294 USA.

Copying and reprinting. Material in this journal may be reproduced by any means for educational and scientific purposes without fee or permission with the exception of reproduction by services that collect fees for delivery of documents and provided that the customary acknowledgment of the source is given. This consent does not extend to other kinds of copying for general distribution, for advertising or promotional purposes, or for resale. Requests for permission for commercial use of material should be addressed to the Acquisitions Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA. Requests can also be made by e-mail to reprint-permission@ams.org.

Excluded from these provisions is material in articles for which the author holds copyright. In such cases, requests for permission to use or reprint should be addressed directly to the author(s). (Copyright ownership is indicated in the notice in the lower right-hand corner of the first page of each article.)

Transactions of the American Mathematical Society (ISSN 0002-9947) is published monthly by the American Mathematical Society at 201 Charles Street, Providence, RI 02904-2294 USA. Periodicals postage is paid at Providence, Rhode Island. Postmaster: Send address changes to *Transactions*, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA.

This journal is indexed in *Mathematical Reviews*, *Zentralblatt MATH*, *Science Citation Index*[®], *Science Citation Index*TM-*Expanded*, *ISI Alerting Services*SM, *CompuMath Citation Index*[®], and *Current Contents*[®]/*Physical, Chemical & Earth Sciences*. This journal is archived in *Portico*.

Printed in the United States of America.

⊗ The paper used in this journal is acid-free and falls within the guidelines established to ensure permanence and durability.

TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY

CONTENTS

Vol. 362, No. 1

Whole No. 896

January 2010

Xiao-Song Lin and Hao Zheng, On the Hecke algebras and the colored HOMFLY polynomial	1
Wilhelm Schlag, Avy Soffer, and Wolfgang Staubach, Decay for the wave and Schrödinger evolutions on manifolds with conical ends, Part I	19
Andrzej Derdzinski and Tadeusz Januszkiewicz, Totally real immersions of surfaces	53
Marius Mitrea, Mixed boundary-value problems for Maxwell’s equations ..	117
Eric J. Olson and James C. Robinson, Almost bi-Lipschitz embeddings and almost homogeneous sets	145
Markus Kunze, Luca Lorenzi, and Alessandra Lunardi, Nonautonomous Kolmogorov parabolic equations with unbounded coefficients ..	169
G. Everest, R. Miles, S. Stevens, and T. Ward, Dirichlet series for finite combinatorial rank dynamics	199
Arkady Berenstein and Yurii Burman, Quasiharmonic polynomials for Coxeter groups and representations of Cherednik algebras	229
Jeremy Avigad, Philipp Gerhardy, and Henry Towsner, Local stability of ergodic averages	261
Wilhelm Schlag, Avy Soffer, and Wolfgang Staubach, Decay for the wave and Schrödinger evolutions on manifolds with conical ends, Part II ..	289
Esteban Andruchow, Gabriel Larotonda, and Lázaro Recht, Finsler geometry and actions of the p-Schatten unitary groups	319
Ferruccio Colombini and Herbert Koch, Strong unique continuation for products of elliptic operators of second order	345
Manuel D. Contreras, Santiago Díaz-Madrigal, and Christian Pommerenke, Second angular derivatives and parabolic iteration in the unit disk	357
Volodymyr Nekrashevych, A group of non-uniform exponential growth locally isomorphic to $IMG(z^2 + i)$	389
Michael Ching, A chain rule for Goodwillie derivatives of functors from spectra to spectra	399
Vladimir Baranovsky, Algebraization of bundles on non-proper schemes ..	427
Sonia Fourati, Fluctuations of Lévy processes and scattering theory	441
Takeshi Abe, Projective normality of the moduli space of rank 2 vector bundles on a generic curve	477
Sabin Cautis and David M. Jackson, On Tutte’s chromatic invariant ..	491
Carla Farsi and Christopher Seaton, Nonvanishing vector fields on orbifolds	509
Shouhei Ma, Twisted Fourier-Mukai number of a $K3$ surface	537

