

- 358.—(a) A. V. LEBEDEV & R. M. FEDEROVA, *Spravočnik po matematičeskim tablitsam*, Akad. Nauk, Moscow, 1956. [See RMT **49**, *MTAC*, v. 11, 1957, p. 104–106.]
- (b) A. V. LEBEDEV & R. M. FEDEROVA, *A Guide to Mathematical Tables*, Pergamon Press, Oxford, 1960.
- (c) N. M. BURUNOVA, *Spravočnik po matematičeskim tablitsam, Dopolnenie N.1*, Akad. Nauk, Moscow, 1959. [See RMT **1**, *Math. Comp.*, v. 15, 1961, p. 81.]
- (d) N. M. BURUNOVA, *A Guide to Mathematical Tables, Supplement No. 1*, Pergamon Press, Oxford, 1960.

The following misprint originating on p. 157 of (a) has been reproduced in (b), (c), and (d).

$$\text{For } \int_1^{\infty} e^{-xt} t^n dt = \frac{1}{x^{n+1}} \int_0^{\infty} e^{-t} t^n dt, \text{ read } \int_1^{\infty} e^{-xt} t^n dt = \frac{1}{x^{n+1}} \int_x^{\infty} e^{-t} t^n dt.$$

This correction is required also in (b), (c), and (d), as follows: (b), p. 157; (c), p. 36; and (d), p. 36.

CORRIGENDA

A. C. R. NEWBERY, "Multistep integration formulas," *Math. Comp.*, v. 17, 1963, p. 452–455.

On p. 454, the element in the fifth row and second column of the corrector matrix corresponding to $K = 5$ should read -4032 instead of -4042 .

A. C. R. NEWBERY

JOHN R. B. WHITTLESEY, "Incomplete gamma functions for evaluating Erlang process probabilities," *Math. Comp.*, v. 17, 1963, p. 11–17.

On p. 12, in section 3C, the continued fraction expression for $G_a(x)$ should read

$$G_a(x) = H_a(x) \left(\frac{a}{x} + \frac{a_1}{b_1 + \frac{a_2}{b_2 + \frac{a_3}{b_3 + \dots}}} \right)$$

This typographical error does not affect either the single- or double-precision FORTRAN subroutines referred to in this paper.

On p. 14, in Fig. 2, for the *double precision* FORTRAN subroutine the "regions of x " should cover the range $0 < x < 7$, $7 \leq x \leq A_1$ instead of $0 < x < 1$, $1 \leq x \leq A_1$. This affects the double-precision subroutine output for $G_a(x)$ only for $a < 1$, $1 \leq x < 1.35$. A corrected version of this program has been submitted to SHARE.

JOHN R. B. WHITTLESEY
