# Mathematics of Computation 

Volume 20, Number 95

July, 1966

## Editorial Committee

Eugene Isaacson, Chairman, New York University, Courant Institute of Mathematical Sciences, 251 Mercer Street, New York, New York 10012
Avron Douglis, Department of Mathematics, University of Maryland, College Park, Maryland 20740
Alan Fletcher, Department of Mathematics, University of Liverpool, Liverpool 3, England
Walter Gautschi, Computer Sciences Department, Purdue University, Lafayette, Indiana 47907
Alan J. Hoffman, IBM Research Center, Yorktown Heights, New York 10598
A. S. Householder, Oak Ridge National Laboratory, Oak Ridge, Tennessee

Peter D. Lax, New York University, Courant Institute of Mathematical Sciences, 251 Mercer Street, New York, New York 10012
Y. L. Luke, Midwest Research Institute, Kansas City, Missouri 64110

Philip M. Morse, Massachusetts Institute of Technology, Cambridge, Massachusetts 02139
Harry Polachek, Research Division, U. S. Atomic Energy Commission, Washington, D. C. 20545
Daniel Shanks, Applied Mathematics Laboratory, David Taylor Model Basin, Washington, D. C. 20007
R. S. Varga, Case Institute of Technology, Cleveland, Ohio 44106
J. W. Wrench, Jr., Applied Mathematics Laboratory, David Taylor Model Basin, Washington, D. C. 20007

## Information for Subscribers

The journal is published quarterly in one volume per year, with issues numbered serially since Volume 1, Number 1. The subscription price is $\$ 16.00$. All back volumes are available. For Volumes 1-19 (1943-1965), prices are $\$ 20.00$ per volume and $\$ 6.00$ per issue.

## Unpublished Mathematical Tables

The editorial office of the journal maintains a repository of Unpublished Mathematical Tables (UMT). When a table is deposited in the UMT repository a brief summary of its contents is published in the section Reviews and Descriptions of Tables and Books. Upon request, the chairman of the editorial committee will supply copies of any table for a nominal cost.

## Microcard Edition

Volumes 1-10 (1943-1956), Nos. 1-56 are now available on Microcards and may be purchased from the Microcard Foundation, Box 2145, Madison, Wisconsin 53705.

Subscriptions, address changes, business communications and payments should be sent to:

American Mathematical Society
P. O. Box 6248

Providence, Rhode Island 02904

## Forthcoming ...

## INTERVAL ANALYSIS

by RAMON E. MOORE, University of Wisconsin

Presents a new set of techniques by which a computer can be programmed to provide solutions of guaranteed accuracy to a variety of types of mathematical problems. All the necessary analysis is carried out by the computer itself for each specific application of the resulting programs. October 1966, approx. 192 pp., \$9.00

## CHEBYSHEV METHODS <br> IN NUMERICAL APPROXIMATION

by MARTIN AVERY SNYDER, Courant Institute of Mathematical Sciences, New York University

Designed for numerical analysts and mathematical pro-grammers-to show how the Chebyshev polynomials can be used in approximation to obtain nearly optimal or mini$\max$ approximations. This is the first time it has been brought together as a unified point of view. September 1966, approx. 144 pp., $\$ 7.50$

## INTRODUCTION TO COMPUTING

by T. E. HULL, University of Toronto

The purpose of this book is to provide an introduction to algorithms, stored-program computers, and programming languages, along with a complete description of FORTRAN IV, and examples of numerical methods, non-numerical applications, and simulations. The emphasis throughout is on understanding the basic ideas. Turing machines are described in the final chapter in order to provide a rigorous definition of algorithms, and to introduce the important relationship between automata theory and programming languages. June 1966, 240 pp., $\$ 6.95$

## Prentice-Hall's

## Automatic

## Computation Series

Edited by Dr. GEORGE E. forsythe, Professor of Computer Science at Stanford University and Executive Head, Computer Science Department.
recently published...

## GAUSSIAN <br> QUADRATURE <br> FORMULAS

by A. H. Stroud, Columbia University and DON SECREST, University of Illinois. This new book gives thorough coverage on the use of Gaussian Quadrature Formulas for different applications, including a discussion of errors. It features highly accurate approximate integration formulas in table form, and may be used as a standard reference for practical computations involving approximate integration on a digital computer. February 1966, 374 pp., $\$ 14.95$
other titles in the series...

## COMPUTERS AND THEIR USES

by william h. Desmonde, Research Staff Member, IBM Corporation. 1964, 296 pp., \$8.75

DIGITAL PROCESSING: A SYSTEM

## ORIENTATION

by louise schultz, System Development Corporation. 1963, 403 pp., $\$ 10.75$

## FORTRAN IV: PROGRAMMING AND COMPUTING

by James t. Golden, Scientific Marketing Manager, IBM Corporation. 1965, 270 pp., paperbound $\$ 4.95$

## INTRODUCTION <br> TO ALGOL

by DR. RICHARD BAUMANN, Munich Institute of Technology, Germany; m. feliciano, Oak Ridge Nat'l Lab.; F. L. BAUER, and K. L. SAMELSON, both of the Munich Institute of Technology, Germany. 1964, 172 pp., \$6.95

## ITERATIVE METHODS FOR THE SOLUTION OF EQUATIONS

by J. f. Traub, Bell Telephone Laboratories, Inc. 1964, 310 pp., \$12.95

## MATRIX ITERATIVE ANALYSIS

by richard s. varga, Case Institute of Technology. 1962, 322 pp., \$12.95
PROGRAMMING
REAL-TIME
COMPUTER