Stefan Geiss, Stephen Montgomery-Smith, and Eero Saksman, On singular integral and martingale transforms	553
Andrew D. Warshall, Deep pockets in lattices and other groups	577
Inessa Epstein and Todor Tsankov, Modular actions and amenable representations	603
Kevin Wildrick, Quasisymmetric structures on surfaces	623
Andreas Axelsson, Non-unique solutions to boundary value problems for non-symmetric divergence form equations	661
Scott Rodney, A degenerate Sobolev inequality for a large open set in a homogeneous space	673
J.-P. Tignol and A. R. Wadsworth, Value functions and associated graded rings for semisimple algebras	687
Jungchao Ban, Yongluo Cao, and Huyi Hu, The dimensions of a non-conformal repeller and an average conformal repeller	727
Fan Xu, On the cluster multiplication theorem for acyclic cluster algebras	753
George Barmpalias, Rod Downey, and Noam Greenberg, Working with strong reducibilities above totally ω-c.e. and array computable degrees	777
Consuelo Martínez and Efim Zelmanov, Representation theory of Jordan superalgebras I	815
Anna Felikson and Pavel Tumarkin, Reflection subgroups of Coxeter groups	847
Changjian Fu and Bernhard Keller, On cluster algebras with coefficients and 2-Calabi-Yau categories	859
William D. Kirwin and Alejandro Uribe, Theta functions on the Kodaira–Thurston manifold	897
Patrick Delorme, Constant term of smooth H_ψ-spherical functions on a reductive p-adic group	933
Mourad E. H. Ismail and Jiang Zeng, Addition theorems via continued fractions	957
Jeffrey D. Achter and Peter Norman, Local monodromy of p-divisible groups	985
Martin Malandro and Dan Rockmore, Fast Fourier transforms for the rook monoid	1009
Jiongmin Yong, Forward-backward stochastic differential equations with mixed initial-terminal conditions	1047
Suyoung Choi, Mikiya Masuda, and Dong Youp Suh, Topological classification of generalized Bott towers	1097

Daniel J. Vera, Topological Hochschild homology of twisted group algebras	1113
--	------

Shengda Hu and François Lalonde, A relative Seidel morphism and the Albers map	1135
Maurice Duits and Kurt Johansson, Powers of large random unitary matrices and Toeplitz determinants	1169
Masahide Iwakiri, The lower bound of the w-indices of surface links via quandle cocycle invariants	1189
R. Brown, I. Mitrea, M. Mitrea, and M. Wright, Mixed boundary value problems for the Stokes system	1211
Elisabetta Colombo and Paola Frediani, Siegel metric and curvature of the moduli space of curves	1231
Daniel Meyer, Snowballs are quasiballs	1247

Editorial Information

To be published in the *Transactions*, a paper must be correct, new, nontrivial, and significant. Further, it must be well written and of interest to a substantial number of mathematicians. Piecemeal results, such as an inconclusive step toward an unproved major theorem or a minor variation on a known result, are in general not acceptable for publication.

Papers submitted to the *Transactions* should be 15 or more published journal pages in length. Shorter papers may be submitted to the *Proceedings of the American Mathematical Society*. Published pages are the same size as those generated in the style files provided for $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ or $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{T}\mathcal{E}\mathcal{X}$.

Information on the backlog for this journal can be found on the AMS website starting from <http://www.ams.org/tran>.

In an effort to make articles available as quickly as possible, articles are posted to the AMS website individually after proof is returned from authors and before appearing in an issue.

A Consent to Publish and Copyright Agreement is required before a paper will be published in this journal. After a paper is accepted for publication, the Providence office will send a Consent to Publish and Copyright Agreement to all authors of the paper. By submitting a paper to this journal, authors certify that the results have not been submitted to nor are they under consideration for publication by another journal, conference proceedings, or similar publication.

Information for Authors

Initial submission. The AMS uses Centralized Manuscript Processing for initial submissions. Authors should submit a PDF file using the Initial Manuscript Submission form found at www.ams.org/submission/tran, or send one copy of the manuscript to the following address: Centralized Manuscript Processing, TRANSACTIONS OF THE AMS, 201 Charles Street, Providence, RI 02904-2294 USA. If a paper copy is being forwarded to the AMS, indicate that it is for *Transactions* and include the name of the corresponding author, contact information such as email address or mailing address, and the name of an appropriate Editor to review the paper (see the list of Editors below).

The first page of an article must consist of a *descriptive title*, followed by an *abstract* that summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The *descriptive title* should be short, but informative; useless or vague phrases such as “some remarks about” or “concerning” should be avoided. The *abstract* should be at least one complete sentence, and at most 300 words. Included with the footnotes to the paper should be the 2010 *Mathematics Subject Classification* representing the primary and secondary subjects of the article. The classifications are accessible from www.ams.org/msc/. The Mathematics Subject Classification footnote may be followed by a list of *key words and phrases* describing the subject matter of the article and taken from it. Journal abbreviations used in bibliographies are listed in the latest *Mathematical Reviews* annual index. The series abbreviations are also accessible from www.ams.org/msnhtml/serials.pdf. To help in preparing and verifying references, the AMS offers MR Lookup, a Reference Tool for Linking, at www.ams.org/mrlookup/.

Electronically prepared manuscripts. The AMS encourages electronically prepared manuscripts, with a strong preference for $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$. To this end, the

Society has prepared $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ author packages for each AMS publication. Author packages include instructions for preparing electronic manuscripts, samples, and a style file that generates the particular design specifications of that publication series. Articles properly prepared using the $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ style file and the `\label` and `\ref` commands automatically enable extensive intra-document linking to the bibliography and other elements of the article for searching electronically on the Web. Because linking must often be added manually to electronically prepared manuscripts in other forms of $\mathcal{T}\mathcal{E}\mathcal{X}$, using $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ also reduces the amount of technical intervention once the files are received by the AMS. This results in fewer errors in processing and saves the author proofreading time. $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ papers also move more efficiently through the production stream, helping to minimize publishing costs.

$\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ is the highly preferred format of $\mathcal{T}\mathcal{E}\mathcal{X}$, but author packages are also available in $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{T}\mathcal{E}\mathcal{X}$. Those authors who make use of these style files from the beginning of the writing process will further reduce their own efforts. Manuscripts prepared electronically in $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ or plain $\mathcal{T}\mathcal{E}\mathcal{X}$ are normally not acceptable due to the high amount of technical time required to insure that the file will run properly through the AMS in-house production system. $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ users will find that $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ is the same as $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ with additional commands to simplify the typesetting of mathematics, and users of plain $\mathcal{T}\mathcal{E}\mathcal{X}$ should have the foundation for learning $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$.

Authors may retrieve an author package for *Transactions of the AMS* from www.ams.org/tran/tranauthorpac.html or via FTP to [ftp.ams.org](ftp://ftp.ams.org) (login as `anonymous`, enter your complete email address as password, and type `cd pub/author-info`). The *AMS Author Handbook* and the *Instruction Manual* are available in PDF format from the author package link. The author package can also be obtained free of charge by sending email to tech-support@ams.org, or from the Publication Division, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA. When requesting an author package, please specify $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ or $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{T}\mathcal{E}\mathcal{X}$ and the publication in which your paper will appear. Please be sure to include your complete email address.

After acceptance. The source files for the final version of the electronic manuscript should be sent to the Providence office immediately after the paper has been accepted for publication. The author should also submit a PDF of the final version of the paper to the Editor, who will forward a copy to the Providence office. Accepted electronically prepared manuscripts can be submitted via the web at www.ams.org/submit-book-journal/, sent via email to pub-submit@ams.org, or sent on CD to the Electronic Prepress Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA. When sending a manuscript electronically via email or CD, please be sure to include a message indicating in which publication the paper has been accepted. No corrections will be accepted electronically. Authors must mark their changes on their proof copies and return them to the Providence office. Complete instructions on how to send files are included in the author package.

Electronic graphics. Comprehensive instructions on preparing graphics are available starting from www.ams.org/authors/journals.html. A few of the major requirements are given here.

Submit files for graphics as EPS (Encapsulated PostScript) files. This includes graphics originated via a graphics application as well as scanned photographs or

other computer-generated images. If this is not possible, TIFF files are acceptable as long as they can be opened in Adobe Photoshop or Illustrator.

Authors using graphics packages for the creation of electronic art should also avoid the use of any lines thinner than 0.5 points in width. Many graphics packages allow the user to specify a “hairline” for a very thin line. Hairlines often look acceptable when proofed on a typical laser printer. However, when produced on a high-resolution laser imagesetter, hairlines become nearly invisible and will be lost entirely in the final printing process.

Screens should be set to values between 15% and 85%. Screens which fall outside of this range are too light or too dark to print correctly. Variations of screens within a graphic should be no less than 10%.