## SYSTEMS

by james martin, Senior Systems Analyst, IBM United Kingdom Ltd. 1965, 386 pp., $\$ 12.00$

REAL-TIME DATA

## PROCESSING

## SYSTEMS: INTRO-

## DUCTORY CONCEPTS

by william h. desmonde, Research Staff Member, IBM Corporation. 1964, 186 pp., $\$ 8.50$

## ROUNDING ERRORS <br> IN ALGEBRAIC PROCESSES

by James wilkinson, National Physical Laboratory, England. 1964, 161 pp., $\$ 6.00$
(prices shown are for student USE.)
For approval copies, write: Box 903

PRENTICE-HALL, ENGLEWOOD CLIFFS, N. J. 07632

## CLASSIFICATION OF REVIEWS

| A. Arithmetical Tables, Mathematical | N. Interest and Investment |
| :--- | :--- |
| Constants | O. Actuarial Science |
| B. Powers | P. Engineering |
| C. Logarithms | Q. Astronomy |
| D. Circular Functions | R. Geodesy |
| E. Hyperbolic and Exponential Func- | S. Physics, Geophysics, Crystallog- |
| tions | raphy |
| F. Theory of Numbers | T. Chemistry |
| G. Higher Algebra | U. Navigation |
| H. Numerical Solution of Equations | V. Aerodynamics, Hydrodynamics, |
| I. Finite Differences, Interpolation | W. Eallistics |
| J. Summation of Series | X. Numerical Analysis and Applied |
| K. Statistics | Z. Calculating Machines and Me- |
| L. Higher Mathematical Functions |  |

## Information for Contributors

Manuscripts should be typewritten double-spaced in the format used by the journal. For journal abbreviations, see Mathematical Reviews, v. 28, Index. An author should submit the original and one copy of the manuscript and retain one copy. The author may suggest an appropriate editor for his paper. It is recommended that the author acquaint himself with the pertinent material contained in "Information for Contributors to Mathematics of Computation" and "Manual for Authors", both of which are available upon request from the American Mathematical Society. All contributions intended for publication and all books for review should be addressed to Eugene Isaacson, Chairman, Editorial Committee, Mathematics of Computation, New York University, Courant Institute of Mathematical Sciences, 251 Mercer Street, New York, New York 10012. Beginning with the January, 1965 issue, institutions sponsoring research reported in the journal are assessed page charges.

# Mathematics of Computation 

TABLE OF CONTENTS
July 1966
Some Remarks on the Stefan Problem Alan Solomon ..... 347
A Modified Monte-Carlo Quadrature Seymour Haber ..... 361
Estimates for Some Computational Techniques in Linear Algebra
Shmuel Kaniel ..... 369
The Use of Richardson Extrapolation in One-Step Methods with Variable Step Size F. G. Lether ..... 379
Runge-Kutta Methods with Constrained Minimum Error Bounds
Richard King ..... 386
Economical Evaluation of Runge-Kutta Formulae David J. Fyfe ..... 392
An Iterative Method for the Solution of Eigenvalue Problems. . .M. Godart ..... 399
Calculation of the Modified Bessel Functions of the Second Kind with Com- plex Argument Fr. Mechel ..... 407
A Note on an Expansion of Hypergeometric Functions of Two Variables
Arun Verma ..... 413
Technical Notes and Short Papers
Inversion of the $N$-Dimensional Laplace Transform. Bruce S. Berger ..... 418
On the First Positive Zero of $P_{\nu-1 / 2}^{(-m)}(\cos \theta)$, Considered as a Function of $\nu$. R. D. Low ..... 421
Some Integrals of Ramanujan and Related Contour Integrals Van E. Wood ..... 424
Note on the Calculation of Fourier Series Philip Rudnick ..... 429
Concerning the Numerical Solution of Differential Equations
H. P. Decell, Jr., L. F. Guseman, Jr. \& R. N. Lea ..... 431
Some Fourth Order Multipoint Iterative Methods for Solving Equa- tions ..... 434
Certification of Parlett's ALGOL Eigenvalue Procedure Eig 3
J. M. Varah ..... 437
A Note on an Iterative Method for Generalized Inversion of Matrices
Adi Ben-Israel ..... 439
Maximization of a Second-Degree Polynomial on the Unit Sphere
James W. Burrows ..... 441
Questions Concerning Khintchine's Constant and the Efficient Computa- tion of Regular Continued Fractions
John W. Wrench, Jr. \& Daniel Shanks ..... 444
Distributions of Mersenne Divisors Sidney Kravitz ..... 448
Equal Sums of Biquadrates L. J. Lander \& T. R. Parkin ..... 450
Reviews and Descriptions of Tables and Books ..... 452
Lyusternik, Chervonenkis \& Yanpol'skil 64, Lyusternik 65, Gardiner \& Wright 66, Khrenov 67, Beeger 68, Beeger 69, Osipova \& Tumarkin 70, Murnaghan \& Wrench 71, Marshall 72, Bill- ingsley 73, Southworth \& Deleeuw 74, Christenson 75, Martin 76, Saul'yev 77, Lether 78, Jennings 79, Norkin 80, Stamper 81, Germain 82, Golden 83, Instituto Gulbenkian de Ciencia 84
Table Errata ..... 468
Adams \& Hippisley 391, Ryshik \& Gradstein 392, Abramowitz \& Stegun 393, Sheldon, Zondek \& Friedman 394, Glover 395, Spenceley, Spenceley \& Epperson 396