AMS policy on making changes to articles after posting. Articles are posted to the AMS website individually after proof is returned from authors and before appearing in an issue. To preserve the integrity of electronically published articles, once an article is individually posted to the AMS website but not yet in an issue, changes cannot be made in place in the paper. However, an “Added after posting” section may be added to the paper right before the References when there is a critical error in the content of the paper. The “Added after posting” section gives the author an opportunity to correct this type of critical error before the article is put into an issue for printing and before it is then reposted with the issue. The “Added after posting” section remains a permanent part of the paper. The AMS does not keep author-related information, such as affiliation, current address, and email address, up to date after a paper is initially posted.

Once the article is assigned to an issue, even if the issue has not yet been posted to the AMS website, corrections may be made to the paper by submitting a traditional errata article. The errata article will appear in a future print issue and will link back and forth on the web to the original article online.

Secure manuscript tracking on the Web. Authors can track their manuscripts through the AMS journal production process using the personal AMS ID and Article ID printed in the upper right-hand corner of the Consent to Publish form sent to each author who publishes in AMS journals. Access to the tracking system is available from www.ams.org/mstrack/. An explanation of each production step is provided on the web through links from the manuscript tracking screen. Questions can be sent to tran-query@ams.org.

T_EX files available upon request. T_EX files are available upon request for authors by sending email to file-request@ams.org or by contacting the Electronic Prepress Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA. The request should include the title of the paper, the name(s) of the author(s), the name of the publication in which the paper has or will appear, and the volume and issue numbers if known. The T_EX file will be sent to the author making the request after the article goes to the printer. If the requestor can receive Internet email, please include the email address to which the file should be sent. Otherwise please indicate a postal address to which a CD should be mailed. **Note:** Because T_EX production at the AMS sometimes requires extra fonts and macros that are not yet publicly available, T_EX files cannot be guaranteed to run through the author’s version of T_EX without errors. The AMS regrets that it cannot provide support to eliminate such errors in the author’s T_EX environment.

Inquiries. Any inquiries concerning a paper that has been accepted for publication that cannot be answered via the manuscript tracking system mentioned above should be sent to tran-query@ams.org or directly to the Electronic Prepress Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA.

Editors

The AMS uses Centralized Manuscript Processing for initial submissions to AMS journals. Authors should follow instructions listed on the Initial Submission page found at www.ams.org/tran/transubmit.html.

Algebra, ALEXANDER KLESHCHEV, Department of Mathematics, University of Oregon, Eugene, OR 97403-1222 USA; e-mail: ams@noether.uoregon.edu

Algebraic geometry, DAN ABRAMOVICH, Department of Mathematics, Brown University, Box 1917, Providence, RI 02912 USA; e-mail: amsedit@math.brown.edu

Algebraic geometry and its applications, MINA TEICHER, Emmy Noether Research Institute for Mathematics, Bar-Ilan University, Ramat-Gan 52900, Israel; e-mail: teicher@macs.biu.ac.il

Algebraic topology, ALEJANDRO ADEM, Department of Mathematics, University of British Columbia, Room 121, 1984 Mathematics Road, Vancouver, British Columbia, Canada V6T 1Z2; e-mail: transactions@math.ubc.ca

Combinatorics, JOHN R. STEMBRIDGE, Department of Mathematics, University of Michigan, Ann Arbor, MI 48109-1043 USA; e-mail: jrs@umich.edu

Real analysis and partial differential equations, DANIEL TATARU, Department of Mathematics, University of California, Berkeley, CA 94720 USA; e-mail: tataru@math.berkeley.edu

All other communications to the editors should be addressed to the Managing Editor, ROBERT GURALNICK, Department of Mathematics, University of Southern California, Los Angeles, CA 90089-1113 USA; e-mail: guralnic@math.usc.edu

MEMOIRS OF THE AMERICAN MATHEMATICAL SOCIETY

Memoirs is devoted to research in pure and applied mathematics of the same nature as *Transactions*. An issue consists of one or more separately bound research tracts for which the authors provide reproduction copy. Papers intended for *Memoirs* should normally be at least 80 pages in length. *Memoirs* has the same editorial committee as *Transactions*; authors may choose an Editor from the list above upon submission.
